SUPPLEMENT

LORD ABBETT SHORT DURATION INCOME FUND

(A Fund of Lord Abbett Passport Portfolios plc, an open-ended investment company with variable capital constituted as an umbrella fund with segregated liability between its Funds)

The date of this Supplement is 10 March 2021

This Supplement contains specific information in relation to the Lord Abbett Short Duration Income Fund (the “Fund”), a sub-fund of Lord Abbett Passport Portfolios plc (the “Company”). It forms part of and must be read in the context of and together with the Prospectus of the Company dated 10 March 2021.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Supplement.

INTRODUCTION

This Supplement comprises information relating to the Shares of the Fund to be issued in accordance with the Prospectus and this Supplement.

The general details set out in the Prospectus apply to the Fund save where otherwise stated in this Supplement. To the extent that there is any inconsistency between this Supplement and the Prospectus this Supplement shall prevail.

Investors should read the section “RISK FACTORS” before investing in the Fund.

As the Directors may, at their discretion, impose an initial sales charge and/or a CDSC with respect to particular Classes, Shareholders in these Classes should view their investment as medium to long-term.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is actively managed.

THE FUND

Investment Objective

The investment objective of the Fund is to seek a high level of income consistent with preservation of capital.

Investment Policies

The Fund invests primarily in various types of short duration debt (or fixed income) securities issued by U.S. and non-U.S. issuers.

Under normal conditions, the Fund pursues its investment objective by investing at least 65% of its net assets in Investment Grade Debt Securities of various types.

Such Investment Grade Debt Securities primarily include: corporate debt securities of U.S. issuers; corporate debt securities of non-U.S. issuers that are denominated in U.S. Dollars; mortgage-backed and other asset-backed securities; securities issued or guaranteed by the U.S. government, its agencies or government-sponsored enterprises; and Inflation-Linked Investments.

The Fund may invest up to 35% of its net assets in any one or a combination of the following types of fixed income securities and other instruments: High Yield Debt Securities (commonly referred to as “lower-rated” or “junk” bonds); debt securities of non-U.S. (including emerging market) issuers that are denominated in non-U.S. currencies; senior loans, including novations, assignments and participations (not exceeding 10% of its net assets); convertible securities, including convertible bonds and preferred stocks; and CDOs. Such investments may include corporate securities and securities issued or guaranteed by non-U.S. governments, their agencies, authorities, political subdivisions or instrumentalities, or supranational agencies. Convertible securities may represent derived investment positions whose value at maturity or interest rate is linked to equity securities and which may therefore embed FDIs.

The Fund attempts to manage interest rate risk through its management of the average duration of the securities it holds in its portfolio. Duration is a mathematical concept that measures a portfolio's exposure to interest rate changes. The longer a portfolio's duration, the more sensitive it is to interest rate risk. The shorter a portfolio's duration, the less sensitive it is to interest rate risk. For example, the price of a portfolio with a duration of five years would be expected to fall approximately five percent if interest rates rose by one percentage point and a portfolio with a duration of two years would be expected to fall approximately two percent if interest rates rose by one percentage point. The Fund expects to maintain its average duration range between one and three years.

Subject to the limitations above, the Fund may invest in High Yield Debt Securities and debt securities issued by non-U.S. issuers and denominated in currencies other than the U.S. Dollar. These securities present greater investment risks.

The debt securities described above may include mortgage-backed, mortgage-related and other asset-backed securities, which directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans, real property, or other assets such as car loans or aviation financing. The Fund will not invest more than 25% of its total assets in any industry; however, this limitation does not apply to mortgage-backed securities, privately issued mortgage-related securities or securities issued by the U.S. government, its agencies and its instrumentalities.

The Fund may invest in convertible securities, such as preferred stocks or bonds, which are exchangeable at the option of the holder for a fixed number of other securities, usually common stocks, at a set price or formula. Convertible securities may provide the opportunity to participate in rising equity markets, but generally entail greater risks than bonds in declining equity markets.

