**GENERAL INFORMATION**

---

Nomura Funds Ireland Plc (the “Fund”) is structured as an open-ended umbrella investment company with variable capital, incorporated under the laws of Ireland on 13th April, 2006 as a public limited company pursuant to the Companies Act 2014. The Fund has been authorised by the Central Bank of Ireland (the “Central Bank”) pursuant to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”). The Fund commenced operations on 18th December, 2006.

The Fund has segregated liability between its Sub-Funds (the “Sub-Funds”) and accordingly any liability incurred on behalf of or attributable to any Sub-Fund shall be discharged solely out of the assets of that Sub-Fund. The Sub-Funds are set out below:

- Nomura Funds Ireland - India Equity Fund
- Nomura Funds Ireland - Fundamental Index Global Equity Fund<sup>1</sup>

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - India Equity Fund**

The investment objective of the Nomura Funds Ireland - India Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of Indian securities.

The Sub-Fund invests, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in India. The Sub-Fund may invest in equity and equity-related securities listed or traded on any recognised exchange outside India provided that the business activities of the issuers of such securities are in India. The Sub-Fund may also hold exposure to India through investment in such instruments as American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”) and which may be listed on any recognised exchange outside India.

It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund is considered to be actively managed in reference to the MSCI India Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

**Nomura Funds Ireland - Fundamental Index Global Equity Fund**

The Nomura Funds Ireland - Fundamental Index Global Equity Fund (the “Sub-Fund”) was fully redeemed on 4th January, 2017 but the Central Bank has not withdrawn its approval yet.

**Nomura Funds Ireland - NEWS Emerging Markets Small Cap Equity Fund**

The Nomura Funds Ireland - NEWS Emerging Markets Small Cap Equity Fund was fully redeemed on 27th June, 2014 but the Central Bank has not withdrawn its approval yet.

As at 31st December, 2023, the Sub-Fund held three illiquid positions in its portfolio – Inepar SA Industria e Construcoes, China Lumena New Materials Corp, China Metal Recycling Holdings Ltd. The Sub-Fund had a cash balance of USD 10,503 at the financial year end.

**Nomura Funds Ireland - Japan Strategic Value Fund**

The investment objective of the Nomura Funds Ireland - Japan Strategic Value Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a portfolio of Japanese equity securities.

The Sub-Fund invests, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in Japan. The Sub-Fund may invest up to 30% of its net assets in equity and equity-related securities listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund seeks to identify equity and equity-related securities, whose valuations are, in the opinion of the Sub-Investment Manager, low in comparison to assets and profitability, and which may be expected to rise in the future. In addition to these valuation opportunities, the Sub-Fund seeks investments based on other strategic features as detailed below:

- a) equity and equity-related securities where changes to financial conditions, such as changes in operations, strategy and dividend and share buy-back policies, are expected;
- b) equity and equity-related securities where potential for growth has been identified, including improved results and increasing market share, as new business operations are developed and the underlying economy improves; and
- c) equity and equity-related securities relating to companies that have been identified as candidates for business restructuring, corporate governance reform or attractive merger and acquisition opportunities.

The Sub-Fund is considered to be actively managed in reference to the TOPIX Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

The Sub-Fund is managed so as to maintain a near fully invested position, other than during periods where the Investment Manager believes that a larger cash position is warranted.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - US High Yield Bond Fund**

The investment objective of the Nomura Funds Ireland - US High Yield Bond Fund (the “Sub-Fund”) is to achieve current yield and capital gains, through investment in a diversified portfolio of primarily high yielding US Dollar denominated debt and debt-related securities issued principally by companies in the United States and Canada.

The Sub-Fund may invest in debt and debt-related securities issued by United States or non-United States corporations, limited liability companies or limited partnerships and other forms of enterprise.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted high yield securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

Under normal circumstances, the Sub-Fund invests at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated.

No more than 30% of the Sub-Fund’s net assets may be invested in debt and debt-related securities with a rating of lower than B3/B- by both Moody’s and S&P, respectively or which are deemed to be of equivalent quality by the Investment Manager.

The Sub-Fund may invest up to 25% of its net assets in debt and debt-related securities issued by companies, governments or governmental agencies in countries other than the United States or Canada.

No more than 5% of the Sub-Fund’s net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund’s net assets may be invested in debt and debt-related securities in any one industry. The Sub-Fund may invest up to 20% of its net assets in debt and debt-related securities not denominated in US Dollar.

The Sub-Fund is considered to be actively managed in reference to the ICE Bank of America Merrill Lynch US High Yield Constrained Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

A change in Index proposed by the Directors will be subject to shareholder approval and disclosure in a revised supplement for the Sub-Fund.

**Nomura Funds Ireland - Japan High Conviction Fund**

The investment objective of the Nomura Funds Ireland - Japan High Conviction Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of Japanese equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in Japan.

The Sub-Fund may invest up to 20% of its net assets in equity and equity-related securities listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund is considered to be actively managed in reference to the TOPIX Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

Investors should note that due to the highly concentrated nature of the portfolio, the Sub-Fund is likely to have a high annualised volatility.

**Nomura Funds Ireland - Asia Ex Japan High Conviction Fund**

The investment objective of the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of Asian (excluding Japan) equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in the countries covered by the MSCI All Country Asia Ex Japan Index (the “Index Countries”).

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Asia Ex Japan High Conviction Fund (continued)**

The Sub-Fund may invest up to 30% of its net assets in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, provided that the business activities of the issuers of such securities are in the Index Countries.

The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) and which may be listed on any recognised exchange in a non-Index Country. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Fund is considered to be actively managed in reference to the MSCI All Countries Asia Ex Japan Index (total return with net dividends reinvested) (the “Benchmark”) by virtue of the fact that it seeks to outperform the Benchmark. While certain of the Fund’s securities may be components of and may have similar weightings to the Benchmark, the Investment Manager will use its discretion to invest in securities or sectors not included in the Benchmark in order to take advantage of investment opportunities. The investment strategy does not restrict the extent to which the Fund’s holdings may deviate from the Benchmark and deviations may be material. This is likely to increase the extent to which the Fund can outperform or underperform the Benchmark.

