AQR UCITS FUNDS II

Investment Management Report (Unaudited)

AQR Delphi Global Equities UCITS Fund

The investment objective of AQR Delphi Global Equities UCITS Fund (the “Sub-Fund”) is to seek to outperform the MSCI World Net Total Return Index, hedged to the respective investors’ unit class currency (the “Benchmark”).

For the year ended 31 March 2021, the Sub-Fund’s Class A2 units underperformed the Benchmark⁽¹⁾. The Class A2 units are denominated in U.S. Dollar, which is the reference currency of the Sub-Fund. Beginning in January 2020 through the end of the 2020 calendar year, the global outbreak of Coronavirus (or COVID-19) created significant unprecedented economic and social uncertainty throughout the world. The ultimate impact of the Coronavirus pandemic (or of any future pandemic, epidemic or outbreak of a contagious disease) is difficult to predict, but Coronavirus and the reactions to it have already had adverse effects on global, national and local economies and on financial markets, all of which may have had an impact on the Sub-Fund’s performance.

The Sub-Fund’s underperformance relative to its Benchmark was driven primarily by stock selection within sectors, as well as by sector selection. The Sub-Fund’s performance was negatively impacted by both a relative underweight to information technology, and relative overweight to utilities and consumer staples. Stock selection within consumer services, consumer discretionary, and financials sectors detracted.

As of 31 March 2021, the Sub-Fund’s largest active positions within the stock selection strategy included sector overweight to consumer staples and health care, and underweights in information technology and industrials.

At AQR, we employ a variety of means to monitor markets and assess both portfolio and operational risk on a continual basis. The equity portfolios that form our investment strategies maintain extensive levels of diversification (at the security, industry, and where applicable country level), strict risk controls, and independent risk monitoring. We maintain a systematic equity portfolio management process that considers moderate position-level exposures, and portfolio liquidity. Our portfolio management and research teams, in coordination with our implementation team and independent risk team, have long employed measures to assess portfolio performance during uncertain and volatile periods, and to monitor the higher levels of market and active portfolio volatility to determine if intervention is necessary. We will continue to do so. Our experience during the recent COVID-19 environment, as with other past volatile and uncertain periods, is that we have been able to successfully maintain portfolio liquidity, and to execute our strategies effectively, while making adjustments where necessary to limit active portfolio risk. We will continue to remain vigilant as the COVID-19 pandemic remains a potential factor within the global equity market environment.

There have been no material changes to the Sub-Fund’s investment strategy or objectives during the year ended 31 March 2021. Additionally, while AQR promotes a process that we expect continually adds to our ability to outperform the commercial Benchmark, while controlling for unwanted portfolio exposures or risks, we do not anticipate that these incremental changes will materially impact the portfolio’s investment objective or the means of achieving them during the next fiscal year.

AQR Global Risk Premium UCITS Fund

The investment objective of the AQR Global Risk Premium UCITS Fund (the “Sub-Fund”) is to efficiently deliver exposure to a diversified set of global risk premia covering equities, government bonds and eligible commodity indices. The risk allocation of the Sub-Fund is spread across three major categories: equity risk, nominal interest rate risk, and inflation risk. The Sub-Fund seeks to achieve a long-term risk-adjusted return that is higher than traditional allocations by combining these market exposures in a risk-diversified way and actively managing them to target a desired level of risk.

For the period from the launch of the Sub-Fund on 16 February 2021 to 31 March 2021, the Sub-Fund’s Class IAGF units negatively returned⁽²⁾. The Class IAGF units are denominated in the British Pound.

There have been no material changes to the Sub-Fund’s investment strategy or objectives during the period ended 31 March 2021.

Investment Management Report (Unaudited) (continued)

AQR Sustainable Style Premia Global Equity UCITS Fund (formerly known as AQR Style Premia: Global Equity UCITS Fund)

The investment objective of AQR Sustainable Style Premia Global Equity UCITS Fund (the “Sub-Fund”) is to outperform the MSCI World Index (total return net dividends, unhedged) (the “Benchmark”), on a risk adjusted basis. The Sub-Fund aims to provide exposure to three well-known and researched investment styles: value, momentum, and defensive. Additionally, the Sub-Fund incorporates Environmental, Social, and Governance (“ESG”) goals in parallel to its investment return objectives. In order to achieve these goals, which include improved ESG ratings versus the broader equity market, the Sub-Fund may underweight or avoid investing in companies the manager determines do not rate sufficiently well along a variety of ESG dimensions.

For the year ended 31 March 2021, the Sub-Fund's Class A2 units relatively underperformed the Benchmark⁽¹⁾. The Class A2 units are denominated in U.S. Dollar, which is the reference currency of the Sub-Fund. Beginning in January 2020 through the end of the 2020 calendar year, the global outbreak of Coronavirus (or COVID-19) created significant unprecedented economic and social uncertainty throughout the world. The ultimate impact of the Coronavirus pandemic (or of any future pandemic, epidemic or outbreak of a contagious disease) is difficult to predict, but Coronavirus and the reactions to it have already had adverse effects on global, national and local economies and on financial markets, all of which may have had an impact on the Sub-Fund's performance.

The Sub-Fund's underperformance was driven by both stock selection within sectors, as well as by sector selection. Specifically, the Sub-Fund's performance was negatively impacted by stock selection within the communication services and health care sectors. Overweight positions to the consumer staples and health care sectors also detracted from the portfolio's relative performance.

As of 31 March 2021, the Sub-Fund's largest active positions within the stock selection strategy included a sector overweight to consumer staples, while the Sub-Fund was underweight energy and utilities.

At AQR, we employ a variety of means to monitor markets and assess both portfolio and operational risk on a continual basis. The equity portfolios that form our investment strategies maintain extensive levels of diversification (at the security, industry, and where applicable country level), strict risk controls, and independent risk monitoring. We maintain a systematic equity portfolio management process that considers moderate position-level exposures, and portfolio liquidity. Our portfolio management and research teams, in coordination with our implementation team and independent risk team, have long employed measures to assess portfolio performance during uncertain and volatile periods, and to monitor the higher levels of market and active portfolio volatility to determine if intervention is necessary. We will continue to do so. Our experience during the recent COVID-19 environment, as with other past volatile and uncertain periods, is that we have been able to successfully maintain portfolio liquidity, and to execute our strategies effectively, while making adjustments where necessary to limit active portfolio risk. We will continue to remain vigilant as the COVID-19 pandemic remains a potential factor within the global equity market environment.

The only material changes to the Sub-Fund's investment strategy or objectives during the fiscal year ended 31 March 2021 was the merging of the AQR Style Premia: Sustainable Global Equity UCITS Fund with the Sub-Fund which occurred during the third quarter of calendar year 2020. The merger did not impact the Sub-Fund's investment objective, other than integrating ESG objectives into the acquiring Sub-Fund's overall investment goals. Additionally, while AQR promotes a process that we expect continually adds to our ability to outperform the commercial Benchmark, while controlling for unwanted portfolio exposures or risks, we do not anticipate that these incremental changes will materially impact the portfolio's investment objective or the means of achieving them during the next fiscal year.

Investment Management Report (Unaudited) (continued)

Style Capture UCITS Fund

The investment objective of Style Capture UCITS Fund (the “Sub-Fund”) is to produce attractive risk-adjusted returns while maintaining low long-term average correlation to traditional markets by constructing diversified, “long” and “short” positions across asset classes such as stocks/industries, equity indices, fixed income and currencies. The Sub-Fund seeks to achieve its investment objective by providing exposure to five separate investment styles: value, momentum, carry, defensive and trend. The Sub-Fund invests within four broad asset groups which include stocks and industries, equity indices, fixed income and currencies.

Since the Sub-Fund’s inception date of 10 June 2020 through the period ended 31 March 2021, the Sub-Fund’s Class IAE3 units positively returned⁽¹⁾. The Class IAE3 units are denominated in Euro. Beginning in early 2020 through the end of the fiscal year of the Sub-Fund, the global outbreak of Coronavirus (or COVID-19) created significant economic and social uncertainty. While we do not believe the outbreak had a material impact on the Sub-Fund’s aggregate return during the period, the ultimate impact of the Coronavirus pandemic (or of any future pandemic, epidemic or outbreak of a contagious disease) is difficult to predict and measure, but Coronavirus and the reactions to it have already had adverse effects on global, national and local economies and on financial markets, all of which have had an impact on the Sub-Fund’s performance.

Gains were driven by three of the four asset groups; stocks and industries, equity indices, and currencies. Fixed income was the sole detracting asset group. From a style perspective, five of the Sub-Fund’s six styles contributed positively over the period. Both value and momentum were meaningful drivers of gain while defensive, trend and the volatility strategy contributed smaller gains. Carry was the only style to detract, with losses coming from each of the three asset groups where that style is executed.

There have been no material changes to the Sub-Fund’s investment objectives during the period ended 31 March 2021. The investment strategy has, however, seen some meaningful changes. The fixed income asset group has been enhanced to now include yield curve and short-term interest rate futures strategies. Emerging market assets have also been added to both equity indices and currencies, and volatility risk premium strategies were removed from both the equity index and fixed income asset groups.

⁽¹⁾Please visit the AQR UCITS website (<https://ucits.aqr.com>) for detailed performance information and information on the fees associated with net performance which can be found in the “Charges” section of the Sub-Fund’s KIID or the “Fees and Expenses” section of the Prospectus.

⁽²⁾The performance information of the class of units is net of fees as outlined in the Fees and Expenses section of the Prospectus.

The figures stated in this report are historical and not necessarily indicative of future performance.

