

RobecoSAM Circular Economy Equities D USD

RobecoSAM Circular Economy Equities is an actively managed fund that invests globally in companies aligned with circular economy principles. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector to finance solutions supporting the paradigm shift to a circular economy. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives and relevant SDGs using an internally developed framework, more information on which can be obtained at www.robeco.com/si. The fund also has the aim to achieve a better return than the index.

Performance

Indexed value (until 30-04-2024) - Source: Robeco

Performance

Based on transaction prices, the fund's return was -3.48%.

In April, the fund was down, but outperformed the broader MSCI World Index. The Technology sector provided the largest relative outperformance, supported by the holding in Dell. In contrast to Q1, no ownership in financials was a positive for the fund in April. Consumer staples in general and Gruma and Sprouts Farmers Market in particular were positive for the fund's performance. The largest performance detractor was the Industrials sector. Despite this, the top performance contributors were two industrial companies: Swedish transformer and electrification product manufacturer AQ Group and American environmental design company Tetra Tech. Among other individual contributors were natural color producer Sensient Technologies, Dell and the Mexican tortilla manufacturer Gruma. The three main performance detractors were Lear, Cavco and Shoals. The fund outperformed relative to the internal thematic benchmark. The stock selection component was a positive and the relative outperformance was broad-based across sectors. However, underperformance was concentrated more on the consumer discretionary sector, especially on Cavco and Lear.

Market development

The Q1 reporting season kicked off in April with some distinct signals. Good momentum in the environmental services benefits exposed companies, providing them with good growth visibility. Many manufacturing areas failed to gain much strength, but some first short-cyclical green shoots could be spotted. Construction in the US is good again, seemingly de-coupled from all the rates and inflationary worries. The construction sector's impressive resilience could partly be explained by the demand coming from reshoring, a strong need for housing and a consolidated supplier structure that supports pricing trends and positive price-cost spreads. As for consumers, they stay selective. However, the trend for healthier food choices shows good momentum in the US. 2023's destocking that hit many sectors is abating. Sticky inflation is visible in the slow decline of cost pressure, and skilled labor shortages continue to be bottlenecks in various areas. Investments in the AI physical infrastructure continue undiminished and, if anything, AI-linked investment budgets are rising. However, the market's short-term expectations seem to have been too high. Those are rebasing, leading to price volatility for impacted companies. At the same time, the longer-term TAM for AI continues to expand and the discussion on AI has shifted from if to how large and when.

Expectation of fund manager

After five months of good market performance, a pause in optimism is not unexpected. The sticky inflation numbers have been a new negative – dampening investors' sentiment. The absence of a concrete plan for crisis deceleration in the Middle East acts as an additional softener for overall market confidence. As the risk for stagflation appears on investors' radar screens, structural growth could become relatively more attractive. Investing in areas with high growth visibility and structural growth tailwinds remains the focus of the strategy. Another area we pay increasingly stronger attention to is the price-cost spreads of companies. As cost inflation stays sticky, continued ability to pass on cost rises to customers will be key for stable margins. Compared to the previous year, when price hikes were almost universal, this year companies are likely to meet more resistance and scrutiny from their clients.

Top 10 largest positions

The fund has a relatively even positioning structure among high-conviction holdings. This allows for exposure to attractive areas through a number of companies rather than through a few large positions, which in turn reduces stock-specific risks. This portfolio structure means the top ten holdings fluctuate from month to month. In April, changes in the top ten holdings were not due to active trading but to share price changes. The two companies that entered the top ten reported strong results and saw their share prices rise. These two were French Saint-Gobain and the US Sprouts Farmers Market. The two that exited the top ten list were AECOM and Cavco. AECOM have not yet reported and Cavco's share price weakened, likely due to fewer expected interest rate cuts this year. In April, the fund exited Wesco. Wesco's share price recovered a large portion of its weakness since its weak full-year 2023 report. These results did however signal that the operating leverage in the business model needs to be addressed, something that could take time. No new holdings were added to the strategy in April.

Fund price

30-04-24	USD	141.85

Asset Allocation

Asset allocation		
Equity		95.3%
Cash		4.7%

Sector allocation

The fund invests in four distinct investment clusters, with the following exposure per end of February. 'Redesign Inputs': 33%; 'Enabling Technologies': 19%; 'Circular Use': 30%; and 'Loop Resources': 18%. As a result, the portfolio is invested mostly in the industrials, information technology, materials, consumer discretionary, consumer staples and healthcare sectors.

Sector allocation		Deviation index	
Semiconductors & Semiconductor Equipment	10.5%	2.4%	
Commercial Services & Supplies	10.2%	9.6%	
Electrical Equipment	7.2%	6.1%	
Machinery	5.9%	3.8%	
Trading Companies & Distributors	5.7%	4.8%	
Professional Services	5.5%	4.5%	
Construction & Engineering	5.0%	4.7%	
Building Products	4.5%	3.8%	
Software	4.4%	-3.6%	
Household Durables	4.3%	3.8%	
Health Care Equipment & Supplies	4.2%	2.0%	
Chemicals	4.0%	2.1%	
Other	28.6%	-43.9%	

Regional allocation

The country allocation of the fund is purely the result of the bottom-up stock selection process of companies exposed to the shift to a circular economy. Consequently, the fund is currently overweight in Western Europe and underweight in North America compared to the MSCI World.