Investors should note that due to the general nature of Asian markets, and the highly concentrated nature of the portfolio, the Sub-Fund is likely to have a high annualised volatility.

**Nomura Funds Ireland - Global Sustainable High Yield Bond Fund**

The investment objective of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund (the “Sub-Fund”) is sustainable investment to achieve current yield and capital gains through investment in a diversified portfolio of primarily high yielding debt and debt-related securities issued in the United States or major Eurobond developed markets.

The Sub-Fund shall invest in a diversified portfolio of primarily high yielding debt and debt-related securities issued in developed markets principally by companies, which are listed or traded on a recognised exchange and which constitute sustainable investments. Investors should note that high yielding securities generally have a high volatility.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities.

The Sub-Fund may hold equity and equity-related securities, which may or may not be listed or traded on a recognised exchange, that it receives or purchases in connection with its ownership of certain debt and debt-related securities, such as defaulted high yield securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated. No more than 30% of the Sub-Fund’s net assets may be invested in debt and debt-related securities with a rating lower than B3/B - by both Moody’s and S&P, respectively or which are deemed to be of equivalent quality by the Investment Manager.

Subject to Section 2.1 of Appendix 1 to the Prospectus, the Sub-Fund may invest up to 10% of its net assets in loans, loan participations and/or loan assignments, which constitute transferable securities or money market instruments.

No more than 5% of the Sub-Fund’s net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund’s net assets may be invested in debt and debt-related securities in any one industry (as defined by reference to ICE BofA Level 4 Industry Classification which comprises a detailed sector classification for constituents of the ICE BofA global fixed income universe).

The Sub-Fund is considered to be actively managed in reference to the ICE BofA Developed Markets High Yield Constrained (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund seeks to achieve its sustainable investment objective by investing in debt and debt-related securities of issuers that contribute to the sustainable development of society and/or the environment and which also provide attractive return.

The Sub-Fund may also employ spot foreign exchange transactions, forward foreign exchange contracts and currency futures to seek to hedge the foreign exchange exposure of the assets of the Sub-Fund from the impact of fluctuations in the relevant exchange rates.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Global Dynamic Bond Fund**

The investment objective of the Nomura Funds Ireland - Global Dynamic Bond Fund (the “Sub-Fund”) is to provide a combination of income and growth through investing principally in debt and debt-related securities with fixed or variable rates of income.

The Sub-Fund shall invest principally in debt and debt-related securities with fixed or variable (linked to inflation or other indices) rates of income, issued by corporations, limited liability companies, limited partnerships, sovereign, government agencies, supranational or other issuers, which are listed or traded on recognised exchanges. In addition to direct investment in debt and debt-related securities, the Sub-Fund may also gain exposure to debt and debt-related securities indirectly through investment in financial derivative instruments.

There are no geographical restrictions as to the debt and debt-related securities that may be held, but a maximum of 30% of the Net Asset Value of the Sub-Fund may be invested in debt and debt-related securities of emerging market issuers.

The Sub-Fund may invest either in investment grade or sub-investment grade debt and debt-related securities, which have been rated as such by at least one rating agency (either Standard & Poors or Moody’s). The Sub-Fund may also invest up to 30% of its Net Asset Value in unrated securities (which are not rated by a rating agency), if the Investment Manager determines that the security is of comparable quality to a rated security that the Sub-Fund may purchase.

Subject to Section 2.1 of Appendix 1 to the Prospectus, the Sub-Fund may invest up to 10% of its net assets in loans, loan participations and/or loan assignments, which constitute transferable securities or money market instruments.

With the exception of equity options and equity index options no investment shall be made in equity securities provided, however, that equity securities up to 10% of the Net Asset Value may be held as a result of investments in preferred securities, which have equity/warrant characteristics or as a result of acquisitions of equity securities upon conversion or exercise of convertible bonds.

The Sub-Fund is actively managed without reference to any benchmark meaning that the Investment Manager has full discretion over the composition of the Sub-Fund’s portfolio, subject to the stated investment objectives and policies of the Sub-Fund.

**Nomura Funds Ireland - Emerging Market Local Currency Debt Fund**

The investment objective of the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund (the “Sub-Fund”) is to generate a total return through a combination of capital gains and income gains.

The Sub-Fund seeks to achieve its objective principally by investing in local currency denominated emerging debt and debt-related securities and derivative instruments comprising forward currency contracts, non-deliverable forward contracts (“NDFs”), futures, interest rate swaps, cross currency swaps, credit default swaps, FX options and interest rate options. The Sub-Fund may, without limitation, also invest in non-local currency denominated emerging debt and debt-related securities and non-emerging debt and debt-related securities.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, limited liability companies or limited partnerships and other forms of enterprise, and in sovereign, quasi-sovereign and supranational bonds which are listed or traded on a recognised exchange.

The Sub-Fund will not invest in debt and debt-related securities rated below B3 or B- by Moody’s or S&P respectively. If any debt and debt-related securities are downgraded, then they will be held within the portfolio until upgraded, or, disposed of within 6 months, if not upgraded. The Sub-Fund may purchase unrated securities (which are not rated by a rating agency) if the Investment Manager determines that the security is of comparable quality to a rated security that the Sub-Fund may purchase. Unrated securities may be less liquid than comparable rated securities and involve the risk that the Investment Manager may not accurately evaluate the security’s comparative credit rating.

No investment shall be made in equity securities provided, however, equity securities up to 10% of the Net Asset Value may be held as a result of investments in hybrid preferred securities which have equity/warrant characteristics or as a result of acquisitions of equity securities upon conversion or exercise of convertible bonds or upon allotments to the bondholders.

