Part 1: Prospectus

This prospectus with integrated fund contract, the key investor information document (KIID) and the most recent annual or semi-annual report (if published after the latest annual report) serve as the basis for all subscriptions of units in the subfunds.

Only the information contained in the prospectus, the key investor information document (KIID) and the fund contract will be deemed to be valid. BlackRock Asset Management Schweiz AG as the fund management company, is responsible for the content of this prospectus and declares that, according to their knowledge, the information contained in this prospectus is accurate and no material facts have been omitted.

1 Information on the Umbrella Fund and the Subfunds

1.1 General Information on the Umbrella Fund and the Subfunds

iShares ETF (CH) is an umbrella fund under Swiss law of the "Other funds for traditional investments" type which was established under the Swiss Collective Investment Schemes Act (CISA) of June 23, 2006 and is divided into the following subfunds:

Equity Index Exchange Traded Funds

- a) iShares SLI® (CH) ¹
- b) iShares SMI® (CH) ¹
- c) iShares SMIM® (CH) ¹
- d) iShares Swiss Dividend (CH) ¹
- e) iShares Core SPI® (CH) ¹

Bond Index Exchange Traded Funds

- f) iShares Swiss Domestic Government Bond 1-3 (CH) ¹
- g) iShares Swiss Domestic Government Bond 3-7 (CH) ¹
- h) iShares Swiss Domestic Government Bond 7-15 (CH) ¹
- i) iShares Core CHF Corporate Bond (CH) ¹

The fund contract was originally drawn up by Credit Suisse Funds AG, Zurich, as fund management company and with the agreement of Credit Suisse AG, Zurich, as custodian bank, and submitted to the Swiss Financial Market Supervisory Authority ("FINMA"). The fund contract was first approved by the FINMA on August 6, 2008.

As of December 8, 2014 Credit Suisse Funds AG was replaced by BlackRock Asset Management Schweiz AG as fund management company, and Credit Suisse AG was replaced by State Street Bank GmbH, Munich, Zurich branch, as custodian bank.

The subfunds are based upon a collective investment agreement (fund contract), under which the fund management company undertakes to provide the investor with a stake in the corresponding subfund in proportion to the units acquired by the said investor, and to manage this subfund in accordance with the provisions of the law and the fund contract. The custodian bank is party to the fund contract in accordance with the tasks conferred upon it by the law and the fund contract.

Investors are only entitled to the assets and income of the subfund in which they have invested. Liabilities that are attributable to an individual subfund will be borne solely by the said subfund.

In accordance with the fund contract, the fund management company is entitled to establish, liquidate or merge unit classes for each subfund at any time, subject to the consent of the custodian bank and the approval of the supervisory authority.

The subfunds are not currently divided into unit classes. There is only one unit class: class A.

The subfunds are subject to the usual market fluctuations. Historical performance is no guarantee of the subfunds' future returns.

1.2 Listing of the Subfunds on SIX Swiss Exchange Ltd

The subfunds' units are, or will be, listed according to the collective investment schemes standard of SIX Swiss Exchange Ltd ("SIX Swiss Exchange") and are thus also referred to as exchange traded funds ("ETF"). The Admission Board of SIX Swiss Exchange has approved the listing as requested to date. Trading in the fund units on SIX Swiss Exchange is conducted solely in Swiss francs. The listing of the units on SIX Swiss Exchange is aimed at providing investors with an additional opportunity for the direct subscription/redemption of units from/by the fund management company or its selling agents, and to facilitate the purchase and sale of the units on a liquid, regulated secondary market, i.e. via the stock exchange. Details regarding the purchase of units on the primary or secondary market are explained below in section 5.2.

The companies used by the fund management company as market makers for trading in units of the individual subfunds are listed on the SIX Swiss Exchange website.

It is possible that further market makers will be appointed in the future. Any other market makers will be disclosed to the FINMA. A market maker is responsible for maintaining a market for the traded fund units and, in this connection, for entering bid and ask prices for the subfunds' units in the SIX Swiss Exchange trading system.

The FINMA has obliged the fund management company to ensure that the spread between the relevant net asset value per unit (calculated on the basis of the net asset value per unit and adjusted to reflect trading-induced changes in the prices of securities included in the benchmark index, i.e. intraday net asset value) and the price at which investors can buy and sell units on SIX Swiss Exchange is kept down to a reasonable level.

Under a cooperation agreement between the fund management company, on the one hand, and the market makers, on the other, the latter are obliged, within a certain framework and under normal market conditions, to maintain a market for the fund's units on SIX Swiss Exchange and, in this connection, to enter bid and ask prices for fund units in the SIX Swiss Exchange trading system, which, under normal market conditions, will not exceed a spread of 2% (1% on either side of the intraday net asset value) for the Equity Index ETF or a spread of 1% for government bonds with a maturity of three years upwards or of 1% for investment-grade

¹ Disclaimer:

1.3 Investment Objective, Investment Policy and Investment Restrictions of the Subfunds, and their Use of Derivatives

The investment objective of the subfunds is to match the benchmark indices specified below as closely as possible.

Detailed information on the investment policy and its restrictions, as well as the permitted investment techniques and instruments (in particular derivative financial instruments and their scope) are contained in the fund contract (cf. Part II, §§ 7–15).

1.3.1 Investment Objective and Investment Policy of the Subfunds

a) iShares SLI® (CH)

This subfund invests primarily in equity-type securities and rights included in the Swiss Leader Index (SLI®) (shares, dividend right certificates, cooperative shares, participation certificates, etc.). However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times. Futures on the benchmark index or on instruments contained in the benchmark index may also be used, though as a rule only for a small part of the fund assets.

iShares SLI® (CH) is a subfund in the category "Other Funds for Traditional Investment". The investment instruments and restrictions correspond to those of a securities fund, the exception being that in the context of replicating the index the restrictions applicable to securities funds with regard to the holding of assets of a single issuer do not have to be observed.

Provided the capping model described below is applied when calculating the SLI®, these restrictions are nevertheless observed on a de-facto basis and a concentration of the subfund's assets on a small number of stocks is thereby avoided. Compared with a securities fund, the subfund may also borrow against a larger proportion of its assets or pledge or transfer as collateral a larger proportion of its assets (see §§ 13 and 14 of the fund contract).

The primary risks for the subfund are that the income and value of the units are subject to fluctuations arising from the fluctuations in income and value of the stocks contained in the SLI®. Equity-type securities and rights may be subject to substantial market fluctuations and are thus exposed to greater risk than debt securities of the same companies.

The SLI® is an equity index of publicly traded mid- or high-cap Swiss companies. It is a focused equity index with a high concentration of stocks in the financial, healthcare and industrial sectors. The SLI® contains the 30 largest and most liquid stocks on the Swiss equity market – namely, all 20 Swiss Market Index (SMI®) shares and the ten biggest SMI Mid Index (SMIM®) shares. The weighting of the individual stocks included in the SLI® is based on their market capitalization but is additionally limited by a so-called capping model: The weighting of the four largest stocks is limited to a maximum of 9%, while the weighting of the other stocks is restricted to a maximum of 4.5%. As at 30 September 2015, the four largest constituents of the SLI® were: Nestlé SA, Roche Holding AG, Novartis AG, and UBS AG. The composition of the index is periodically updated by SIX Swiss Exchange on the basis of the index regulations. For the last available composition of the SLI® and the index regulations, as well as for other information on the index (e.g. rebalancing frequency), please see www.six-swiss-exchange.com.

b) iShares SMI® (CH)

This subfund invests exclusively in equity-type securities and rights included in the Swiss Market Index (SMI®) (shares, dividend right certificates, cooperative shares, participation certificates, etc.). However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times. Futures on the benchmark index or on instruments contained in the benchmark index may also be used, though as a rule only for a small part of the fund assets.

iShares SMI® (CH) is a subfund in the category "Other Funds for Traditional Investment". The investment instruments and restrictions correspond to those of a securities fund, the exception being that in the context of replicating the index the restrictions applicable to securities funds with regard to the holding of assets of a single issuer do not have to be observed. As a result, the subfund's assets may be concentrated in a small number of issuers represented in the index, thus leading to an increase in the securities-specific risks. Compared with a securities fund, the subfund may also borrow against a larger proportion of its assets or pledge or transfer as collateral a larger proportion of its assets (see §§ 13 and 14 of the fund contract).

The primary risks for the subfund are that the income and value of the units are subject to fluctuations arising from the fluctuations in income and value of the stocks contained in the SMI®. Equity-type securities and rights may be subject to substantial market fluctuations and are thus exposed to greater risk than debt securities of the same companies.

The Swiss Market Index (SMI®) is an index featuring the shares of publicly traded, large-cap Swiss companies. It is a focused equities index with a concentration of pharmaceutical, consumer goods and financial stocks. The SMI® contains the 20 largest and most liquid stocks in the Swiss Performance Index SPI® (which is regarded as the overall index for the Swiss equity market). The weightings of the individual stocks in the SMI® are based on their market capitalization. As at 30 September 2015, the four largest constituents of the SMI® were: Nestlé SA, Novartis AG, Roche Holding AG, and UBS AG. The composition of the index is periodically updated by SIX Swiss Exchange on the basis of the index regulations. For the last available composition of the SMI® and the index regulations, as well as for other information on the index. (e.g. rebalancing frequency), please see www.six-swiss-exchange.com.

c) iShares SMIM® (CH)

This subfund invests exclusively in equity-type securities and rights included in the SMI MID Index (SMIM®) (shares, dividend right certificates, cooperative shares, participation certificates, etc.). However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times. Futures on the benchmark index or on instruments contained in the benchmark index may also be used, though as a rule only for a small part of the fund assets.

iShares SMIM® (CH) is a subfund in the category "Other Funds for Traditional Investment". The investment instruments and restrictions correspond to those of a securities fund, the exception being that in the context of replicating the index the restrictions applicable to securities funds with regard to the holding of assets of a single issuer do not have to be observed. As a result, the subfund's assets may be concentrated in a small number of issuers represented in the index, thus leading to an increase in the securities-specific risks. Compared with a securities fund, the subfund may also borrow against a larger proportion of its assets or pledge or transfer as collateral a larger proportion of its assets (see §§ 13 and 14 of the fund contract).

The primary risks for the subfund are that the income and value of the units are subject to fluctuations arising from the fluctuations in income and value of the stocks contained in the SMIM®. Equity-type securities and rights may be subject to substantial market fluctuations and are thus exposed to greater risk than debt securities of the same companies. Owing to their relatively low market liquidity, their specific growth prospects and their increased vulnerability, investments in companies with a relatively low market capitalization are exposed to additional risk.

The SMI MID index (SMIM®) is an index featuring the shares of publicly traded, mid-capitalization Swiss companies. It is a focused equity index with a high concentration of stocks in the financial and consumer goods sectors. The SMIM® contains the 30 largest stocks in the SPI EXTRA® (low- and mid-cap companies in the SPI®) that are not already contained in the SMI®. The weightings of the individual stocks in the SMIM® are based on their market capitalization. As at 30 September 2015, the four largest constituents of the SMIM® were: Lindt & Sprüngli AG, Sonova Holding AG, Kühne und Nagel International AG, and Swiss Life Holding AG. The composition of the index is periodically updated by SIX Swiss Exchange on the basis of the index regulations. For the last available composition of the SMIM® and the index regulations, as well as for other information on the index (e.g. rebalancing frequency), please see www.six-swiss-exchange.com.

d) iShares Swiss Dividend (CH)

This subfund invests exclusively in equity-type securities and rights included in the SPI® Select Dividend 20 Index (shares, dividend right certificates, cooperative shares, participation certificates, etc.). However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times. Futures on the benchmark index or on instruments contained in the benchmark index and futures on the Swiss Market Index (SMI®), the Swiss Leader Index (SLI®) and the SMI MID Index (SMIM®) may also be used, but shall generally account for only a small portion of the fund assets.

The iShares Swiss Dividend (CH) is a subfund of the "Other funds for traditional investments" type. The investment instruments and restrictions correspond to those of a securities fund, the exception being that in the context of replicating the index the restrictions applicable to securities funds with regard to the holding of assets of a single issuer do not have to be observed. As a result, the subfunds' assets may be concentrated in a small number of issuers represented in the index, thus leading to an increase in the securities-specific risks. Compared with a securities fund, the subfund may also borrow against a larger proportion of its assets or pledge or transfer as collateral a larger proportion of its assets (see §§ 13 and 14 of the fund contract).

The main risk associated with the subfund is that the income from and the value of its units may vary according to the income from and value of the stocks contained in the SPI® Select Dividend 20 Index. Equity-type securities and rights may be subject to substantial market fluctuations and are thus exposed to greater risk than debt securities of the same companies. Owing to their relatively low market liquidity, their specific growth prospects and their increased vulnerability, investments in companies with a relatively low market capitalization are exposed to additional risk.

The SPI® Select Dividend 20 Index is an equity index of publicly traded Swiss companies with high dividend yields. The composition of the SPI® Select Dividend 20 Index is based on a universe of dividend-distributing shares in the SPI® which have a minimum of liquidity and a sustainable distribution policy. Of the qualifying shares, the 30 with the highest dividend yield are first selected; from these 30 shares, the 20 with the highest return on capital are then selected for the index.

The weighting of the individual shares contained in the SPI® Select Dividend 20 Index is based on their dividend yield and market capitalization, subject to a maximum limit of 15% on the weighting of any single share. As at 30 September 2015, the four largest constituents of the SPI® Select Dividend 20 Index were: Nestlé SA, Roche Holding AG, Novartis AG, and Zurich Insurance Group AG. The composition of the index is periodically updated by SIX Swiss Exchange on the basis of the index regulations. For the last available composition of the SPI® Select Dividend 20 Index and the index regulations, as well as for other information on the index (e.g. rebalancing frequency), please see www.six-swiss-exchange.com.

e) iShares Core SPI® (CH)

This subfund invests exclusively in equity-type securities and rights included in the Swiss Performance Index (SPI®) (shares, dividend right certificates, cooperative shares, participation certificates, etc.). However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times. Futures on the benchmark index or on instruments contained in the benchmark index and futures on the Swiss Market Index (SMI®), the Swiss Leader Index (SLI®) and the SMI MID Index (SMIM®) may also be used, but shall generally account for only a small portion of the fund assets.

The iShares Core SPI® (CH) is a subfund of the "Other funds for traditional investments" type. The investment instruments and restrictions correspond to those of a securities fund, the exception being that in the context of replicating the index the restrictions applicable to securities funds with regard to the holding of assets of a single issuer do not have to be observed. As a result, the subfunds' assets may be concentrated in a small number of issuers represented in the index, thus leading to an increase in the securities-specific risks. Compared with a securities fund, the subfund may also borrow against a larger proportion of its assets or pledge or transfer as collateral a larger proportion of its assets (see §§ 13 and 14 of the fund contract).

The main risk associated with the subfund is that the income from and the value of its units may vary according to the income from and value of the stocks contained in the SPI® Index. Equity-type securities and rights may be subject to substantial market fluctuations and are thus exposed to greater risk than debt securities of the same companies. Owing to their relatively low market liquidity, their specific growth prospects and their increased vulnerability, investments in companies with a relatively low market capitalization are exposed to additional risk.

The SPI® Index is an equity index of publicly traded companies which have their primary listing on SIX Swiss Exchange. Only investment companies and equities with a free float of less than 20% are excluded from the SPI® Index. This is therefore an equity index which aims to replicate the performance of the Swiss equity market as a whole. The weightings of the individual stocks in the SPI® are based on their market capitalization.

As at 30 September 2015, the four largest constituents of the SPI® Index were: Nestlé SA, Novartis AG, Roche Holding AG, and UBS AG. The composition of the index is periodically updated by SIX Swiss Exchange on the basis of the index regulations. For the last available composition of the SPI® Index and the index regulations, as well as for other information on the index (e.g. rebalancing frequency), please see www.six-swiss-exchange.com.

f) iShares Swiss Domestic Government Bond 1-3 (CH)

g) iShares Swiss Domestic Government Bond 3-7 (CH)

h) iShares Swiss Domestic Government Bond 7-15 (CH)

These subfunds invest exclusively in bonds and other fixed or variable-rate debt instruments and rights, denominated in Swiss francs, of the Swiss Confederation, which are included in the Swiss Bond Index Domestic Government®. Futures on the benchmark index or on instruments contained in the benchmark index may also be used, though as a rule only for a small part of the fund assets. The benchmark indices vary for each subfund in terms of the maturities of the bonds or other fixed or variable-rate debt instruments and rights of the Swiss Confederation (1–3, 3–7 and 7–15 years).

iShares Swiss Domestic Government Bond 1-3 (CH), iShares Swiss Domestic Government Bond 3-7 (CH) and iShares Swiss Domestic Government Bond 7-15 (CH) are subfunds of the "Other funds for traditional investments" type.

