INVESTMENT OBJECTIVE

To maximise the value of its shares through both growth in the value of, and income from, its investments.

INVESTMENT PROCESS

The fund is actively managed and invests mainly in a diversified portfolio of corporate bonds from emerging market issuers. Although the fund does not have sustainable investment as an objective, the promotion of environmental and/or social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments, as defined by the SFDR. In addition to the E/S characteristics promoted, the fund also applies the investment manager's proprietary responsible screen (the T. Rowe Price Responsible Exclusion List). The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies and debt securities. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark.

Past performance is not a reliable indicator of future performance.

Performance for additional share classes is shown later in this document.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with dividends reinvested, if any. The value of the investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the subscription currency, if different. Sales charges (up to a maximum of 5% for the A Class), taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

Please note that no management fees are charged to the Z, S and J share classes. No administration agent fees are charged to the J Class. No expenses or any other fees are charged to the Z class. Fee arrangements for the Z, S and J share classes are made directly with the investment manager. Please see the prospectus for further information.

Where the base currency of the fund differs from the share class currency, exchange rate movements may affect returns.

Hedged share classes (denoted by 'h', 'b' or 'n') utilize investment techniques to mitigate currency risk between the underlying investment currency(ies) of the fund and the currency of the hedged share class. The costs of doing so will be charged to the share class and there is no guarantee that such hedging will be effective.

Performance data will be displayed when a share class has more than 1 year history of returns.

The manager is not constrained by the fund's benchmark(s), which is (are) used for performance comparison purposes only.

The investment policy of the fund changed as at 1 October 2022, with the addition of a minimum commitment to sustainable investments. The performance prior to this date was achieved without this consideration.

KEY FUND RISKS

China Interbank Bond Market - The China Interbank Bond Market may subject the fund to additional liquidity, volatility, regulatory, settlement procedure and counterparty risks. The fund may incur significant trading and realisation costs. **Contingent convertible bond** - Contingent Convertible Bonds may be subject to additional risks linked to: capital structure inversion, trigger levels, coupon cancellations, call extensions, yield/valuation, conversions, write downs, industry concentration and liquidity, among others. **Country (China)** - Chinese investments may be subject to higher levels of risks such as liquidity, currency, regulatory and legal risks due to the structure of the local market. **Credit** - Credit risk arises when an issuer's financial health deteriorates and/or it fails to fulfill its financial obligations to the fund. **Default** - Default risk may occur if the issuers of certain bonds become unable or unwilling to make payments on their bonds. **Derivatives** - derivatives may result in losses that are significantly greater than the cost of the derivative. **Distressed or defaulted debt** - Distressed or defaulted debt securities may bear substantially higher degree of risks linked to recovery, liquidity and valuation. **Emerging markets** - Emerging markets are less established than developed markets and therefore involve higher risks. **Frontier markets** - Frontier markets are less mature than emerging markets and typically have higher risks, including limited investability and liquidity. **High yield bond** - High yield debt securities are generally subject to greater risk of issuer debt restructuring or default, higher liquidity risk and greater sensitivity to market conditions. **Interest rate** - Interest rate risk is the potential for losses in fixed-income investments as a result of unexpected changes in interest rates. **Liquidity** - Liquidity risk may result in securities becoming hard to value or trade within a desired timeframe at a fair price. **Total return swap** - Total return swap contracts may expose the fund to additional risks, including market, counterparty and operational risks as well as risks linked to the use of collateral arrangements.