The Sub-Fund is considered to be actively managed in reference to the JPMorgan GBI-EM Global Diversified Composite Unhedged USD Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Asia High Yield Bond Fund**

The investment objective of the Nomura Funds Ireland - Asia High Yield Bond Fund (the “Sub-Fund”) is to generate income and capital growth through investing primarily in a diversified portfolio of primarily high yielding debt and debt-related securities in Asia.

The Sub-Fund shall invest primarily in a diversified portfolio of high yielding debt and debt-related securities issued in countries covered by the Index (the “Index Countries”) or issued in other countries provided that the business activities of the issuers of such securities are in the Index countries as defined above.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, financial institutions, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities, which are listed on recognised exchanges.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated. From time to time, the Sub-Fund may invest in investment grade debt and debt-related securities provided that no more than 20% of the Sub-Fund’s net assets may be invested in non-benchmark debt and debt-related securities which are rated as investment grade. The Sub-Fund will take a higher rating of either Standard & Poors or Moody’s when determining a rating constraint. Investors should note that high yielding debt and debt-related securities which are rated non-investment grade and/or unrated will generally have a high volatility.

The Sub-Fund may hold equity and equity-related Securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted securities in the course of reorganisation which are subsequently converted into equity and equity-related securities. While certain debt and debt-related securities (i.e. convertible bonds) and equity and equity-related securities (i.e. convertible shares) may embed a derivative component (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

The Sub-Fund shall primarily consist of securities denominated in US Dollar as well as the various Asian currencies included of the Index countries.

The Sub-Fund is considered to be actively managed in reference to the J.P. Morgan Asia Credit Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - Asia Investment Grade Bond Fund**

The investment objective of the Nomura Funds Ireland - Asia Investment Grade Bond Fund (the “Sub-Fund”) is to generate income and capital growth by investing firstly in a diversified portfolio of primarily investment grade debt and debt-related securities in Asia.

The Sub-Fund shall invest primarily in a diversified portfolio of investment grade debt and debt-related securities issued in the countries covered by the J.P. Morgan Asia Credit Index (JACI) Investment Grade Index (the “Index Countries”) or issued in other countries provided that the business activities of the issuers of such securities are in the Index countries, as defined above.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, financial institutions, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities, which are listed or traded on recognised exchanges.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in investment grade debt and debt-related securities. Investors should note that investment grade debt and debt-related securities may be subject to ratings downgrades by the rating agencies during the holding period of the debt and debt-related securities. In the instance of one or more downgrades to below investment grade or otherwise, the Sub-Fund may continue to hold such securities. Such downgrades might affect the Net Asset Value of the Sub-Fund.

No more than 30% of the Sub-Fund’s net assets may be invested in debt and debt-related securities which have a rating of below investment grade or are unrated. The Sub-Fund will take a higher rating of either Standard & Poors or Moody’s when determining a rating constraint.

The Sub-Fund shall primarily consist of debt and debt-related securities denominated in US Dollar as well as the various Asian currencies included in the Index countries.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Asia Investment Grade Bond Fund (continued)**

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

While certain debt and debt-related securities (i.e. convertible bonds) and equity and equity-related securities (i.e. convertible shares) may embed a derivative component (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

The Sub-Fund is considered to be actively managed in reference to the J.P. Morgan Asia Credit Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - China Fund**

The investment objective of the Nomura Funds Ireland - China Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of Chinese securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities of companies listed or traded on recognised exchanges in the People's Republic of China (“PRC”), comprising Hong Kong Special Administrative Region (“SAR”). The Sub-Fund may also invest in equity and equity-related securities listed or traded on any recognised exchange outside the PRC, provided that the companies issuing such securities carry out a significant part of their business activities in the PRC. The Sub-Fund may also hold exposure to China through investment in such instruments as American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”) and which may be listed on any recognised exchange outside China.

It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund may also invest in “A” shares of companies in the PRC. “A” Shares of companies in the PRC are shares denominated in Renminbi (the official currency of the PRC) and issued by companies in the PRC and listed on PRC stock exchanges.

The Sub-Fund may also invest from time to time in debt and debt-related securities issued by corporations, financial institutions, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities, which are listed or traded on a recognised exchange. Such debt and debt-related securities will be rated investment grade (BBB) by at least one rating agency (either Standard & Poors or Moody’s).

While certain debt and debt-related securities (i.e. convertible bonds) and equity and equity-related securities (i.e. convertible shares) may embed a derivative component (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

The Sub-Fund is considered to be actively managed in reference to the MSCI China Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - Global High Conviction Fund**

The investment objective of the Nomura Funds Ireland - Global High Conviction Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of global equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily (at least 65% of net assets) in equity and equity-related securities listed or traded on a recognised exchange in the countries covered by the MSCI All Country World Index (the “Index Countries”).

The Sub-Fund may also invest from time to time in equity and equity-related securities listed or traded on a recognised exchange in a Non-Index Country, when market opportunities so arise.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Global High Conviction Fund (continued)**

The Sub-Fund may also hold exposure to Index and Non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), Non-Voting Depositary Receipts (“NVDRs”) or PNotes (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund may invest in equity and equity-related securities (such as convertible securities) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

It is anticipated that the Sub-Fund will invest on a long-only basis across a range of capitalisations but generally this will be from medium cap to high cap. There is no particular industry / sector focus to the Sub-Fund’s investments.

The Sub-Fund will be highly concentrated in that it will own approximately 20 stocks and aims to generate a higher excess return than is available from a more diversified portfolio. Investors should note that due to the highly concentrated nature of the portfolio, the Sub-Fund is likely to have a higher annualised absolute volatility than a more diversified portfolio. Annualised volatility can be described as the distribution of periodic returns recalculated in such a way to show the level of volatility as if over a one year period. A more concentrated portfolio is likely to experience higher volatility of returns than a less concentrated portfolio as the impact on portfolio returns from the movement in one holding will, by definition, be higher when the weight of that holding within the portfolio is higher.