The investment instruments and restrictions correspond to those of a securities fund, the exception being that in the context of replicating the Swiss Bond Index Domestic Government® index in accordance with § 15 prov. 8 of the fund contract, it is possible

that only a small number of securities will be held in a particular subfund, in which case no consideration need be given to either the minimum number of issues or a maximum investment volume for the holding of securities from the same issue.

As a result, the subfunds' assets may be concentrated in a small number of issuers represented in the index, thus leading to an increase in the securities-specific risks. Debt instruments which amount to more than 20% of the volume of the respective issue may not be acquired for the subfunds.

Compared with a securities fund, the subfunds may also borrow against a larger proportion of its assets or pledge or transfer as collateral a larger proportion of its assets (see §§ 13 and 14 of the fund contract).

The primary risks for the subfunds are that the income and value of the units are subject to fluctuations arising from the fluctuations in income and value of the stocks contained in the benchmark index. Debt securities and rights are subject to market fluctuations. The value of these investments is influenced in particular by interest rate fluctuations. In addition, debt securities and rights are exposed to the risk of the borrower defaulting and no longer being able to meet its payment obligations (issuer risk).

The Swiss Bond Index Domestic Government[®] is an index composed of Swiss government bonds denominated in Swiss francs that are quoted on SIX Swiss Exchange.

The Swiss Bond Index Domestic Government[®] is a sub-index of the Swiss Bond Index SBI[®] which, among other things, is further divided into sub-indices structured in accordance with the following maturities in particular:

- 1 to less than 3 years
- 3 to less than 7 years
- 7 or less than 15 years

Each bond contained in the respective index is weighted by its market capitalization.

As at 30 September 2015, the Swiss Bond Index Domestic Government 1–3 consisted of three Swiss government bonds with an average remaining term to maturity of 1–3 years.

As at 30 September 2015, the Swiss Bond Index Domestic Government 3–7 consisted of four Swiss government bonds with an average remaining term to maturity of 3–7 years.

As at 30 September 2015, the Swiss Bond Index Domestic Government 7–15 consisted of seven Swiss government bonds with an average remaining term to maturity of 7–15 years.

The composition of the indices is periodically updated by SIX Swiss Exchange based on the index regulations. For the last available composition of the SBI[®] and the index regulations, as well as other information on the index (e.g. rebalancing frequency), please see www.six-swiss-exchange.com.

i) iShares Core CHF Corporate Bond (CH)

The aim of this subfund is to replicate the performance of the SBI[®] Corporate Total Return benchmark index through use of the optimized sampling approach. In some cases, the subfund may invest in a representative selection of securities from the benchmark index rather than in all the securities in the index. In addition, the subfund may also invest in Swiss franc-denominated bonds and other fixed or variable-rate debt instruments and rights which are not contained in the benchmark index. However, their risk properties must be comparable with those of the benchmark index securities and the use of such securities must not result in any deviation from the investment objectives or in any alteration of the investment character of this subfund. Selection is facilitated by a system that takes account of both quantitative factors as well as factors that determine returns. The portfolio may be limited to a representative selection of securities from the benchmark index, or expanded to include securities not contained in the index, owing to the investment restrictions set out below, to other legal or statutory restrictions, to costs and expenses incurred by the subfund, or to the illiquidity of certain securities. Futures on Swiss franc-denominated bonds issued by the Swiss Confederation may also be used, but shall generally account for only a small portion of the fund assets. Furthermore, up to 20% of the subfund's assets may be invested in Swiss franc-denominated bonds and other fixed or variable-rate debt instruments and rights which are not contained in the benchmark index; However, their risk properties must be comparable with those of the benchmark index securities and the use of such securities must not, therefore, result in any deviation from the investment objectives set out in this fund contract, in the prospectus or in the key investor information document (KIID), nor may it alter the investment character of this subfund.

The bonds and any other fixed- or variable-rate debt instruments and rights must have an SBI[®] composite rating of at least BBB or be deemed by the fund management company to have an equivalent borrower rating. For the assessment of borrower ratings, the SBI[®] uses the ratings of international rating agencies and also – for the Swiss domestic segment – those produced by the Fedafin rating agencies and by selected Swiss banks. For details of the SBI[®] composite rating please see http://www.six-swiss-exchange.com/indices/bonds/sbi_de.html.

iShares Core CHF Corporate Bond (CH) is a subfund of the "Other funds for traditional investments" type.

The investment instruments and restrictions correspond to those of a securities fund.

The subfunds' assets may be concentrated in a smaller number of issuers than those represented in the index, thus leading to an increase in the securities-specific risks. Debt instruments which amount to more than 20% of the volume of the respective issue may not be acquired for the subfund.

Including derivatives, the fund management company may invest up to a maximum of 20% of the fund's assets in securities issued by the same issuer.

Compared with a securities fund, the subfund may also borrow against a larger proportion of its assets or pledge or transfer as collateral a larger proportion of its assets (see §§ 13 and 14 of the fund contract).

The primary risks for the subfund are that the income and value of the units are subject to fluctuations arising from the fluctuations in income and value of the stocks contained in the benchmark index. Debt securities and rights are subject to market fluctuations. The value of these investments is influenced in particular by interest rate fluctuations. In addition, debt instruments and rights are exposed to the risk of the borrower defaulting and no longer being able to meet his payment obligations (issuer risk). The use of optimized sampling as well as investing in assets not contained in the benchmark index may result in deviations from the benchmark index.

The SBI[®] Corporate Total Return reflects the performance, including coupon payments, of the Swiss franc-denominated corporate bonds listed on the SIX Swiss Exchange and meeting the acceptance criteria for the SBI[®]. The SBI[®] Corporate Total Return is a subindex of the SBI[®] and comprises corporate bonds issued by domestic and foreign borrowers with a fixed interest rate. To be included in the index, a bond must also exhibit an SBI[®] composite rating of at least BBB, a residual term of at least one year and an issue volume of at least CHF 100 million. Each bond contained in the index is weighted in accordance with its market capitalization. As at 30 September 2015, the SBI[®] Corporate Total Return consisted of 465 bonds.

Index compositions are periodically updated by the SIX Swiss Exchange based on the index regulations. For the last available composition of the SBI[®] and index regulations, as well as other information on the index (e.g. rebalancing frequency), please see www.six-swiss-exchange.com.

1.3.2 Collateral strategy for financial derivative transactions, securities lending transactions and repurchase/reverse repurchase agreements

Collateral transferred in relation to derivatives, securities lending or repurchase transactions must comply with applicable regulations.

Subject to the framework of agreements in place with the relevant counterparty, which may or may not include minimum transfer amounts, it is the intention of the fund management company that any collateral received shall have a value, adjusted in light of the haircut policy, which equals or exceeds the relevant counterparty exposure where appropriate.

Only collateral that meets the following requirements may be accepted:

- It is highly liquid and is traded at a transparent price on an exchange or other regulated market open to the public. It can be disposed of at short notice at a price close to the valuation undertaken prior to sale.
- It is valued at least on each trading day. Where price volatility is high, suitable conservative haircuts must be applied.
- It is not issued by the counterparty or by a company that belongs to or is dependent on the counterparty's group.
- The credit quality of the issuer is high.
- It is sufficiently diversified in terms of country, markets and issuers with a maximum exposure to a given issuer of 20% of a subfund's net asset value. When a sub-fund is exposed to different counterparties the different baskets of collateral should be aggregated to calculate the 20% limit of exposure to a single issuer. The exemptions for publicly guaranteed or issued investments pursuant to Art. 83 CISO are reserved; and
- It is capable of being fully enforced by the fund management company at any time without reference to or approval from the counterparty.

Non-cash collateral cannot be lent, sold, re-invested or pledged.

Cash as collateral may only be used as liquid assets or invested in high-quality government bonds and directly or indirectly in short-term money market instruments or used for the purposes of reverse repurchase agreements.

Re-invested cash collateral should be diversified in accordance with the diversification requirements applicable to non-cash collateral.

The fund management company has implemented a haircut policy in respect of each class of assets received as collateral. A haircut is a discount applied to the value of a collateral asset to account for the fact that its valuation, or liquidity profile, may deteriorate over time. The haircut policy takes account of the characteristics of the relevant asset class, including the credit standing of the issuer of the collateral, the price volatility of the collateral and the results of any stress tests which may be performed in accordance with the collateral management policy.

1.3.3 Investment Restrictions of the Subfunds

Detailed information on the subfunds' investment restrictions can be found in the fund contract (see Part II, § 15).

1.3.4 Use of Derivatives by the Subfunds

The fund management company may use derivatives. However, even under extreme market circumstances, the use of derivatives may not result in a deviation from the investment objectives or a change in the investment character of the subfund.

Commitment I approach is applied for the assessment of risk.

Derivatives form part of the investment strategy and are not used solely to hedge investment positions.

Only basic forms of derivatives may be used, i.e. call or put options, swaps and futures and forward transactions, as described in more detail in the fund contract (cf. § 12), and only as long as the underlying securities are permitted as investments under the investment policy. The derivative transactions may be concluded on either a stock exchange or another regulated market open to the public, or in OTC (over-the-counter) trading. In addition to the market risks, derivatives are also subject to counterparty risk, i.e. the risk that the party to the contract fails to meet its obligations and thus causes a financial loss.

Even under extraordinary market circumstances, the use of these instruments may not result in the subfunds' assets being leveraged, neither may they correspond to a short sale.

1.4 Profile of the Typical Investor

The subfunds are suitable for investors with a long-term horizon who are primarily seeking to track the respective benchmark index. They must be prepared to see the net asset value of fund units undergo sharp fluctuations and sustained declines. They are aware of the main risks of an equity investment (Equity Index ETFs) or a bond investment (Bond Index ETFs).

1.5 Tax Regulations Relevant to the Subfunds

The umbrella fund and the subfunds have no legal personality in Switzerland. They are not subject to tax on income or capital.

The Swiss federal withholding tax deducted from the subfunds' domestic income can be reclaimed in full for the subfunds by the fund management company.

Distributions of income made by the subfunds (to investors domiciled in Switzerland and abroad) are subject to Swiss federal withholding tax (source tax) at 35%. Any capital gains paid on a separate coupon are not subject to withholding tax.

Investors domiciled in Switzerland may reclaim the deducted withholding tax via their tax returns or by submitting a separate refund application.

Investors domiciled outside Switzerland may reclaim withholding tax under the terms of any double taxation treaty between Switzerland and their country of domicile. If no such treaty exists, then the withholding tax may not be reclaimed.

The issuing and redemption of units in the fund are exempt from stamp duty. The trading of units on the secondary market is subject to stamp duty.

Based on the provisions of the directive issued by the Council of the European Union in respect of the taxation of interest income, and under the terms of the agreement reached between Switzerland and the EU as part of bilateral negotiations, Switzerland is obliged to retain tax on certain interest payments made by investment funds and subfunds, in the case of both distributions of income and the sale or redemption of units of funds and subfunds, in respect of natural persons whose tax domicile is in an EU member state. In accordance with this agreement, Swiss collective investment schemes or subfunds which – as is the case with the subfunds in question here – do not meet the requirements for the affidavit procedure and where withholding tax is due on distributions, are

not subject to the agreement. Consequently, the Swiss paying agent does not retain savings tax in such cases. A foreign paying agent may, however, retain savings tax.

Furthermore, both earnings and capital gains, whether distributed or reinvested, and depending on the person who holds the units either directly or indirectly, may be subject wholly or in part to a so-called paying agency tax (e.g. compensatory withholding tax, EU savings tax, or Foreign Account Tax Compliance Act FATCA).

This tax information is based on the current legal situation and practice in Switzerland. It is subject to changes in legislation, the decisions of the courts and the decrees and practices of the tax authorities.

Taxation and other tax implications for investors who hold, buy or sell fund units are defined by the tax laws and regulations in the investor's country of domicile. For information on such matters, investors should consult their tax advisor.

The tax status of the umbrella fund and the subfunds is as follows:

EU savings tax:

The income distributed and/or the interest realized on the sale or redemption of units is not subject in Switzerland to EU savings tax.

FATCA and other cross border reporting systems

The subfunds are classified as "registered deemed compliant collective investment vehicles (CIV)" within the meaning of the agreement between Switzerland and the United States on cooperation to simplify the implementation of FATCA "Swiss/US IGA". The fund management company (Fondsleitung) is registered with the US tax authorities as registered deemed compliant foreign financial institution ("FFI") pursuant to the US-Swiss Agreement to Improve International Tax Compliance and to Implement FATCA (the "US-Swiss IGA"). The custodian bank is registered with the US tax authorities as a participating foreign financial institution ("pFFI") pursuant to the US-Swiss IGA and pursuant to sections 1471 through 1474 of the U.S. Internal Revenue Code, including the corresponding rulings. The US-Swiss IGA was entered into with the intention of enabling the Swiss implementation of the Foreign Account Tax Compliance Act provisions of the U.S. Hiring Incentives to Restore Employment Act ("FATCA"), which impose a new reporting regime and potentially a 30% withholding tax on certain payments made from (or attributable to) US sources or in respect of US assets to certain categories of recipient including a non-US financial institution (a "foreign financial institution" or "FFI") that does not comply with the terms of FATCA and is not otherwise exempt. Certain financial institutions ("reporting financial institutions") are required to provide certain information about their US accountholders to the US Internal Revenue Service pursuant to the terms of an FFI Agreement (as defined in the US-Swiss IGA, which has been implemented by Swiss regulations). The umbrella fund will constitute a reporting financial institution for these purposes. Accordingly, the umbrella fund will be required to enter into and comply with the terms of an FFI Agreement (as defined in the US-Swiss IGA), including the requirement to provide certain information about its US investors to the US Internal Revenue Service. It is the intention of the umbrella fund and the fund management company to procure that the umbrella fund complies with the terms of FATCA by entering into and complying with the terms of an FFI Agreement (as defined in the US-Swiss IGA) and all other terms of the reporting system contemplated by the US-Swiss IGA. No assurance can, however, be provided that the umbrella fund would be able to comply with FATCA and, in the event that it is not able to do so, a 30% withholding tax may be imposed on payments it receives from (or which are attributable to) US sources or in respect of US assets, which may reduce the amounts available to it to make payments to its investors.

Switzerland and a number of other jurisdictions have also announced that they propose to enter into multilateral arrangements modelled on the Common Reporting Standard for Automatic Exchange of Financial Account Information published by the Organisation for Economic Co-operation and Development (OECD), pursuant to which certain financial institutions (also described as "reporting financial institutions") will be required to provide certain information to their local tax authorities about accountholders from the jurisdictions which are party to such arrangements (which information will in turn be provided to the relevant tax authorities). If such arrangements are implemented into Swiss law, it is currently expected that the umbrella fund would constitute a reporting financial institution for these purposes.

In light of the above, investors in the umbrella fund will be required to provide certain information to the umbrella fund to comply with the terms of the reporting systems. Please note that the fund management company has determined that US persons are not permitted to own units in the umbrella fund.

2 Information on the Fund Management Company

2.1 General Information on the Fund Management Company

The fund management company of the umbrella fund and subfunds is BlackRock Asset Management Schweiz AG.

The fund management company is a Swiss stock corporation, which was originally registered on 17 June 2005 in the Commercial Register in Canton Geneva as Barclays Global Investors Schweiz AG. The fund management company's registered office was moved to Zurich on 6 December 2006. The fund management company was acquired by BlackRock Inc. on 1 December 2009 and renamed BlackRock Asset Management Schweiz AG. The fund management company has been active in the international fund business since 2014 as the fund management company of the Swiss BlackRock funds.

The fully paid in share capital of the fund management company was CHF 1'000'000 on 30 September 2015, divided into 1'000 registered shares with a value of CHF 1'000 each.

The fund management company is part of the BlackRock Group, of which BlackRock Inc. (listed on a stock exchange in the USA) is the parent company.