Audit report

To the Unitholders of
AQR UCITS Funds II

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of AQR UCITS Funds II (the “Fund”) and of each of its sub-funds as at 31 March 2021, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the Schedules of Investments as at 31 March 2021;
- the Statements of Assets and Liabilities as at 31 March 2021;
- the Statements of Operations for the year then ended;
- the Statements of Changes in Net Assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Management Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Management Company for the financial statements

The Board of Directors of the Management Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Management Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Management Company is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Management Company either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Management Company;

- conclude on the appropriateness of the Board of Directors of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other Matter

In addition to our responsibility to audit and express an opinion on the financial statements in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we have been requested by the Board of Directors of the Management Company to express an opinion on the financial statements in accordance with generally accepted auditing standards in the United States of America as issued by the AICPA, in order to meet the requirements of Rule 206(4)-2 of the US Investment Advisors Act of 1940. We have reported separately in this respect on Page 10.

Régis Malcourant

Report of Independent Auditors

To the Board of Directors of the Management Company of
AQR UCITS Funds II

We have audited the accompanying financial statements of AQR UCITS Funds II (the “Fund”) and of each of its sub-funds, which comprise the Schedules of Investments, the Statements of Assets and Liabilities as of 31 March 2021, the Statements of Operations and of Changes in Net Assets for the year then ended.

Responsibility of the Board of Directors of the Management Company for the financial statements

The Board of Directors of the Management Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements; this includes the design, implementation, and maintenance of internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors’ Responsibility

Our responsibility is to express an opinion on the financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Fund’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors of the Management Company, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of AQR UCITS Funds II and of each of its sub-funds as of 31 March 2021, and the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

AQR UCITS FUNDS II

Notes to the Financial Statements as at 31 March 2021

1. General Information

(a) The Fonds Commun de Placement

AQR UCITS Funds II (the “FCP”) is an investment fund created on 1 August 2013 as a Fonds Commun de Placement. The FCP is governed by the provisions of the Part I of the Law of 17 December 2010, as amended, governing Undertakings for Collective Investments (the “Law”). The FCP is managed for the account and in the exclusive interest of its unitholders by the management company. The Management Regulations have been deposited with the Luxembourg Trade and Companies’ Register and a statement to that effect has been published in the Mémorial.

The FCP is structured as an umbrella fund designed to offer investors access to a variety of investment strategies through a range of separate sub-funds (the “Sub-Funds”). Each Sub-Fund maintains a separate portfolio of investment securities, cash and other assets. Separate classes of units are issued within each Sub-Fund.

The FCP is an unincorporated co-proprietorship of its securities and other assets, managed by FundRock Management Company S.A. (the “Management Company”). The assets of the FCP are segregated from those of the Management Company. The list of the investment funds managed by the Management Company may be obtained, on request, at the registered office of the Management Company. The Management Company has appointed (by way of delegation) AQR Capital Management, LLC as the investment manager of the FCP (the “Investment Manager”). The Investment Manager invests the assets of each of the active Sub-Funds pursuant to their respective investment objectives and policies.

The Investment Manager appointed UBS Asset Management (Americas) Inc. as a sub-investment manager (the “Sub-Investment Manager”) to Style Capture UCITS Fund. The Sub-Investment Manager provides investment management and advisory services to the Investment Manager with respect to the investment of the cash assets of this Sub-Fund, and is compensated directly by the Investment Manager pursuant to a sub-investment manager agreement (the “Sub-Investment Manager Agreement”). None of the fees related to the services provided by the Sub-Investment Manager are charged to the Sub-Fund. As at 30 November 2020, the Sub-Investment Manager Agreement has been terminated.

The Investment Manager is subject to the Securities and Exchange Commission’s amended Rule 206(4)-2 under the Investment Advisers Act of 1940 (the “Act”). The Investment Manager did not identify any United States of America investors in the FCP for the year ended 31 March 2021 and as such no reconciliation is required between generally accepted accounting principles in the United States of America and generally accepted accounting principles in Luxembourg.

The Board of Directors of the Management Company (the “Directors”) has adopted the most recent Association of Luxembourg Fund Industry Code of Conduct (the “Code”), which sets out principles of best corporate governance practices. The Directors consider that the Management Company has been in compliance with the Code in all material aspects through the financial year ended 31 March 2021.

(b) The Sub-Funds

As at 31 March 2021, the FCP consists of four active Sub-Funds:

Sub-Fund	Launch Date
AQR Delphi Global Equities UCITS Fund	4 September 2013
AQR Global Risk Premium UCITS Fund	16 February 2021
AQR Sustainable Style Premia Global Equity UCITS Fund ⁽¹⁾	24 November 2015
Style Capture UCITS Fund	10 June 2020

⁽¹⁾Sub-Fund changed its name from AQR Style Premia: Global Equity UCITS Fund on 25 September 2020 after NAV production.

The investment objective for each Sub-Fund is set out in the relevant Supplement to the Prospectus.

AQR UCITS FUNDS II

Notes to the Financial Statements as at 31 March 2021 (continued)

1. General Information (continued)

(b) The Sub-Funds (continued)

On 25 September 2020, after NAV production, AQR Style Premia: Global Equity UCITS Fund changed its name to AQR Sustainable Style Premia Global Equity UCITS Fund and updated its investment objective and fee structure. Please refer to the most recent Supplement to the Prospectus for additional details.

(c) Merger

On 11 August 2020, the Directors approved the merger of the AQR Style Premia: Sustainable Global Equity UCITS Fund (the "Absorbed Sub-Fund") into the AQR Style Premia: Global Equity UCITS Fund (the "Receiving Sub-Fund") (the "Merger"). The Merger was effected by absorption whereby the assets and liabilities of the Absorbed Sub-Fund are transferred by way of a contribution in kind into the Receiving Sub-Fund effective on 25 September 2020 after NAV production (the "Merger Date"). The reason for the Merger is an economic rationalisation of the range of Sub-Funds of the FCP. Such Merger will enable unitholders of both Sub-Funds to benefit from economies of scale, which is considered by the Directors as being in the best interest of the unitholders of the merging Sub-Funds.

Unitholders of the Absorbed Sub-Fund were issued on the Merger Date a number of corresponding unit classes of the Receiving Sub-Fund equivalent to the number of units held in the relevant unit class of the Absorbed Sub-Fund multiplied by the relevant unit exchange ratio (the "Unit Exchange Ratio"). The Unit Exchange Ratio in respect of the unit classes of the Absorbed Sub-Fund has been determined, on a per unit class basis, by dividing the NAV per unit calculated as at the Merger Date by the NAV per unit of the corresponding unit class, expressed in the same currency, in the Receiving Sub-Fund as at the same date. The Unit Exchange Ratio as at the Merger Date are presented below:

Class of Units of the Absorbed Fund	Class of Units of the Receiving Fund	Unit Exchange Ratio	NAV per Unit of the Absorbed Fund at Merger Date
Class B3	Class B3	0.8290	EUR 91.64
Class E - TT2	Class E - TT2	1.0000	EUR 112.57

The Investment Manager bore the legal, advisory and administrative costs and expenses associated with the preparation and completion of the Merger.

(d) The Units

Each Sub-Fund may offer more than one class of units. Each class of units may have different features with respect to a number of criteria, including but not limited to subscription, redemption, minimum holding, fee structure, currency and dividend policy. Within each Sub-Fund, individual classes of units may have a currency of denomination that may differ from the reference currency of the Sub-Fund. Subscriptions and redemptions that are recognised in the current year but are received or paid after the year end are reflected as subscriptions receivable and redemptions payable, respectively, in the Statements of Assets and Liabilities. The Investment Manager may enter into certain transactions to hedge a Sub-Fund's exposure to foreign exchange risk where classes of units are denominated in a currency other than the reference currency of the respective Sub-Fund. The classes available as at 31 March 2021 for each Sub-Fund are set out in the relevant Supplement to the Prospectus.

2. Significant Accounting Policies

(a) Presentation of the Financial Statements

The financial statements of the FCP are prepared in accordance with Luxembourg legal and regulatory requirements relating to Undertakings for Collective Investment Funds. The combined accounts of the FCP as well as the financial statements of the Sub-Funds are expressed in U.S. Dollar ("USD"), which is the reference currency of the FCP and the Sub-Funds.

Notes to the Financial Statements as at 31 March 2021 (continued)

2. Significant Accounting Policies (continued)

(b) Combined Financial Statements

The Combined Statements of Assets and Liabilities is the sum of the Statements of Assets and Liabilities of each Sub-Fund converted, if applicable, into the reference currency of the FCP using the exchange rate prevailing at year end. The Combined Statements of Operations and the Combined Statements of Changes in Net Assets are the sum of the Statements of Operations and the Statements of Changes in Net Assets of each Sub-Fund converted, if applicable, into the reference currency of the FCP using the average exchange rate for the year.

(c) Valuation of Investments

All securities and other investments are recorded at their estimated fair value, as described in Note 5.

(d) Swing Pricing

A Sub-Fund may incur dilution of the NAV per unit due to investors buying or selling units in a Sub-Fund at a price that does not reflect dealing and other costs (such as taxes) that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows.

In order to counter this impact, the Management Company may adopt a swing pricing mechanism to protect the interests of unitholders in the Sub-Fund. If on any valuation day, the aggregate net transactions in units of a Sub-Fund exceed a pre-determined threshold (the "Threshold"), the NAV per unit may be adjusted upward or downward to reflect the dealing and other costs attributable to the net inflows and net outflows, respectively. The extent of the price adjustment (the "Factor") will be set by the Management Company to reflect an approximation of the dealing and other costs which would be incurred on the effective acquisition or disposal of assets in the Sub-Fund. The Factor and the Threshold will be reviewed on a periodic basis by the Management Company. Please refer to the most recent Prospectus for details on swing pricing mechanisms.

In accordance with the Prospectus, swing pricing is in effect during the year ended 31 March 2021 in Style Capture UCITS Fund (maximum Factor of 0.5%). Swing pricing may be included in proceeds from subscriptions of units or payments for redemptions of units in the Statements of Changes in Net Assets, if applicable. The NAV per unit as disclosed in the Statistical Information represents the published NAV per unit. There was no swing pricing applied to the NAV per unit as at 31 March 2021.