The Sub-Fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - European High Yield Bond Fund**

The investment objective of the Nomura Funds Ireland - European High Yield Bond Fund (the “Sub-Fund”) is to achieve current yield and capital gains, through investment primarily in a diversified portfolio of debt and debt-related securities rated below investment grade and issued in European currencies.

Such debt and debt-related securities shall be issued by European and Non-European issuers such as corporations, limited liability companies and/or limited partnerships. The Sub-Fund may also invest in debt and debt-related securities issued by emerging market issuers such as corporations, limited liability companies and/or limited partnerships, if these are determined to be suitable by the Investment Manager.

The Sub-Fund may hold equity and equity-related securities, which are listed or traded on a recognised exchange, that it receives or acquires in connection with its ownership of certain debt and debt-related securities, such as defaulted high yield securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated between BB and CCC. The minimum rating for securities at purchase is CCC- and D.

No more than 5% of the Sub-Fund’s net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund’s net assets may be invested in debt and debt-related securities in any one industry sector.

The Sub-Fund is considered to be actively managed in reference to the ICE Bank of America Merrill Lynch European Currency High Yield Constrained Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - Global Sustainable Equity Fund**

The investment objective of the Nomura Funds Ireland – Global Sustainable Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a relatively concentrated, actively managed portfolio of global equity securities issued by companies with a high overall positive impact on society.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in the countries covered by the MSCI All Country World Index (the “Index Countries”).

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Global Sustainable Equity Fund (continued)**

The Sub-Fund may also invest from time to time in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may also hold exposure to Index and non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), Non-Voting Depositary Receipts (“NVDRs”) or PNotes (as further described in Section 8 of the Supplement) and which will be listed on a recognised exchange.

The Sub-Fund may invest in equity and equity-related securities (such as convertible securities) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

Investors should note that due to the relatively concentrated nature of the Sub-Fund, the Sub-Fund is likely to have a higher annualised volatility than a more diversified portfolio.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The strategy focuses on investing in businesses that provide a positive impact on the sustainable development of society. The Investment Manager defines such companies as follows: a) companies that create high total value which is shared among all stakeholders in both monetary and non-monetary terms; b) companies that demonstrate ethical business practices (i.e. they follow proper business policies and practices regarding such issues as corporate governance, bribery, discrimination, corporate social responsibility and fiduciary responsibilities) in respect of all employees, supply chain and customers alike; c) companies that actively demonstrate socially responsible corporate governance and engage with the wider community, which is assessed by a combination of external research and data, and an internal assessment of any strengths and weaknesses of engagements conducted by the Investment Manager’s analyst team.

The Sub-Fund may hold up to 10% of net assets in debt and debt-related securities, which are listed or traded on debt and debt-related securities, that it receives or purchases in connection with its ownership of certain equity and equity-related securities and accordingly, holding such debt and debt-related securities will be as a result of investment in equity and equity-related securities. This occurs in circumstances where the Sub-Fund has purchased equity and equity-related securities which have subsequently been subject to a corporate action which results in the issuance of debt and debt-related securities. These debt and debt-related securities are held by the Sub-Fund until they can be sold at a price which the Investment Manager believes reflects the underlying value of the security. Such debt and debt-related securities will be issued by corporations, limited liability companies or limited partnerships, other forms of enterprise (such as state owned enterprises) and sovereign and quasi-sovereign entities and may be rated either investment grade or non-investment grade by at least one rating agency (such as Moody’s, Standard and Poors, Fitch or Rating and Investment Information Inc.).

The Sub-Fund may invest up to 30% of net assets in emerging market countries at any given time.

The Sub-Fund may invest up to 10% of net assets in Russian markets provided that the Sub-Fund will only invest in securities that are listed / traded on the Moscow Exchange.

**American Century Global Small Cap Equity Fund**

The investment objective of the American Century Global Small Cap Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of equity and equity-related securities issued by small capitalisation companies in both developed and emerging countries.

The Investment Manager will invest primarily in companies within the MSCI ACWI Small Cap Index (the “Index”) or other companies whose capitalisation is no greater than that of the largest company within the Index at the time of investment.

The Sub-Fund shall invest in countries world-wide, including both developed and emerging markets. The Sub-Fund shall invest, under normal market conditions, at least 40% (unless the Investment Manager deems market conditions to be detrimental to the performance of the Sub-Fund, in which case the Sub-Fund would invest at least 30%) of its assets in equity and equity-related securities of issuers located outside of the United States. The Sub-Fund will allocate its assets among at least three different countries.

**GENERAL INFORMATION (CONTINUED)**

---

**American Century Global Small Cap Equity Fund (continued)**

The Sub-Fund may invest in equity and equity-related securities denominated in both US Dollar and other currencies.

The Sub-Fund may also hold exposure through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

In the event of exceptional market or economic conditions, the Sub-Fund may also invest up to 10% of net assets in debt and debt-related securities, whether rated investment grade or non-investment grade, comprising notes, bonds, convertible bonds, preferred securities, zero coupon, pay-in-kind or deferred payment securities, variable and floating rate instruments, issued by governments, governmental agencies or corporates.

The Sub-Fund may also invest up to 10% in other collective investment schemes including equity exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes as appropriate and as set out in Appendix I to the Prospectus.

**American Century Global Growth Equity Fund**

The investment objective of the American Century Global Growth Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of global equity and equity-related securities.

The Sub-Fund shall invest, under normal market conditions, primarily (at least 65% of net assets) in equity and equity-related securities of issuers located in the countries covered by the MSCI All Country World Index (the “Index Countries”) and which are listed or traded on a recognised exchange.

