Fund objectives and investment policy

The fund aims to provide capital growth in excess of the MSCI Emerging Markets Asia (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of companies in the emerging markets in Asia. The fund is actively managed and invests at least two-thirds of its assets in equities of companies in emerging markets in Asia. The fund may invest directly in China B-Shares and China H-Shares and may invest less than 30% of its assets (on a net basis) directly or indirectly through derivatives in China A-Shares through (i) Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, (ii) the Renminbi Qualified Foreign Institutional Investor ("RQFII") scheme and (iii) regulated markets. The fund may also invest directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash. The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Relevant risk as associated with this Fund are shown overleaf and should be carefully considered before making any investment.

Performance over 5 years (%)

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

Exchange rate movements may cause the value of investments to fall as well as rise. The performance shown does not take account of any commissions, entry or exit charges.

Source: Morningstar, bid to bid, net income reinvested, net of fees. The fund's performance should be assessed against its target benchmark being to exceed the MSCI Emerging Markets Asia (Net TR) index and compared against the Morningstar Asia ex Japan Equities sector. The majority of the fund's investments may be components of the target benchmark. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of any benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. On 01.02.2015 the MSCI Emerging Markets Asia (Net TR) replaced the MSCI Emerging Markets Asia (Price). The full track record of the previous index has been kept and chainlinked to the new one. The Schroder ISF Emerging Asia fund was launched in January 2004 to accommodate a transfer of shareholders from the Schroder range of Hong Kong unit trusts to the Schroder ISF SICAV.

5 year return of EUR 10.000

Past Performance is not a guide to future performance and may not be repeated.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Derivatives risk – Efficient Portfolio Management: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Onshore renminbi currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses. Currency control decisions made by the Chinese government could affect the value of the fund's investments and could cause the fund to defer or suspend redemptions of its shares.

Stock Connect risk: The fund may be investing in China "A" shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Higher volatility risk: The price of this fund may be volatile as it may take higher risks in search of higher rewards.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed and may change over time. A fund in the lowest category does not mean a risk-free investment. The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.