Board of Directors

- David Blumer, Chairman, BlackRock
- Barry O'Dwyer, Vice-Chairman, BlackRock
- Christian Staub, Delegate, BlackRock
- Susanne Haury von Siebenthal, member
- Dr. Peter Athanas, member

Executive Committee

- Christian Hinze, COO and Deputy CEO
- Jasmin Djalali, member, Legal & Compliance
- Nathalie von Niederhäusern, member, Investment Management Private Equity
- Christian Gast, member, iShares
- André Bantli, member, Retail
- Frank Rosenschon, member, Institutional Client Business
- Holger Schmidt, member, Business Operations
- Joerg Allenspach, member, Business Development
- Barbara Dailey, member, Human Resources
- Alexander Barion, member, Marketing
- Timea Gregorcsok, member, Risk and Quantitative Analysis

The fund management company BlackRock Asset Management Schweiz AG is registered with the US tax authorities as a "registered deemed compliant FFI" within the meaning of the agreement between Switzerland and the United States on cooperation to simplify the implementation of FATCA (Foreign Account Tax Compliance Act) "Swiss/US IGA". Investors should also read the information set out under the heading "FATCA and other cross-border reporting systems", particularly in relation to the consequences of the umbrella fund being unable to comply with the terms of such reporting systems.

Address: BlackRock Asset Management Schweiz AG,
Bahnhofstrasse 39,
CH-8001 Zurich

Website: www.blackrock.com

As at 30 September 2015, the fund management company manages 15 Swiss domiciled collective investment schemes, with assets under management of approximately USD 7'957 million.

2.2 Delegation and Sub-delegation of Investment Decisions

Investment decisions in respect of the following subfunds have been delegated to BlackRock Advisors (UK) Limited, London, which has sub-delegated these investment decisions to BlackRock Asset Management Deutschland AG:

- a) iShares SLI® (CH)
- b) iShares SMI® (CH)
- c) iShares SMIM® (CH)
- d) iShares Swiss Dividend (CH)
- e) iShares Core SPI® (CH)

BlackRock Advisors (UK) Limited, London, is a subsidiary of BlackRock, Inc. It is authorized and regulated in the UK by the Financial Conduct Authority (the "FCA") to carry on investment management business and as such is subject to FCA rules. BlackRock Advisors (UK) Limited, London, has a number of "passports" granted under the EU Markets in Financial Instruments Directive (2004/39/EC) to conduct investment management related services in a number of European Union countries including Ireland and Luxembourg. BlackRock Asset Management Deutschland AG is also a subsidiary of BlackRock, Inc. It is a capital management company as defined in the German Capital Investment Code (Kapitalanlagegesetzbuch – "KAGB") authorised and regulated by the German Federal Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") for the purposes of managing investment funds, including externally managed investment stock corporations in accordance with the UCITS Directive and providing portfolio management services to third parties.

The precise duties involved are laid down in an asset management agreement between the fund management company and BlackRock Advisors (UK) Limited, London as well as an sub-asset management agreement between BlackRock Advisors (UK) Limited and BlackRock Asset Management Deutschland AG.

Investment decisions in respect of the following subfunds have been delegated to BlackRock Advisors (UK) Limited, London:

- f) iShares Swiss Domestic Government Bond 1-3 (CH)
- g) iShares Swiss Domestic Government Bond 3-7 (CH)
- h) iShares Swiss Domestic Government Bond 7-15 (CH)
- i) iShares Core CHF Corporate Bond (CH)

BlackRock Advisors (UK) Limited, London, is a subsidiary of BlackRock, Inc. It is authorized and regulated in the UK by the Financial Conduct Authority (the "FCA") to carry on investment management business and as such is subject to FCA rules. BlackRock Advisors (UK) Limited, London, has a number of "passports" granted under the EU Markets in Financial Instruments Directive (2004/39/EC) to conduct investment management related services in a number of European Union countries including Ireland and Luxembourg.

The precise duties involved are laid down in an asset management agreement between the fund management company and BlackRock Advisors (UK) Limited, London.

2.3 Delegation of Other Specific Tasks

Further, the fund management company has delegated parts of the fund administration to State Street Bank GmbH, Munich, Zurich branch (the "Fund Administration").

A contract concluded between the fund management company and State Street Bank GmbH, Munich, Zurich Branch regulates the exact execution of the mandate including the delegation of the following tasks: Calculation of the Net Asset Value; determination of the issue and redemption prices; operation of and access to the portfolio compliance system; Net Asset Value validation and reporting; creation of semi-annual and annual reports.

2.4 Exercising of Membership and Creditors' Rights

The fund management company exercises the memberships' rights (voting rights) and creditors' rights associated with the investments of the subfunds it manages independently and exclusively in the interests of the investors. The fund management company will, upon request, provide the investors with information on exercising of membership and creditors' rights.

In the case of scheduled routine transactions, the fund management company is free to exercise membership and creditors' rights itself or to delegate their exercise to the custodian bank or a third party.

In the case of all other events that might have a lasting impact on the interests of the investors, such as, in particular, the exercise of membership and creditors' rights the fund management company holds as a shareholder or creditor of the custodian bank or another related legal entity, the fund management company will exercise the voting rights itself or issue explicit instructions. In such cases, it may base its actions on information it receives from the custodian bank, the portfolio manager, the company or from proxy advisers and other third parties, or on information it learns from the press.

The fund management company is free to waive the exercise of membership and creditors' rights.

3 Information on the Custodian Bank

The custodian bank is State Street Bank GmbH, Munich, Zurich Branch, Beethovenstrasse 19, CH-8027 Zurich. The custodian bank is a bank within the meaning of the Swiss Federal Law on Banks and Savings Banks (Bundesgesetz über die Banken und Sparkassen) and meets the requirements of Art. 72 CISA.

The custodian bank may delegate the safekeeping of the assets of the subfunds to third-party custodians and collective securities depositaries in Switzerland and abroad, provided this is in the interests of proper safekeeping. In relation to financial instruments, the fund assets may only be transferred to regulated third-party custodians and collective securities depositaries. This does not apply to mandatory safekeeping at a location where the transfer to regulated third-party custodians or collective securities depositaries is not possible, in particular due to mandatory legal provisions or the modalities of the investment product. The use of third-party custodians and collective securities depositaries means that deposited securities are no longer owned solely by the fund management company, which instead becomes only a co-owner. If the third-party custodians and collective securities depositaries are not supervised, they are unlikely to meet the organizational requirements applied to Swiss banks. The Custodian Bank is liable for damage or loss caused by its agents unless it is able to prove that it exercised the due diligence required in the circumstances in respect of selection, instruction, and monitoring.

The custodian bank is registered with the US tax authorities as a "participating foreign financial institution (pFFI)" within the meaning of the agreement between Switzerland and the United States on cooperation to simplify the implementation of FATCA (Foreign Account Tax Compliance Act) "Swiss/US IGA" and of Section 1471–1474 of the US Internal Revenue Code, including related decrees. The custodian bank is a "Reporting Financial Institution under Model 2 IGA" and the FATCA GIIN number is JR3CY0.99999.SL.756. Investors should also read the information set out under the heading "FATCA and other cross-border reporting systems", particularly in relation to the consequences of the umbrella fund being unable to comply with the terms of such reporting systems.

The custodian bank is part of an international enterprise. In connection with the execution of subscriptions and redemptions and the maintenance of business relations, data and information on clients, their business relation to the custodian bank (including information about the beneficial owner) as well about the business dealings in accordance with applicable laws may be forwarded to group companies of the custodian bank outside Switzerland, to its delegates and agents outside Switzerland, to the fund management company. These service providers and the fund management company are obliged, to keep and treat the information confidential and to use the received information and data exclusively for the aim, they have been provided to the service providers. The data protection regulations outside Switzerland may deviate from the Swiss regulations and do not meet the standard of Swiss data protection regulations.

4 Information on Third Parties

4.1 Paying Agents

The paying agent is: State Street Bank GmbH, Munich, Zurich branch, Beethovenstrasse 19, CH-8027 Zurich.

4.2 Distributors

The fund management company is entitled to appoint distributors within the meaning of the Collective Investment Schemes Act of June 23, 2006.

4.3 Auditor

The auditor is Deloitte AG, Zurich.

5 Further Information

5.1 Key Data

Valor number	cf. table at the end of the prospectus
ISIN number	cf. table at the end of the prospectus
Ticker	cf. table at the end of the prospectus
Listing	according to the collective investment schemes standard of SIX Swiss Exchange (applies to all subfunds)
Financial year	1 June to 31 May (applies to all subfunds)
Accounting currency	cf. table at the end of the prospectus
Units	Held as book-entry securities
Treatment of income	Income distributed within four months of the end of the financial year

5.2 Terms for the Issue and Redemption of Subfund Units

Investors have the opportunity to acquire fund units on the primary or secondary market. The primary market is where the units are issued and redeemed by the fund management company or its selling agents. The conditions described in section 5.2.1 apply in this regard. On the secondary market, the units are bought or sold via the exchange pursuant to the conditions described in section 5.2.2.

5.2.1 Acquisition and Redemption of Subfund Units on the Primary Market

Subfund units will be issued and redeemed on every bank working day (Monday to Friday). No issues or redemptions will take place on Swiss public holidays (Easter, Whitsun, Christmas (including Christmas Eve), New Year (including 31 December and 1 and 2 January), 1 August, etc.), or on days when the stock exchanges and markets in the main investment countries of a subfund are closed, or when 50% or more of the subfund's investments cannot be valued, or under the exceptional circumstances defined under § 17 prov. 4 of the fund contract.

Subscription and redemption orders received at the latest by the time stated in the table at the end of the prospectus on a given bank working day (order day) will be processed on the next bank working day on the basis of the net asset value calculated for the order day. The net asset value taken as the basis for the settlement of the order is not known when the order is placed (forward pricing). The net asset value is calculated on the valuation day on the basis of the closing prices on the order day.

The net asset value of a unit of a subfund is determined by the market value of that subfund's assets, minus all that subfund's liabilities, divided by the number of units of that subfund in circulation. The net asset value shall be rounded up or down to six places after the decimal point of the unit of account. Incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) effectively incurred by a subfund for the purchase and sale of investments in connection with the investment of the amount paid in, or with the sale of that portion of investments corresponding to the redeemed unit(s), will be charged to that subfund's assets.

The issue and redemption prices are rounded up or down to four places after the decimal point of the unit of account. Payments for units issued or redeemed will be made two bank working days after the order day at the latest (value date max. 2 days). Units will not take the form of actual certificates but will exist purely as book entries.

The fund management company and the custodian bank may, within the scope of their sales activities, refuse subscription orders and may suspend or limit the sale, distribution or transfer of units to individuals or corporate bodies in particular countries or areas.

Directed Cash Dealings

If any investor on the primary market making a cash subscription or redemption wishes to have the underlying securities traded with a particular designated broker (i.e. a directed cash subscription or redemption), that investor would need to specify such instructions in underlying securities with the designated broker. Investors that wish to select a designated broker are required, prior to the transaction in the underlying securities, to contact the relevant portfolio trading desk of the designated broker to arrange the trade.

If an application resulting in a creation is accepted as a directed cash subscription, as part of the investor's settlement obligations, the investor would be responsible for (i) ensuring that the designated broker transfers to the subfund (via the custodian) the relevant underlying securities, and (ii) paying the fees and costs charged by the designated broker for selling the relevant underlying securities to the subfund plus any associated incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs incurred)), to reflect the cost of execution.

If a dealing request resulting in a redemption is accepted as a directed cash redemption, the investor is responsible for (i) ensuring that the designated broker purchases the relevant underlying securities from the subfund, and (ii) paying the fees and costs charged by the designated broker for purchasing the relevant underlying securities from the subfund plus any associated incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs incurred)), to reflect the cost of execution.

The fund management company (or delegate) will not be responsible, and shall have no liability, if the execution of the underlying securities with a designated broker and, by extension, an investor's subscription or redemption order, is not carried out due to an omission, error, failed or delayed trade or settlement on the part of the investor or the designated broker. Should an investor or the designated broker to which the investor directed the underlying securities transaction default on, delay settlement of, or change the terms of, any part of the underlying securities transaction, the investor shall bear all associated risks and costs, including costs incurred by the subfund and/or the fund management company (or delegate) as a result of the delay to the underlying securities

transaction. In such circumstances, the subfund and the fund management company (or delegate) have the right to transact with another broker and to amend the terms of the investor's subscription or redemption, including the subscription price and/or redemption proceeds, to take into account the default, delay and/or the change to the terms.

The following applies to the subfunds

Equity Index Exchange Traded Funds

- a) iShares SLI® (CH)
- b) iShares SMI® (CH)
- c) iShares SMIM® (CH)
- d) iShares Swiss Dividend (CH)
- e) iShares Core SPI® (CH)

Bond Index Exchange Traded Funds

- f) iShares Swiss Domestic Government Bond 1-3 (CH)
- g) iShares Swiss Domestic Government Bond 3-7 (CH)
- h) iShares Swiss Domestic Government Bond 7-15 (CH)

The issue price corresponds to the net asset value calculated on the valuation day, plus any incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) incurred by the corresponding subfund in connection with the investment of the amount paid in, plus the issuing commission. The maximum amounts for the incidental costs and the issuing commission are set out in the table at the end of the prospectus.

The redemption price corresponds to the net asset value calculated on the valuation day, less any incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) incurred by the corresponding subfund in connection with the sale of that portion of investments corresponding to the redeemed unit(s), less the issuing commission. The maximum amounts for the incidental costs and the redemption commission are set out in the table at the end of the prospectus.

The following applies to the subfund

Bond Index Exchange Traded Funds

- i) iShares Core CHF Corporate Bond (CH)

The issue price corresponds to the net asset value calculated on the valuation day, plus any incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) incurred by the corresponding subfund in connection with the investment of the amount paid in, plus the issuing commission. The maximum amounts for the incidental costs and the issuing commission are set out in the table at the end of the prospectus.

The redemption price corresponds to the net asset value calculated on the valuation day, less any incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) incurred by the corresponding subfund in connection with the sale of that portion of investments corresponding to the redeemed unit(s), less the redemption commission. The maximum amounts for the incidental costs and the redemption commission are set out in the table at the end of the prospectus.

The fund management company may on the request of an investor in the primary market charge incidental costs on the basis of a fixed rate ("fixed issue and redemption fees") provided that the investment or sale of the net amount of subscriptions or redemptions received on an order day for which the charges of the incidental costs was chosen to be on a fixed rate basis have no significant negative effect on the subfund's assets ("net" means the difference between the subscription and redemption requests on the relevant order day).

Fixed issue and redemption fees may be set at a different rate for subscriptions and redemptions. The maximum applicable rates for the fixed issue and redemption fees and for the effective incidental costs are shown in the table at the end of the prospectus.

The indicative threshold value of net subscriptions and redemptions that can be executed at a fixed rate of costs, and the rate for fixed issue and redemption fees, are established daily and available from the fund management company on request. Calculation of the indicative threshold value and the rate for fixed issue and redemption fees takes account of the incidental costs that are expected to be incurred on average from the investment or sale of the corresponding portion of the assets on the day in question.

The fund management company has delegated the setting of an indicative threshold value and the rate for fixed issue and redemption fees to BlackRock Advisors (UK) Limited, London.

5.2.2 Acquisition and Redemption of Units on the Secondary Market

In contrast to subscriptions and redemptions on the primary market, the issuing and redemption commissions set out in § 18 of the fund contract do not apply to the purchase and sale of fund units via the stock exchange. Investors need only bear the customary stock exchange fees for such transactions.

Such transactions are conducted in a similar way to the purchase or sale of equities via SIX Swiss Exchange. The market price of a unit listed or traded on the SIX Swiss Exchange may not reflect the net asset value per unit of an exchange traded fund. The purchase and sale of units takes place at current market prices. The investor will therefore experience substantially greater pricing fluctuations than is the case with the purchase or redemption of units through the fund management company or its selling agents (i.e. on the primary market).

As with the purchase of equities, a limit may also be imposed on buy and sell orders (limit orders).

If the SIX Swiss Exchange – the exchange on which the units are listed – is closed, no trading in the units shall take place.

5.3 Fees and Incidental Costs

Details on the fees and incidental costs for each subfund, together with the issue and redemption commission for each unit class, are set out in the table at the end of the prospectus.

The fees and incidental costs listed under § 19 of the fund contract may also be charged to the subfunds.

The following applies to all subfunds:

Information on the flat fee actually charged is stated in the table at the end of the prospectus and can also be found in the annual and semi-annual reports.

The flat fee payable to the fund management company is used for the administration, asset management and, if applicable, distribution of the subfunds as well as for the remuneration of the services performed by the custodian bank such as safekeeping of the fund assets, the handling of payment transactions and other tasks listed under § 4.

In addition, the following services of third parties are remunerated by this commission, namely: Tax reporting, index and data licences, iNAV services, publications, audit, external legal advice and tax advice, translations, typesetting and other services.

In addition, rebates and remuneration for certain other services pursuant to the sub-section "Payment of retrocessions and rebates" of the prospectus are paid out of the flat fee of the fund management company.

