Key benefits

- The fund is actively managed and offers the investor straightforward and convenient access to UBS House View, which draws on the professional insights of UBS investment specialists worldwide.
- Investors benefit globally from diversified market opportunities in the area of bonds and equities. In addition to high-quality bonds, investments can also be made in other bond segments.
- The weighting of the different asset classes is maintained within a specific range in order to take account of the fund's risk profile.
- The fund is attractive for cautious investors who focus on interest and dividends, but who are also prepared to take on additional risks in order to generate capital gains.

Canadian Government Bond	1.93
United Kingdom Gilt	1.88
European Investment Bank	1.78

Risks

The fund invests globally in bonds of varying credit quality, money market securities and to a lesser extent in equities and may therefore be subject to fluctuations. The fund may use derivatives which can reduce investor risks or give rise to additional risks (inter alia the counterparty risk). The value of a unit may fall below the purchase price. This requires an elevated risk tolerance and capacity. Every fund exhibits specific risks, a description of these risks can be found in the prospectus.
