INVESTMENT UNIVERSE

The fund invests mainly (without any sector or geographical restrictions) in equity funds (UCITS or UCIs) and accessorily in other investment funds (UCITS or UCIs). Accessorily, the fund can also invest directly or indirectly in equities, bonds and other debt securities (maximum 20% of net assets). The fund aims to limit its investments (directly or indirectly) in equities and other equity related securities to approximately 30% of net assets. At least 75% of net assets are invested in funds or securities that are selected based on compliance with environmental, social and governance criteria. The fund may, on an optional basis, use derivatives to achieve its goals or for hedging. This is an actively managed fund with no benchmark.

RISKS

The risk indicator assumes that you will hold the product for at least 2 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Investing in this product also entails risks that are materially relevant but not included in the risk indicator:

- Liquidity risk: The sub-fund may potentially be exposed to issuers from the real estate sector and/or small caps and/or corporate bonds. The liquidity of such assets may decrease during periods of market stress. This risk may also be associated with the funds in which the sub-fund invests.
- · Credit risk: The risk that the creditworthiness of a bond or debt security issuer may deteriorate, thereby reducing the value of investments. The fund may be exposed to fixed income securities, primarily through investments in other funds.
- Inflation risk: The risk that rising inflation will reduce the assets in the portfolio. The sub-fund may be exposed, primarily through investments in other funds, to inflation-sensitive fixed income securities.
- Sustainability risk: Environmental and/or social aspects are not systematically part of the sub-fund's investment selection process. This may result in the sub-fund being more exposed to companies that have a negative impact on sustainability. This risk may also be associated with the funds in which the fund invests.

This product does not include any protection from future market performance so you could lose some or all of your investment. We refer to the prospectus and KID for more explanation and a complete overview of the risks.