(e) Cash

Cash comprises USD and foreign currency deposits held at a custodian bank which may exceed insured limits. The Sub-Funds are subject to risk to the extent that the institution may be unable to fulfill its obligations.

(f) Due from/to Broker(s)

Due from/to broker(s) represent(s) cash balances pledged to, or cash balances received from, the Sub-Funds' prime brokers and counterparties, including cash held for securities trading, as well as cash pledged or received as collateral at counterparties for over-the-counter ("OTC") derivative transactions. The Sub-Funds are subject to credit risk should the counterparties be unable to meet their obligations to the Sub-Funds.

AQR UCITS FUNDS II

Notes to the Financial Statements as at 31 March 2021 (continued)

2. Significant Accounting Policies (continued)

(f) Due from/to Broker(s) (continued)

The table below summarises the net cash collateral that is pledged/(received) at each relevant broker for each Sub-Fund as at 31 March 2021. The Sub-Funds do not hold any non-cash collateral for OTC derivative transactions.

Sub-Fund	Broker ⁽¹⁾	Collateral for OTC Derivative Transactions
AQR Delphi Global Equities UCITS Fund	CITI ⁽²⁾	\$488,647
	JPMC ^{(2),(3)}	1,287,465
AQR Global Risk Premium UCITS Fund	CITI ^{(2),(3)}	31,361,133
	GSIN ^{(2),(3)}	69,030,057
	JPMC ^{(2),(3)}	64,602,494
	MLIN ⁽²⁾	(3,645)
AQR Sustainable Style Premia Global Equity UCITS Fund ⁽⁴⁾	CITI ⁽²⁾	(5)
	JPMC ⁽²⁾	(5)
Style Capture UCITS Fund	CITI ⁽²⁾	24,539,084
	GSIN ^{(2),(3)}	295,414
	JPMC ^{(2),(3)}	31,510,632
	MLIN ^{(2),(3)}	3,533,365
	UBSA	3,680,002

⁽¹⁾The broker abbreviations are defined in the Schedules of Investments.

⁽²⁾Includes unsettled cash on OTC derivative transactions.

⁽³⁾A portion of the collateral is held in a tri-party account.

⁽⁴⁾Sub-Fund changed its name from AQR Style Premia: Global Equity UCITS Fund on 25 September 2020 after NAV production (see Note 1).

(g) Deposits with/from Brokers for Exchange-Traded and Centrally Cleared Derivatives

Upon entering into an exchange-traded or centrally cleared derivative contract, a Sub-Fund is required to pledge cash or securities as collateral to a central clearinghouse ("CCP"), through a broker, in accordance with the initial margin requirements of the CCP. At year end, the balances of the initial margin requirements at each broker, excluding the value of any securities pledged as collateral, are recorded as deposits with/from brokers for exchange-traded and centrally cleared derivatives in the Statements of Assets and Liabilities. Any security that has been pledged as collateral is identified as an asset in the Statements of Assets and Liabilities as a component of investments, at fair value. As at 31 March 2021, there were no securities pledged as collateral.

As at 31 March 2021, the Sub-Fund(s) pledged/(received) collateral as follows:

Sub-Fund	Broker ⁽¹⁾	Deposits with/from Broker
AQR Delphi Global Equities UCITS Fund	GSCO	\$1,936,092
AQR Global Risk Premium UCITS Fund	GSCO	124,185
	JPPC	62,979,024
AQR Sustainable Style Premia Global Equity UCITS Fund ⁽²⁾	JPPC	2,284,883
Style Capture UCITS Fund	CITG	2,865,133
	GSCO	7,210,105
	JPPC	21,170,231

⁽¹⁾The broker abbreviations are defined in the Schedules of Investments.

⁽²⁾Sub-Fund changed its name from AQR Style Premia: Global Equity UCITS Fund on 25 September 2020 after NAV production (see Note 1).

Notes to the Financial Statements as at 31 March 2021 (continued)

2. Significant Accounting Policies (continued)

(h) Foreign Currency Translation

Any value not expressed in the reference currency of the relevant Sub-Fund shall be converted into the reference currency of the relevant Sub-Fund at the prevailing exchange rate that the Management Company shall determine to be appropriate.

Income and expenses expressed in currencies other than the reference currency of the respective Sub-Fund are converted at exchange rates prevailing at the transaction date. The acquisition cost of securities expressed in a currency other than the reference currency of the respective Sub-Fund is translated at the exchange rates prevailing on the date of purchase. Assets and liabilities expressed in currencies other than the reference currency of the respective Sub-Fund are converted at exchange rates prevailing at year end.

The respective Sub-Fund does not separately disclose the portion of the results of operations arising from changes in the foreign exchange rates on investments and derivatives from the fluctuations that result from changes in the market prices of investments and derivatives held or sold during the year. Accordingly, such foreign currency gains/(losses) are included in the applicable reported net realised gain/(loss) on investments and derivatives and net change in unrealised appreciation/(depreciation) on investments and derivatives in the Statements of Operations.

Net realised gain/(loss) on foreign currency transactions recorded in the Statements of Operations arise from the disposition of foreign currency, and the difference between the amount of dividends, interest and foreign withholding taxes recorded on each Sub-Fund's books on the transaction date and the USD equivalent of the amounts actually received or paid. Net changes in unrealised appreciation/(depreciation) on foreign currency translation reported in the Statements of Operations arise from changes (due to the changes in the exchange rate) in the value of foreign currency and assets and liabilities (other than investments and derivatives) denominated in foreign currencies, which are held at year end.

The following exchange rates (against USD) as at 31 March 2021 were used to convert assets and liabilities denominated in currencies other than the reference currency of the Sub-Funds:

1 USD =	1.312078 AUD	– Australian Dollar
	5.735100 BRL	– Brazilian Real
	1.256650 CAD	– Canadian Dollar
	0.941450 CHF	– Swiss Franc
	6.336400 DKK	– Danish Krone
	0.851934 EUR	– Euro
	0.725453 GBP	– British Pound
	7.774100 HKD	– Hong Kong Dollar
	3.340900 ILS	– Israeli New Shekel
	110.735000 JPY	– Japanese Yen
	1,131.750000 KRW	– South Korean Won
	20.457000 MXN	– Mexican Peso
	4.146500 MYR	– Malaysian Ringgit
	8.535950 NOK	– Norwegian Krone
	3.958450 PLN	– Poland Zloty
	8.724450 SEK	– Swedish Krona
	1.343900 SGD	– Singapore Dollar
	31.250000 THB	– Thai Baht
	8.250000 TRY	– Turkish Lira
	14.766250 ZAR	– South African Rand

Notes to the Financial Statements as at 31 March 2021 (continued)

2. Significant Accounting Policies (continued)

(i) Investment Transactions and Related Income and Expense

Investment transactions are accounted for on a trade date plus one accounting basis (the next business day after the order to buy or sell is executed). Realised gains and losses are calculated using the specific identification cost relief methodology and include transaction costs. Interest income/(expense), net of withholding tax, if any, is recorded on an accrual basis using the effective interest method, which results in coupon interest being adjusted for amortisation of premiums and accretion of discounts, when applicable. Dividend income/(expense), net of withholding tax, if any, is recorded on the ex-dividend date or when a Sub-Fund receives notification of the ex-date dividend. The Sub-Funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. Interest purchased and interest sold on bonds are included in interest receivable and interest payable, respectively, in the Statements of Assets and Liabilities. For inflation-linked bonds, interest income/(expense) is earned on the principal amount and adjusted for the changes in the relevant consumer price index. As governed by the relevant Master Agreement, interest income may be earned by a Sub-Fund on collateral posted directly to a counterparty. Additionally, interest expense may be incurred by a Sub-Fund if a counterparty charges interest on collateral posted directly to a Sub-Fund.

The Sub-Funds record distributions received in excess of income from underlying investments as a reduction of cost of investments and/or realised gains. Such amounts are based on estimates (if actual amounts are not available) and actual amounts of income, realised gains and returns of capital may differ from the estimated amounts. The Sub-Funds adjust the estimated amounts of the components of distributions (and consequently net investment income) as necessary once the issuers provide information about the actual composition of the distributions.

(j) Multi-Class Operations

In calculating the NAV per unit of each class of units, income, non-class specific expenses, realised and unrealised gains and losses are allocated daily to each class of units based on the proportion of net assets of each class at the beginning of each day. Each Sub-Fund is charged for those expenses that are directly attributable to that Sub-Fund. FCP level expenses are allocated among the Sub-Funds based on the ratio of average net assets or another reasonable methodology.

3. Investments and Other Securities

(a) Inflation-Indexed Bonds

Certain Sub-Funds may invest in inflation-indexed bonds which are adjusted for inflation through periodic increases or decreases in the security's interest accruals, face amount, or principal redemption value, by amounts corresponding to the rate of inflation as measured by an index.

