## Fund Description

### Investment Objective

The investment objective of the Portfolio is to provide long term capital growth through investment primarily in Greater China equities including companies listed in Mainland China (A & B shares), Hong Kong, Singapore and overseas markets. The investment approach is based on fundamental, bottom up research. Nevertheless macro analysis and top-down considerations are instrumental in theme selection and also in managing exposure through tactical use of cash and hedges. The reference currency is USD. All other share classes will be systematically hedged against currency risk giving investors the ability to separate market risk from currency risk.

### Investment Manager

Belgrave Capital Management Limited authorised and regulated by the Financial Conduct Authority.

### Investment Advisor

Greenwoods Asset Management employs a fundamental-driven, bottom-up, value approach targeting companies with fast growth, high barriers to entry, strong cash flows, motivated management, good corporate governance and compelling valuations. Macro top-down analysis is used to identify the exposure level and the most attractive sectors. Due-diligence on target companies is performed including on-site visits and also using the team's network of local contacts to verify information and check references across suppliers, customers and competitors. Financial forecasts and valuation models are developed with the aim of identifying stocks with a 30%+ upside potential. Macro analysis, policy research, industry specialists, fund flows and liquidity analysis also form part of the investment approach.
