

WisdomTree

Bitcoin

Investment Objective

WisdomTree Bitcoin is a physically backed Exchange Traded Product (ETP) designed to offer shareholders a simple, secure and cost-efficient way to gain exposure to the price of Bitcoin. The ETP provides for easy investor access, tradability, transparency and institutional custody solutions within a robust physically backed structure.

Pricing of shares

Each share of WisdomTree Bitcoin has an entitlement to a certain number of Bitcoin. The entitlement is adjusted daily to reflect the accrual of fees¹.

The 'NAV' for the ETP is calculated daily by multiplying the per-share Bitcoin entitlement by the CME CF Bitcoin Reference Rate, which is the same rate underlying the settlement price for the most liquid Bitcoin futures, which trade on the Chicago Mercantile Exchange (CME).

Potential Benefits

- Physically backed by Bitcoin
- Each share has a corresponding Bitcoin entitlement professionally secured in "cold storage"
- WisdomTree is a world leader at securing physical metals underlying ETPs and have used the same structure to protect fund holdings
- Listed and tradable on The Swiss Stock Exchange (SIX) and Xetra, or available via Over the Counter Trade facilitation (OTC)
- Intra-day trading on-exchange available in US Dollar and Euro
- Institutional cryptocurrency custody solutions which are continuously evaluated and monitored by WisdomTree
- ETP structure fits seamlessly within current portfolio management structures

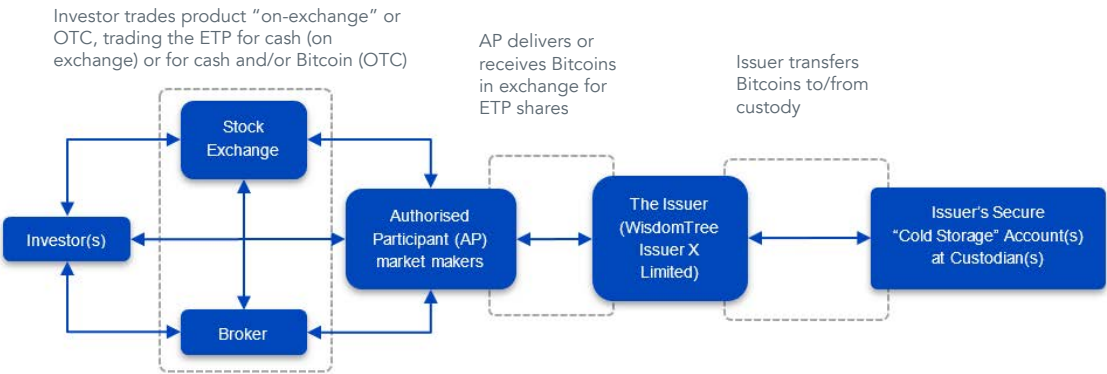

Potential Risks

- An investment in this product involves a degree of risk. Any decision to invest should be based on the information contained in the relevant prospectus. Prospective investors should obtain independent accounting, tax and legal advice and should consult their professional advisers to ascertain the suitability of this product as an investment to their own circumstances
- The value of this product may go up or down and a security holder may lose some or all of the amount invested
- The price of Bitcoin may fluctuate greatly and may be affected by factors including investor sentiment, supply and demand, the global financial markets and other political, financial or economic events
- At any time, the price at which the ETP trades on an exchange may not accurately reflect the price of Bitcoin

The product discussed in this document is an unregulated ETP, approved to trade on the SIX Swiss Exchange in Switzerland. Cryptocurrencies are a high-risk investment and may not be suitable for all types of investor. Prospective investors should be aware that the price of the underlying asset(s) by which the securities are secured can demonstrate higher volatility than other asset classes and consequently the value of the securities may be extremely volatile. You must ensure that the nature, complexity and risks associated with cryptocurrencies are suitable for your objectives in light of your circumstances and financial position.