Regional allocation			Deviation index	
America	<div><div></div></div>	62.6%	<div><div></div></div>	-11.1%
Europe	<div><div></div></div>	32.9%	<div><div></div></div>	15.7%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund's sustainable investment objective is to finance solutions that support the transition from traditional production and consumption patterns toward a circular economy. Circular economy and sustainability considerations are incorporated in the investment process by the means of a target universe definition, exclusions, ESG integration, and voting. The fund only invests in companies that have a significant thematic fit as per Robeco's thematic universe methodology. Through screening on both Robeco's internally developed SDG Framework and Robeco's exclusion policy, the fund does not invest in issuers that have a negative impact on the SDGs, are in breach of international norms or where products have been deemed controversial. Financially material ESG factors are integrated in the bottom-up fundamental investment analysis to assess existing and potential ESG risks and opportunities. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

The following sections display the ESG-metrics for this fund along with short descriptions. For more information please visit the sustainability-related disclosures.

The index used for all sustainability visuals is based on MSCI World Index TRN.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index. Only holdings mapped as corporates are included in the figures.

Source: Copyright ©2024 Sustainalytics. All rights reserved.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

Engagement

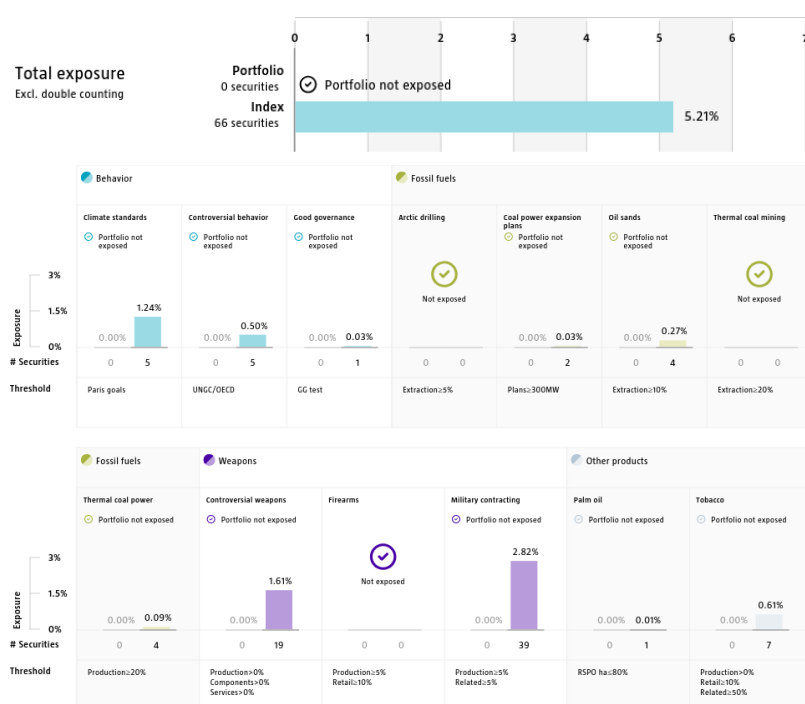

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	11.67%	6	13
Environmental	0.00%	0	0
Social	0.59%	1	4
Governance	0.00%	0	0
Sustainable Development Goals	8.40%	4	8
Voting Related	2.68%	1	1
Enhanced	0.00%	0	0

Investment policy

RobecoSAM Circular Economy Equities is an actively managed fund that invests globally in companies aligned with circular economy principles. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector to finance solutions supporting the paradigm shift to a circular economy. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives and relevant SDGs using an internally developed framework, more information on which can be obtained at www.robeco.com/si. The fund also has the aim to achieve a better return than the index.

The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund fosters resource-efficient business models for production and consumption of consumer goods, aligned with Circular Economy principles, by investing in companies that advance the following UN Sustainable Development Goals (UN SDGs): Zero Hunger, Good health and well-being, Decent work and economic growth, Industry, innovation and infrastructure, Sustainable cities and communities and Responsible consumption and production. The fund applies sustainability indicators, including but not limited to, integrates E&S (i.e. Environmental and Social) in the investment process, applies normative, activity-based and region-based exclusions, and applies proxy voting.

The majority of stocks selected will be components of the Benchmark, but stocks outside the Benchmark may be selected too. The investment policy is not constrained by a benchmark but the fund may use a benchmark for comparison purposes. The fund can deviate substantially from the issuer, country and sector weightings of the Benchmark. There are no restrictions on the deviation from the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the sustainable objective of the fund.

Fund manager's CV

Natalie Falkman is Portfolio Manager of the RobecoSAM Circular Economy Equities strategy and member of the Thematic Investing team. Before joining Robeco in 2022, she was a portfolio manager for Kapitalinvest, a global equity, 5-star rated by Morningstar and AAA-rated by Citywire (Global blend-category) fund at Swedbank Robur in Stockholm. Prior to that, she worked at Carnegie (largest independent investment bank in the Nordics), first as the Head of Emerging Markets Research and thereafter with Nordic Capital Goods Equity Research. She started her career in 2002 as an equity research analyst at Deutsche Bank in Moscow covering utility and shipping sectors. Natalie holds a Master's in Finance from Stockholm School of Economics.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.