The Fund may invest up to 10% of its net assets in floating or adjustable rate senior loans which are assignments or participations in loans which are acquired from the banks or brokers who have made the loan or from a member of a lending syndicate. The Fund will not engage in loan origination. Senior loans are business loans made to borrowers that may be U.S. or non-U.S. corporations, partnerships or other business entities. The interest rates on senior loans periodically are adjusted to a generally recognised base rate such as the London Interbank Offered Rate or the prime rate as set by the U.S. Federal Reserve. Senior loans typically are secured by specific collateral of the borrower and hold the most senior position in the borrower's capital structure or share the senior position with the borrower's other senior debt securities. This capital structure position generally gives holders of senior loans a priority claim on some or all of the borrower's assets in the event of default.

The Fund may invest up to 10% of its net assets in Underlying Collective Investment Schemes, subject to the requirements of the Central Bank and the Regulations. Such Underlying Collective Investment Schemes will have investment policies consistent with the investment policies of the Fund. For the avoidance of doubt, the Fund shall not invest more than 10% of its net assets in any Underlying Collective Investment Schemes, individually or in aggregate.

In pursuing its investment objective, the Fund may invest in FDIs. The Fund may use FDIs in order to seek to enhance returns, to attempt to hedge some of its investment or currency risk, to manage portfolio duration or as a substitute position for holding the underlying asset on which the FDI is based. The FDIs that the Fund may use consist principally of futures contracts, forward contracts, options and swap agreements. The underlying reference security for FDIs which will, at all times, reflect the investment policies of the Fund may be a single security, a basket of securities or an index of securities. Where the Fund invests in FDIs that are based on financial indices, these indices will be consistent with the investment

policies of the Fund and generally will not be rebalanced more frequently than monthly. It is not anticipated that such rebalancing will increase Fund costs or impact the Fund's ability to comply with its investment restrictions. FDIs may also use other types of instruments or investments as a reference, such as interest rates, provided such instruments or investments are consistent with the investment policies of the Fund. Details of these FDIs are set out in the Prospectus under the section "USE OF FINANCIAL DERIVATIVE INSTRUMENTS".

The leverage exposure of the Fund through the use of FDIs will not exceed 100% of the Fund's Net Asset Value, as measured using the commitment approach.

The Investment Manager operates a risk management process on behalf of the Fund in relation to its use of FDIs, details of which are set out in the Prospectus under the section "USE OF FINANCIAL DERIVATIVE INSTRUMENTS: Risk Management".

Investment Process

The Fund buys and sells securities using a relative value-oriented investment process, meaning the Fund generally seeks more investment exposure to securities believed to be undervalued and less investment exposure to securities believed to be overvalued. The Fund combines top-down and bottom-up analysis to construct its portfolio. The Fund uses a blend of fundamental research and quantitative tools to evaluate global economic conditions, opportunities and risks across different segments of the fixed income market. The Fund applies proprietary filters to this analysis to determine security selection, sector exposure, and term structure. The Fund may actively rotate sector exposure based on its assessment of relative value. The Fund engages in active and frequent trading of its portfolio securities.

Base Currency

The Base Currency of the Fund is USD.

Investment Restrictions and Risk Management

The general investment restrictions as set out in the "INVESTMENT RESTRICTIONS" section of the Prospectus shall apply. The Fund will only invest in assets that are permitted under the Regulations.

Profile of a Typical Investor

The Fund is intended to serve as a long-term investment option and should not be viewed as an appropriate investment vehicle for short-term gain or trading. The Fund may be suitable for investors seeking a high level of income consistent with preservation of capital.

RISK FACTORS

Investment in the Fund carries with it a degree of risk including, but not limited to, the risks described in the "INVESTMENT RISKS AND SPECIAL CONSIDERATIONS" section of the Prospectus. The Investment Manager considers that the investment risks that are ticked in the "INVESTMENT RISKS APPLICABLE TO EACH FUND" section of the Prospectus are relevant to an investment in the Fund. These investment risks are not purported to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before making an application for Shares. There can be no assurance that the Fund will achieve its investment objective.

FEES AND EXPENSES

The Fund shall bear its attributable portion of the fees and operating expenses of the Company. The fees and operating expenses of the Company are set out in detail under the section “Fees and Expenses” in the Prospectus.