Payment of retrocessions and rebates

The fund management company, its agents and the custodian bank generally do not pay retrocessions as remuneration for distribution activity in respect of share of the subfunds in or from Switzerland. In the context of the performance of the fund business, in individual cases and at their discretion the fund management company and its agents may pay third parties fees on the basis of written agreements for the performance of specific services, for example, to facilitate joint marketing initiatives, to train and educate clients and client advisers, to report on trading in the secondary market, and to provide access to fund holding data which is otherwise unavailable.

In the case of distribution activity in or from Switzerland, the fund management company and its agents may, upon request, pay rebates directly to investors for the purpose of reducing the fees or costs incurred by the investor in question. Rebates are permitted provided that a) they are paid from fees received by the fund management company and therefore do not represent an additional charge for the assets of the respective subfund; b) they are granted on the basis of objective criteria; and c) all investors who meet these objective criteria and demand rebates are also granted these within the same timeframe and to the same extent.

The objective criteria for the granting of rebates by the fund management company are as follows:

- the level of investment in a collective investment or range of collective investments or other portfolio managed by the fund management company or its agents; and
- the willingness of an investor to provide support during a fund's inception phase.

Upon request of the investor, the fund management company must disclose the relevant amounts of rebates free of charge.

Total Expense Ratio

The coefficient of the total costs charged to the subfunds' assets on an ongoing basis (total expense ratio, TER) was: cf. table at the end of the prospectus.

Fee-Sharing Agreements and Non-Pecuniary Benefits ("Commission Sharing Agreements" and "Soft Commissions")

The fund management company has not concluded any commission sharing agreements or agreements in respect of "soft commissions".

Investments in associated collective investment schemes

No issuing and redemption commission is charged for investments in collective investment schemes that are managed directly or indirectly by the fund management company itself or by a company with which it is related by virtue of common management or control or by way of a significant direct or indirect stake (related target funds).

5.4 Publication of Official Notices by the Umbrella Fund and Subfunds

Further information on the umbrella fund and the subfunds may be found in the latest annual or semi-annual report. The latest information can also be found on the internet at www.ishares.com.

The prospectus with integrated fund contract, the key investor information document (KIID) and the latest annual or semi-annual reports may be obtained free of charge from the fund management company, the custodian bank and all selling agents.

In the event of a change to the fund contract, a change in the fund management company or the custodian bank or the dissolution of the subfunds, the corresponding notice will be published by the fund management company on the electronic fundinfo platform (www.fundinfo.com).

Prices are published daily on the electronic fundinfo platform (www.fundinfo.com) and possibly also in other Swiss and international newspapers and electronic media.

5.5 Information Regarding Distribution Abroad

The subfunds of the umbrella fund were admitted for sale at July 21, 2009, in the following additional country: Principality of Liechtenstein.

The fund management company may at any time apply for the fund to be admitted for distribution in other countries.

Information Regarding Distribution in the Principality of Liechtenstein

The Representative and Paying Agent in the Principality of Liechtenstein is LGT Bank AG, Herrengasse 12, FL-9490 Vaduz.

The prospectus and fund contract, as well as annual and semi-annual reports in German, are obtainable free of charge from the Representative and Paying Agent in Liechtenstein.

Notifications and changes to the fund contract and prospectus, a change of fund management company or custodian bank, as well as the liquidation of a subfund shall be published in the *Liechtensteiner Vaterland*.

Prices (issue and redemption prices of subfund units) are published on the electronic fundinfo platform (www.fundinfo.com) for each day that units are issued or redeemed. At least twice a month, prices are published in the *Liechtensteiner Vaterland*. The place of performance and jurisdiction is Vaduz.

5.6 Sales Restrictions

With respect to the issue and redemption of units of the subfunds outside Switzerland, the regulations valid in the country in question apply.

Units of the subfunds may not be offered, sold or delivered within the United States. Units of this collective investment scheme may not be offered, sold or delivered to citizens and/or residents of the United States of America and/or persons or entities whose income and/or revenue, irrespective of source, is subject to US income tax, including those deemed to be US persons under Regulation S of the US Securities Act of 1933 and/or the US Commodity Exchange Act, as amended.

5.7 Detailed Regulations

All further information on the umbrella fund and subfunds, such as the method used for the valuation of the subfunds' assets, a list of all fees and incidental costs charged to the investor and the subfunds, and the appropriation of net income, can be found in detail in the fund contract.

6. Risk Factors

Risks specific to investing in index-tracking exchange traded funds (ETFs)

Index Tracking Risks

While the funds seek to track the performance of their respective Benchmark Indices, whether through a replication or optimising strategy, there is no guarantee that they will achieve perfect tracking and the funds may potentially be subject to tracking error risk, which is the risk that their returns may not track exactly those of their respective Benchmark Indices, from time to time. This tracking error may result from an inability to hold the exact constituents of the Benchmark Index, for example where there are local market trading restrictions, small illiquid components and/or where the Regulations limit exposure to the constituents of the Benchmark Index.

Optimising strategy

It may not be practical or cost efficient for certain funds to replicate their respective Benchmark Indices. Where it is not part of a fund's investment policy to replicate its Benchmark Index, such fund may use optimisation techniques to track the performance of their respective Benchmark Indices. Optimisation techniques may include the strategic selection of some (rather than all) of the securities that make up the Benchmark Index, holding securities in proportions that differ from the proportions of the Benchmark Index and/or the use of derivatives to track the performance of certain securities that make up the Benchmark Index. The asset manager may also select securities which are not underlying constituents of the relevant Benchmark Index where such securities provide similar performance (with matching risk profile) to certain securities that make up the relevant Benchmark Index. Optimising funds may potentially be subject to tracking error risk, which is the risk that their returns may not track exactly those of their respective Benchmark Indices.

Index-Related Risks

As prescribed by this Prospectus, in order to meet its investment objective, each Fund seeks to achieve a return which corresponds generally to the price and yield performance, before fees and expenses, of the relevant Benchmark Index as published by the index provider. There is no assurance that the index provider will compile the Benchmark Index accurately, or that the Benchmark Index will be determined, composed or calculated accurately. While the index provider does provide descriptions of what the Benchmark Index is designed to achieve, the index provider does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in respect of their indices, and does not guarantee that the Benchmark Index will be in line with their described index methodology. The asset manager's mandate as described in this Prospectus is to manage the funds consistently with the relevant Benchmark Index provided to the asset manager. Consequently, the asset manager does not provide any warranty or guarantee for index provider errors. Errors in respect of the quality, accuracy and completeness of the data may occur from time to time and may not be identified and corrected for a period of time, particularly where the indices are less commonly used. Therefore gains, losses or costs associated with index provider errors will be borne by the funds and their unitholders. For example, during a period where the Benchmark Index contains incorrect constituents, a Fund tracking such published Benchmark Index would have market exposure to such constituents and would be underexposed to the Benchmark Index's other constituents. As such, errors may result in a negative or positive performance impact to the funds and their unitholders. Unitholders should understand that any gains from index provider errors will be kept by the funds and their unitholders and any losses resulting from index provider errors will be borne by the Fund and their unitholders.

Apart from scheduled rebalances, the index provider may carry out additional ad hoc rebalances to the Benchmark Index in order, for example, to correct an error in the selection of index constituents. Where the Benchmark Index of a fund is rebalanced and the fund in turn rebalances its portfolio to bring it in line with its Benchmark Index, any transaction costs (including any capital gains tax and/or transaction taxes) and market exposure arising from such portfolio rebalancing will be borne directly by the fund and its unitholders. Unscheduled rebalances to the Benchmark Indices may also expose the funds to tracking error risk, which is the risk that its returns may not track exactly those of the Benchmark Index. Therefore, errors and additional ad hoc rebalances carried out by the index provider to a Benchmark Index may increase the costs and market exposure risk of the relevant fund.

Secondary Trading Risk

The units will generally be traded on the main market of the SIX Swiss Stock Exchange and may be listed or traded on one or more other stock exchanges. There can be no certainty that there will be liquidity in the units on any one or more of the stock exchanges or that the market price at which units may be traded on a stock exchange will be the same as the Net Asset Value per units. There can be no guarantee that once the units are listed or traded on a stock exchange they will remain listed or traded on that stock exchange.

Counterparty and trading risks

Counterparty Risk

The fund management company will be exposed to the credit risk of the parties with which it transacts and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the fund management company. This would include the counterparties to any derivatives that it enters into. Trading in derivatives which have not been collateralised gives rise to direct counterparty exposure. The fund management company mitigates much of its credit risk to its derivative counterparties by receiving collateral with a value at least equal to the exposure to each counterparty but, to the extent that any derivative is not fully collateralised, a default by the counterparty may result in a reduction in the value of the Fund. A formal review of each new counterparty is completed and all approved counterparties are monitored and reviewed on an ongoing basis. The fund management company maintains an active oversight of counterparty exposure and the collateral management process.

Specific investment risks for all funds**Securities Lending Risk**

The fund management company engages in a securities lending programme through the Investment Manager. The fund management company will have a credit risk exposure to the counterparties to any securities lending contract. Fund Investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the Fund. The fund management company intends to ensure that all securities lending is fully collateralised but, to the extent that any securities lending is not fully collateralised (for example due to timing issues arising from payment lags), the fund management company will have a credit risk exposure to the counterparties to the securities lending contracts.

Risks specific to Funds focusing on specific markets**Concentration Risk**

If the Benchmark Index of a fund concentrates in a particular country, region, industry, group of industries or sector, that fund may be adversely affected by the performance of those securities and may be subject to price volatility. In addition, a fund that concentrates in a single country, region, industry or group of countries or industries may be more susceptible to any single economic, market, political or regulatory occurrence affecting that country, region, industry or group of countries or industries.

Investments in Smaller Companies

The securities of smaller companies tend to be more volatile and less liquid than the securities of large companies. As securities of smaller companies may experience more market price volatility than securities of larger companies, the Net Asset Value of any Funds which invest in smaller companies may reflect this volatility. Smaller companies, as compared with larger companies, may have a shorter history of operations, may not have as great an ability to raise additional capital, may have a less diversified product line making them susceptible to market pressure and may have a smaller public market for their securities.

Investment in smaller companies may involve relatively higher investment costs and accordingly investment in funds which invest in smaller companies should be viewed as a long-term investment. Such funds may however dispose of an investment made by it within a relatively short period of time, for example, to meet requests for redemption of units.

As a result of the above risks, a fund's investments can be adversely affected and the value of your investments may go up or down.

Risks related to investment in Equity Funds**Equity Securities**

The value of equity securities fluctuate daily and a fund investing in equities could incur significant losses. The prices of equities can be influenced by factors affecting the performance of the individual companies issuing the equities, as well as by daily stock market movements, and broader economic and political developments, including trends in economic growth, inflation and interest rates, corporate earnings reports, demographic trends and natural disasters.

High Dividend Paying Stocks

While the Benchmark Index rules for the high dividend paying funds are designed to select high dividend paying stocks, dividend payment streams can vary from year to year and past dividend payments are no guide for future dividend payments.

High dividend paying stocks include small capitalised and mid capitalised companies, which might be less financially secure than large capitalised companies. Additionally these companies depend more heavily on essential personnel and thus are more vulnerable to personnel loss. Small capitalised and mid capitalised companies might have less diversified product lines than large capitalisation companies and thus are more susceptible to adverse development concerning their products. Small capitalised and mid capitalised companies may also be less frequently traded and thus may be difficult for a Fund to buy and sell.

Risks related to investment in Fixed Income Funds**Government Bonds**

A fund may invest in government bonds which pay a fixed rate of interest (also known as the 'coupon') and behave similarly to a loan. These bonds are therefore exposed to changes in interest rates which will affect their value. In addition, periods of low inflation will mean the positive growth of a government bond fund may be limited.

Investments in government bonds may be subject to liquidity constraints and periods of significantly lower liquidity in difficult market conditions. Therefore it may be more difficult to achieve a fair value on purchase and sale transactions which may cause the asset manager not to proceed with such transactions. As a result, changes in the value of the fund's investments may be unpredictable.

Corporate Bonds

A corporate bond fund may invest in corporate bonds issued by companies within a range of credit worthiness if the relevant fund's Benchmark Index does not apply any minimum credit rating requirement to its constituents.

Corporate bonds may be upgraded or downgraded from time to time due to a perceived increase or reduction in the credit worthiness of the companies issuing the bonds.

Where the Benchmark Index of a fund imposes specific credit rating requirements for bonds to be included in the Benchmark Index (e.g. investment grade bonds or non / sub investment grade bonds) and bonds that make up the Benchmark Index are downgraded, upgraded or have their credit ratings withdrawn by the relevant credit rating agencies such that they no longer meet the credit rating requirements of the Benchmark Index, the fund may continue to hold the relevant bonds until such time as these bonds cease to form part of the Fund's Benchmark Index and the fund's position in such bonds can be liquidated. Sub-investment grade bonds are generally riskier investments, involving a higher risk of default by the issuer, than investment grade bonds. A default by the issuer of a bond is likely to result in a reduction in the value of that Fund.

Although a fund may invest in bonds that are traded on the Secondary Market, the Secondary Market for corporate bonds can often be illiquid and therefore it may be difficult to achieve fair value on purchase and sale transactions.

Cash interest rates vary over time. The price of corporate bonds will generally be affected by changing interest rates and credit spread which in turn may affect the value of your investment. Bond prices move inversely to interest rates, so generally speaking the market value of a bond will decrease as interest rates increase. The credit rating of an issuing company will generally affect the yield that can be earned on a bond; the better the credit rating the smaller the yield.

Risks specific to use of Derivatives

Derivative Risks

Each fund may use derivatives for the purposes of efficient portfolio management or, where stated in the investment policy of a fund, for direct investment purposes. Such instruments involve certain special risks and may expose investors to an increased risk of loss. These risks may include credit risk with regard to counterparties with whom the fund trades, the risk of settlement default, lack of liquidity of the derivatives, imperfect tracking between the change in value of the derivatives and the change in value of the underlying asset that the Fund is seeking to track and greater transaction costs than investing in the underlying assets directly.

In accordance with standard industry practice when purchasing derivatives, a fund may be required to secure its obligations to its counterparty. For non-fully funded derivatives, this may involve the placing of initial and/or variation margin assets with the counterparty. For derivatives which require a fund to place initial margin assets with a counterparty, such assets may not be segregated from the counterparty's own assets and, being freely exchangeable and replaceable, the Fund may have a right to the return of equivalent assets rather than the original margin assets deposited with the counterparty. These deposits or assets may exceed the value of the relevant fund's obligations to the counterparty in the event that the counterparty requires excess margin or collateral. In addition, as the terms of an derivatives may provide for one counterparty to provide collateral to the other counterparty to cover the variation margin exposure arising under the derivatives only if a minimum transfer amount is triggered, the fund may have an uncollateralised risk exposure to a counterparty under a derivative up to such minimum transfer amount. A default by the counterparty in such circumstances will result in a reduction in the value of the Fund and thereby a reduction in the value of an investment in the fund.

Additional risks associated with investing in derivatives may include a counterparty breaching its obligations to provide collateral, or due to operational issues (such as time gaps between the calculation of risk exposure to a counterparty's provision of additional collateral or substitutions of collateral or the sale of collateral in the event of a default by a counterparty), there may be instances where a fund's credit exposure to its counterparty under a derivative is not fully collateralised but each fund will continue to observe specific set out in this context limits. The use of derivatives may also expose a fund to legal risk, which is the risk of loss due to the unexpected application of a law or regulation, or because a court declares a contract not legally enforceable.

Other general risks

Liquidity Risk

A fund's investments may be subject to liquidity constraints, which means they may trade less frequently and in small volumes. Securities of certain types, such as bonds, may also be subject to periods of significantly lower liquidity in difficult market conditions. As a result, changes in the value of investments may be more unpredictable. In certain cases, it may not be possible to sell the security at the price at which it has been valued for the purposes of calculating the Net Asset Value of the fund or at a value considered to be fairest. Reduced liquidity of a fund's investments may result in a loss to the value of your investment.