The Sub-Fund may also invest from time to time in equity and equity-related securities of issuers located in Non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may invest in equity and equity-related securities of companies located in emerging market countries.

The Sub-Fund may also hold exposure to Index and Non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also, in accordance with the investment powers and restrictions set out in Appendix I of the Prospectus, use derivatives for efficient portfolio management and /or hedging purposes.

**American Century Concentrated Global Growth Equity Fund**

The investment objective of the American Century Concentrated Global Growth Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of global equity and equity-related securities.

**GENERAL INFORMATION (CONTINUED)**

---

**American Century Concentrated Global Growth Equity Fund (continued)**

The Sub-Fund shall invest, under normal market conditions, primarily (at least 65% of net assets) in equity and equity-related securities of approximately 30 to 50 different issuers located in the countries covered by the MSCI All Country World Index (the “Index Countries”) and which are listed on a recognised exchange.

The Sub-Fund may also invest from time to time in equity and equity-related securities of issuers located in Non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may invest in equity and equity-related securities of companies located in emerging market countries.

The Sub-Fund may also hold exposure to Index and Non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund may also, in accordance with the investment powers and restrictions set out in Appendix I of the Prospectus, use derivatives for efficient portfolio management and /or hedging purposes.

**American Century Emerging Markets Equity Fund**

The investment objective of the American Century Emerging Markets Equity Fund (the “Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of emerging market equity securities.

The Sub-Fund will invest at least 80% of its assets in equity and equity-related securities of companies located in the countries covered by the MSCI Emerging Markets Index (the “Index Countries”) and which are listed or traded on a recognised exchange. The Sub-Fund may invest up to 20% of net assets in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager. The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) and which may be listed on any recognised exchange in a non-Index Country.

Shareholders should note that the Sub-Fund’s exposure may also include Chinese A shares traded via Shanghai Hong Kong Stock Connect or Shenzhen Hong Kong Stock Connect. Chinese A shares are renminbi-denominated A shares of companies domiciled in mainland China; these are traded on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange.

The Sub-Fund is considered to be actively managed in reference to the MSCI Emerging Markets Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also, in accordance with the investment powers and restrictions set out in Appendix I of the Prospectus, use derivatives for efficient portfolio management and /or hedging purposes.

**American Century Emerging Markets Debt Total Return Fund**

The American Century Emerging Markets Debt Total Return Fund (the “Sub-Fund”) was fully redeemed on 9th March, 2023, but the Central Bank has not withdrawn its approval yet.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Global Multi-Theme Equity Fund**

The investment objective of the Nomura Funds Ireland - Global Multi-Theme Equity Fund (the “Sub-Fund”) is to achieve medium to long-term capital appreciation through investment in an actively managed portfolio of global equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in Index Countries.

The Sub-Fund may also invest from time to time less than 20% of net asset value in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may also hold exposure to Index and non-Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), Non-Voting Depositary Receipts (“NVDRs”) or PNotes and which will be listed on a recognised exchange.

Up to 10% of the Net Asset Value of the Sub-Fund may be invested, in aggregate, in collective investment schemes. The Sub-Fund will invest in such instruments when such investment is consistent with the Sub-Fund’s primary investment objective.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

The Sub-Fund may hold up to 10% of net assets in debt and debt-related securities, which are listed or traded on recognised exchanges, that it receives or purchases in connection with its ownership of certain equity and equity-related securities and accordingly, holding such debt and debt-related securities will be as a result of investment in equity and equity-related securities. This occurs in circumstances where the Sub-Fund has purchased equity and equity-related securities which have subsequently been subject to a corporate action which results in the issuance of debt and debt-related securities. These debt and debt-related securities are held by the Sub-Fund until they can be sold at a price which the Investment Manager believes reflects the underlying value of the security.

Such debt and debt-related securities may be issued by corporations, limited liability companies or limited partnerships, state owned enterprises and sovereign and quasi-sovereign entities and may be rated either investment grade or non-investment grade by at least one rating agency (such as Moody’s, Standard and Poors, Fitch or Rating and Investment Information, Inc.).

The Sub-Fund may invest up to 10% of net assets in Russian markets provided that the Sub-Fund will only invest in securities that are listed /traded on the Moscow Exchange.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Index (the “Index”). Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager will use its discretion to invest in companies or sectors not included in the Index.

**Nomura Funds Ireland - Japan Small Cap Equity Fund**

The investment objective of the Nomura Funds Ireland – Japan Small Cap Equity Fund (“Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of equity and equity-related securities of small capitalisation companies in Japan.

The Sub-Fund shall invest primarily in equity and equity-related securities of small capitalization companies that are listed or traded on a recognised exchange in Japan.

The Sub-Fund may invest up to 20% of its net assets in equity and equity-related securities of small capitalisation companies that are listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan.

The Investment Manager considers small capitalisation companies to be those that have a market capitalisation of less than JPY 1 trillion at the time of investment.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Japan Small Cap Equity Fund (continued)**

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted. Examples are situations such as financial crisis where the Investment Manager expects large redemption from shareholders and/or the Investment Manager deems it appropriate to reduce market exposure in the face of deteriorating market condition.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

Up to 10% of the Net Asset Value of the Sub-Fund may be invested, in aggregate, in collective investment schemes, including Exchange Traded Funds (“ETFs”). The Sub-Fund will invest in such schemes when such investment is consistent with the Sub-Fund’s primary investment objective.

Up to 10% of the net asset value of the Sub-Fund may be invested in real estate investment trusts (“REITs”).

The Sub-Fund is actively managed in reference to the Russell/Nomura Small Cap Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

**American Century Emerging Markets Sustainable Impact Equity Fund**

The investment objective of the American Century Emerging Markets Sustainable Impact Equity Fund (“Sub-Fund”) is to achieve long-term capital growth through investment in an actively managed portfolio of emerging market equity securities issued by companies that create a positive social and/or environmental impact.

