Objective and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation. Seeks to provide income and, secondarily, to increase the value of your investment over the recommended holding period. The Sub-Fund mainly invests in a broad range of securities from around the world, including emerging markets. This may include equities, government and corporate bonds and money market securities. The Sub-Fund's bond investments may be of any quality (investment grade or below). The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit, equities, interest rates, foreign exchange, and inflation). **Benchmark** : The Sub-Fund is actively managed, is not managed in reference to a benchmark, and has not designated a reference benchmark for the purpose of the Disclosure Regulation. **Management Process** : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The investment manager uses its own global economic analysis to determine the most attractive asset types and geographical regions, then uses analysis of individual issuers to identify individual securities that offer the best potential gain for the risk involved. The Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the investment universe.

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The risk indicator assumes you keep the product for 4 Years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi Funds prospectus.

ESG Terminology

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
“E” for Environment (energy and gas consumption levels, water and waste management, etc.).
“S” for Social/Society (respect for human rights, health and safety in the workplace, etc.).
“G” for Governance (independence of board of directors, respect for shareholders’ rights, etc.)

ESG Rating

The issuer’s ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).
ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers’ scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy⁴, Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

¹ The investment universe reference is defined by either the fund’s reference indicator or an index representative of the ESG-related investable universe.
² Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight).
³ Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
⁴ The updated document is available at <https://www.amundi.com/int/ESG>.

Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).
