## Investment overview

### OBJECTIVE

To increase the value of your investment.

### PORTFOLIO ASSETS

The Compartment mainly invests in equities of companies that are domiciled, or do most of their business, in Japan.

### INVESTMENT PROCESS

In actively managing the Compartment, the investment manager uses fundamental company analysis with a bias towards companies with superior ESG characteristics to select securities that it believes offer favourable growth prospects at a reasonable price (long position) while selling securities of companies that seem to be overvalued

(short position). It also applies an exclusion policy relating to direct investment in issuers that are deemed incompatible with Pictet Asset Management's approach to responsible investment. For further information, please refer to our exclusion framework in the Responsible Investment policy\*. It methodically exercises voting rights and may engage with issuers in order to positively influence ESG practices. The performance of the Compartment is likely to be significantly different from that of the benchmark, because the Investment Manager has significant discretion to deviate from its securities and weightings.

## Value of 100 EUR invested since 28.10.2011 (Net of fees\*)

## Risk considerations

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures.

The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

**Further information can be found in the prospectus.**