The Sub-Fund will invest at least 80% of its assets in equity and equity-related securities of companies located in Index Countries and which are listed or traded on a recognised exchange, whose products or behaviour, in the opinion of the Investment Manager, have a positive social and/or environmental impact. The Sub-Fund may invest up to 20% of net assets in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager. The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) or Non-Voting Depositary Receipts (“NVDRs”) and which may be listed on any recognised exchange in a non-Index Country.

Shareholders should note that the Sub-Fund's exposure may also include Chinese A shares traded via Shanghai Hong Kong Stock Connect or Shenzhen Hong Kong Stock Connect. Chinese A shares are renminbi-denominated A shares of companies domiciled in mainland China; these are traded on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

In order to achieve its investment objective described in the Prospectus, the Sub-Fund will invest principally in sustainable investments which are defined as those investments that contribute to an environmental or social objective, provided that such investments do not significantly harm any of those objectives and that investee companies follow good governance practices. As a result, the Investment Manager seeks to invest in companies or other organisations which have a commercial purpose of solving social or environmental problems.

In the event of exceptional market or economic conditions, the Sub-Fund may also invest up to 10% of net assets in both investment grade and non-investment grade debt and debt-related securities comprising notes (such as short term treasury notes), bonds, convertible bonds, (which may embed a derivative element but will not embed any leverage), preferred securities, (such bonds with hybrid features and characteristics of both bonds and equities which are in general perpetual and callable, and pay fixed-rate or floating-rate dividends instead of coupons and rank higher than common stocks but lower than senior debt), zero coupon, pay-in-kind or deferred payment securities, variable and floating rate instruments (debt securities with floating coupon rates whereby the interest paid to an investor fluctuates over time with an underlying interest rate level, such as floating rate notes) issued by governments, governmental agencies or corporates.

**GENERAL INFORMATION (CONTINUED)**

---

**American Century Emerging Markets Sustainable Impact Equity Fund (continued)**

Investment grade securities are those that have been rated in one of the four highest categories used by a nationally recognised statistical rating organisation or determined by the Investment Manager to be of comparable credit quality. Non-investment grade securities are those that have been rated below the four highest categories used by a nationally recognized statistical rating organisation, or, if not rated, determined by the Investment Manager to be of similar quality (which assessment is made by the Investment Manager reviewing the credit attributes of the issuer of the security, such as its financial strength (profitability, cash flows, liquidity, leverage etc.) business profile, management quality as well as the political, legal and regulatory environment).

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes including exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes.

The Sub-Fund may engage in active trading of portfolio securities to achieve its investment objective.

The Sub-Fund may also, in accordance with the investment powers and restrictions, use financial derivative instruments for efficient portfolio management and/or hedging.

The Sub-Fund is actively managed in reference to the MSCI Emerging Markets Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund’s securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

**American Century Advanced Medical Impact Equity Fund**

The American Century Advanced Medical Impact Equity Fund (the “Sub-Fund”) was fully redeemed on 12th December, 2023, but the Central Bank has not withdrawn its approval yet.

**American Century US Focused Innovation Equity Fund**

The investment objective of the American Century US Focused Innovation Equity Fund (“Sub-Fund”) is to provide a total return that exceeds the MSCI USA Growth Index (the “Index”) through investment in a concentrated, actively managed portfolio of companies with significant long-term growth potential.

The Sub-Fund will invest primarily, under normal market conditions, in equity and equity-related securities of US companies that are listed or traded on a recognised exchange. Such US companies may be selected from the Index or from outside the Index. In addition, the Sub-Fund may also invest up to 10% in non-US companies which will be selected from outside the Index. The Investment Manager will favour stocks of early and rapid stage growth companies, which the Investment Manager believes will increase in value over time, as further set out in the investment strategy below.

The Sub-Fund may gain exposure to the Index directly or through investment in such instruments as American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”), which may be listed on any recognised exchange in a non-Index Country.

The Sub-Fund will generally invest in companies which have a market capitalisation at the date of investment of \$2 billion or greater.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes, including exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes.

**Nomura Funds Ireland - Japan Sustainable Equity Growth Fund**

The investment objective of the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund (“Sub-Fund”) is sustainable investment and the Sub-Fund seeks to achieve long-term capital growth through investment in an actively managed portfolio of Japanese equity and equity-related securities, issued by companies with a high overall positive environmental and/or societal impact.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Japan Sustainable Equity Growth Fund (continued)**

In order to achieve its objective of sustainable investment, the Sub-Fund shall invest in Japanese equity and equity-related securities, which constitute Sustainable Investments, as further described below.

The Sub-Fund is actively managed in reference to the TOPIX Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Investment Manager has a responsible investment philosophy of considering the environmental, social and governance (“ESG”) impact of investment decisions on all the stakeholders of the issuing company, including the environment, society, customers, suppliers, employees and investors. Within this philosophical framework, the Investment Manager has identified five SDGs aligned “Impact Goals”, reflecting its sustainable investment objective, to pursue over the long term. The “Impact Goals” are as follows: 1) Mitigate Climate Change, 2) Mitigate Natural Capital Depletion, 3) Promote Good Health and Well-Being, 4) Improve Quality of Life and 5) Promote Sustainable Industrialisation and Foster Innovation. The Investment Manager will select sustainable investments which contribute directly or indirectly to achieving the “Impact Goals”. The strategy seeks to identify those companies that have the greatest positive total impact on all stakeholders of the company.

The Sub-Fund shall invest primarily in equity and equity-related securities that are listed or traded on a recognised exchange in Japan. The Sub-Fund may also invest up to 20% of its net assets in equity and equity-related securities that are listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

**Nomura Funds Ireland - Japan Sustainable Equity Core Fund**

The investment objective of the Nomura Funds Ireland - Japan Sustainable Equity Core Fund (“Sub-Fund”) is sustainable investment and the Sub-Fund seeks to achieve long-term capital growth through investment in an actively managed portfolio of Japanese equity and equity-related securities, issued by companies with a high overall positive environmental and/or societal impact.

