Risk and Reward Profile

Investment risks

The fund does not offer any capital guarantee or protection and you may not get back the amount invested. The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator: **Bonds:** There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation. **Derivatives:** The Fund makes significant use of derivatives. The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested. **Liquidity:** In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments. **Low rated bonds:** The fund may invest in lower rated or unrated bonds of similar quality, which carry a higher degree of risk than higher rated bonds. **Geographical focus:** This fund invests primarily in Asia, which means that it is more sensitive to local economic, market, political or regulatory events in Asia, and will be more affected by these events than other funds that invest in a broader range of regions. **Emerging markets investment:** The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries. **Fund currency:** Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it. **Interest rates:** Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall. **Investment in China:** The fund invests in China and is subject to the risk of significant change in political, social or economic policy in China, which may negatively affect the value of such investments. **Fund counterparties:** The fund may suffer losses if the parties that it trades with cannot meet their financial obligations. **Fund operations:** The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries. **Hedged class currency:** The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund. Efforts will be made to try to protect the value of your investment against such changes, but such efforts may not succeed. For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Definitions

Life The average number of years for which each component of unpaid principal on a bond, loan or mortgage remains outstanding. The weighted average life calculation provides an aggregate figure that shows how many years it will take to pay off half the outstanding principal on a bond portfolio.

Effective duration Average Duration equals the weighted average maturity of all the cash flows in the portfolio and gives an indication of the sensitivity of a portfolio's bond prices to a change in interest rates. The higher the duration, the more sensitive the portfolio is to interest rate changes. Effective Duration is a calculation for bonds with embedded options (Not every portfolio will purchase bonds with embedded options). It takes into account the expected change in cash flows caused by the option, as interest rates change. If a portfolio does not hold bonds with embedded options, then the Effective Duration will be equal to the Average Duration.

Credit quality breakdown Nationally Recognised Statistical Rating Organisations (NRSROs) assess the likelihood of bond issuers defaulting on a bond's coupon and principal payments. The weighted average credit quality by Western Asset Management assigns each security the higher rating from three NRSROs (Standard & Poor's, Moody's Investor Services and Fitch Ratings, Ltd.). If only one NRSRO assigns a rating, that rating will be used. Securities that are not rated by all three NRSROs are reflected as such. The lower the overall credit rating, the riskier the portfolio. The credit rating is expressed as a regular letter rating (from high to low quality): AAA, AA, A, BBB, BB, ...D.

Important Information

OUTSIDE OF THE UNITED KINGDOM, IRELAND AND SWITZERLAND, THIS FACTSHEET IS FOR USE BY PROFESSIONAL OR QUALIFIED INVESTORS ONLY.

This is a sub-fund ("fund") of Legg Mason Global Funds plc ("LMGF plc"), an umbrella fund with segregated liability between sub-funds, established as an open-ended investment company with variable capital, organised as an undertaking for collective investment in transferable securities ("UCITS") under the laws of Ireland as a public limited company pursuant to the Irish Companies Acts and UCITS regulations. LMGF plc is authorised in Ireland by the Central Bank of Ireland (the "Central Bank"). It should be noted that the value of investments and the income from them may go down as well as up. Investing in a sub-fund involves investment risks, including the possible loss of the amount invested. Past performance is not a reliable indicator of future results. An investment in a sub-fund should not constitute a substantial proportion of an investor's investment portfolio and may not be appropriate for all investors. Investors' attention is drawn to the specific risk factors set out in a fund's share class key investor information document ("KIID") and LMGF plc's prospectus (the "Prospectus"). This material is not necessarily a complete summary and is not intended, for example, as a complete analysis. The information and data in this material (that may include without limitation research, forecasts, figures, opinions, statements, trends, investment techniques and strategies) has been prepared from sources believed reliable but is not guaranteed in any way by Legg Mason Investments (Europe) Limited nor any Legg Mason, Inc. company or affiliate (together "Legg Mason"). No representation is made that the information or data is correct as of any time subsequent to its date. Further there is no guarantee or assurance that funds will achieve their investment objectives. Individual securities mentioned are intended as examples only and are not to be taken as advice nor are they intended as a recommendation to buy or sell any investment or interest. Before investing investors should read in their entirety LMGF plc's application form and a fund's share class KIID and the Prospectus (which describe the investment objective and risk factors in full). These and other relevant documents may be obtained free of charge in English, French, German, Greek, Italian, Norwegian and Spanish from LMGF plc's registered office at Riverside Two, Sir John Rogerson's Quay, Grand Canal Dock, Dublin 2, Ireland, from LMGF plc's administrator, BNY Mellon Fund Services (Ireland) Limited, at the same address or from www.leggmasonglobal.com.
