

Factsheet

Bellevue Funds (Lux) | Share class I2 CHF

Investment Company with Variable Capital (SICAV) according to Luxembourg Laws – UCITS
Marketing document - For professional investors: AT, CH, DE, ES, LU, HK

Investment focus

The fund's aim is to achieve capital growth in the long term. The Bellevue AI Health Fund is a global equity fund with an actively managed portfolio of 50 to 70 stocks, mostly from the healthcare sector, rounded out with a small number of tech companies that have considerable exposure to the healthcare industry. Its focus is on liquid mega and large caps, with modest allocation to mid cap stocks. In addition to fundamental aspects ranging from valuation and growth profiles to profitability, a proprietary «AI Affinity Score» is used to determine how attractive a company is from an AI perspective. The selection of the portfolio companies is entirely bottom up, independent of benchmark weightings. The fund takes ESG factors into consideration while implementing the aforementioned investment objectives.

As stipulated by Article 27 of the EU Directive 2006/73/EC implementing Directive 2004/39 / EC ("MiFID" - Markets in the Financial Instruments Directive) and by national laws incorporating the directive, information regarding past performance may be presented only if that performance information covers a complete 12-month period (or longer). The information regarding past performance will be presented here as soon as it covers a complete 12 month period (or longer).

Source: Bellevue Asset Management, 30.04.2024; all figures in CHF %, total return / BVI-methodology

Past performance is not a reliable indicator of future results and can be misleading. As the fund is denominated in a currency that may differ than an investor's base currency, changes in the rate of exchange may have an adverse effect on prices and incomes. Performance is shown net of fees and expenses for the relevant share class over the reference period. All performance figures reflect the reinvestment of dividends and do not take into account the commissions and costs incurred on the issue and redemption of shares, if any. Individual costs are not taken into account and would have a negative impact on the performance. With an investment amount of CHF 1,000 over an investment period of five years, the investment result in the first year would be reduced by the front-end load of up to CHF 50 (5%) as well as by additional individual custody charges. In subsequent years, the investment result would also be reduced by the individual custody account costs incurred. The reference benchmark of this class is used for performance comparison purposes only (dividend reinvested). No benchmark is directly identical to a fund, thus the performance of a benchmark is not a reliable indicator of future performance of the fund to which it is compared. There can be no assurance that a return will be achieved or that a substantial loss of capital will not be incurred.

Market review

A combination of persistently high inflation and robust consumer spending in the US pushed 10-year US treasury yields up by half a percent to 4.7% and weighed on investor sentiment in April.

Stock markets worldwide came under selling pressure, leading to negative monthly returns for major large-cap indexes such as the S&P 500 (-4.1%), the MSCI World (-3.7%) and the Nasdaq 100 (-4.4%). Small caps as measured by the Russell 2000 (-7.0%) were even weaker.

The broad healthcare sector tracked by the MSCI World Healthcare Index (-4.4%) declined roughly in line with the total market but slightly more than the tech sector. The Bellevue AI Health Fund (-3.8%) also closed April in negative territory but still managed to outperform its benchmark.

BioPharma (57.9% weighting at the end of the month) had a negative impact of 1.4% on absolute performance and a positive impact of 0.2% on relative performance. AstraZeneca (+11.9%), Daiichi Sankyo (+7.5%), Novo Nordisk (+1.1%) and Eli Lilly (+0.4%) were performance drivers, while Regeneron (-7.5%) and Roche (-5.7%) detracted from performance. AstraZeneca beat consensus sales and profit estimates by a comfortable margin, mainly thanks to Farxiga (cardiology), Symbicort (asthma, COPD) and Tagrisso (lung cancer). Enhertu, a cancer drug being co-developed by AstraZeneca and Daiichi Sankyo, demonstrated a statistically significant improvement in progression-free survival in certain types of metastatic breast cancer in the DESTINY-Breast06 Phase III trial. Daiichi Sankyo's quarterly results also beat investor expectations. Roche published disappointing quarterly results and Regeneron's shares sold off after the US DOJ (Department of Justice) accused the company of overcharging Medicare for Eylea (a treatment for macular edema).

Medtech companies (23.8%) had a negative impact of 1.3% on absolute performance and a positive impact of 0.2% on relative performance. While ResMed (+8.1%), Boston Scientific (+4.9%) and Insulet (+0.3%) made positive contributions to performance, GE Healthcare (-16.1%) and Intuitive Surgical (-7.1%) had a negative impact. Boston Scientific pleased investors by reporting surprisingly strong organic sales growth for the first quarter and revising its sales guidance for 2024 sharply higher. ResMed, a company focused on sleep apnea and respiratory conditions, surprised investors by reporting significantly higher sales of respiratory devices and CPAP masks in the US. GE Healthcare, the market leader for AI-powered medical imaging and diagnostics, presented disappointing results for the first quarter, but its financial results should bounce back quickly.