In order to achieve its objective of sustainable investment, the Sub-Fund shall invest in Japanese equity and equity-related securities, which constitute sustainable investments, as further described below.

The Sub-Fund is actively managed in reference to the TOPIX Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Investment Manager has a responsible investment philosophy of considering the environmental, social and governance (“ESG”) impact of investment decisions on all the stakeholders of the issuing company, including the environment, society, customers, suppliers, employees and investors. Within this philosophical framework, the Investment Manager has identified three SDGs aligned “Impact Goals,” reflecting its sustainable investment objective, to pursue over the long term. The “Impact Goals” are as follows: 1) Mitigate Climate Change, 2) Mitigate Natural Capital Depletion and 3) Promote Good Health and Well-Being. The Investment Manager will select sustainable investments which contribute directly or indirectly to achieving the “Impact Goals”. The strategy seeks to identify those companies that have the greatest positive total impact on all stakeholders of the company.

The Sub-Fund shall invest primarily in equity and equity-related securities that are listed or traded on a recognised exchange in Japan. The Sub-Fund may also invest up to 20% of its net assets in equity and equity-related securities that are listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

**Nomura Funds Ireland - Asia Sustainable Equity Fund**

The investment objective of the Nomura Funds Ireland - Asia Sustainable Equity Fund (“Sub-Fund”) is sustainable investment and the Sub-Fund seeks to achieve long-term capital growth through investment in an actively managed portfolio of Asian equity and equity-related securities, issued by companies with a high overall positive environmental and/or societal impact.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Asia Sustainable Equity Fund (continued)**

In order to achieve its objective of sustainable investment, the Sub-Fund shall invest in Asian equity and equity-related securities, which constitute sustainable investments, as further described below.

The Sub-Fund is actively managed in reference to the MSCI All Countries Asia Pacific ex Japan Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Investment Manager has a responsible investment philosophy of considering the environmental, social and governance (“ESG”) impact of investment decisions on all the stakeholders of the issuing company, including the environment, society, customers, suppliers, employees and investors. Within this philosophical framework, the Investment Manager has identified six SDGs aligned “Impact Goals,” reflecting its sustainable investment objective, to pursue over the long term. The “Impact Goals” are as follows: 1) Mitigate Climate Change, 2) Mitigate Natural Capital Depletion, 3) Global Access to Basic Financial Services, 4) Global Access to Clean Drinking Water, 5) Eliminate Communicable Disease and 6) Mitigate the Obesity Epidemic. The Investment Manager will select sustainable investments which contribute directly or indirectly to achieving the “Impact Goals”. The strategy seeks to identify those companies that have the greatest positive total impact on all stakeholders of the company.

The Sub-Fund shall invest primarily in equity and equity-related securities that are listed or traded on a recognised exchange in the countries covered by the Index (the “Index Countries”). The Sub-Fund may invest up to 20% of its net assets in equity and equity-related securities that are listed or traded on any recognised exchange in non-Index countries, provided that the business activities of the issuers of such securities are in the Index countries.

The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), Non-Voting Depositary Receipts (“NVDRs”) or PNotes (as further described in Section 8 of the Supplement) and which may be listed on any recognised exchange in a non-Index country. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund may invest in China A shares listed on the Shanghai Stock Exchange via the Shanghai Hong Kong Stock Connect scheme, or the Shenzhen Stock Exchange via the Shenzhen Hong Kong Stock Connect scheme. Such investment is expected to range generally between 5% and 15% of the Net Asset Value of the Sub-Fund but may fluctuate lower or higher than this.

Up to 10% of the Net Asset Value of the Sub-Fund may be invested in real estate investment trusts (“REITs”).

**Nomura Funds Ireland - Corporate Hybrid Bond Fund**

The investment objective of the Nomura Funds Ireland - Corporate Hybrid Bond Fund (“Sub-Fund”) is to achieve an attractive level of total return (income plus capital appreciation) through investment primarily in corporate hybrid bonds.

In order to achieve its investment objective, the Sub-Fund will invest in debt and debt-related securities, comprising primarily of corporate hybrid bonds, both investment grade and subinvestment grade that have been rated by a recognised rating agency such as Moody’s, S&P, and Fitch, which are listed or traded on global recognised exchanges.

The Sub-Fund is actively managed in reference to the ICE BofA Global Hybrid Non-Financial 5% Constrained Custom Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

Corporate hybrid bonds are bonds that have certain equity-like features (such as subordination risk, coupon deferral risk and extension risk). Corporate hybrid bonds are issued by non-financial corporations and generally offer a means for issuers to borrow money from investors in return for interest payments.

The Sub-Fund may also invest in other debt and debt-related securities, both investment grade and sub-investment grade that have been rated by a recognised rating agency, including fixed and floating rate debt securities, such as senior bonds, issued by governments, government related and corporate entities from OECD countries denominated in local currencies. The Sub-Fund will not invest in contingent convertible bonds.

Under normal market conditions, it is the intention of the Investment Manager to invest at least 50% of the Sub-Fund’s Net Asset Value in investment grade debt and debt-related securities. The Sub-Fund will invest a majority of its Net Asset Value in securities denominated in Euro, Sterling and/or US Dollar. The investments will be fully hedged into the base currency of the Sub-Fund through the use of forward and future contracts.

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes, including exchange-traded funds (“ETFs”).

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - US High Yield Bond Continuum Fund**

The investment objective of the Nomura Funds Ireland - US High Yield Bond Continuum Fund (“Sub-Fund”) is to achieve current yield and capital gains through investment in a diversified portfolio of primarily high yielding US Dollar denominated debt and debt-related securities.

