

Eurizon Fund - Bond EUR Medium Term LTE Z, EUR Accumulation

Data as of 04/30/2024

This Sub-Fund is managed by Eurizon Capital S.A.

NAV (in EUR)	352.49	Fund Size (in EUR)	2,215 mil	Number of Holdings	72
Morningstar Rating TM	★★★★	Fund Manager	Andrea Giannotta		
Morningstar Rating TM referred to 03/29/2024					
Class Unit Inception Date	01/15/2008				

Investment / Performance Objectives & policy

The fund mainly invests in government bonds denominated in euro. The fund generally favours direct investment but may at times invest through derivatives. Specifically, the fund normally invests at least 80% of total net assets in debt and debt-related instruments, including money market instruments, denominated in EUR. The credit rating and duration of securities are usually consistent with those of the benchmark.

The fund may invest in the following asset classes up to the percentages of total net assets indicated:

- corporate debt instruments: 20%

The fund does not invest in asset-backed securities or contingent convertible bonds (coco bonds), but may be indirectly exposed to them (maximum 10% of total net assets). Non-EUR investments are hedged to EUR.

The fund may use derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure.

For more information read the Prospectus or Key Information Document (KID).

Reference period: YTD (year to date) from 01/01/2024 to the date of this reporting. The returns calculations do not take into account taxes applicable to an average professional client in his or her country of residence. When the currency presented differs from yours, there is a currency risk that may result in a decrease in value.

Risk and Reward Profile

The risk indicator assumes you keep the product for 4 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a lower risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you.

For any further details on investment risks, please refer in particular to the Risks section of the Fund's Prospectus.

Portfolio Characteristics

	Portfolio
Weighted Average Coupon	1.77%
Current Yield	1.80%
Average Rating	A+
Yield to Worst*	2.96%

The portfolio Yield to Worst refers only to the component of fixed income and is calculated as a weighted average of returns of the single bond instruments, where the weighting takes place with respect to the value of the individual instrument. Returns hold account of the operating probabilities of the optional components possibly present in the bonds.

Data as of 04/30/2024

Sustainability characteristics

Sovereign ESG integration

Sovereign ESG integration involves processes for selecting government issuers using specific indicators provided by the “Sustainable Development Report”, which assesses each country’s progress in achieving the 17 “Sustainable Development Goals” or “SDGs” promoted by the United Nations and also considers the potentially negative impacts regarding the achievement of these goals; the main negative environmental and social impacts on government issuers are also monitored. At least 70% of the fund’s assets must be invested in such issuers.

Percentage of assets in government issuers meeting the screening criteria

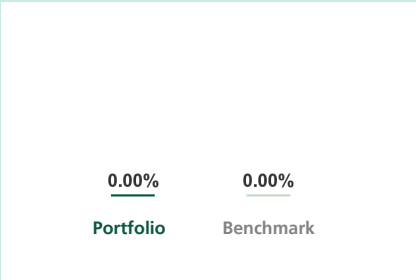

SFDR Category

Article 8

The fund is qualified pursuant to Article 8 of Regulation (EU) 2019/2088; see the Sustainability Report for more details.

Percentage of issuers involved in controversial sectors

Percentage of critical issuers

Values other than zero may be due to (i) discontinued issuers, in the best interest of participants and in accordance with current legislation, (ii) issuers for which an engagement activity is in progress or (iii) indirect exposures.

Source: Internal processing of data provided by MSCI ESG Research
Survey period: 12-month rolling average

Appendix

Percentage of issuers involved in controversial sectors

Issuers operating in sectors deemed controversial (not “socially responsible”), to which restrictions or exclusions apply with respect to the entirety of the individual assets under management, are companies (i) that have a clear direct involvement in the manufacture of unconventional weapons; (ii) at least 25% of whose turnover is generated from thermal coal mining or power generation activities; (iii) at least 10% of whose turnover is generated from the exploitation of oil sands.

More specifically, unconventional weapons are understood as: anti-personnel mines; cluster bombs; nuclear weapons*; impoverished uranium; biological weapons; chemical weapons; stealth cluster bombs; blinding lasers; incendiary weapons; white phosphorus.

These provisions do not apply to the activities permitted by the following treaties and/or conventions:

- The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines; the Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster bombs;
- The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons;
- The Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons;
- Regulation (EU) 2018/1542 concerning restrictive measures against the proliferation and use of chemical weapons;

These exclusions are also intended to comply with the requirements established by Law no. 220 of 9 December 2021 on measures to counter the financing of companies producing antipersonnel mines, cluster bombs and submunitions.