Healthcare services (11.2%) made a negative contribution of 0.2% to absolute performance and a positive contribution of 0.4% to relative performance. Elevance (+1.9%), a US health insurer focused on employer-sponsored plans that is overweighted in the fund's portfolio, beat expectations for Q1 profits and increased its full-year profit guidance for 2024. United-Health (-2.2%) weighed on performance after disappointing reimbursement rates for Medicare Advantage health insurance plans in 2025 were announced.

Tech exposure (5.3%), which includes tech companies from both the healthcare and IT industries, had a negative impact of 0.5% and 0.4%, respectively, on absolute and relative performance. Veeva Systems (-14.3%), Oracle (-9.1%) and Microsoft (-7.5%) retreated in the face of rising bond yields and detracted from performance. The sudden resignation of Veeva's CFO after serving the company for four years dragged down its shares, too, but the company did confirm its previous guidance for the current financial year. All performance data in USD / B shares.

Positioning & outlook

The rapid development of generative artificial intelligence (GenAI) is ushering in an unprecedented technology-driven transformation that ranks right next to other key milestones such as the Internet, cloud computing and the smartphone. GenAI is creating tremendous opportunities for businesses and investors, especially in the health sector. According to a number of studies, the health sector will be one of the industries that will benefit the most from the deployment of GenAI. This forecast is mainly based on the considerable potential for efficiency gains in healthcare systems, on the large, readily available amounts of data in healthcare systems, and on the considerable financial resources available for healthcare needs.

Already today medications are being developed more quickly and with better rates of success, for example, new diagnostic and treatment methods are producing better clinical outcomes, and GenAI is helping medical professionals make better and more informed decisions. We focus on healthcare companies that have made GenAI a core element of their business strategy and that are investing substantial resources in this technology to gain a lasting competitive advantage and achieve superior value growth. The technology risk here is more calculable than in other industries because healthcare is such a heavily regulated industry.

For illustrative purposes only. Holdings and allocations are subject to change. Any reference to a specific company or security does not constitute a recommendation to buy, sell, hold or directly invest in the company or securities. Where the fund is denominated in a currency other than an investor's base currency, changes in the rate of exchange may have an adverse effect on price and income.

Risk and return profile acc. to SRI

The Fund’s investment objective is to generate attractive and competitive long-term capital growth. It is particularly suited to investors with an investment horizon of at least 5 years. The Fund is exposed to the risks typical of equity investments.

We have classified this product as risk class 4 on a scale of 1 to 7, where 4 corresponds to a medium risk class. The risk of potential losses from future performance is classified as medium. In the event of very adverse market conditions, it is possible that the ability to execute your redemption request may be impaired. The calculation of the risk and earnings profile is based on simulated/historical data, which cannot be used as a reliable indication of the future risk profile. The classification of the fund may change in future and does not constitute a guarantee. Even a fund classed in category 1 does not constitute a completely risk-free investment. There can be no guarantee that a return will be achieved or that a substantial loss of capital will not be incurred. The overall risk exposure may have a strong impact on any return achieved by the fund or subfund. For further information please refer to the fund prospectus or PRIIP-KID.

Liquidity risk

The fund may invest some of its assets in financial instruments that may in certain circumstances reach a relatively low level of liquidity, which can have an impact on the fund’s liquidity.

Risk arising from the use of derivatives

The fund may conclude derivatives transactions. This increases opportunities, but also involves an increased risk of loss.

Currency risks

The fund may invest in assets denominated in a foreign currency. Changes in the rate of exchange may have an adverse effect on prices and incomes.

Operational risks and custody risks

The fund is subject to risks due to operational or human errors, which can arise at the investment company, the custodian bank, a custodian or other third parties.

Benefits

- GenAI is speeding up the process of digitization and automation across the healthcare system.
- GenAI can enhance patient care, simplify processes and procedures, and lead to better decisions.
- Companies that use or provide GenAI tools for healthcare-relevant purposes will gain a sustainable competitive advantage.
- Shareholder value creation will largely be determined by a company’s AI strategy and its execution.
- Bellevue – a pioneer in healthcare investing since 1993 and now one of the largest independent investors in the healthcare space in Europe.

You can find a detailed presentation of the risks faced by this fund in the “Special Investment Risks” section of the sales prospectus.