Summary of the Subfunds and Unit Classes

Subfund	Unit classes	Valor number	ISIN number	Ticker	Accounting currency	Max. issue / redemption commission charged to the investors ¹⁾	Flat fee charged to the subfund ²⁾	Max. incidental costs issue/redemption ³⁾	Valuation date (days since order day)	Value date (days since order day)	Date of relevant valuation prices (days since order day)	Deadline for daily subscription and redemption of fund units (CET)	Min. investment / min. holding	Delegation / subdelegation of investment decisions for subfunds	Total expense ratio (TER) ⁴⁾

- ¹⁾ Fees and incidental costs charged to the investor (excerpt from § 18 of the fund contract): issuing commission accruing to the fund management company, the custodian bank and/or distributors in Switzerland and abroad; redemption commission accruing to the fund management company, the custodian bank and/or distributors in Switzerland and abroad.
- ²⁾ Fees and incidental costs charged to the subfunds' assets pursuant to § 19 prov. 1 of the fund contract: flat fee payable to the fund management company for administration, asset management and distribution of the subfunds as well as all tasks performed by the custodian bank (such as safekeeping of the fund assets, the handling of payment transactions) and other tasks listed under § 4. The costs set out in § 19 prov. 2 of the fund contract may additionally be charged to the subfund.
- ³⁾ The maximum incidental costs include standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)). When units are issued, the incidental costs incurred by the subfund concerned in connection with the investment of that portion of investments corresponding to the amount paid in will be added to the net asset value. When units are redeemed, the incidental costs incurred by the subfund concerned in connection with the sale of a portion of investments corresponding to the redeemed units will be deducted from the net asset value. For iShares Core CHF Corporate Bond (CH), the fund management company may on the request of an investor in the primary market charge incidental costs on the basis of a fixed rate provided that the investment or sale of the net amount of subscriptions or redemptions received on an order day for which the charges of the incidental costs was chosen to be on a fixed rate basis have no significant negative effect on the subfund's assets. In this case calculation of the indicative threshold value and the rate for fixed issue and redemption fees takes account of the incidental costs that are expected to be incurred on average from the investment or sale of the corresponding portion of the assets on the day in question. The relevant provisions are contained in § 18 prov. 3 of the fund contract.
- ⁴⁾ These numbers on TER refer to the previous fee model (management fee plus custodian fee and other costs charged separately) whereas the current fee model (introduced on 8 December 2014) is based on a flat fee including management and custodian fees and other costs.

Part 2: Fund Contract

I. Basic Principles

§ 1 Name of the Fund; Name and Registered Office of the Fund Management Company, the Custodian Bank and the Asset Manager

1. A contractual umbrella fund of the "Other funds for traditional investments" type has been established under the name of iShares ETF (CH) ("umbrella fund") in accordance with Art. 25 et seq. in conjunction with Art. 68 et seq. and Art. 92 et seq. of the Swiss Federal Act on Collective Investment Schemes of June 23, 2006 (CISA). The umbrella fund is split into the following subfunds:

Equity Index Exchange Traded Funds

- a) iShares SLI® (CH)
- b) iShares SMI® (CH)
- c) iShares SMIM® (CH)
- d) iShares Swiss Dividend (CH)
- e) iShares Core SPI® (CH)

Bond Index Exchange Traded Funds

- f) iShares Swiss Domestic Government Bond 1-3 (CH)
- g) iShares Swiss Domestic Government Bond 3-7 (CH)
- h) iShares Swiss Domestic Government Bond 7-15 (CH)
- i) iShares Core CHF Corporate Bond (CH)

2. The fund management company is BlackRock Asset Management Schweiz AG, Zurich.
3. The custodian bank is State Street Bank GmbH, Munich, Zurich Branch.
4. The asset managers are - by a sub-delegation from BlackRock Advisors (UK) Limited, London - BlackRock Asset Management Deutschland AG, Munich, for the subfunds a)-e), and BlackRock Advisors (UK) Limited, London, for the subfunds f)-i).

II. Rights and Obligations of the Parties to the Contract

§ 2 The Fund Contract

The legal relationship between an investor, and the fund management company and the custodian bank, is governed by the present fund contract and the applicable provisions of the legislation on collective investment schemes.

§ 3 The Fund Management Company

1. The fund management company manages the subfunds at its own discretion and in its own name, but for the account of the investors. It decides in particular on the issue of units, the assets and their valuation. It calculates the net asset value of the subfunds and determines the issue and redemption prices of units as well as distributions of income. It exercises all rights associated with the umbrella fund and subfunds.
2. The fund management company and its agents are subject to the duties of loyalty, due diligence and disclosure. They act independently and exclusively in the interests of the investors. They implement the organizational measures that are necessary for proper management. They ensure the provision of transparent financial statements and provide appropriate information on the umbrella fund and subfunds. They disclose all fees and costs directly or indirectly charged to investors, detailing their appropriation; they provide investors with full, accurate and comprehensible information on compensation paid for the distribution of collective investment schemes in the form of commission, brokerage fees and other pecuniary benefits.
3. The fund management company can delegate investment decisions as well as specific tasks for all subfunds or for individual subfunds, provided this is in the interests of proper management. It shall commission only persons who are qualified to execute the task properly, and shall ensure the provision of instructions as well as monitoring and controlling in respect of the tasks. Investment decisions may only be delegated to asset managers who are subject to a recognized supervisory body. Where foreign law requires an agreement on cooperation and the exchange of information with foreign supervisory authorities, the fund management company may only delegate investment decisions to asset managers abroad where such an agreement exists between FINMA and the relevant foreign supervisory authorities for the investment decisions concerned. The fund management company is liable for the actions of its agents as if they were its own actions.
4. The fund management company may, with the consent of the custodian bank, submit a change to the present fund contract to the supervisory authority for approval (cf. § 26), and may also establish further subfunds with the approval of the supervisory authority.
5. The fund management company can merge the individual subfunds with other subfunds or with other investment funds pursuant to § 24 and can dissolve the umbrella fund or the individual subfunds pursuant to § 25.
6. The fund management company is entitled to receive the fees stipulated in §§ 18 and 19. It is further entitled to be released from the liabilities assumed in the proper execution of its tasks, and to be reimbursed for expenses incurred in connection with such liabilities.

§ 4 The Custodian Bank

1. The custodian bank is responsible for the safekeeping of the subfunds' assets. It handles the issue and redemption of fund units as well as payments on behalf of the subfunds.
2. The custodian bank and its agents are subject to the duties of loyalty, due diligence and disclosure. They act independently and exclusively in the interests of the investors. They implement the organizational measures that are necessary for proper management. They ensure the provision of transparent financial statements and provide appropriate information on the umbrella fund and subfunds. They disclose all fees and costs directly or indirectly charged to investors, detailing their appropriation; they provide investors with full, accurate and comprehensible information on compensation paid for the distribution of collective investment schemes in the form of commission, brokerage fees and other pecuniary benefits.
3. The custodian bank is responsible for cash account and safekeeping account management on behalf of the subfunds, but does not have independent access to their assets.
4. The custodian bank ensures that in the case of transactions relating to the assets of the subfunds the counter-value is transferred thereto within the usual time limit. It notifies the fund management company if the counter-value is not refunded within the usual time limit and where possible requests reimbursement for the asset item concerned from the counterparty.

5. The custodian bank keeps the required records and accounts in such manner that it is at all times able to distinguish between the assets held in safe custody of the individual investment funds.
In relation to assets that cannot be placed in safe custody, the custodian bank verifies ownership to the fund management company and keeps a record thereof.
6. The custodian bank may delegate the safekeeping of the assets of the subfunds to third-party custodians and collective securities depositaries in Switzerland or abroad, provided this is in the interests of efficient safekeeping. It verifies and monitors whether the third-party custodian and collective securities depositary:
 - a) possesses an appropriate organizational structure, financial guarantees and the specialist qualifications required given the nature and complexity of the assets entrusted to it;
 - b) is subject to regular external audits, thereby ensuring that it possesses the financial instruments;
 - c) the assets received from the custodian bank are kept in safe custody in such manner that by means of regular portfolio comparisons they can at all times be clearly identified as belonging to the subfunds' assets;
 - d) complies with the provisions applicable to the custodian bank with respect to the performance of the tasks delegated to it and the avoidance of conflicts of interest.

The custodian bank is liable for the damage caused by the agent if it cannot prove that it applied the degree of due diligence with regard to the selection, instruction and monitoring required in the given circumstances. The prospectus contains information on the risks involved in transferring the safekeeping to third-party custodians and collective securities depositaries.
Transfers of financial instruments along the lines set out in the previous paragraph may only be made to regulated third-party custodians and collective securities depositaries. This does not apply to mandatory safekeeping at a location where the transfer to regulated third-party custodians and collective securities depositaries is not possible, in particular due to mandatory legal provisions or the procedural details for the investment product, for example. Safekeeping by non-regulated third-party custodians or collective securities depositaries must be disclosed to investors in the prospectus.
7. The custodian bank ensures that the fund management company complies with the law and the fund contract. It checks whether the calculation of the net asset value and of the issue and redemption prices of the units as well as the investment decisions are in compliance with the law and the fund contract, and whether the income is appropriated in accordance with the fund contract. The custodian bank is not responsible for the choice of investments which the fund management company makes in accordance with the investment regulations.
8. The custodian bank is entitled to receive the fees stipulated in §§ 18 and 19. It is further entitled to be released from the liabilities assumed in the proper execution of its tasks, and to be reimbursed for expenses incurred in connection with such liabilities.
9. The custodian bank is not responsible for the safekeeping of the assets of the target funds in which the subfunds invest, unless this task has been delegated to it.

§ 5 The Investor

1. Investor eligibility is not subject to any restrictions (except for the sales restrictions described at section 5.6 of the prospectus).
2. On concluding the contract and making a payment in cash, the investor acquires a claim against the fund management company in respect of a participation in the assets and income of a subfund of the umbrella fund. The investor's claim is evidenced in the form of fund units.
3. Investors are obliged only to remit payment for the units of the subfund they subscribe. They shall not be held personally liable for the liabilities of the subfund. Investors are entitled to participate in the assets and income of only that subfund in which they hold units. Liabilities that are attributable to an individual subfund will be borne solely by the said subfund.
4. Investors may at any time request that the fund management company supply them with information regarding the basis on which the net asset value per unit is calculated. If investors express an interest in more detailed information on specific business transactions effected by the fund management company, such as the exercising of memberships' rights (voting rights) and creditors' rights or risk management, they must be given such information by the fund management company at any time. The investors may request at the courts of the registered office of the fund management company that the auditors or another expert investigate the matter which requires clarification and furnish the investors with a report.
5. The investors may terminate the fund contract on any day and demand that their share in the corresponding subfund be paid out in cash.
6. If requested, the investors are obliged to provide the fund management company, the custodian bank and their agents with proof that they comply with or continue to comply with the provisions laid down in the law or the fund contract in respect of participation in a subfund or in a unit class. Furthermore, they are obliged to inform the fund management company, the custodian bank and their agents immediately once they no longer meet these prerequisites.
7. The fund management company in conjunction with the custodian bank must make an enforced redemption of the units of an investor at the current redemption price if:
 - a) this is necessary to safeguard the reputation of the financial market, specifically to combat money laundering;
 - b) the investor no longer meets the statutory or contractual requirements for participation in a subfund.
8. The fund management company in conjunction with the custodian bank can also make an enforced redemption of the units of an investor at the current redemption price if:
 - a) the participation of the investor in a subfund is such that it could have a significant detrimental impact on the economic interests of the other investors, in particular if the participation could result in tax disadvantages for the umbrella fund or a subfund in Switzerland or abroad;
 - b) investors have acquired or hold their units in violation of provisions of a law to which they are subject either in Switzerland or abroad, of the present fund contract or the prospectus;
 - c) there is a detrimental impact on the economic interests of the investors, in particular in cases where individual investors seek by way of systematic subscriptions and immediate redemptions to achieve a pecuniary gain by exploiting the time differences between the setting of the closing prices and the valuation of the subfunds' assets (market timing).

§ 6 Units and Unit Classes

1. The fund management company can establish different unit classes and can also merge or dissolve unit classes for each subfund at any time subject to the consent of the custodian bank and the approval of the supervisory authority. All unit classes embody an entitlement to a share in the undivided assets of the subfund concerned, which are not segmented. This share may differ due to class-specific costs or distributions or due to class-specific earnings, and the various classes may therefore have different net asset values per unit. Class-specific costs are covered by the assets of the subfund as a whole.
2. Notification of the establishment, dissolution or merger of unit classes is published in accordance with section 5.4 of the prospectus. Only mergers shall be deemed a change to the fund contract pursuant to § 26.
3. The various unit classes may differ from one another in terms of their cost structure, reference currency, currency hedging, policy with regard to distribution or reinvestment of income, the minimum investment required and investor eligibility.
Fees and costs are only charged to the unit class for which the respective service is performed. Fees and costs that cannot be unequivocally allocated to a unit class shall be charged to the individual unit classes on a pro rata basis in relation to their share of the subfund's assets.
4. The subfunds are not currently divided into unit classes. There is only one unit class: class A.

5. Units will not take the form of actual certificates but will exist purely as book entries. The investors are not entitled to demand delivery of a registered or bearer unit certificate.
6. The fund management company and the custodian bank are obliged to instruct investors who no longer meet the prerequisites for holding a unit class to ensure within 30 calendar days that their units are redeemed pursuant to § 17, transferred to a person who does meet the aforementioned prerequisites, or switched into units of another unit class whose prerequisites they do meet. If an investor fails to comply with this demand, the fund management company must, in cooperation with the custodian bank, make an enforced switch into another unit class of the same subfund or, should this not be possible, enforce the redemption of the units in question pursuant to § 5 prov. 7.

III. Investment Policy Guidelines

A Investment Principles

§ 7 Compliance with Investment Regulations

1. In selecting the individual investments of each subfund, the fund management company must adhere to the principle of balanced risk diversification and must observe the percentage limits defined below. These percentages relate to the assets of the individual subfunds at market value and must be complied with at all times. The individual subfunds must have fulfilled the terms of the investment restrictions no later than six months after the expiry of the subscription period (launch).
2. If the limits are exceeded as a result of market-related changes, the investments must be restored to the permitted level within a reasonable period, taking due account of the investors' interests. If the limits relating to derivatives pursuant to § 12 below are exceeded due to a change in the delta, this is to be rectified within three bank working days at the latest, taking due account of the investors' interests.

§ 8 Investment Policy

1. Within the framework of the specific investment policy of each subfund pursuant to prov. 3, the fund management company may invest the assets of the individual subfunds in the following investments (the risks of which must be disclosed in the prospectus):
 - a) Securities issued on a large scale and non-certificated rights with a like function which are traded on a stock exchange or another regulated market open to the public.
Investments in securities from new issues are only permitted if their admission to a stock exchange or another regulated market open to the public is envisaged under the terms of issue. If they have not been admitted to a stock exchange or another regulated market open to the public within a year after their acquisition, these securities must be sold within one month or included under the restriction set down in prov. 1 section g).
 - b) Derivatives, if (i) the underlying securities are securities pursuant to sections a) and b), derivatives pursuant to section b), units in collective investment schemes pursuant to section c), money market instruments pursuant to section d), or financial indices, interest rates, exchange rates, credits or currencies, and (ii) the underlying securities are permitted as investments under the fund contract. Derivatives are either traded on an exchange or other regulated market open to the public, or are traded OTC.
OTC transactions are only permitted if (i) the counterparty is a regulated financial intermediary specializing in such transactions, and (ii) the OTC derivatives can be traded daily or a return to the issuer is possible at any time. In addition, it shall be possible for them to be valued in a reliable and transparent manner. Derivatives may be used pursuant to § 12.
 - c) Units of other collective investment schemes (target funds), provided that (i) their documents restrict investments for their part in other target funds to a total of 49%; (ii) these target funds are subject to provisions equivalent to those pertaining to other funds for traditional or alternative investments in respect of the purpose, organization, investment policy, investor protection, risk diversification, asset segregation, borrowing, lending, short-selling of securities and money market instruments, the issuing and redemption of fund units and the content of the semi-annual and annual reports; and (iii) these target funds are authorized as collective investment schemes in their country of domicile and are subject there to supervision which is equivalent to that in Switzerland and which serves to protect investors, and that international legal assistance is ensured.
 - d) Money market instruments, provided these are liquid, can be readily valued and are traded on an exchange or other regulated market open to the public; money market instruments which are not traded on an exchange or other regulated market open to the public may only be acquired if the issue or the issuer is subject to provisions regarding creditor or investor protection and if the money market instruments are issued or guaranteed by issuers pursuant to Art. 74(2) Collective Investment Schemes Ordinance (CISO).
 - e) Structured products relating to securities, collective investment schemes, money market instruments, derivatives, indices, interest rates, exchange rates, currencies, precious metals, commodities or similar instruments.
 - f) On-call or term deposits with terms to maturity not exceeding twelve months with banks domiciled in Switzerland or in a member state of the European Union or in another country provided that the bank is subject to supervision in this country which is equivalent to the supervision in Switzerland.
 - g) Investments other than those mentioned in sections a) to f) above and investments which do not meet the requirements stated in sections a) to f), up to a maximum total of 10% of the subfund's assets; the following are not permitted: investments in precious metals, precious metals certificates, goods and documents of title to goods.
2. The investment objective and investment policy of the subfunds is to replicate the benchmark indices referred to in prov. 3 as closely as possible. The objective will be for the subfunds to exhibit approximately the same statistical characteristics (investment return and volatility) as the index, with the weightings of the securities in the subfund matching the index weightings as closely as possible, provided the index is replicated primarily by way of direct investments in index securities with the exception of the subfund iShares Core CHF Corporate Bond (CH). In the case of the subfund iShares Core CHF Corporate Bond (CH), the weighting is carried out using the optimized sampling approach in accordance with § 8 prov. 3. i).
3. Investment Policies of the Individual Subfunds:
 - a) **iShares SLI® (CH)**
The fund management company
 - aa) invests the subfund's assets exclusively in the equities and similar instruments included in the Swiss Leader Index (SLI®) (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.), subject to bb) and cc) below. However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times.
 - bb) may invest the subfund's assets temporarily in equities and similar instruments (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.) which are not contained in the benchmark index but where there is a high probability that such securities will be included in the Swiss Leader Index on the basis of its acceptance criteria.
 - cc) may, subject to the exceptions mentioned below, invest up to 5% of the subfund's assets in futures on the benchmark index specified in aa) or in securities contained in the benchmark index. Exceptions may be made, for example, in the event of adjustments to indices or corporate actions relating to investments as per aa), the scale of which is determined by weighting of the relevant securities in the benchmark index.
 - dd) does not invest the subfund's assets in units of other collective investment schemes (target funds).

