

# MFS Meridian® Funds Global Credit Fund

31 MAY 2015

## Seeks current income by investing in global investment grade bonds

Seeks total return with an emphasis on current income, but also considering capital appreciation, measured in US dollars. Key points:

- Focuses on global investment grade, corporate bonds of developed countries that MFS believes to have solid/improving fundamentals
- May also include high yield, international and/or emerging market debt
- Portfolio based on intensive fundamental research and collaborative research organization that aims to avoid adverse credit events, and focuses on bottom up security selection

### PORTFOLIO MANAGEMENT

#### Robert D. Persons

28 years in industry

#### Pilar Gomez-Bravo

17 years in industry

#### Robert M. Hall\*\*

21 years in industry

\*\* Advises and communicates on the management of the portfolio, but is not responsible for day-to-day management.

Portfolio characteristics data are based on the equivalent exposure of unaudited net assets as of 31-May-15. Equivalent exposure measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. The portfolio is actively managed, and current holdings may be different.

Top ten holdings, portfolio characteristics and weightings do not reflect the effect of exposure/weightings for hedging of hedged share classes. Full holdings and net assets do reflect this hedging.

### PORTFOLIO STRUCTURE

Cash and other assets are less liabilities; this may include derivative offsets.

#### Other share classes are available for which performance and expenses will differ.

The source for all fund data is MFS. Source: Benchmark performance from SPAR, FactSet Research Systems Inc.

Fund inception date: 22 December 2009

^ Results represent the percent change in NAV.

^^ Periods less than one year are actual not annualized.

1 The MFS Meridian Funds offer several share classes each with different expenses. Performance reflects the performance of a relevant older class with the same currency until the actual start of class performance record of the class detailed. Performance for periods prior to that date and prior to the fund's inception date may have been higher or lower had the actual share class fees and expenses been reflected.

2 The Fund's investment strategy was changed on 31 October 2014; performance shown prior to this date reflects the Fund's prior investment strategy.

Returns would have been lower had sales charges, of up to 6% of the net asset value (NAV), or any commissions, fees or other charges that your financial intermediary may charge been reflected.

Class I shares are only available to certain qualifying institutional investors. Class W shares are available to fee-based wrap accounts, clients of financial intermediaries prohibited from receiving compensation from the Fund, and to employees of MFS and its affiliates.

CREDIT QUALITY (% OF TOTAL NET ASSETS)									
US GOVT	FEDERAL AGENCIES	AAA	AA	A	BBB	BB	B	CCC & BELOW	OTHER NOT RATED
—	0.2	1.2	0.8	19.3	56.3	13.9	2.2	—	3.3

#### Avg. credit quality: BBB

The Average Credit Quality (ACQR) is a market weighted average (using a linear scale) of securities included in the rating categories. For all securities other than those specifically described below, ratings are assigned to underlying securities utilizing ratings from Moody's, Fitch, and Standard & Poor's rating agencies and applying the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). All ratings are subject to change. U.S. Government includes securities issued by the U.S. Department of the Treasury. Federal Agencies includes rated and unrated U.S. Agency fixed-income securities, U.S. Agency MBS, and CMOs of U.S. Agency MBS. Other Not Rated includes fixed income securities which have not been rated by any rating agency. The portfolio itself has not been rated.

TRAILING 3 YR RISK MEASURES VS. BENCHMARK	
Benchmark	Barclays Global Aggregate Credit Bond Index (USD)
Standard Deviation	6.08 vs 4.20

**Benchmark:** Barclays Global Aggregate Credit Bond Index measures global investment-grade credit securities. This index is the Credit component of the Global Aggregate index.

It is not possible to invest directly in an index.

**Standard deviation** is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

RISK AND REWARD PROFILE CLASS A2USD						
< Lower risk (typically lower rewards)			Higher risk (typically higher rewards) >			
1	2	3	4	5	6	7

The rating is based on past volatility of returns and may be different in the future or for other classes of the fund.

