Ongoing charge based on actual expenses for the year ending 30/11/2023. The cost of investing will impact your investment. The return will be reduced by the fees and expenses that may be incurred in managing the investment. Fees may have a compounding effect. Number of holdings represents physical holdings only.

†Yield to worst is calculated at the portfolio level and reflects the most conservative annual yield measure on the current portfolio of bonds, assuming the issuers do not default on payments.

Fund objective

The investment objective is to maximise total return (income plus capital) by investing at least two thirds of its net assets in high yield bonds. The fund may also hold selected investment grade bonds and cash.

Performance

The fund aims to outperform the peer group median, returning second quartile performance over a rolling 12 month period and top quartile performance over a rolling 36 month period.

Performance for the individual share class is also shown against the reference index as detailed in the key facts table.

Past performance does not predict future returns.

Risk factors

For Retail Investors. Capital is at risk.

This fund is a medium to long-term investment and your capital is at risk. Any investment objective, performance benchmark and yield information should not be considered as an assurance or guarantee of the performance of the fund or any part of it. An initial charge reduces the amount available for investment. Investors should be aware that funds denominated in a currency other than investors' home state currency are subject to currency fluctuations which may decrease returns. Please be aware that each fund presents its own risk profile. Material risks for this fund are: Credit; Liquidity; Counterparty; Other Markets; Derivatives; Interest Rate and Concentration. Please read the KIID for an explanation and refer to the prospectus for information about all relevant risks.

Past performance does not predict future returns. Outcomes, including the payment of income, are not guaranteed.

The Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions. We calculate yields in compliance with the industry standard formula we are obliged to use which takes no account of potential future defaults. This may mean that, depending on future economic factors, the actual yield could be less than those shown.

The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions.

This is a marketing communication. Please refer to the Prospectus of the UCITS and to the KIID before making any final investment decisions. The relevant documents can be found at aegonam.com. The principal risk of this product is the loss of capital.