*With regard to exclusions on nuclear weapons, issuers based in states that have adhered to the “Nuclear Non-Proliferation Treaty” stipulated on 1 July 1968 are not considered.

Percentage of critical issuers

“Critical” issuers are those companies having a higher exposure to environmental, social and corporate governance risks, i.e. which have a lower ESG sustainability rating level (equal to “CCC” assigned by the specialized info-provider) in the equity and bond investment category and for which an escalation process has been activated, or is being assessed, which determines restrictions and/or exclusions with respect to the entirety of the individual assets under management (“ESG Binding screening”).

Percentage of issuers selected on the basis of positive and negative criteria

The weighting of issuers that comply with the specific positive and negative selection criteria identified by the Product, i.e. (i) issuers of green/sustainable bonds and (ii) companies publicly engaged in the energy transition process, particularly through the progressive reduction in Scope 1 and Scope 2 emissions to reach climate neutrality by 2050 (“Net Zero” goal).

Percentage of assets in government issuers meeting the screening criteria

The weight of government issuers that meet the selection criteria defined on the basis of the indicators of the “Sustainable Development Report” and Regulation (EU) 2019/2088 to monitor the principal adverse impacts relating to government issuers.

Percentage of assets in ESG or sustainable investment type UCIs

This is understood as assets of UCITS that promote environmental and/or social characteristics pursuant to Article 8 of Regulation 2019/2088 or which pursue sustainable investment objectives pursuant to Article 9 of said Regulation.

Carbon footprint

The value represents tonnes of carbon dioxide (direct - Scope 1 and indirect - Scope 2) of the investee companies in relation to their turnover.

Sustainable investment

Weighting (i) of issuers with net positive alignment with at least 1 of the United Nations’ 17 Sustainable Development Goals (SDG) and no misalignment with any of the SDGs and (ii) of green, social and sustainability bonds.

Investment Manager Commentary

Performance and Investment Choices

The 3-5 years Euro Area Government Bonds lost 0.75% in April. During the month took place the ECB meeting with the council that decided to keep policy rates unchanged for the fifth consecutive meeting. The Governing Council observed that the new information made available since the last March meeting substantially confirmed the assessment regarding the medium-term inflation outlook. Thus, ECB laid the groundwork for a rate cut in June while at the same time refraining from taking a stance on subsequent moves. The April inflation in the Eurozone remained stable at an annual rate of 2.4%, in line with expectations. This stabilization reflected the combined effect of upward pressure from the more volatile components of inflation, such as food and energy, and downward pressure from the 'core' component, which decreased from 2.9% to an annual rate of 2.7% (compared to the expected 2.6%).

Analyzing the 5-year maturity segment yields increased both in the core/semi-core and the periphery. German 5-yrs yield increased by almost 30 bps and France by 27. Belgium showed a similar behavior with an increase of almost 27 bps. In the periphery, in the 5-yrs space, Italy underperformed less compared to the rest with an increase in yields of 22 bps likewise Spain (23 bps).

Over the month from a tactical perspective, we implemented some trades on German futures exploiting the increased volatility. At the end of the month, we decided to reduce the small duration bets of the fund against benchmark by selling German and Spanish paper.

The performance of the fund was in line with the one posted by the benchmark.

IMPORTANT INFORMATION

Source of information and data related to the Unit of the Sub-Fund: Eurizon Capital SGR S.p.A, Società di gestione del risparmio, a public limited company (società per azioni) incorporated in Italy under number 15010 and having its registered office Via Melchiorre Gioia, 22 - 20124 Milan and authorized to act as investment manager under the supervision of CONSOB.

Morningstar Rating based on the Unit of this document. For more details about the methodology, please refer to the Glossary as well as the following link: https://www.morningstar.com/content/dam/marketing/shared/research/methodology/771945_Morningstar_Rating_for_Funds_Methodology.pdf. Morningstar The Morningstar rating is a quantitative assessment of past performance that takes into account risk and costs imputed. It does not take into account qualitative elements and is calculated on the basis of a (mathematical) formula. The classes are categorized and compared with similar UCITS classes, based on their score and they receive one to five stars. In each category, the top 10% receive 5 stars, the next 22.5% 4 stars, the next 35% 3 stars, the next 22.5% 2 stars, and the last 10% receive 1 star. The rating is calculated monthly on the basis of historical performance over 3, 5 and 10 years and does not take into account the future.