b) iShares SMI® (CH)

- aa) The fund management company invests the subfund's assets exclusively in the equities and similar instruments included in the Swiss Market Index (SMI®) (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.), subject to bb) and cc) below. However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times.
- bb) temporarily in equities and similar instruments (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.) which are not contained in the benchmark index but where there is a high probability that such securities will be included in the Swiss Market Index on the basis of its acceptance criteria.
- cc) may, subject to the exceptions mentioned below, invest up to 5% of the subfund's assets in futures on the benchmark index specified in aa) or in securities contained in the benchmark index. Exceptions may be made, for example, in the event of adjustments to indices or corporate actions relating to investments as per aa), the scale of which is determined by weighting of the relevant securities in the benchmark index.
- dd) does not invest the subfund's assets in units of other collective investment schemes (target funds).

c) iShares SMIM® (CH)

- aa) The fund management company invests the subfund's assets exclusively in the equities and similar instruments included in the SMI MID Index (SMIM®) (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.), subject to bb) and cc) below. However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times.
- bb) temporarily in equities and similar instruments (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.) which are not contained in the benchmark index but where there is a high probability that such securities will be included in the SMI MID Index on the basis of its acceptance criteria.
- cc) may, subject to the exceptions mentioned below, invest up to 5% of the subfund's assets in futures on the benchmark index specified in aa) or in securities contained in the benchmark index. Exceptions may be made, for example, in the event of adjustments to indices or corporate actions relating to investments as per aa), the scale of which is determined by weighting of the relevant securities in the benchmark index.
- dd) does not invest the subfund's assets in units of other collective investment schemes (target funds).

d) iShares Swiss Dividend (CH)

The fund management company

- aa) invests the subfund's assets exclusively in the equities and similar instruments included in the SPI® Select Dividend 20 Index (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.), subject to bb) and cc). However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times.
- bb) may invest temporarily in equities and similar instruments (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.) which are not contained in the benchmark index but where there is a high probability that such securities will be included in the SPI® Select Dividend 20 Index on the basis of its acceptance criteria.
- cc) may, subject to the exceptions mentioned below, invest up to 5% of the subfund's assets in futures on the benchmark index specified in aa), in futures on shares contained in the benchmark index and in futures on the Swiss Market Index (SMI®), the Swiss Leader Index (SLI®) and the SMI MID Index (SMIM®). Exceptions may be made, for example, in the event of adjustments to indices or corporate actions relating to investments as per aa), the scale of which is determined by weighting of the relevant securities in the benchmark index.
- dd) does not invest the subfund's assets in units of other collective investment schemes (target funds).
- ee) securities which are dropped from the benchmark index must be sold within an appropriate period while safeguarding the interests of the investors.

e) iShares Core SPI® (CH)

The fund management company

- aa) invests the subfund's assets exclusively in the equities and similar instruments included in the Swiss Performance Index (SPI®) (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.), subject to bb) and cc). However, there is no requirement for all securities included in the benchmark index to be included in the subfund at all times.
- bb) may invest temporarily in equities and similar instruments (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.) which are not contained in the benchmark index but where there is a high probability that such securities will be included in the Swiss Performance Index (SPI®) on the basis of its acceptance criteria.
- cc) may, subject to the exceptions mentioned below, invest up to 5% of the subfund's assets in futures on the benchmark index specified in aa), in futures on shares contained in the benchmark index and in futures on the Swiss Market Index (SMI®), the Swiss Leader Index (SLI®) and the SMI MID Index (SMIM®). Exceptions may be made, for example, in the event of adjustments to indices or corporate actions relating to investments as per aa), the scale of which is determined by weighting of the relevant securities in the benchmark index.
- dd) does not invest the subfund's assets in units of other collective investment schemes (target funds).
- ee) securities which are dropped from the benchmark index must be sold within an appropriate period while safeguarding the interests of the investors.

f) iShares Swiss Domestic Government Bond 1-3 (CH)

The fund management company

- aa) invests exclusively in bonds and other fixed or variable-rate debt papers and corresponding rights of the Swiss Confederation which are denominated in Swiss francs and included in the Swiss Bond Index Domestic Government 1–3, subject to bb) and cc) below.
- bb) may temporarily invest in bonds and other fixed or variable-rate debt papers and corresponding rights of the Swiss Confederation which are denominated in Swiss francs and are not contained in the benchmark index but where there is a high probability that such securities will be included in the Swiss Bond Index Domestic Government 1–3 on the basis of its acceptance criteria.
- cc) may invest up to 5% of the subfund's assets in futures on the benchmark index specified in aa) or in securities contained in the benchmark index.
- dd) does not invest the subfund's assets in units of other collective investment schemes (target funds).

g) iShares Swiss Domestic Government Bond 3-7 (CH)

The fund management company

- aa) invests exclusively in bonds and other fixed or variable-rate debt papers and corresponding rights of the Swiss Confederation which are denominated in Swiss francs and included in the Swiss Bond Index Domestic Government 3–7, subject to bb) and cc) below.
- bb) may temporarily invest in bonds and other fixed or variable-rate debt papers and corresponding rights of the Swiss Confederation which are denominated in Swiss francs and are not contained in the benchmark index but where there is a high probability that such securities will be included in the Swiss Bond Index Domestic Government 3–7 on the basis of its acceptance criteria.
- cc) may invest up to 5% of the subfund's assets in futures on the benchmark index specified in aa) or in securities contained in the benchmark index.
- dd) does not invest the subfund's assets in units of other collective investment schemes (target funds).

h) iShares Swiss Domestic Government Bond 7-15 (CH)

The fund management company

- aa) invests exclusively in bonds and other fixed or variable-rate debt papers and corresponding rights of the Swiss Confederation which are denominated in Swiss francs and included in the Swiss Bond Index Domestic Government 7–15, subject to bb) and cc) below.
- bb) may temporarily invest in bonds and other fixed or variable-rate debt papers and corresponding rights of the Swiss Confederation which are denominated in Swiss francs and are not contained in the benchmark index but where there is a high probability that such securities will be included in the Swiss Bond Index Domestic Government 7–15 on the basis of its acceptance criteria.
- cc) may invest up to 5% of the subfund's assets in futures on the benchmark index specified in aa) or in securities contained in the benchmark index.
- dd) does not invest the subfund's assets in units of other collective investment schemes (target funds).

i) iShares Core CHF Corporate Bond (CH)

The aim of this subfund is to replicate the performance of the SBI® Corporate Total Return benchmark index through use of the optimized sampling approach. In some cases, the subfund may invest in a representative selection of securities from the benchmark index rather than in all the securities in the index. In addition, the subfund may also invest in Swiss franc-denominated bonds and other fixed or variable-rate debt instruments and rights which are not contained in the benchmark index. Selection is facilitated by a system that takes account of both quantitative factors as well as factors that determine returns. The portfolio may be limited to a representative selection of securities from the benchmark index, or expanded to include securities not contained in the index, owing to the investment restrictions set out below, to other legal or statutory restrictions, to costs and expenses incurred by the subfund, or to the illiquidity of certain securities.

The fund management company

- aa) invests the subfund's assets, subject to bb), cc) and dd), in Swiss franc-denominated corporate bonds and other fixed or variable-rate debt instruments and rights which are contained in the benchmark index;
 - bb) may temporarily invest in Swiss franc-denominated corporate bonds and other fixed or variable-rate debt instruments and rights which are not contained in the benchmark index but where there is a high probability that such securities will be included in the SBI® Corporate Total Return on the basis of its acceptance criteria; investments in accordance with the present section bb) come under cc) below;
 - cc) may invest up to 20% of the subfund's assets in Swiss franc-denominated bonds and other fixed or variable-rate debt instruments and rights which are not contained in the benchmark index; however, their risk properties must be comparable with those of the benchmark index securities and the use of such securities must not, therefore, result in any deviation from the investment objectives set out in this fund contract, in the prospectus or in the key investor information document (KIID), nor may it alter the investment character of this subfund. Investments (including derivatives on these investments) that are dropped from the benchmark index come under the present section cc);
 - dd) may – in addition to the investments under cc) above – invest up to 5% of the subfund's assets in futures on Swiss franc-denominated bonds issued by the Swiss Confederation;
 - ee) does not invest the subfund's assets in units of other collective investment schemes (target funds).
- Investments in accordance with sections aa), bb) and cc) above must have an SBI® composite rating of at least BBB or be deemed by the fund management company to have an equivalent borrower rating. If an investment loses this minimum rating/borrower rating, it must be sold within 90 days while safeguarding the interests of the investors.

§ 9 Liquid Assets

The fund management company may also hold liquid assets for each subfund in an appropriate amount in the accounting currency of the subfund concerned, in any other currency in which investments for the subfund concerned are permitted, and as a minimum in USD, CHF, EUR, and GBP. Liquid assets comprise bank deposits as well as claims from repurchase agreements at sight or on demand with maturities up to twelve months.

B Investment Techniques and Instruments**§ 10 Securities Lending**

1. For the account of the sub-funds, the fund management company may lend all types of securities which are traded on an exchange or other regulated market open to the public. However, it may not lend securities that have been acquired under a reverse repo transaction.
2. The fund management company may lend the securities in its name and for the account of the sub-funds to a borrower (as principal) or appoint an intermediary (as agent) to make the securities at the disposal of the borrower. The fund management company appoints the asset manager, BlackRock Advisors (UK) Limited, as the securities lending agent (the "Lending Agent").
3. The fund management company, or the Lending Agent on its behalf, shall only carry out securities lending transactions with first-class, regulated borrowers or intermediaries which are specialized in transactions of this type, such as banks, brokers and insurance companies, as well as authorized and recognized central counterparties and central securities depositories that guarantee the proper execution of the security lending transactions.
4. If the fund management company, or the Lending Agent on its behalf, must observe a notice period, which may not be more than 7 bank working days, before it can legally dispose of the loaned securities again, it may not lend more than 50% of the eligible holding of a particular security per sub-fund. However, if the borrower or the intermediary provides the fund management company, or the Lending Agent on its behalf, with a contractual assurance that the latter may legally dispose of the securities lent on the same or next bank working day, the entire holdings of particular instrument type eligible for lending may be lent. There is always such a contractual commitment for securities lending performed by the Lending Agent.
5. The fund management company, or the Lending Agent on its behalf, shall conclude an agreement with the borrower or intermediary whereby the latter shall pledge or transfer collateral pursuant to Art. 51 CISO-FINMA to the fund management company, or the Lending Agent on its behalf, for the purposes of guaranteeing restitution. The value of the collateral must be appropriate and at all times be at least equal to the market value of the loaned securities. The issuer of the collateral must have a high credit rating and the collateral shall not be issued by the counterparty or a company belonging to or depending of the group of companies of the counterparty. The collateral must be highly liquid, traded at a transparent price on an exchange or other regulated market open to the public and valued at least on every exchange trading day. When managing the collateral, the fund management company and/or its agents must comply with the obligations and requirements pursuant to Art. 52 CISO-FINMA. In particular, they must adequately diversify the collateral in respect of countries, markets and issuers, whereby an appropriate diversification of issuers shall be assumed, if the collateral issued by any single issuer does not account for more than 20% of net asset value of a sub-fund, subject to exemptions for publicly guaranteed or issued investments pursuant to Art. 83 CISO. Further, in the event of default by the counterparty, the fund management company and/or its agents must be able to obtain at any time the power of disposal and the right for disposal over the collateral received without involving the counterparty or obtaining its consent. The collateral received shall be kept safe with the custodian bank. The collateral received may be held on behalf of the fund management company with a regulated third party depository provided the ownership on the collateral is not transferred and the third party depository is independent of the counterparty.
6. The borrower or intermediary is liable for ensuring the prompt, unconditional payment of any income accruing during the lending period, as well as for the assertion of other proprietary rights and for the contractually agreed return of securities of the same type, quantity and quality.

7. The custodian bank shall ensure that the securities lending transactions are handled in a secure manner in line with the agreements and in particular shall monitor compliance with the requirements relating to collateral. Throughout the duration of the lending transactions it shall also be responsible for the administrative duties assigned to it under the custody account regulations and for asserting all rights associated with the loaned securities, provided these have not been ceded under the terms of an applicable framework agreement.
8. Under the terms of the written agreement between the fund management company and the Lending Agent, the Lending Agent is appointed to manage the securities lending activities of the relevant sub-funds and is entitled to share in the revenue earned from such activities. The income earned from securities lending will be allocated between the relevant sub-funds and the Lending Agent at normal commercial rates. The Lending Agent's agreed revenue share is currently 37.5% of the total income generated from securities lending. The Lending Agent must meet all costs and expenses associated with securities lending out of this share. The remaining income, 62.5%, will be paid to the relevant sub-funds and used in accordance with the relevant investment policy. This revenue share may change, subject to the fund management company being satisfied that any new terms reflect normal commercial rates. Financial information with respect to securities lending for the sub-funds will be included in the annual reports and audited financial statements. The fund management company will, at least annually, review the securities lending arrangements and associated costs.
9. The prospectus contains additional information on the collateral strategy.

§ 11 Securities Repurchase Agreements

1. For the account of the sub-funds, the fund management company may enter into repurchase agreements. Repurchase agreements can be concluded as either "repos" or "reverse repos".

A "repo" is a legally binding transaction whereby one party (the borrower or repo seller) undertakes to temporarily transfer ownership of specific securities to another (the lender or repo buyer) against remuneration, while the lender undertakes to return to the borrower securities of the same type, quantity and quality at the end of the repo term together with any income earned during such term. The price risk associated with the securities shall be borne by the borrower for the duration of the repo transaction.

From the perspective of the counterparty (lender or repo buyer), a "repo" is a "reverse repo". By means of a "reverse repo", the lender acquires securities for investment purposes and at the same time agrees to return securities of the same type, quantity and quality and to transfer all income received during the term of the reverse repurchase agreement.