(b) Repurchase Agreements

Certain Sub-Funds may enter into repurchase agreements. In a repurchase agreement, the relevant Sub-Fund who takes possession of an underlying debt obligation (collateral) is subject to an obligation of the seller to repurchase, and the relevant Sub-Fund to resell, the obligation at an agreed-upon price and time. A repurchase agreement is considered a short-term investment and is carried at its contractual amounts, which approximates fair value. Interest earned is recorded as interest income on repurchase agreements in the Statements of Operations. In periods of increased demand for collateral, the Sub-Funds may pay a fee for receipt of collateral, which would result in an interest expense to the relevant Sub-Fund. Interest expense related to repurchase agreements is recorded as interest expense on repurchase agreements in the Statements of Operations. The total repurchase agreements outstanding at year end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

Master repurchase agreements govern repurchase relating to government obligations between the Sub-Fund and select counterparties. Master repurchase agreements maintain provisions for initiation, income payments, events of default, and maintenance of collateral. The underlying financial assets for all repurchase agreements are held in safekeeping at the Sub-Funds' depositary or designated sub-custodians under tri-party repurchase agreements. The fair value of the collateral received for a repurchase agreement must be equal to or exceed the total amount

Notes to the Financial Statements as at 31 March 2021 (continued)

3. Investments and Other Securities (continued)

(b) Repurchase Agreements (continued)

of the repurchase obligations and any accrued interest. The underlying financial assets for repurchase agreements entered into by the Sub-Funds are principally U.S. and highly rated non-U.S. government obligations. The daily value of securities to be resold is monitored, and additional collateral is obtained, where appropriate, to protect against credit exposure.

The exposure obtained through the use of repurchase agreements and the identity of the counterparties as at year end, if any, are disclosed in each Sub-Fund's Schedule of Investments. The type and amount of collateral received for repurchase agreements and information relating to returns on repurchase agreements are disclosed in Additional Information for Unitholders under section 2 - Information Related to Security Financing Transactions and Total Return Swap Contracts.

4. Derivative Instruments and Activities

(a) Forward Foreign Exchange Contracts

Certain Sub-Funds buy and sell forward foreign exchange contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the USD of the currencies in which portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a Sub-Fund intends to buy are denominated, when a Sub-Fund holds cash reserves and short-term investments), to hedge the exposure to foreign currency risk where classes of units are denominated in currencies other than USD, or for other investment purposes. The USD value of forward foreign exchange contracts is determined using current forward currency exchange rates supplied by an independent pricing service. The fair value of the contract will fluctuate with changes in currency exchange rates. The contract is marked to market daily and the change in fair value is recorded as a net change in unrealised appreciation/(depreciation) on forward foreign exchange contracts in the Statements of Operations. When the contract is closed, a net realised gain/(loss) on forward foreign exchange contracts is recorded in the Statements of Operations which represents the difference between the value of the forward foreign exchange contract at the time it was opened and the value at the time it was closed.

The Sub-Funds could be exposed to risk if the value of the currency changes unfavourably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the Sub-Funds are unable to enter into a closing position. Risks may exceed amounts recognised in the Statements of Assets and Liabilities. Non-deliverable forward foreign exchange contracts are settled with the counterparty in USD without the delivery of foreign currency. Forward foreign exchange contracts outstanding at year end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

(b) Futures Contracts

Certain Sub-Funds invest in futures contracts as part of their primary investment strategy and to equitise their cash flows. Investments in futures may increase or decrease exposure to a particular market. In the event of a bankruptcy or insolvency of a futures commission merchant that holds margin on behalf of the Sub-Funds, the Sub-Funds may not be entitled to the return of all of the margin owed to the Sub-Funds, potentially resulting in a loss. A change in fair value of an open futures contract is recorded in the Statements of Operations as a net change in unrealised appreciation/(depreciation) on futures and futures-style option contracts. When futures contracts are closed or expire, a net realised gain/(loss) on futures and futures-style option contracts is recorded in the Statements of Operations which represents the difference between the value of the futures contracts at the time they were opened and the value at the time they closed or expired.

The use of long futures contracts subjects the Sub-Funds to risk of loss in excess of variation margins in the Statements of Assets and Liabilities. The use of short futures contracts subjects the Sub-Funds to unlimited risk of loss. Futures contracts outstanding at year end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

Notes to the Financial Statements as at 31 March 2021 (continued)

4. Derivative Instruments and Activities (continued)

(c) Option Contracts

Certain Sub-Funds may write and purchase put and call options, including options on future contracts. The accounting treatment for an option on a futures contract depends on whether the option is a futures-style option contract or a traditional premium-style option contract.

Futures-style option contracts are accounted for similar to futures contracts due to comparable characteristics, including but not limited to the requirement to post initial margin, the requirement to post daily variation margin, and the lack of an upfront premium. A change in market value of an open futures-style option contract is recorded in the Statements of Operations as net change in unrealised appreciation/(depreciation) on futures and futures-style option contracts. A realised gain/(loss) represents the difference between the value of the contract at the time it was opened and the value at the time it was closed or expired, and is reported in the Statements of Operations as net realised gain/(loss) on futures and futures-style option contracts. As at year end, the Sub-Funds did not hold any futures-style option contracts.

When a Sub-Fund writes a traditional premium-style option, an amount equal to the premium received by the Sub-Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked to market to reflect the current value of the option written and the change, if any, is recorded in the Statements of Operations as net change in unrealised appreciation/(depreciation) on premium-style option contracts. When a security is purchased or sold through an exercise of an option, the related premium paid/(received) is added to/(deducted from) the basis of the security acquired or deducted from/(added to) the proceeds of the security sold. When a premium-style option expires, a Sub-Fund realises a gain or loss to the extent the cost of the closing transaction exceeds the premiums paid or received. When a Sub-Fund enters into a closing transaction, the Sub-Fund realises a gain or loss to the extent the cost of the closing transaction exceeds the premiums paid or received and is recorded in the Statements of Operations as net realised gain/(loss) on premium-style options contracts. As at year end, the Sub-Funds did not hold any premium-style option contracts.

Written uncovered call options subject a Sub-Fund to unlimited risk of loss. Written covered call options limit the upside potential of a security above the strike price. Put options written subject a Sub-Fund to risk of loss if the value of the security declines below the exercise price minus the put premium. A Sub-Fund, as writer of an option, bears the market risk of an unfavourable change in the price of the security underlying the written option. Written and purchased options are non-income producing investments. The maximum financial exposure for premium-style written put options is limited to the number of contracts written and the related strike prices.

(d) Swap Contracts

Certain Sub-Funds engage in various swap transactions to manage risks within their portfolio or as an alternative to direct investments. Swap transactions may be privately negotiated in the OTC market where payments are settled through direct payments between the Sub-Fund and the counterparty. By contrast, certain swap transactions are subject to mandatory central clearing ("centrally cleared swaps"). These swap contracts are executed through a derivatives clearing member ("DCM"), acting in an agency capacity, and submitted to a CCP, in which case all payments are settled with the CCP through the DCM.

A Sub-Fund's use of swap contracts may create additional risks beyond those that would exist if the Sub-Fund invested in the underlying positions directly, including: market risk related to unfavourable changes in interest rates or in the price(s) of the underlying security(ies); credit risk related to the counterparty's failure to perform under contract terms; and liquidity risk related to the lack of a liquid market for the swap contracts, which may limit the ability of a Sub-Fund to close out its position(s).

(i) Interest Rate Swap Contracts

Certain Sub-Funds enter into interest rate swap contracts as part of their investment strategy. Interest rate swap contracts generally involve agreements to exchange fixed and floating payment obligations, without the exchange of the underlying notional amounts. Interest rate swap agreements are privately negotiated in the OTC market or may be executed in a multilateral or other trade facility platform, such as a registered exchange (centrally cleared swaps). Periodic payments (received)/paid by the Sub-Funds are recorded as net realised gain/(loss) on swap

Notes to the Financial Statements as at 31 March 2021 (continued)

4. Derivative Instruments and Activities (continued)

(d) Swap Contracts (continued)

(i) Interest Rate Swap Contracts (continued)

contracts in the Statements of Operations. Interest rate swap contracts are marked to market daily and the change in fair value is recorded as a net change in unrealised appreciation/(depreciation) on swap contracts in the Statements of Operations. The Sub-Funds' risk of loss associated with these instruments may exceed their value, as recorded in the Statements of Assets and Liabilities. Non-deliverable interest rate swap contracts are settled with the counterparty in USD without the delivery of foreign currency. Centrally cleared interest rate swap contracts may have forward effective dates. The amortisation of the upfront premiums (if applicable) and payments related to these swap contracts begin on the effective date of the contract. Interest rate swap contracts outstanding at year end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

(ii) Total Return Swap Contracts

Certain Sub-Funds invest in total return swap contracts to obtain leverage or obtain exposure to the returns of the underlying referenced instrument without actually owning the underlying position. Total return swap contracts are two-party contracts that generally obligate one party to pay the positive return and the other party to pay the negative return on a specified reference security, security index or index component during the period of the swap. Total return swap contracts are marked to market daily based on the value of the underlying reference entity and the change in fair value, if any, is recorded as a net change in unrealised appreciation/(depreciation) on swap contracts in the Statements of Operations. Total return swap contracts normally do not involve the delivery of securities or other underlying assets. If the other party to a total return swap defaults, the Sub-Fund's risk of loss consists of the net amount of payments that such Sub-Fund is contractually entitled to receive, if any. The use of long total return swap contracts subjects the Sub-Funds to risk of loss in excess of the amounts shown in the Statements of Assets and Liabilities. The use of short total return swaps subjects the Sub-Funds to unlimited loss. Periodic payments received or paid by the Sub-Funds are recorded as net realised gain/(loss) on swap contracts in the Statements of Operations. Total return swap contracts outstanding at year end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

