Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. This is a small companies fund, you should be prepared to accept a higher degree of risk than a fund that invests in larger companies.

Fund Strategy

At the core of the team's investment philosophy is a belief in valuation-driven, active management. The European equities team firmly believes that investors are best served by a focus on long-term investing, avoiding an over-emphasis on current trends and consensus. Companies operate in long-term cycles and so does the focus of the investment team's research. The team's approach is to take advantage of inefficiencies in the market and buy stocks at below what they believe to be their intrinsic value. The investment process is driven by fundamental stock-picking, combining both top-down and bottom-up analysis, and with a focus on valuation.