2. The fund management company may conclude repurchase agreements in its name and for the account of the sub-funds (as principal) or appoint an intermediary (as agent) to conclude repurchase agreements with a counterparty. The fund management company appoints the asset manager, BlackRock Advisors (UK) Limited, as the agent (the "Repo Agent").
3. The fund management company, or the Repo Agent on its behalf, shall only carry out repurchase transactions with first-class, regulated borrowers or intermediaries which are specialized in transactions of this type, such as banks, brokers and insurance companies, as well as authorized and recognized central counterparties and central securities depositories that guarantee the proper execution of the repurchase transactions.
4. The custodian bank shall ensure that the repurchase agreements are conducted in a secure manner and that the contractual terms are complied with. It shall ensure that fluctuations in the value of the securities used in the repo transactions are daily compensated in cash or securities (mark to market). Throughout the duration of the repurchase agreement, it is also responsible for the administrative duties assigned to it under the custody account regulations and for asserting all rights pertaining to the securities used in the repo transactions, provided these have not been ceded under the terms of an applicable framework agreement.
5. For repo transactions, the fund management company, or the Repo Agent on its behalf, may use all types of securities which are traded on a stock exchange or other regulated market open to the public. It may not use securities acquired under a reverse repo for repo transactions.
6. If the fund management company, or the Repo Agent on its behalf, must observe a notice period, which may not be more than 7 bank working days, before it can legally dispose of the securities used in a repo transaction again, it may not lend more than 50% of the particular type of security eligible for repo transactions. However, if the lender provides the fund management company, or the Repo Agent on its behalf, with a contractual assurance that the latter may legally dispose over the securities used in the repo transaction on the same or next bank working day, the entire holdings of a particular type of security eligible for repo transactions may be used.
7. Concluding repo transactions is deemed to be borrowing pursuant to § 13, unless the money received is used to acquire securities of the same type, quality, creditworthiness and maturity in conjunction with the conclusion of a reverse repo.
8. With regard to "reverse repos", the fund management company, or the Repo Agent on its behalf, may only acquire collateral pursuant to Art. 51 CISO-FINMA. The issuer of the collateral must have a high credit rating and the collateral shall not be issued by the counterparty or a company belonging to or depending on the group of companies of the counterparty. The collateral must be highly liquid, traded at a transparent price on an exchange or other regulated market open to the public and valued at least on every exchange trading day. When managing the collateral, the fund management company and/or its agents must comply with the obligations and requirements pursuant to Art. 52 CISO-FINMA. In particular, they must adequately diversify the collateral in respect of countries, markets and issuers, whereby an appropriate diversification of issuers shall be assumed, if the collateral issued by any single issuer does not account for more than 20% of net asset value of a sub-fund, subject to exemptions for publicly guaranteed or issued investments pursuant to Art. 83 CISO. Further, in the event of default by the counterparty, the fund management company and/or its agents must be able to obtain at any time the power of disposal and the right for disposal over the collateral received without involving the counterparty or obtaining its consent. The collateral received shall be kept safe with the custodian bank. The collateral received may be held on behalf of the fund management company with a regulated third party depository provided the ownership on the collateral is not transferred and the third party depository is independent of the counterparty.
9. Claims arising from "reverse repos" are deemed to be liquid assets pursuant to § 9 and not lending (*Kreditgewährung*) pursuant to § 13.
10. The prospectus contains additional information on the collateral strategy.

§ 12 Derivatives

1. The fund management company may use derivatives. It shall ensure that, even under extreme market circumstances, the financial effect of the use of derivatives does not result in a deviation from the investment objectives set out in the fund contract, the prospectus and in the key investor information documents (KIID) or that it does not change the investment character of the subfunds. Furthermore, the underlying asset of the derivatives must be permitted as investments according to the present fund contract. In connection with collective investment schemes, derivatives may only be used for currency hedging purposes. The option of hedging market, interest-rate and credit risks in collective investment schemes is reserved provided the risks are clearly identifiable and measurable.
2. Commitment Approach I shall be applied for the assessment of risk. The use of derivatives where account is taken of the necessary coverage set out in this paragraph does not result in a leverage effect on the subfunds' assets, nor does it correspond to short selling.
- 2.1. Only basic types of derivative may be used. These comprise:
 - a) Call or put options whose value at expiration is linearly dependent on the positive or negative difference between the market value of the underlying and the strike price and is zero if the difference is preceded by the opposite algebraic sign;

- b) Swaps whose payments are dependent on the value of the underlying or on an absolute amount in both a linear and a path-independent manner;
- c) Future and forward transactions whose value is linearly dependent on the value of the underlying.
- 2.2. The financial effect of the derivatives is similar to either a sale (exposure-reducing derivative) or a purchase (exposure-increasing derivative) of an underlying security.
- 2.3.
 - a) In the case of exposure-reducing derivatives, the arising obligations subject to sections b) and d) must be covered at all times by the underlyings of the derivative.
 - b) Cover with investments other than the underlyings shall be permitted in the case of exposure-reducing derivatives that relate to an index which is
 - calculated by an independent external office;
 - representative of the investments serving as cover;
 - sufficiently well correlated with these investments.
 - c) The fund management company must have unrestricted access to these underlyings or investments at all times.
 - d) An exposure-reducing derivative can be weighted by the delta in the calculation of the corresponding underlyings.
- 2.4. In the case of exposure increasing derivatives, the equivalent underlying asset of a derivative position must at all times be covered by near-money assets in accordance with Art. 34 Abs. 5 CISO-FINMA. In the case of futures, options, swaps and forwards the equivalent underlying asset is determined in accordance to Appendix 1 of CISO-FINMA.
- 2.5. The fund management company must take account of the following rules when offsetting derivative positions:
 - a) Offsetting (*Gegenläufige*) transactions in derivatives of the same underlying as well as offsetting positions in derivatives and in investments of the same underlying may be offset regardless of the expiration of derivatives ("netting"), provided the derivative transaction was concluded solely for the purpose to eliminate the risks related to the acquired derivatives or investments, the key risks are not neglected and the capital requirement (*Anrechnungsbetrag*) of the derivatives is calculated according to Art. 35 CISO-FINMA.
 - b) In case where derivatives in hedging transactions do not refer to the same underlying as the hedged asset, in addition to the rules under let. a) above, the following conditions must be met for offsetting ("Hedging"): The derivative transactions may not be based on an investment strategy which aims for profit. In addition, the derivative must lead to a demonstrable reduction in the risk. The risks of the derivative must be balanced. The derivatives to be offset, underlyings or assets must refer to the same class of financial instruments and the hedging strategy must be effective even under extraordinary market conditions.
 - c) Derivatives, which are used for pure hedging of foreign currency risks and which do not result in a leverage effect, or include additional market risks, can be offset without the requirements as specified under let. b) above for the calculation of total exposure from derivatives.
 - d) Covered hedging transactions through interest rate derivatives are permitted. Convertible bonds can be ignored when calculating the exposure arising from derivatives.
- 3. The fund management company may use both standardized and non-standardized derivatives. It may conclude transactions in derivative financial instruments on an exchange or another regulated market open to the public or in OTC (over-the-counter) trading.
- 4.
 - a) The fund management company may conclude OTC transactions only with regulated financial intermediaries specialized in such types of transactions that ensure proper execution of the contract. If the counterparty is not the custodian bank, the former or its guarantor must meet a high credit rating.
 - b) It must be possible to reliably and verifiably value an OTC derivative on a daily basis and to sell, liquidate or close out the derivative at market value at any time.
 - c) If no market price is available for an OTC- derivative, it must be possible to determine the price at any time by using an appropriate and recognized in practice valuation model, based on the market value of the underlyings from which the derivative was derived. Prior to the conclusion of such derivative contract, specific offers must generally be obtained from at least two potential counterparties, whereby the contract is to be concluded with the counterparty providing the most favorable offer in terms of price. Deviations from this principle are possible for reasons relating to risk diversification, or where other parts of the contract such as credit rating or the range of services offered by the counterparty deem another offer more advantageous overall for the investors. Moreover, provided this is in the best interest of investors, obtaining offers from at least two potential counterparties may exceptionally be omitted. The reasons for this as well as the conclusion of the transaction and pricing shall be documented in a transparent manner.
 - d) The fund management company and/or its agents may in connection with OTC-transactions only accept collateral that meets the requirements set out in Art. 51 CISO-FINMA regarding collateral. The issuer of the collateral must have a high credit rating and the collateral shall not be issued by the counterparty or a company belonging to or depending of the group of companies of the counterparty. The collateral must be highly liquid, traded at a transparent price on an exchange or other regulated market open to the public and valued at least on every exchange trading day. When managing the collateral, the fund management company and/or its agents must comply with the obligations and requirements pursuant to Art. 52 CISO-FINMA. In particular, they must adequately diversify the collateral in respect of countries, markets and issuers, whereby an appropriate diversification of issuers shall be assumed, if the collateral issued by any single issuer does not account for more than 20% of net asset value of a sub-fund, subject to exemptions for publicly guaranteed or issued investments pursuant to Art. 83 CISO. Further, in the event of default by the counterparty, the fund management company and/or its agents must be able to obtain at any time the power of disposal and the right for disposal over the collateral received without involving the counterparty or obtaining its consent. The collateral received shall be kept safe with the custodian bank. The collateral received may be held on behalf of the fund management company with a regulated third party depository provided the ownership on the collateral is not transferred and the third party depository is independent of the counterparty.
- 5. In respect of compliance with the statutory and contractual investment restrictions (maximum and minimum limits), derivatives shall be taken into account in accordance with the legislation on collective investment schemes.
- 6. The prospectus contains further information on:
 - the importance of derivatives as part of the investment strategy;
 - the effect of the use of derivatives on the risk profile of the respective subfund;
 - the counterparty risks of derivatives;
 - (where applicable) the credit derivatives;
 - the collateral strategy.

§ 13 Taking Up and Extending Loans

1. The fund management company may not grant loans for the subfunds' account. Securities lending transactions pursuant to § 10 and securities repurchase agreements taking the form of reverse repos pursuant to § 11 are not deemed to be loans within the meaning of this clause.

2. Unless otherwise stipulated by the investment policy of the individual subfunds, the fund management company may for each subfund temporarily borrow the equivalent of up to 25% of the net assets of said subfund. Securities repurchase agreements as repos pursuant to § 11 are deemed to be borrowing within the meaning of this clause unless the funds obtained are used as part of an arbitrage transaction for the acquisition of securities of the same type, quality, credit rating and maturity in connection with a reverse repo.

§ 14 Encumbrance of the Subfunds' Assets

1. No more than 60% of any subfund's net assets may be pledged or ownership thereof transferred as collateral by the fund management company at the expense of the subfund concerned.
2. The subfunds' assets may not be encumbered with guarantees.

C Investment Restrictions

§ 15 Risk Diversification

1. The regulations on risk diversification pursuant to § 15 shall include the following:
 - a) investments as per § 8;
 - b) liquid assets as per § 9;
 - c) derivative financial instruments pursuant to § 12, with the exception of index-based derivatives, provided the index is sufficiently diversified, is representative of the market it relates to and is published in an appropriate manner;
 - d) claims against counterparties arising from OTC transactions.

Equity Index Exchange Traded Funds

- a) iShares SLI® (CH)
- b) iShares SMI® (CH)
- c) iShares SMIM® (CH)
- d) iShares Swiss Dividend (CH)
- e) iShares Core SPI® (CH)

The regulations on risk distribution apply to each subfund individually.

2. Companies which are classified as a group under international accounting rules shall be regarded as one issuer.
3. The weighting of assets pursuant to prov. 1 for each issuer/borrower in the respective subfund shall match the weighting in the corresponding benchmark index as closely as possible.
iShares SLI® (CH) is subject to the additional requirement that the weighting of the individual securities included in the SLI® is limited by a capping model. A more precise description of the model is given in the prospectus.
4. In relation to the holding of liquid assets pursuant to § 9, the fund management company may not invest more than 20% of a subfund's total assets in on-call and term deposits with a single bank.
5. The fund management company may invest up to a maximum of 5% of the assets of a subfund in OTC transactions with the same counterparty. If the counterparty is a bank domiciled in Switzerland or in a member state of the European Union or another country in which it is subject to supervision equivalent to that in Switzerland, this limit shall be increased to 10% of the assets of the subfund concerned.
6. The fund management company may not acquire equity securities which in total represent more than 10% of the voting rights in a company or which would enable it to exert a material influence on the management of an issuing company, unless special authorization is granted by the supervisory authority.
7. The fund management company may acquire for a subfund's assets up to 10% of the non-voting equity instruments of a single issuer.

Bond Index Exchange Traded Funds

- f) iShares Swiss Domestic Government Bond 1-3 (CH)
- g) iShares Swiss Domestic Government Bond 3-7 (CH)
- h) iShares Swiss Domestic Government Bond 7-15 (CH)

The regulations on risk distribution apply to each subfund individually.

8. These subfunds are assigned to the "Other funds for traditional investments" category. In the context of tracking the respective Swiss Bond Index Domestic Government® index in accordance with § 8 prov. 3 let. f), g) and h) of the fund contract, it is possible that only a small number of securities will be held in a particular subfund, in which case no consideration need be given to either the minimum number of issues or a maximum investment volume for the holding of securities from the same issue. The weighting of assets pursuant to prov. 1 in the respective subfund shall match the weighting in the corresponding benchmark index as closely as possible. This may lead to a concentration of the fund's assets in a small number of securities contained in the index.
Debt instruments which amount to more than 20% of the volume of the respective issue may not be acquired for the subfunds.
9. In relation to the holding of liquid assets pursuant to § 9, the fund management company may not invest more than 20% of a subfund's total assets in on-call or term deposits with a single bank.
10. The fund management company may invest up to a maximum of 5% of the assets of a subfund in OTC transactions with the same counterparty. If the counterparty is a bank domiciled in Switzerland or in a member state of the European Union or another country in which it is subject to supervision equivalent to that in Switzerland, this limit shall be increased to 10% of the assets of the subfund concerned.
Where the claims arising from OTC transactions are hedged using collateral in the form of liquid assets pursuant to Art. 50 to 55 CISO-FINMA, such claims are not included in the calculation of counterparty exposure.

Bond Index Exchange Traded Funds

- i) iShares Core CHF Corporate Bond (CH)

The regulations on risk distribution apply to this subfund.

11. Companies which are classified as a group under international accounting rules shall be regarded as one issuer.
12. This subfund is assigned to the "Other funds for traditional investments" category. The weighting of the assets in accordance with prov. 1 of the present § 15 is based on the use of the optimized sampling approach specified in § 8 prov. 3 let. i). In some cases, the subfund may invest in a representative selection of securities from the benchmark index rather than in all the securities in the index. Debt instruments which amount to more than 20% of the volume of the respective issue may not be acquired for the subfunds.
13. Including derivatives, the fund management company may invest up to a maximum of 20% of the subfund's assets in securities issued by the same issuer. The total value of the securities of issuers in which more than 5% of the fund's assets are invested may not exceed 40% of the subfund's assets, subject to the provisions in provs. 14 and 15 below.
14. In relation to the holding of liquid assets pursuant to § 9, the fund management company may not invest more than 20% of a subfund's total assets in sight and time deposits with a single bank.

15. The fund management company may invest up to a maximum of 5% of the assets of the subfund in OTC transactions with the same counterparty. If the counterparty is a bank domiciled in Switzerland or in a member state of the European Union or another country in which it is subject to supervision equivalent to that in Switzerland, this limit shall be increased to 10% of the assets of the subfund. Where the claims arising from OTC transactions are hedged using collateral in the form of liquid assets pursuant to Art. 50 to 55 CISO-FINMA, such claims are not included in the calculation of counterparty exposure.
16. Investments, credit balances and claims with the same issuer and/or borrower pursuant to provs. 13–15 above may not exceed a total of 20% of the subfund's assets, with the exception of the higher limits stated in provs. 20 and 21 below.
17. Investments pursuant to prov. 13 above of the same group of companies may not in total exceed 20% of the subfund's assets, with the exception of the higher limits stated in provs. 20 and 21 below.
18. The Management Company may acquire for the subfund's assets no more than 10% of the non-voting equity instruments, debt instruments and/or money market instruments of the same issuer. These restrictions do not apply if the gross amount of the debt instruments or money market instruments cannot be calculated at the time of the acquisition.
19. The restrictions in prov. 18 above do not apply to securities and money market instruments which are issued or guaranteed by a state or a public-law entity in an OECD country or by international organizations with public-law characteristics to which Switzerland or a European Union member state belong.
20. The limit in prov. 13 above is increased from 20% to 35% if the securities or money market instruments are issued or guaranteed by an OECD country, by a public-law entity from the OECD, or by an international public-law organization to which Switzerland or a member state of the European Union belongs. The aforementioned securities or money market instruments will not be taken into account in the application of the 40% limit pursuant to prov. 13. However, the individual limits described in points 13 and 15 above may not be accumulated with the existing limit of 35%.
21. The limit in prov. 13 above is increased from 20% to 100% if the securities or money market instruments are issued or guaranteed by an OECD country, or by a public-law entity from the OECD, or by an international public-law organization to which Switzerland or a member state of the European Union belongs. In this case, the subfund concerned must invest in securities or money market instruments from at least six different issues; no more than 30% of the assets of the respective subfund concerned may be invested in securities or money market instruments from the same issue. The aforementioned securities or money market instruments will not be taken into account in the application of the 40% limit pursuant to prov. 13.