(iii) Total Return Basket Swap Contracts

Certain Sub-Funds may enter into a total return basket swap agreement to obtain exposure to a portfolio of long and/or short securities. Under the terms of the agreement, the swap is designed to function as a portfolio of direct investments in long and short equity or fixed income positions. The notional value of each component represents the fair value at year end. The Sub-Funds have the ability to trade in and out of long and short positions within the swap and will receive all of the economic benefits and risks equivalent to direct investments in these positions such as: capital appreciation/(depreciation), corporate actions, dividends and interest received and paid, all of which are reflected in the swap value. The swap value also includes financing charges and credits related to the notional values of the long and short positions and cash balances within the swap. Finance charges and credits are based on defined market rates plus or minus a specified spread. Positions within the swap are reset periodically, and financing costs are reset monthly. During a reset, any realised gains/(losses) from positions, income, proceeds from corporate actions and accrued financing costs may become available for cash settlement between the Sub-Funds and the swap counterparty. Prior to the reset, these amounts are included as a component of the fair value in net cash and other receivables/(payables). Cash settlement in and out of the swap may occur at a reset date or any other date, at the discretion of the Sub-Funds and the counterparty, over the life of the agreement, and is generally determined based on limits and thresholds established as part of the master agreement between the Sub-Funds and the counterparty. The maturity dates are measured from the commencement of investment in each underlying portfolio swap position. A change in the fair value of a total return basket swap contract is recorded as a net change in unrealised appreciation/(depreciation) on swap contracts in the Statements of Operations. Cash settlements between a Sub-Fund and the counterparty are recorded as net realised gain/(loss) on swap contracts in the Statements of Operations. Total return basket swap contracts outstanding at year end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

Notes to the Financial Statements as at 31 March 2021 (continued)

4. Derivative Instruments and Activities (continued)

(e) Master Futures Client Account Agreements

Master Futures Client Account Agreements including an Addendum for Cleared Derivatives (“FCM Master Agreements”) govern exchange-traded futures transactions, exchange-traded options transactions and centrally cleared derivative transactions which are cleared through CCPs. On a daily basis, a CCP clears trades that it has received from brokers that are clearing members of the respective CCP and are registered as swap/futures commission merchants with the Commodity Futures Trading Commission (CFTC), or other applicable regulator. The relevant Sub-Funds therefore interface with these brokers in order to trade exchange-traded or centrally cleared derivatives.

Upon entering into an exchange-traded or centrally cleared derivative contract a Sub-Fund may pledge cash and/or securities to a trading account as collateral to a CCP, through a broker, in accordance with the initial margin requirements of the CCP. Exchange-traded and centrally cleared derivative contracts are revalued at least daily, and as such, the net appreciation or depreciation of the derivative contracts causes the value of the respective trading account to move either above or below the initial margin requirement. In accordance with the FCM Master Agreements, on a daily basis each relevant Sub-Fund will pay or receive cash in an amount that will bring the total value of each trading account back in line with the respective initial margin requirement. Such receipts or payments of cash are known as variation margin. Variation margin is determined separately for exchange-traded futures and centrally cleared swaps and cannot be netted. The movement of variation margin between each relevant Sub-Fund and the respective brokers usually occurs the morning after the close of a trading session, and therefore at the end of each day, the total value of a trading account is greater or less than the initial margin requirement by an amount equal to the current day’s net change in unrealised appreciation or depreciation of the derivative contracts. At reporting year end, the amount that will be paid to, or received from the relevant brokers, on the morning after the close of a trading session is reflected as a variation margin receivable or variation margin payable on exchange-traded and centrally cleared derivatives, as applicable, in the Statements of Assets and Liabilities.

(f) ISDA Master Agreements

International Swaps and Derivatives Association, Inc. Master Agreements and Credit Support Annexes (“ISDA Master Agreements”) govern OTC derivative transactions entered into between a Sub-Fund and a counterparty. ISDA Master Agreements maintain provisions for general obligations, representations, netting of settlement payments, agreements to deliver supporting documents, collateral transfer and events of default or termination. ISDA Master Agreements contain termination events applicable to the relevant Sub-Fund or the counterparty. Such events may include a decline in the relevant Sub-Fund’s capital below a specified threshold over a certain period of time or a decline in the counterparty’s long term and short-term credit ratings below a specified level, respectively. In each case, upon occurrence, the other party may elect to terminate early and cause settlement of all OTC swap and foreign exchange contracts outstanding, including the payment of any losses and costs resulting from such early termination, as reasonably determined by the terminating party. Any decision by a party to elect early termination could impact a Sub-Fund’s future derivative activity.

Collateral pledged by a Sub-Fund for OTC derivatives pursuant to an ISDA Master Agreement is segregated by the Sub-Fund’s custodian and identified as an asset in the Statements of Assets and Liabilities either as a component of investments, at fair value (securities) or in due from brokers (cash). Segregation of the Sub-Fund’s collateral in the custodian account helps mitigate counterparty risk.

Collateral posted for the benefit of a Sub-Fund for OTC derivatives pursuant to an ISDA Master Agreement is held by a custodian of the Sub-Fund. Cash collateral received is reflected as a liability within due to brokers in the Statements of Assets and Liabilities.

5. Fair Value Measurement

(a) Investment Valuation Policies

The NAV per unit of each class within a Sub-Fund is computed by dividing the total current value of the assets of the Sub-Fund attributable to a class, less class liabilities, by the total number of units of that class of the Sub-Fund outstanding at the time the computation is made. The frequency of the NAV per unit computation of each class

Notes to the Financial Statements as at 31 March 2021 (continued)

5. Fair Value Measurement (continued)

(a) Investment Valuation Policies (continued)

within a Sub-Fund is in accordance with each Sub-Fund's relevant Supplement to the Prospectus. In addition, the NAV per unit of each class within a Sub-Fund may be calculated on any other day or suspended as the Management Company may determine as long as unitholders are notified in advance. For purposes of calculating the NAV, portfolio securities and other financial derivative instruments are valued using valuation methods as adopted by the Management Company.

The Management Company delegated responsibility for applying approved valuation policies to the Investment Manager, subject to oversight by the Management Company. The Investment Manager has established a Valuation Committee (the "VC") whose function is to administer, implement and oversee the continual appropriateness of valuation approaches applied and the determination of adjustments to the fair valuation of portfolio securities and other financial derivative instruments in good faith after consideration of market factor changes and events affecting issuers. The Investment Manager performs a series of activities to provide reasonable assurance of the accuracy of prices including: (i) periodic vendor due diligence meetings, review of approaches and techniques, new developments and processes at vendors, (ii) review of daily comparison of security valuation versus prior day for all securities that exceeded established thresholds, (iii) review of third party model prices against internal model prices, and (iv) review the results of back testing.

Where market quotes are readily available, fair value is generally determined on the basis of official closing prices or the last reported sales prices, or if no sales are reported, based on quotes obtained from pricing services or established market makers. Where market quotations are not readily available, or if an available market quotation is determined not to reflect fair value, securities or financial derivatives are valued at fair value, as determined in good faith by the VC in accordance with the valuation procedures approved by the Management Company. Using fair value to price a security may require subjective determinations about the value of a security that could result in a value that is different from a security's most recent closing price and from the prices used by other funds to calculate their net assets. It is possible the estimated values may differ significantly from the values which would have been used had a ready market for the investments existed. These differences could be material.

(b) Valuation Techniques

The following inputs and techniques may be used by the Sub-Funds to value the portfolio securities and other financial derivative instruments held by the Sub-Funds:

Investments in other investment funds that do not have readily determinable fair values are fair valued using their net asset value per share. The investment objective of these other investment funds is to maintain liquidity, preserve capital and generate positive returns. Withdrawals may be made from the other investment funds daily.

Securities listed on a recognised stock exchange or dealt on any other regulated market that operates regularly and is open to the public, are valued at the last sale price or official market closing price (4PM CET) on the primary exchange on which the instrument is traded before the NAV of each Sub-Fund is calculated on a valuation date.

In accordance with procedures adopted by the Management Company, certain Sub-Funds may apply daily fair value factors, furnished by an independent pricing service, to certain equity securities that are solely traded on a foreign exchange in the Asian markets to account for the market movement between the close of the foreign market and when the NAV of each Sub-Fund is calculated, unless the Management Company determines that the use of another valuation methodology is appropriate. The pricing service uses statistical analysis and quantitative models to adjust local market prices using factors such as subsequent movement and changes in the pricing of indices, american depository receipts, futures contracts and exchange rates in other markets in determining fair value as at the time that the Sub-Funds calculate their NAV.

Fixed income securities (other than certain short-term investments maturing in less than 60 days) and other investments that trade in markets that are not considered to be active, are valued based on quoted market prices, dealer quotations or alternative pricing sources. These include certain U.S. government and sovereign obligations, most government agency securities, investment-grade corporate bonds, money market funds and less liquid listed equities. Corporate and sovereign bonds and other fixed income instruments are valued at estimated fair value

Notes to the Financial Statements as at 31 March 2021 (continued)

5. Fair Value Measurement (continued)

(b) Valuation Techniques (continued)

using the latest mid prices or evaluated quotes furnished by independent pricing services, as well as quotations from counterparties and other market participants. Evaluated quotes are based on a matrix system, which may consider such factors as quoted prices for identical or similar assets, yields, maturities and ratings and are not necessarily reliant on quoted prices. Certain short-term investment funds, including registered money market mutual funds, and short-term debt investments of sufficient credit quality maturing in less than 60 days, are generally valued at amortised cost, which approximates fair value. Certain other short-term investment funds are valued using quotations furnished by independent pricing services, as well as quotations from the underlying fund managers, transfer agents or administrators.

Futures and option contracts that are listed on national exchanges and are freely transferable are valued at fair value based on their last sales price on the date of determination on the exchange that constitutes the principal market. For an option contract, if no sales occurred on such date, the contract is valued at the mid price on such exchange at the close of business on such date. Centrally cleared swaps listed or traded on a multilateral trade facility platform, such as a registered exchange, are valued on a daily basis using quotations provided by an independent pricing service.

OTC derivatives, including forward contracts and swap contracts, are valued by the Sub-Funds using observable inputs, such as quotations provided by an independent pricing service, the counterparty, dealers or brokers, whenever available and considered reliable.

The fair value of each total return swap contract or total return basket swap contract is derived from a combination of (i) the net value of the underlying positions, which are valued daily using the last sale or closing price on the principal exchange on which the securities are traded; (ii) financing costs; (iii) the value of dividends or accrued interest; (iv) cash balances within the swap; and (v) other factors, as applicable.

