Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The net asset value performance above shows the Fund's average annual total returns excluding sales charges, which are not applicable to Class J shares. Returns for periods of less than one year are not annualized. If sales charges had been included, performance would have been lower. The investment return and principal value of an investment in the fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. The inception date of the Class J shares is 01/06/2018; benchmark since inception reflects the inception date of the share class. Currency-hedged share classes use hedging techniques in an attempt to reduce fluctuations between the hedged share class and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely. Any gains/losses associated with the hedging techniques will accrue solely to the relevant hedged share class. There can be no guarantee that these techniques will be successful.

GROWTH OF USD 1,000,000

Past performance does not predict future returns.

Based on a hypothetical Class J (acc) USD investment of USD 1,000,000 on 18/02/2014 without sales charge and includes the reinvestment of all distributions, if any. Data as of 31/12/2023. The inception date for Class J (acc) USD shares is 01/06/2018. The performance quotations for Class J (acc) USD shares are based on the following methods of calculation: (a) for periods prior to 01/06/2018, a figure is used based on the historical performance of the Fund's Class I (acc) USD Shares, since inception, restated to reflect all charges and fees applicable to Class J (acc) USD shares; and (b) for periods after 01/06/2018, actual Class J (acc) USD performance is used, which reflects all charges and fees applicable to Class J (acc) USD shares.

Key Risks: The Fund is subject to risks associated with investing in debt securities, including credit risk, interest rate risk, high yield risk, mortgage and asset backed securities risk and derivatives risk. For share classes denominated in a currency other than U.S. dollars, changes in currency exchange rates may reduce or increase fund returns. Please refer to the end of this document as well as the Fund's KIID and prospectus for more detailed risk information.

MATURITY BREAKDOWN

PORTFOLIO BREAKDOWN

Allocations are reported as of the date a security transaction is initiated however, certain transactions may not settle until several days later. Accordingly, cash may appear as a negative allocation as a result of forward-settling instruments such as currency forwards, certain mortgage-backed securities, and U.S. treasury futures. "Other" may include municipal bonds and non-index holdings.

CREDIT QUALITY DISTRIBUTION

Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided by Standard & Poor's, Moody's, and Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. Where the rating agencies rate a security differently, Lord Abbett uses the average rating based on numeric values assigned to each rating. Totals may not add to 100% due to rounding.

Additional share classes are available upon request. Please see the Fund's prospectus for additional information. The fund's monthly dividend yield percentage is calculated for each share class by annualizing the most recent dividend per share amount and dividing the result by the share class' net asset value. Dividends and the dividend yield are subject to the management fee waiver. **Past performance is not a reliable indicator or guarantee of future results.**

GLOSSARY OF TERMS

Effective Duration is the change in the value of a fixed-income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the longer a duration, the greater the interest-rate risk or reward for a portfolio's underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs, ADRs, and CPI swaps and related futures are excluded from these calculations.

Average Coupon is the weighted average coupon for all the securities in a portfolio. A bond's coupon is the annual rate of interest on a bond's face value that the issuer agrees to pay the holder.

Average Life measures how long it will take, on average, to receive the repayment of the principal amount on a debt security. Average life is often used in connection with mortgage-backed securities as a measurement of the length of time, on average, before the underlying mortgages are paid, refinanced, or otherwise retired.

Average Yield to Worst is the lowest yield that can be received on a bond without defaulting.

Average Yield to Maturity is the rate of return anticipated on a bond if held until it matures. Yield to maturity assumes all the coupon payments are reinvested at an interest rate that equals the yield-to-maturity. The yield to maturity is the long-term yield expressed as an annual rate.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund. Morningstar Rating Information (If Applicable): For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three, five, and ten year (if applicable).
