Fund managers

Alban Lhonneur
Marcus Phayre-Mudge

Fund objective and policy

The Fund aims to generate a total return greater than that of its Benchmark (FTSE EPRA Nareit Developed Europe UCITS Capped Net Tax Index). The Fund is actively managed. It is not constrained by its target benchmark and has significant freedom to invest in a portfolio that is different to the benchmark's own composition. The Fund seeks to achieve its objective by investing mainly in equities of European listed property companies and companies related to the real estate sector or with significant exposure to European real estate. Derivatives may be used to obtain long or short market exposure to specific companies.

Risk warning

The value of investments and any income derived from them can go down as well as up as a result of market or currency movements and investors may not get back the original amount invested. Investments which are concentrated in a specific sector or country may result in less diversification and hence more volatility in investment values. Investments in smaller companies carry a higher degree of risk as their shares may be less liquid and investment values can be volatile. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.