The fair value of forward foreign exchange contracts is determined using current forward currency exchange rates supplied by an independent pricing service.

Each Sub-Fund values the repurchase agreements it has entered based on the respective contract amounts, which approximate fair value.

6. Fees and Expenses

(a) Investment Management Fee

The Sub-Funds pay to the Investment Manager an annual fee (the “Investment Management Fee”) calculated as a percentage of the average daily NAV of each class. The fee is accrued daily and payable monthly in arrears at the applicable rate (the “Investment Management Fee Rate”) specified in the Supplements to the Prospectus. The Investment Manager may from time to time, at its sole discretion, and out of its own resources decide to reduce/waive or rebate all or a portion of the Investment Management Fee.

(b) Performance Fee

The Investment Manager may also be entitled to receive a performance fee (the “Performance Fee”) from certain Sub-Funds, the details of which are set out in both the General Section and the relevant Supplement to the Prospectus. The Investment Manager may from time to time, at its sole discretion, and out of its own resources decide to reduce/waive or rebate part or all of the Performance Fee. The Performance Fee is calculated and accrued daily and will generally be paid to the Investment Manager within 14 business days of the month end in which the Performance Fee is crystallised.

The Performance Fee, if any, will be calculated and, if warranted, crystallised at the end of each twelve month period ending on 31 March of each year, and unless specified otherwise in the relevant Supplement to the Prospectus, the Performance Fee is calculated on a “Loss Carryforward” basis. In addition, if units are redeemed from certain Sub-Funds as at a date other than 31 March, a Performance Fee (if accrued as at the date of such redemption) shall

Notes to the Financial Statements as at 31 March 2021 (continued)

6. Fees and Expenses (continued)

(b) Performance Fee (continued)

be crystallised in respect of the units being redeemed. Furthermore, for the purposes of the calculation of the Performance Fee, a transfer of units will, unless determined otherwise by the Directors, be treated as if there was a redemption of such units by the transferor and a subscription (at the most recent price) for such units by the transferee on the date of the transfer. However, a transfer will not be treated as a redemption and subscription where the relevant transfer of units will not result in a change in the beneficial ownership of the units. Crystallised Performance Fee shall remain in the relevant class (but shall not participate in subsequent gains and losses of the relevant class) until paid to the Investment Manager, and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant class.

(c) Administrative and Operating Fees

Each Sub-Fund accrues certain fees and expenses connected with the establishment, management and operation of the FCP, the Sub-Fund and each class of units (the "Administrative and Operating Fees"). The Administrative and Operating Fees include, but are not limited to, the Management Company fees, the global distribution fee, the expenses paid to auditors, legal advisers, administrator, custody and depositary bank, as well as organisational expenses. The Administrative and Operating Fees exclude expenses directly related to the Investment Management Fee, the Performance Fee, the subscription tax ("taxe d'abonnement") and any expenses associated with a Sub-Fund's trading program, including brokerage commissions and any withholding or transfer taxes. Please refer to the Prospectus for additional details on the fees and expenses that are considered Administrative and Operating Fees.

(d) Expense Arrangements

All expenses are recognised in the Statements of Operations on an accrual basis. Each class of a Sub-Fund is subject to a total expense ratio ("TER").

Total Expense Ratio

In a class of a Sub-Fund that is subject to a TER, the actual Administrative and Operating Fees allocated to the class, expressed as a percentage of the NAV of the class, is evaluated against a rate specified in the relevant Supplement to the Prospectus (the "Administrative and Operating Fee Rate"). In the event that the actual Administrative and Operating Fees exceeds the respective Administrative and Operating Fee Rate of a class subject to a TER, the Investment Manager reduces the Investment Management Fee by the amount of the excess. The Investment Manager will reimburse the Sub-Fund to the extent that the actual Administrative and Operating Fees allocated to a certain class exceed the relevant Administrative and Operating Fee Rate by more than the Investment Management Fee applicable to such class. The expenses reimbursed by the Investment Manager are recorded as reimbursement of expenses in the Statements of Operations. In the event the actual Administrative and Operating Fees are less than the Administrative and Operating Fee Rate of a class subject to a TER, the excess is paid to the Investment Manager as additional Investment Management Fee. Please refer to the most recent Supplement to the Prospectus for applicable Administrative and Operating Fee Rates for the classes of each Sub-Fund subject to a TER.

7. Taxation

Under present Luxembourg law, the FCP is not subject to any taxes in Luxembourg on income or capital gains. The FCP is, however, liable in Luxembourg for a taxe d'abonnement up to a rate of 0.05% per annum based on the NAV attributed to each class of units at the end of the relevant quarter, calculated and paid quarterly. The Sub-Funds are reserved for institutional investors and are subject to the reduced rate of 0.01% per annum.

Each Sub-Fund may be subject to taxation on capital gains, interest and dividends or currency repatriation in certain jurisdictions in which each Sub-Fund invests. It is the policy of each Sub-Fund to accrue for any such taxes on dividends and interest when the dividend is declared, interest is earned, or capital gains are earned. Each Sub-Fund will accrue such taxes and reclaims as applicable, based upon their current interpretation of tax rules and regulations that exist in the markets in which they invest.

AQR UCITS FUNDS II

Notes to the Financial Statements as at 31 March 2021 (continued)

7. Taxation (continued)

For the year ended 31 March 2021, the amount of withholding tax expense incurred by each Sub-Fund on transferable securities (excluding OTC, exchange-traded and centrally cleared derivatives) is as follows:

Sub-Fund	Withholding Tax Expense
AQR Delphi Global Equities UCITS Fund	\$282,861
AQR Style Premia: Sustainable Global Equity UCITS Fund ⁽¹⁾	365,515
AQR Sustainable Style Premia Global Equity UCITS Fund ⁽²⁾	1,923,466

⁽¹⁾For the period from 1 April 2020 to 25 September 2020.

⁽²⁾Sub-Fund changed its name from AQR Style Premia: Global Equity UCITS Fund on 25 September 2020 after NAV production (see Note 1).

8. Transaction Costs

As at 31 March 2021, the Sub-Funds incurred transaction costs related to the purchases and sales of transferable securities (excluding OTC, exchange-traded and centrally cleared derivatives) as follows:

Sub-Fund	Transaction Costs
AQR Delphi Global Equities UCITS Fund	\$19,520
AQR Style Premia: Sustainable Global Equity UCITS Fund ⁽¹⁾	36,665
AQR Sustainable Style Premia Global Equity UCITS Fund ⁽²⁾	224,596

⁽¹⁾For the period from 1 April 2020 to 25 September 2020.

⁽²⁾Sub-Fund changed its name from AQR Style Premia: Global Equity UCITS Fund on 25 September 2020 after NAV production (see Note 1).

The transaction costs include broker commission fees, settlement fees and other charges. Those fees are included in the cost of the securities and recorded in the Statements of Operations under the caption net realised gain/(loss) on investments and net change in unrealised appreciation/(depreciation) on investments.

In line with bond market practice, a bid-offer spread is applied when buying and selling these securities. Consequently, in any given transaction, there will be a difference between the purchase and sale prices quoted by the broker, which represents the broker's fee included in the cost of these securities. For fixed income securities, the broker's fee is not separately identifiable from the purchases and sales prices and therefore cannot be disclosed separately.

9. Changes in Investment Portfolio

A copy of the changes in the investment portfolio for each Sub-Fund during the year ended 31 March 2021 is available, free of charge, at the registered office of the Management Company of the FCP, the Swiss Representative, and the Paying Agent in Germany.

10. Risks and Concentrations

In the normal course of business, the Sub-Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk). The Sub-Funds' investments in financial derivatives and other financial instruments may expose the Sub-Funds to various elements of market risks which include interest rate, foreign currency, equity and credit risks. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and in the future may lead, to increased market volatility, which may disrupt the U.S. and world economies and markets and may have significant adverse direct or indirect effects on the Sub-Funds and their investments. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets. Such events include the recent pandemic spread of the novel coronavirus known as COVID-19, the duration and full effects of which are still uncertain.

Notes to the Financial Statements as at 31 March 2021 (continued)

10. Risks and Concentrations (continued)

Each Sub-Fund manages market risk by establishing limits as to the types and degrees of risk that may be undertaken. Additionally, each Sub-Fund monitors the fluctuations in its value and compares these fluctuations to its established limits.

The investment techniques and strategies utilised by the Sub-Funds, including investments made on a shorter-term basis or in derivative instruments or instruments with a maturity of one year or less at the time of acquisition, may result in frequent portfolio trading and high portfolio turnover. High portfolio turnover rates will cause the Sub-Funds to incur higher levels of brokerage fees and commissions, which may reduce performance, and may cause higher levels of current tax liability to unitholders in the Sub-Funds.

The Sub-Funds may invest in developing market debt securities, foreign exchange instruments and equities. Developing markets are riskier than more developed markets because they tend to develop unevenly and may never fully develop. Investments in developing markets may be considered speculative. Developing markets are more likely to experience hyperinflation and currency devaluations. In addition, many developing markets have far lower trading volumes and less liquidity than developed markets.

Currency risk arises from the possibility that fluctuations in foreign exchange rates will affect the value of cash balances held in foreign currencies and foreign denominated financial instruments. In addition, if the Sub-Funds use forward foreign exchange contracts, the Sub-Funds may be exposed to the risk that foreign currency exchange rates change unfavourably. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons.

The fair values of equities, such as common stocks and preferred securities or equity related investments such as futures and options, may decline due to general market conditions which are not specifically related to a particular company. They may also decline due to factors which affect a particular industry or industries. Each Sub-Fund may invest in illiquid investments and may experience difficulty in selling those investments in a timely manner at the price that it believes the investments are worth. Prices may fluctuate widely over short or extended periods in response to company, market or economic news. Markets also tend to move in cycles, with periods of rising and falling prices. This volatility may cause the Sub-Funds to experience significant gains or losses over short periods of time. If there is a general decline in the securities and other markets, the Sub-Funds may experience a loss, regardless of the individual results of the securities and other instruments in which the Sub-Funds invest.