Performance results reflect ongoing charges and any applicable expense subsidies and waivers in effect during the periods shown; without these, the results would be less favorable. All historic results assume the reinvestment of dividends and capital gains.

**Past performance is not a reliable indicator for future results. All financial investments involve an element of risk. The value of investments may rise and fall so you may get back less than originally invested.**

Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the fund's base currency, if different. **See the fund's offering documents for more details, including information on fund risks and expenses.**

The offering documents (sales prospectus and Key Investor Information Documents (KIID)), articles of incorporation and financial reports are available to investors at no cost in paper form or electronically at [meridian.mfs.com](http://meridian.mfs.com), at the offices of the paying agent or representative in each jurisdiction or from your financial intermediary. KIIDs are available in the following languages; Danish, Dutch, English, French, German, Italian, Norwegian, Portuguese, Spanish and Swedish. For additional information, call 416.506.8418 in Toronto or 352.464.010.600 in Luxembourg or your local paying agent or representative. **Austria:** Raiffeisen Bank International AG, Am Stadtpark 9, A-1030 Vienna, Austria. MFS Meridian Funds is an investment company with a variable capital established under Luxembourg law. MFS Investment Management Company (Lux) S.à.r.l. is the management company of the Funds, having its registered office at 19, rue Bitbourg, L-1273 Luxembourg (Company No. B.76.467). The Management Company and the Funds have been duly authorised by the CSSF (Commission de Surveillance du Secteur Financier) in Luxembourg.

**CNMV's registration number for Spain — 68.**  
**The marketing in France of the FUNDS was first authorised by the COB on 19 October 1994 and more recently authorised by the Autorité des Marchés financiers on or about 23 February 2015.**

The funds have been registered with the Netherlands Authority for the Financial Markets referred to in Article 1:107 of the Act on Financial Supervision (Wet op het financieel toezicht), as an investment institution authorised pursuant to Article 2:72 of the aforementioned Act.

The funds are recognised as a "restricted foreign scheme" in Singapore; therefore, material in connection with the offer or sale of the funds may only be distributed to persons in Singapore that are qualified under Sections 304 and 305(2) under Chapter 289 of the Securities and Futures Act.

MFS Meridian Funds are recognised under Section 264 of the Financial Services and Markets Act of 2000 and U.K. investors should note that holdings of shares in the funds will not be covered by the provisions of the Financial Services Compensation Scheme, or by any similar scheme in Luxembourg.

#### IMPORTANT RISK CONSIDERATIONS

The fund may not achieve its objective and/or you could lose money on your investment in the fund. Investments in debt instruments may decline in value as the result of declines in the credit quality of the issuer, borrower, counterparty, or other entity responsible for payment, underlying collateral, or changes in economic, political, issuer-specific, or other conditions. Certain types of debt instruments can be more sensitive to these factors and therefore more volatile. In addition, debt instruments entail interest rate risk (as interest rates rise, prices usually fall), therefore the Fund's share price may decline during rising rate environments as the underlying debt instruments in the portfolio adjust to the rise in rates. Funds that consist of debt instruments with longer durations are generally more sensitive to a rise in interest rates than those with shorter durations. At times, and particularly during periods of market turmoil, all or a large portion of segments of the market may not have an active trading market. As a result, it may be difficult to value these investments and it may not be possible to sell a particular investment or type of investment at any particular time or at an acceptable price. Emerging markets can have less market structure, depth, and regulatory, custodial or operational oversight and greater political, social, and economic instability than developed markets. Investments in derivatives can be used to take both long and short positions, be highly volatile, involve leverage (which can magnify losses), and involve risks in addition to the risks of the underlying indicator(s) on which the derivative is based, such as counterparty and liquidity risk. Investments in lower-quality debt instruments can be more volatile and have greater risk of default, or already be in default, than higher-quality debt instruments.

Please see the prospectus for further information on these and other risk considerations.