IV. Calculation of the Net Asset Value and Issue and Redemption of Units

§ 16 Calculation of the Net Asset Value

1. The net asset value of each subfund is calculated in Swiss francs at the market value as of the end of the financial year and for each day on which units are issued or redeemed. The subfund's assets will not be calculated on days when the stock exchanges / markets in the main investment countries of the subfund concerned are closed (e.g. bank and stock exchange holidays).
2. Securities traded on a stock exchange or another regulated market open to the public shall be valued at the closing prices of the main market on the order day. Other investments or investments for which no current market value is available shall be valued at the price which would probably be obtained in a diligent sale at the time of the valuation. In such cases, the fund management company shall use appropriate and recognized valuation models and principles to determine the market value.
3. The net asset value of a unit of a subfund is determined by the market value of that subfund's assets, minus all that subfund's liabilities, divided by the number of units of that subfund in circulation. It will be rounded up or down to four places after the decimal point of the unit of account.

§ 17 Issue and Redemption of Units

1. Subscription and redemption orders for units are accepted up to a certain cut-off time specified in the prospectus on the day the orders are placed. The definitive price of the units for the issues and redemptions is determined in line with the "forward pricing" principal. Details are set out in the prospectus.
2. The issue and redemption price of units is based on the net asset value per unit on the valuation day calculated on the basis of the relevant closing prices pursuant to § 16 and as specified further in the table of the prospectus. Incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) effectively incurred by a subfund in connection with the investment of the amount paid in, or with the sale of that portion of investments corresponding to the redeemed unit(s), will be charged to that subfund's assets. When units are issued, the incidental costs incurred by the subfund concerned in connection with the investment of that portion of investments corresponding to the amount paid in will be added to the net asset value. When units are redeemed, the incidental costs incurred by the subfund concerned in connection with the sale of a portion of investments corresponding to the redeemed units will be deducted from the net asset value. The applicable maximum rate is stated in the table at the end of the prospectus. Furthermore, in the case of unit issues, an issuing commission may be added to the net asset value pursuant to § 18 and in the case of unit redemptions, a redemption commission may be deducted from the net asset value pursuant to § 18.
3. The fund management company may suspend the issue of units at any time, and may reject applications for the subscription or switching of units.
4. The fund management company may temporarily and by way of exception defer repayment in respect of units of a subfund in the interests of all investors:
 - a) if a market which is the basis for the valuation of a significant proportion of the assets of the subfund concerned is closed, or if trading on such a market is restricted or suspended;
 - b) in the event of a political, economic, military, monetary or other emergency;
 - c) if, owing to exchange controls or restrictions on other asset transfers, the subfund can no longer transact its business;
 - d) in the event of large-scale redemptions of units of the subfund that could significantly affect the interests of the remaining investors of this subfund.
5. The fund management company shall immediately apprise the auditors and the supervisory authority of any decision to suspend redemptions.
6. The issue of units of a subfund shall be suspended for as long as the redemption of units of this subfund is delayed on the grounds referred to under prov. 4 a) to c).

V. Fees and Incidental Costs

§ 18 Fees and Incidental Costs Charged to the Investor

1. In the case of unit issues, investors will be charged an issuing fee of up to 5% of the net asset value, such fees accruing to the fund management company. This also applies to individual subscriptions made as part of any kind of fund investment program; in such cases, no additional costs incurred for individual instalments may be charged. The currently relevant maximum applicable rate is stated in the prospectus.
2. On the redemption of fund units, the investors will be charged a redemption commission accruing to the fund management company of up to 3% of the net asset value of the subfunds. This also applies to redemptions made as part of any kind of fund investment program; in such cases,

no additional costs incurred for individual withdrawals may be charged. The currently relevant maximum applicable rate is stated in the prospectus.

3. a) The following applies to the issue and redemption of units in the subfunds:

Equity Index Exchange Traded Funds

- a) iShares SLI® (CH)
- b) iShares SMI® (CH)
- c) iShares SMIM® (CH)
- d) iShares Swiss Dividend (CH)
- e) iShares Core SPI® (CH)

Bond Index Exchange Traded Funds

- f) iShares Swiss Domestic Government Bond 1-3 (CH)
- g) iShares Swiss Domestic Government Bond 3-7 (CH)
- h) iShares Swiss Domestic Government Bond 7-15 (CH)

The fund management company shall charge the incidental costs for the purchase and sale of investments (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) incurred by the subfund through the investment or sale of a portion of the investments as a result of subscriptions or redemptions, this accruing to the assets of the subfund concerned (cfr. § 17 prov. 2). The maximum applicable rate is stated in the table at the end of the prospectus. If the actual incidental costs are not known at the time of the subscription or redemption of units, the costs incurred on average by the purchase and sale of the investments will be charged to the investor.

- b) The following applies to the issuing and redemption of units in the subfund

Bond Index Exchange Traded Funds

- i) iShares Core CHF Corporate Bond (CH)

The fund management company shall charge the incidental costs for the purchase and sale of investments (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) incurred by the subfund through the investment or sale of a portion of the investments as a result of subscriptions or redemptions, this accruing to the assets of the subfund concerned.

The issue price corresponds to the net asset value calculated on the valuation day, plus any incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) incurred by the corresponding subfund in connection with the investment of the amount paid in, plus the issuing commission. The maximum amounts for the incidental costs and the issuing commission are set out in the table at the end of the prospectus.

The redemption price corresponds to the net asset value calculated on the valuation day, less any incidental costs (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs)) incurred by the corresponding subfund in connection with the sale of that portion of investments corresponding to the redeemed unit(s), less the redemption commission. The maximum amounts for the incidental costs and the redemption commission are set out in the table at the end of the prospectus.

The fund management company may on the request of an investor in the primary market charge incidental costs on the basis of a fixed rate ("fixed issue and redemption fees") provided that the investment or sale of the net amount of subscriptions or redemptions received on an order day for which the charges of the incidental costs was chosen to be on a fixed rate basis have no significant negative effect on the subfund's assets ("net" means the difference between the subscription and redemption requests on the relevant order day).

Fixed issue and redemption fees may be set at a different rate for subscriptions and redemptions. The maximum applicable rates for the fixed issue and redemption fees and for the effective incidental costs are shown in the table at the end of the prospectus.

The indicative threshold value of net subscriptions and redemptions that can be executed at a fixed rate of costs, and the rate for fixed issue and redemption fees, are established daily and available from the fund management company on request. Calculation of the indicative threshold value and the rate for fixed issue and redemption fees takes account of the incidental costs that are expected to be incurred on average from the investment or sale of the corresponding portion of the assets on the day in question.

The fund management company has delegated the setting of an indicative threshold value and the rate for fixed issue and redemption fees to BlackRock Advisors (UK) Limited, London.

4. For the distribution of liquidation proceeds in the event of the subfund's dissolution, investors may be charged a commission of 0.5% of the net asset value of their units.

§ 19 Fees and Incidental Costs Charged to the Subfunds' Assets

1. For the administration, asset management and distribution of the subfunds as well as all tasks performed by the custodian bank (such as safekeeping of the fund assets, the handling of payment transactions) and other tasks listed under § 4, the fund management company shall charge the subfunds a flat fee not exceeding 1,00% p. a. of the subfund's net asset value, to be charged to the fund assets on a pro rata basis every time the net asset value is calculated, and paid out at the end of each quarter.
The rate of the flat fee actually charged is stated in the table at the end of the prospectus and can also be found in the annual and semi-annual reports.
2. The following fees and incidental costs of the fund management company and the custodian bank are not included in the flat fee and may be charged additionally to the respective subfunds assets:
 - a. costs for the purchase and sale of the investments, (such as standard brokerage charges, commission, taxes and duties, transaction costs (such as execution and slippage costs));
 - b. all costs incurred as a result of extraordinary steps taken by the fund management company, the asset manager of collective investment schemes or the custodian bank to safeguard investors' interests.
3. The fund management company, its agents and the custodian bank generally do not pay retrocessions as remuneration for distribution activity in respect of fund units in or from Switzerland. They may however use some of its fees to pay for selected services in certain situations. For example, the fund management company may pay third parties to facilitate joint marketing initiatives, to train and educate clients and client advisers, to report on trading in the secondary market, and to provide access to fund holding data which is otherwise unavailable. The prospectus

shall contain further information whether and, if applicable, under which further conditions such fees may be paid. Moreover, the fund management company, its agents and the custodian bank may pay rebates pursuant to the provisions of the prospectus in order to reduce the attributable to the investor and charged to the respective subfund's fees and costs.

4. If the fund management company acquires units of other collective investment schemes that are managed directly or indirectly by the fund management company itself or a company with which it is related by virtue of common management or control or by way of a significant direct or indirect stake ("related target funds"), no issuing or redemption commissions of the related target funds may be charged to the umbrella fund and subfunds.

VI. Financial Statements and Audits

§ 20 Financial Statements

1. The accounting currencies of the individual subfunds are set out in the table at the end of the prospectus.
2. The financial year runs from June 1 until May 31 of the following year. The first financial year of the subfunds iShares Swiss Dividend (CH), iShares Core SPI® (CH) and iShares Core CHF Corporate Bond (CH) runs until May 31, 2015.
3. The fund management company shall publish an audited annual report for the umbrella fund and subfunds respectively within four months of the end of the financial year.
4. The fund management company shall publish a semi-annual report for the umbrella fund and subfunds respectively within two months following the end of the first half of the financial year.
5. The investor's right to obtain information under § 5 prov. 4 is reserved.

§ 21 Audits

The auditors shall each year examine whether the fund management company and the custodian bank have acted in compliance with the legal and contractual provisions and the code of conduct of the Swiss Funds & Asset Management Association SFAMA. The annual report shall contain a short report by the auditors on the published annual financial statements.

VII. Treatment of Net Income

§ 22

1. The net income of the individual subfunds shall be distributed annually to the investors within four months of the end of the financial year in the fund's unit of account, the Swiss franc.
The fund management company may make additional interim distributions from the income.
Up to 30% of the net income may be carried forward to the new account. If the net income in a financial year, including income carried forward from previous financial years, is less than 1% of the net assets of a subfund and less than CHF 1, USD 1, EUR 1 or JPY 100 per unit (depending on reference currency), a distribution may be waived and the entire net income may be carried forward to the following financial year.
2. Capital gains realized on the sale of assets, rights and capital repayments by underlying securities can be distributed by the fund management company or retained for the purpose of reinvestment.

VIII. Publication of Official Notices by the Umbrella Fund and Subfunds

§ 23

1. The medium of publication of the umbrella fund and subfunds is deemed to be the print medium or electronic medium specified in the prospectus. Notification of any change in the medium of publication shall be published in the medium of publication.
2. The following information shall in particular be published in the medium of publication: summaries of material amendments to the fund contract, indicating the offices from which the amended wording may be obtained free of charge, any change of fund management company and/or custodian bank, the creation, dissolution or merger of unit classes, as well as the liquidation of the umbrella fund or of the subfunds. Amendments that are required by law that do not affect the rights of investors or are of an exclusively formal nature may be exempted from the duty to publish subject to the approval of the supervisory authority.
3. Each time units are issued or redeemed, the fund management company shall publish both the issue and the redemption prices or the net asset value together with a footnote "excluding commissions" in the medium of publication specified in the prospectus. The prices shall be published at least twice per month.
4. The prospectus, including the fund contract and the key investor information document (KIID) and also the annual and semi-annual reports, may be obtained free of charge from the fund management company, the custodian bank and all selling agents.

IX. Restructuring and Dissolution

§ 24 Mergers

1. Subject to the consent of the custodian bank, the fund management company can merge individual subfunds with other subfunds or other investment funds by transferring – as of the time of the merger – the assets and liabilities of the subfund(s) or fund(s) being acquired to the acquiring subfund or fund. The investors of the subfund(s) or fund(s) being acquired shall receive the corresponding number of units in the acquiring subfund or fund. The subfund(s) or fund(s) being acquired is/are terminated without liquidation when the merger takes place, and the fund contract of the acquiring subfund or fund shall also apply for the subfund(s) or fund(s) being acquired.
2. Subfunds and funds may be merged only if:
 - a) provision for this is made in the relevant fund contracts;
 - b) they are managed by the same fund management company;
 - c) the relevant fund contracts are basically identical in terms of the following provisions:
 - the investment policy, investment techniques, risk diversification, as well as the risks associated with the investment
 - the appropriation of net income and capital gains from the sale of assets and rights
 - the type, amount and calculation of all fees, the issue and redemption commission together with the incidental costs for the purchase and sale of the investments (brokerage fees, charges, duties) that may be charged to the assets of the funds or subfunds or to the investors
 - the redemption conditions
 - the duration of the contract and the conditions of dissolution;
 - d) the assets of the funds concerned are valued, the exchange ratio is calculated, and the assets and liabilities are acquired on the same day;
 - e) no costs shall arise as a result for either the funds or subfunds or the investors.

3. If the merger is likely to take more than one day, the supervisory authority may approve limited deferment of repayment in respect of the units of the funds or subfunds involved.
4. The fund management company must submit the proposed merger together with the merger schedule to the supervisory authority for review at least one month before the planned publication of the intended changes to the fund contract. The merger schedule must contain information on the reasons for the merger, the investment policies of the funds or subfunds involved and any differences between the acquiring fund or subfund and the fund(s) or subfund(s) being acquired, the calculation of the exchange ratio, any differences with regard to fees and any tax implications for the funds or subfunds, as well as a statement from the competent statutory auditors for collective investment schemes.
5. The fund management company must publish a notice of the proposed changes to the fund contract pursuant to § 23 prov. 2 and the proposed merger and its timing together with the merger schedule at least two months before the planned date of merger in the medium of publication of the subfunds or funds involved. In this notice, it must inform the investors that they may lodge objections against the proposed changes to the fund contract with the supervisory authority within 30 days of the publication of the notice, or request redemption of their units.
6. The auditors must check directly that the merger is being carried out correctly, and shall submit a report containing their comments in this regard to the fund management company and the supervisory authority.
7. The fund management company shall inform the supervisory authority of the conclusion of the merger and shall publish notification of the completion of the merger, the confirmation from the auditors regarding the proper execution of the merger and the exchange ratio without delay in the medium of publication of the funds or subfunds involved.
8. The fund management company must make reference to the merger in the next annual report of the acquiring fund or subfund and in the semi-annual report if published prior to the annual report. If the merger does not take place on the last day of the usual financial year, an audited closing statement must be produced for the fund(s) or subfund(s) being acquired.

§ 25 Duration of the Subfunds and Dissolution

1. The individual subfunds have been established for an indefinite period.
2. The fund management company or the custodian bank may dissolve some or all of the subfunds by terminating the fund contract without notice.
3. The subfund may be dissolved by order of the supervisory authority, in particular if at the latest one year after the expiry of the subscription period (launch) or a longer extended period approved by the supervisory authority at the request of the custodian bank and the fund management company it does not have net assets of at least CHF 5 million (or the equivalent).
4. The fund management company shall inform the supervisory authority of the dissolution immediately and shall publish notification in the medium of publication.
5. Once the fund contract has been terminated, the fund management company may liquidate the subfund forthwith. If the supervisory authority has ordered the dissolution of the subfund, it must be liquidated forthwith. The custodian bank is responsible for the payment of liquidation proceeds to the investors. If the liquidation proceedings are protracted, payment may be made in installments. Prior to the final payment, the fund management company must obtain authorization from the supervisory authority.

X. Changes to the Fund Contract

§ 26

If changes are made to the present fund contract, or if a change of the fund management company or of the custodian bank is planned, the investors may lodge objections with the supervisory authority within 30 days of the corresponding publication. In this publication, the fund management company informs investors which amendments to the fund contract are covered by FINMA's verification and ascertainment of compliance with the Act. In the event of a change to the fund contract, the investors can also demand the redemption of their units in cash subject to the contractual period of notice. Exceptions in this regard are cases pursuant to § 23 prov. 2 that have been exempted from the duty to publish with the approval of the supervisory authority.

XI. Applicable Law and Place of Jurisdiction

§ 27

1. The umbrella fund and the individual subfunds are subject to Swiss law, in particular the Swiss Federal Act on Collective Investment Schemes of June 23, 2006 (CISA), the Ordinance on Collective Investment Schemes of November 22, 2006 (CISO) and the Ordinance of the Swiss Financial Market Supervisory Authority on Collective Investment Schemes of 27 August 2014 (CISO-FINMA).
The court of jurisdiction is the court at the fund management company's registered office.
2. When approving the fund contract or any amendment to the fund contract, FINMA exclusively examines the provisions pursuant to Art. 35a (1) a-g CISO and establishes whether they comply with the law.
3. For the interpretation of the fund contract, the German-language version shall be binding.
4. The present fund contract takes effect on 5 February 2016.
5. The present fund contract replaces the fund contract dated 8 December 2014.

Date of approval of the fund contract by the Swiss Financial Market Supervisory Authority FINMA: 5 February 2016.