Each Sub-Fund may be exposed to the risk that one or more securities in its portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the security experiences a decline in its financial status (credit risk). Each Sub-Fund may be exposed to the risk that an institution or other entity with which the relevant Sub-Fund has unsettled or open transactions will default (counterparty credit risk). These risks are measured by the loss each Sub-Fund would record if the issuer of a security, a major financial institution or other counterparties, failed to perform pursuant to terms of their obligations.

Many financial instruments may be tied to the London Interbank Offered Rate ("LIBOR") to determine payment obligations, financing terms, hedging strategies, or investment value. LIBOR is the offered rate for short-term EUR dollar deposits between major international banks. On 27 July 2017, the head of the United Kingdom ("UK") Financial Conduct Authority ("FCA") announced a desire to phaseout the use of LIBOR. The FCA has confirmed that all LIBOR settings will either cease to be provided by any administrator or no longer be representative: (1) immediately after 31 December 2021, in the case of all British Pound, Euro, Swiss Franc and Japanese Yen settings, and the 1-week and 2-month USD settings; and (2) immediately after 30 June 2023, in the case of the remaining USD settings. Regulators and industry working groups have suggested alternative reference rates, and global consensus is growing around the process for amending existing contracts or instruments to transition away from LIBOR. There does remain some uncertainty and risk regarding the willingness and ability of issuers to include enhanced provisions in new and existing contracts or instruments. As such, the transition away from LIBOR may lead to increased volatility and illiquidity in markets that are tied to LIBOR, reduced values of LIBOR-related investments, and reduced effectiveness of hedging strategies, adversely affecting a Sub-Fund's performance or NAV. In addition, the alternative reference rate may be an ineffective substitute resulting in prolonged adverse market conditions for a Sub-Fund.

Notes to the Financial Statements as at 31 March 2021 (continued)

10. Risks and Concentrations (continued)

In the normal course of business, the Sub-Funds may enter into agreements with certain counterparties for derivative transactions. Each Sub-Fund's derivative agreements may contain provisions that require it to maintain a predetermined level of net assets, and/or provide limits regarding the decline of the net assets over specified time periods. If a certain Sub-Fund was to violate such provisions, the counterparties to the derivative instruments could request immediate payment or demand immediate collateralisation on derivative instruments in net liability positions. If such events are not cured by the Sub-Fund, or waived by the counterparties, the counterparties may decide to curtail or limit extension of credit, and the Sub-Fund may be forced to unwind its derivative positions which may result in material losses.

Each Sub-Fund may utilise substantial leverage in its investment program. Such leverage may take the form of trading on margin, investing in derivative instruments that are inherently leveraged. There is no guarantee that each Sub-Fund's borrowing arrangement or other arrangements for obtaining leverage will continue to be available, or if available, will be available on terms and conditions acceptable to the respective Sub-Fund. Unfavourable economic conditions also could increase funding costs, limit access to the capital markets or result in a decision by lenders not to extend credit to certain Sub-Funds. In addition, a decline in fair value of a certain Sub-Fund's assets may have particular adverse consequences in instances where it has borrowed money based on the fair value of its assets. A decrease in fair value of its assets may result in the lender (including derivative counterparties) requiring a certain Sub-Fund to post additional collateral or otherwise sell assets at a time when it may not be in the Sub-Fund's best interest to do so.

As at 31 March 2021, there were unitholders of certain Sub-Funds who individually owned greater than 10% of the respective Sub-Fund's net assets. If any of these unitholders were to submit a redemption request, the respective Sub-Fund may be forced to dispose of investments during inopportune market conditions which could result in losses. Significant redemptions by unitholders may also impact each Sub-Fund's liquidity and the Management Company may temporarily suspend or defer the redemption of units and/or the determination of the NAV in such instances.

Periodically, each Sub-Fund may be a party to legal actions arising in the ordinary course of business. The Sub-Funds are currently not subject to any actions that either individually or in the aggregate are expected to have a material impact on their results of operations or financial condition.

11. Brexit Planning

Following the General Election held in the UK on 12 December 2019, the UK Parliament ratified the Withdrawal Agreement negotiated with the European Union ("EU"). As such, the UK formally left the EU on 31 January 2020 (known as "Brexit") and was in a transition period until 31 December 2020 while the UK and EU negotiated additional arrangements. On 24 December 2020, the EU and the UK agreed a "Brexit deal", set out in the EU-UK Trade and Cooperation Agreement (the "Agreement"), which took effect from 1 January 2021.

In preparation for Brexit and over the course of the year, the Investment Manager and AQR Capital Management (Europe) LLP ("AQR Europe") (together, the "AQR Group") have taken a number of steps to mitigate Brexit-related risks and ensure business continuity from 1 January 2021. The main risks (and the AQR Group's contingency plans in relation to these risks) are, in summary, as follows:

Licensing risk to the AQR Group

AQR Europe, an affiliate of the Investment Manager, is authorised and regulated by the FCA. At the end of the transition period, AQR Europe lost its cross-border services passport into various EU Member States.

To help address this risk, the AQR Group in 2019 established a new affiliate in Germany, AQR Capital Management (Germany) GmbH ("AQR Germany"). AQR Germany has a licence from the German Federal Financial Supervisory Authority to carry on the German regulated activities of "investment broking" and "investment advice". AQR Germany has its own cross-border services passport into the same EU Member States as AQR Europe held prior to 1 January 2021. As such, AQR Germany facilitates the AQR Group's continued market access to EU investors.

Notes to the Financial Statements as at 31 March 2021 (continued)

11. Brexit Planning (continued)

The Investment Manager, as a United States of America domiciled SEC-registered investment adviser, is not directly affected by Brexit. As such, the Investment Manager will continue its function as the delegated portfolio manager in respect of the FCP.

Marketing/distribution risk to the FCP

The Management Company of the Sub-Funds has submitted a notification to the FCA to enable the Sub-Funds to benefit from the UK's Temporary Permissions Regime. This preserves the continued distribution of the Sub-Funds (including new Sub-Funds) to UK investors for at least a period of three years from 1 January 2021.

Market risk

The AQR Group actively monitors the market impact of Brexit and routinely runs various scenario analyses to help identify potential market risk concerns. In the event that the AQR Group identifies exposures that are undesired or unexpected, the risk management team will circulate the findings with the relevant stakeholders and discuss any potential remediation. The AQR Group takes a multi-disciplinary approach to monitoring developing market risks and uses input from the risk management, trading and portfolio management teams to arrive at a consensus conclusion regarding the appropriate risk management action. In addition, the AQR Group works closely with its counterparties to ensure that there are no material disruptions with respect to access to trading venues and markets.

12. Subsequent Events

The Directors have evaluated subsequent events for the Sub-Funds and determined there are no other material events which would require accrual or disclosure through 28 June 2021, the date of issuance of this report.

AQR UCITS FUNDS II

Additional Information for Unitholders (Unaudited)

1. Global Risk Exposure

Unless otherwise stated in the relevant Supplement to the Prospectus, each Sub-Fund shall employ a Value-at-Risk (“VaR”) model in determining its global exposure to financial derivative instruments and will monitor such global exposure against the limits as set out in the Commission de Surveillance du Secteur Financier circular 11/512 of 30 May 2011, as may be amended or restated from time to time.

As part of the risk-management process, the global exposure of the AQR Delphi Global Equities UCITS Fund is measured and controlled by the relative VaR approach, by reference to the Sub-Fund’s benchmark, the MSCI World Net Total Return Index Hedged to local currency.

The following table summarises the calculation of the global exposure for the FCP:

Sub-Fund	Global Risk Calculation Method	VaR Limit	Model	Confidence Interval	Holding Period	Lookback Period	Min VaR	Max VaR	Average VaR	Min Leverage	Max Leverage	Average Level of Leverage Reached During the Year
AQR Delphi Global Equities UCITS Fund	Relative VaR	200%	Historical	99%	20 Days	2 Years	75.38%	122.62%	88.17%	95.99%	305.45%	151.60%
AQR Global Risk Premium UCITS Fund	Absolute VaR	20%	Historical	99%	20 Days	2 Years	3.56%	118.05%	14.47%	190.63%	267.19%	208.83%
Style Capture UCITS Fund	Absolute VaR	20%	Historical	99%	20 Days	2 Years	3.08%	16.34%	9.57%	141.62%	3,829.31%	1,379.53%

During the year, the Management Company conducted a review of the calibration of the VaR model for all of the Sub-Funds in scope, defined as Sub-Funds which utilise VaR to measure global exposure, in which various parameters were modelled and back-tested to identify the most appropriate calibration in relation to each Sub-Fund’s strategy and investment objective. Following this review, the Management Company concluded that an increase in the lookback period⁽¹⁾ to 2 years (previously 1 year), and a decay factor⁽²⁾ of 0.997 (previously 0.995), and the inclusion of overlapping returns⁽³⁾ brought improvements to the VaR estimates for most funds. As such, the Management Company implemented these changes within the VaR model and have also updated the monitoring infrastructure with the relevant parameters (as from 4 January 2021).

⁽¹⁾Lookback Period: Also known as the observation period, refers to the period of data included into the modelling of the historical VaR. The longer the lookback period, the more data points that are included in the distribution.

⁽²⁾Decay Factor: Is the process of assigning a relatively higher weighting to returns from the more recent past. The approach combines exponential smoothing through the historical simulation, by applying exponentially declining probability weights to past returns of the instruments held. After the probability weights are assigned, VaR is calculated from the empirical cumulative distribution function weighted by the modified probability weights.

