Objective and Investment Policy

The Sub-Fund seeks to offer investors capital growth through diversification of its investments over all categories of assets and a policy of following a 'value' approach.

To pursue its goal, it invests at least two-thirds of its Net Assets in equities, Equity-linked Instruments and bonds without any restriction in terms of market capitalisation, geographical diversification or in terms of what part of the assets of the Sub-Fund may be invested in a particular class of assets or a particular market. The investment process is based on fundamental analysis of the financial and business situation of the issuers, market outlook and other elements.

UK retail investors will not have any protection under the UK Financial Services Compensation Scheme (FSCS).

Management commentary

August Highlights

- The First Eagle Amundi International Fund returned -2.79% in August (USD, AUC share class).
- By equity sector, Energy was the only contributor to positive returns.
- Industrials, Consumer Discretionary and Consumer Staples were the leading detractors
- Gold-related securities also detracted from returns.

Month-End Market Review

Financial markets receded in August as the MSCI World Index fell 2.4% and the S&P 500 Index declined 1.6%. Concerns about Chinese growth had an impact on equity markets, as well as a reversal of 12 consecutive months of disinflation as year-over-year inflation increased to 3.2% from 3.0% in the previous month. Growth stocks outperformed value names in the US, but non-US value stocks outperformed their growth counterparts. In the US, small cap equities underperformed large caps. The Bloomberg Global Aggregate Bond Index decreased 1.4% and the Bloomberg US Aggregate Bond Index fell 0.6%; high yield bonds and leveraged loans continued to be bright spots in the bond market. The still-inverted yield curve steepened during the month as the 2-year Treasury rate declined while 10-year Treasury yield rose. The gold price declined 1.7%. The US Dollar Index gained 1.7% as traders sought safe havens amid a shaky global outlook.

First Eagle Amundi International Fund (FEAIF) Portfolio & Attribution

FEAIF returned -2.79% in August (USD, AUC share class). Our equity holdings detracted during the month, and gold-related securities were also a headwind to performance. By equity sector, energy was the only contributor, while industrials, consumer discretionary and consumer staples were the leading detractors. Among individual positions, the Fund's top contributors included Exxon Mobil, Oracle, Comcast Corporation, Alphabet and NOV. The largest detractors included Meta Platforms, Compagnie Financière Richemont, IPG Photonics, C.H. Robinson and Prosus. We established new equity positions in a North American real estate investment trust, and a North American media and entertainment company, and we increased exposure in six stocks during the month of August. We exited our position in Imperial Oil due to the ESG-related constraints on this particular fund and we reduced our holdings in four other stocks.