Management Fee and Expense Limitation

Under the Management Agreement, the Company will pay to the Manager a maximum fee at an annual rate equal to the percentage of the average daily Net Asset Value of the relevant Class of the Fund as set out in the Schedule to this Supplement. The management fee shall accrue daily and be calculated and payable monthly in arrears. The Manager will remunerate the Investment Manager from its management fee, together with any reasonable vouched out of pocket expenses. The Investment Manager may from time to time at its sole discretion, use part of its investment management fee to remunerate the Distributors and certain other financial intermediaries, including Distribution Agents, and may pay reimbursements or rebates to certain institutional Shareholders.

In addition, the Manager shall be entitled to be reimbursed its reasonable vouched out-of-pocket expenses. Each Fund shall bear pro rata its share of such out-of-pocket expenses.

The Manager has committed to waive its management fee and, if necessary, reimburse the Fund's operating expenses, in order to keep the Fund's total operating expenses (including the fees and out of pocket expenses of the Manager, the Administrator and Depositary) from exceeding an annual rate of the daily Net Asset Value of the Fund as set out in the Schedule to this Supplement (the “Expense Limitation”). Operating expenses do not include the cost of buying and selling investments, withholding tax, stamp duty or other taxes on investments, commissions and brokerage fees incurred with respect to investments, and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to the Company as may be determined by the Directors in their discretion. The expenses subject to the Expense Limitation shall include the management fee and out-of-pocket expenses. The Manager may renew or discontinue this arrangement at any time upon prior notification to Shareholders.

To the extent that the Manager waives its fee or reimburses the Fund's operating expenses under the Expense Limitation, the Fund's overall expense ratio will be lower than it would have been without the Expense Limitation. This reduction in operating expenses may increase the Fund's investment return and such returns may not be achieved without the benefit of the Expense Limitation.

Depositary's Fee

The Depositary is entitled to receive out of the assets of the Fund a fee at an annual rate which will not exceed 0.03% of the average Net Asset Value of the Fund (plus any applicable taxes). This fee accrues and is calculated on each Dealing Day and payable monthly in arrears. The Depositary shall, subject to a minimum annual custody fee of USD 15,000 per Fund, also be entitled to receive out of the assets of the Fund all agreed sub-custodian fees, transaction charges (which will be charged at normal commercial rates) together with reasonable out-of-pocket expenses incurred by the Depositary in the performance of its duties under the Depositary Agreement. Such depositary fees shall accrue daily and be calculated and payable monthly in arrears. This fee will be included within the Expense Limitation.

Administrator's Fee

The Administrator is entitled to receive out of the assets of the Fund a fee at an annual rate which will not exceed 0.035% of the average Net Asset Value of the Fund, subject to a minimum fee of USD 3,000 per month per Fund (plus any applicable taxes). This fee accrues and is calculated on each Dealing Day and payable monthly in arrears. The Administrator is also entitled to charge to the Fund all agreed fees and transaction charges, at normal commercial rates, together with reasonable out-of-pocket expenses (plus any applicable taxes), it incurs on behalf of the Fund in the performance of its duties under the Administration Agreement. This fee will be included within the Expense Limitation.

Initial Sales Charge

An initial sales charge of up to 5% of the amount subscribed in respect of subscriptions to Class A Shares and of up to 3% of the amount subscribed in respect of subscriptions to Class N Shares shall be payable, as more particularly described in the “SHARE CLASSES” section of the Prospectus and the Schedule to this Supplement. Where an initial sales charge applies, Shareholders should view their investment as medium to long-term.

CDSC

Class C Shares are subject to a CDSC of 1% of the lesser of the Net Asset Value of the Shares being sold or the Net Asset Value of those Shares when purchased if an investor sells Shares within one (1) year of purchase as more particularly described in the “SHARE CLASSES” section of the Prospectus.

SUBSCRIPTIONS

Purchase of Shares

Full details on how to purchase Shares are set out in the “ADMINISTRATION OF THE COMPANY: Subscription Procedure” section of the Prospectus.

Details in relation to the Class Currency, investment management fee, Initial Offer Price, minimum initial investment, minimum holding and initial sales charge are set out in the Schedule to this Supplement.

The Distributors are authorised by the Directors to accept subscriptions in relation to the Fund notwithstanding that the amount subscribed for may fall below the minimum initial investment and minimum holding as set out in the Schedule to this Supplement.