⁽³⁾Overlapping Returns: It is the approach of creating an overlapping return series, such as creating a daily return series using 10-day windows, where the first return is from the 1st to the 10th of the month, followed by the return of the 2nd to the 11th of the month, then the 3rd to the 12th, and so on. When using this as a return sequence, most modelers will correctly observe that, by construction, the returns have some degree of correlation between them.

AQR UCITS FUNDS II

Additional Information for Unitholders (Unaudited) (continued)

1. Global Risk Exposure (continued)

The AQR Sustainable Style Premia Global Equity UCITS Fund (formerly known as AQR Style Premia: Global Equity UCITS Fund) has used the commitment approach in order to monitor and measure its global exposure.

The level of leverage disclosed in the above table is calculated based on the sum of notionals. The Management Company is using the notional approach as set out in ESMA Guidelines 10-788.

2. Information Related to Security Financing Transactions and Total Return Swap Contracts

(a) Security Financing Transactions and Total Return Swap Contracts by Counterparty

The table below summarises, by counterparty, each type of security financing transaction and total return swap contracts with respect to outstanding transactions as at 31 March 2021. The Sub-Funds held outstanding transactions in total return swap contracts, including total return basket swap contracts (“TRS Contracts”) and repurchase agreements (“Repo’s”) as at 31 March 2021. The value of TRS Contracts consists of the unrealised appreciation/(depreciation) on total return swap contracts and the fair value of total return basket swap contracts, if any.

Sub-Fund	Counterparty ⁽¹⁾	Counterparty's Country of Incorporation	Value of TRS Contracts	Absolute Amount of TRS Contracts	Value of TRS Contracts as a Percent of Net Assets	Fair Value of Repo's	Absolute Amount of Repo's	Fair Value of Repo's as a Percent of Net Assets
AQR Global Risk Premium UCITS Fund	GSIN	USA	\$(9,652,870)	\$9,652,870	(0.66)	\$-	\$-	-
	JPMC	USA	532	532	0.00	-	-	-
	MLIN	USA	123,808	123,808	0.01	-	-	-
	SSBT	USA	-	-	-	535,796,883	535,796,883	36.37
	Total		(9,528,530)	9,777,210	(0.65)	535,796,883	535,796,883	36.37
Style Capture UCITS Fund	CITI	USA	1,434,482	3,023,896	0.52	-	-	-
	GSIN	USA	(47,241)	55,601	(0.02)	-	-	-
	JPMC	USA	6,898,780	6,898,780	2.50	-	-	-
	MLIN	USA	(110,857)	470,085	(0.04)	-	-	-
	SSBT	USA	-	-	-	151,332,607	151,332,607	54.93
	UBSS	USA	911,085	911,085	0.33	-	-	-
	Total		9,086,249	11,359,447	3.29	151,332,607	151,332,607	54.93

⁽¹⁾The counterparty abbreviations are defined in the Schedules of Investments.

AQR UCITS FUNDS II

Additional Information for Unitholders (Unaudited) (continued)

2. Information Related to Security Financing Transactions and Total Return Swap Contracts (continued)

(b) Top Ten Collateral Issuers

As at 31 March 2021, the Sub-Funds have received non-cash collateral from one or more counterparties in relation to outstanding transactions. The top ten issuers of non-cash collateral received as at 31 March 2021 are as follows:

Sub-Fund	Securities Financing Transaction	Issuer Name	Type of Collateral	Quantity	Currency	Fair Value ⁽¹⁾
AQR Global Risk Premium UCITS Fund	Repo's	United States Treasury	United States Treasury Notes	528,555,500	USD	\$535,796,883
Style Capture UCITS Fund	Repo's	United States Treasury	United States Treasury Notes	149,332,600	USD	151,332,607

⁽¹⁾Non-cash collateral is valued using available market prices and taking into account appropriate discounts determined by the Management Company based on its haircut policy. The minimum haircut applied for the collateral received as at 31 March 2021 is 2%.

(c) Type, Maturity, Quality and Currency of Collateral

As at 31 March 2021, the Sub-Funds held cash and non-cash collateral all in segregated accounts, at one or more counterparties, in relation to outstanding transactions. Cash collateral is held at the counterparty of the outstanding transactions and is disclosed under the appropriate counterparty in Note 2(f) Due from/to Broker(s) along with unsettled cash balances. The non-cash collateral consists of high quality, highly liquid, U.S. Treasury Obligations having investment grade rating of AAA. Non-cash collateral on TRS Contracts is held at JPMC and non-cash collateral on Repo's is held at SSBT.

The maturity and currency of the cash collateral pledged/(received) are as follows:

Sub-Fund	Maturity Tenor	Currency	Cash Collateral Pledged		Cash Collateral Received		Total
			OTC Derivatives ⁽¹⁾	Repo's	OTC Derivatives ⁽¹⁾	Repo's	
AQR Global Risk Premium UCITS Fund	Open maturity	USD	\$133,649,000	\$-	\$-	\$-	\$133,649,000
Style Capture UCITS Fund	Open maturity	USD	67,733,154	-	(3,749,219)	-	63,983,935

⁽¹⁾Includes non-TRS Contracts.

AQR UCITS FUNDS II

Additional Information for Unitholders (Unaudited) (continued)

2. Information Related to Security Financing Transactions and Total Return Swap Contracts (continued)

(c) Type, Maturity, Quality and Currency of Collateral (continued)

The maturity and currency of the non-cash collateral pledged/(received) are as follows:

Sub-Fund	Maturity Tenor	Currency	Non-Cash Collateral Pledged		Non-Cash Collateral Received		Total
			OTC Derivatives ⁽¹⁾	Repo's	OTC Derivatives ⁽¹⁾	Repo's	
AQR Global Risk Premium UCITS Fund	Above one year	USD	\$-	\$-	\$-	\$(535,796,883)	\$(535,796,883)
Style Capture UCITS Fund	Above one year	USD	-	-	-	(151,332,607)	(151,332,607)

⁽¹⁾Includes non-TRS Contracts.

AQR UCITS FUNDS II

Additional Information for Unitholders (Unaudited) (continued)

2. Information Related to Security Financing Transactions and Total Return Swap Contracts (continued)

(d) Maturity of Security Financing Transactions and Total Return Swap Contracts

The below table summarises the maturity tenor of outstanding transactions by Sub-Fund as at 31 March 2021.

Sub-Fund	Maturity Tenor	Value of TRS Contracts	Fair Value of Repo's	Total
AQR Global Risk Premium UCITS Fund	One day to one week	\$(9,652,870)	\$535,796,883	\$526,144,013
	One week to one month	124,340	-	124,340
	Total	(9,528,530)	535,796,883	526,268,353
Style Capture UCITS Fund	One day to one week	-	151,332,607	151,332,607
	One week to one month	3,825	-	3,825
	One to three months	(151,318)	-	(151,318)
	Three months to one year	1,457,318	-	1,457,318
	Above one year	7,776,424	-	7,776,424
Total	9,086,249	151,332,607	160,418,856	

All outstanding transactions are settled and cleared bilaterally.

(e) Data on Re-use of Collateral

Non-cash collateral received by a Sub-Fund may not be sold, re-invested or pledged. Cash collateral received may be reinvested in line with the Prospectus. No cash collateral received for outstanding transactions has been reinvested during the year ended 31 March 2021.

(f) Returns on Security Financing Transactions and OTC Derivatives

All returns from securities financing transactions and OTC derivatives will accrue to the Sub-Funds and are not subject to any return sharing agreements with the Investment Manager or any other third parties. For TRS Contracts, transaction costs are not separately identifiable as they are included in the purchase and sales price upon entering and exiting. For repurchase agreements, direct and indirect costs are not separately identifiable and are deducted from the interest income received from the counterparties.

Returns for TRS Contracts are reported as net realised gain/(loss) on swap contracts and net change in unrealised appreciation/(depreciation) on swap contracts in the Statements of Operations.

Interest income earned on repurchase agreements is reported as interest income on repurchase agreements in the Statements of Operations.

3. Remuneration Policy

The Management Company has established and applies a remuneration policy in accordance with the European Securities and Markets Authority ("ESMA") Guidelines on sound remuneration policies under the UCITS V Directive (ESMA 2016/575) and the Alternative Investment Fund Managers Directive (ESMA 2016/579) and any related legal and regulatory provisions applicable in Luxembourg. The remuneration policy is aligned with the business strategy, objectives, values and interests of the Management Company and the funds that it manages and of the investors in such funds, and which includes, inter alia, measures to avoid conflicts of interest; and it is consistent with and promotes sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the funds that the Management Company manages.

As an independent management company relying on a full-delegation model (i.e. delegation of the collective portfolio management function), the Management Company ensures that its remuneration policy adequately reflects the predominance of its oversight activity within its core activities. As such, it should be noted that Management Company's employees who are identified as risk-takers under UCITS V are not remunerated based on the performance of the funds under management.

Additional Information for Unitholders (Unaudited) (continued)

3. Remuneration Policy (continued)

A paper version of the remuneration policy is made available free of charge to investors at the Management Company's registered office.

The amount of remuneration for the financial year ended 31 December 2020 paid by the Management Company to its staff: EUR 12,070,862.

Fixed remuneration: EUR 11,288,396

Variable remuneration: EUR 782,466

Number of beneficiaries: 133

The aggregated amount of remuneration for the financial year ended 31 December 2020 paid by the Management Company to identified staff/risk takers is EUR 1,948,900.

The total amount of remuneration is based on a combination of the assessment of the performance of the individual, the overall results of the Management Company, and when assessing individual performance, financial as well as non-financial criteria are taken into account.

The policy is subject to annual review by the compliance officer and the update is performed by the human resources department of the Management Company and is presented for review to the remuneration committee and approval by the Board of Directors of the Management Company.