Management Team

Stefan Blum
Lead Portfolio Manager since inception of the fund

Marcel Fritsch
Lead Portfolio Manager since inception of the fund

Inherent risks

- The fund actively invests in equities. Stocks are subject to price fluctuations, so there is a risk of falling prices.
- The investments the fund makes may be denominated in foreign currency, which can entail a foreign-exchange risk relative to the fund’s base currency.
- The fund may invest some of its assets in financial instruments that may have relatively low levels of liquidity under certain circumstances, which may then affect the liquidity of the fund’s own shares.
- There are additional risks in the form of political and social unrest when investing in emerging markets.
- The fund may use derivatives. Derivatives offer greater upside potential yet also carry greater downside risk.

MSCI ESG Rating (AAA - CCC):	A	Coverage:	99%

Based on portfolio data as per 30.04.2024; – ESG data base on MSCI ESG Research and are for information purposes only; compliance with global norms according to the principles of UN Global Compact (UNGC), UN Guiding Principles for Business and Human Rights (HR) and standards of International Labor Organisation (ILO); no involvement in controversial weapons; norms-based exclusions based on annual revenue thresholds; ESG Integration: Sustainability risks are considered while performing stock research and portfolio construction; Stewardship: Engagement in an active and constructive dialogue with company representatives on ESG aspects as well as exercising voting rights at general meetings of shareholders. MSCI ESG Rating ranges from "leaders" (AAA-AA), "average" (A, BBB, BB) to "laggards" (B, CCC). The CO₂-intensity expresses MSCI ESG Research’s estimate of GHG emissions measured in tons of CO₂ per USD 1 million sales; for further information c.f. www.bellevue.ch/sustainability-at-portfolio-level.

Important information

This marketing communication relates to Bellevue Funds (Lux) (hereinafter the "Fund"), an investment company with variable capital "société à capital variable" (SICAV) under the current version of the Law of the Grand Duchy of Luxembourg of 10 August 1915 on commercial companies ("Law of 1915") and is authorized under Part I of the Law of 17 December 2010 relating to undertakings for collective investment ("Law of 2010") as an undertaking for collective investment (UCITS). Bellevue AI Health is a subfund of Bellevue Funds (Lux).

This marketing communication is issued by Bellevue Asset Management AG, which is an authorized asset manager subject to the supervision of the Swiss Financial Market Supervisory Authority (FINMA) and acts as an Investment Manager of the Fund. The Prospectus, statutes, the annual and half-yearly report, the share prices as well as the Key Information Document (PRIIP-KID) and further information about the Fund can be obtained free of charge in English and German from the management company of the Fund, Bellevue Asset Management AG, Seestrasse 16, CH-8700 Küsnacht, from the representative, paying, facilities and information agents mentioned below or online at www.bellevue.ch. The Key Information Document (PRIIP-KID) is available free of charge in the languages of the countries of distribution www.fundinfo.com.

This document is neither directed to, nor intended for distribution or use by, any person or entity who is a citizen or resident of any locality, state, country or jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. It is particularly not intended for US persons, as defined under Regulation S of the U.S. Securities Act of 1933, as amended. The information and data presented in this document are not to be considered as an offer to buy, sell or subscribe to any securities or financial instruments. The information, opinions and estimates contained in this document reflect a judgment at the original date of release and are subject to change without notice. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient and in particular tax treatment depends on individual circumstances and may be subject to change. This document is not to be relied upon in substitution for the exercise of independent judgment. Before making any investment decision, investors are recommended to ascertain if this investment is suitable for them in the light of their financial knowledge and experience, investment goals and financial situation, or to obtain specific advice from an industry professional. The details and opinions contained in this document are not to be considered as recommendation or investment advice. Every investment involves risk, especially with regard to fluctuations in value and return, and investors' capital may be at risk. If the currency of a financial product is different from your reference currency, the return can increase or decrease as a result of currency fluctuations. Past performance is no indicator for the current or future performance. The performance data are calculated without taking account of commissions and costs that result from subscriptions and redemptions. Commissions and costs have a negative impact on performance. For more information about the associated costs, please refer to the related costs and fees section of the prospectus. Any benchmarks/indices cited herein are provided for information purposes only. No benchmark/index is directly comparable to the investment objectives, strategy or universe of the subfund. The performance of a benchmark shall not be indicative of past or future performance of the subfund. Financial transactions should only be undertaken after having carefully studied the current valid prospectus and are only valid on the basis of the latest version of the prospectus and available annual and half-yearly reports. Please take note of the risk factors.