The Sub-Fund is actively managed in reference to the ICE BofA US High Yield Constrained Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Sub-Fund may invest in debt and debt-related securities issued by corporates, limited liability companies or limited partnerships and other forms of enterprise and in sovereign, quasi-sovereign and supranational debt and debt-related securities.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities and accordingly, holding such equity and equity-related securities will be as a result of investment in debt and debt-related securities.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated. No more than 30% of the Sub-Fund’s net assets may be invested in debt and debt-related securities with a rating of lower than B3/B- by both Moody’s and S&P, respectively or which are deemed to be of equivalent quality by the Investment Manager.

The Sub-Fund will not invest more than 10% of its net assets in debt and debt-related securities issued by governments or governmental agencies.

No more than 5% of the Sub-Fund’s net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund’s net assets may be invested in debt and debt-related securities in any one industry.

The Sub-Fund may invest up to 20% of its net assets in debt and debt-related securities not denominated in US Dollar and up to 5% of net assets in investment grade debt and debt-related securities.

The Sub-Fund may also invest up to 10% in eligible collective investment schemes including exchange-traded funds (“ETFs”).

**Nomura Funds Ireland - Emerging Market Corporate Bond Fund**

The investment objective of the Nomura Funds Ireland - Emerging Market Corporate Bond Fund (“Sub-Fund”) is to achieve an attractive level of total return (income plus capital appreciation) through investment in debt and debt-related securities that are economically tied to emerging market countries.

In order to achieve its investment objective, the Sub-Fund will invest primarily in debt and debt-related securities, which are listed or traded on recognised exchanges, that are economically tied to emerging market countries. In addition, a portion of the Sub-Fund’s assets may be invested in debt and debt-related securities, which are listed or traded on recognised exchanges, that are economically tied to frontier markets (i.e. emerging market countries at an earlier stage of development).

The Sub-Fund is actively managed in reference to the J.P. Morgan CEMBI Broad Diversified Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Sub-Fund may invest in debt and debt-related securities issued by corporates, limited liability companies or limited partnerships and other forms of enterprise and in sovereign, quasi-sovereign and supranational debt and debt-related securities. Under normal circumstances, the Sub-Fund will invest at least 80% of its Net Asset Value in debt and debt-related securities issued by corporate issuers that are economically tied to emerging market countries.

The Sub-Fund will principally invest in investment grade and sub-investment grade debt and debt-related securities that have been rated by a recognised rating agency such as Moody’s, S&P, and Fitch.

The securities in which the Sub-Fund invests will predominantly be denominated in hard currencies (primarily US Dollar), but may be denominated in any currency, including local currencies of emerging market countries. No more than 20% of the Sub-Fund’s Net Asset Value may be invested in non-US Dollar denominated securities.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities and accordingly, holding such equity and equity-related securities will be as a result of investment in debt and debt-related securities.

**GENERAL INFORMATION (CONTINUED)**

---

**Nomura Funds Ireland - Emerging Market Corporate Bond Fund (continued)**

The Sub-Fund may also invest up to 10% in eligible collective investment schemes including, exchange-traded funds (“ETFs”).

**Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund**

The investment objective of the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund (“Sub-Fund”) is to seek to achieve long-term capital growth through investment primarily in an actively managed portfolio of China A-Shares.

The Sub-Fund is actively managed in reference to the MSCI China A Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes.

The Sub-Fund shall invest primarily in China A-Shares that are listed on the Shanghai Stock Exchange via the Shanghai Hong Kong Stock Connect scheme, or the Shenzhen Stock Exchange via the Shenzhen Hong Kong Stock Connect scheme, or through the Qualified Foreign Investor (“QFI”) scheme.

The Sub-Fund may hold up to 10% of its net assets in debt and debt-related securities in the People’s Republic of China (“PRC”) via the Bond Connect scheme. Such debt and debt-related securities will only be held as a result of investment in China A-Shares. This occurs in circumstances where the Sub-Fund has purchased China A-Shares which have subsequently been subject to a corporate action which results in the issuance of debt and debt-related securities. These debt and debt-related securities are held by the Sub-Fund until they can be sold at a price which the Investment Manager believes reflects the underlying value of the security. Such debt and debt-related securities may be issued by corporations, limited liability companies or limited partnerships, state owned enterprises and sovereign and quasi-sovereign entities and may be rated either investment grade or non-investment grade by at least one rating agency (such as Moody’s, Standard and Poor’s, Fitch or Rating and Investment Information, Inc.).

The Sub-Fund will be managed so as to maintain a near fully invested position in a portfolio of China A-Shares, other than during periods where the Investment Manager believes that a larger cash position is warranted. Examples are situations such as a financial crisis where the Investment Manager expects large redemptions from Shareholders and/or the Investment Manager deems it appropriate to reduce market exposure in the face of deteriorating market conditions. In such circumstances, the Sub-Fund may invest up to 20% of its net assets in cash.

## DIRECTORS' REPORT

---

The Directors present, herewith, their annual report and audited financial statements for Nomura Funds Ireland Plc (the "Fund") for the year ended 31st December, 2023.

The Fund is organised in the form of an umbrella fund with thirty two sub-funds: the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Fundamental Index Global Equity Fund, the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - European High Yield Bond Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the American Century Emerging Markets Debt Total Return Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund, the Nomura Funds Ireland - Corporate Hybrid Bond Fund, the Nomura Funds Ireland - US High Yield Bond Continuum Fund, the Nomura Funds Ireland - Emerging Market Corporate Bond Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund (the "Sub-Funds").

### Statement of Directors' responsibilities

The Directors are responsible for preparing the annual report and the audited financial statements in accordance with applicable Irish law and International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Irish company law requires the Directors to prepare financial statements for each financial year which give a true and fair view of the assets, liabilities and financial position of the Fund and of the profit or loss of the Fund for that year. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent; and
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on a going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Fund;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Fund to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

The Directors are responsible for keeping adequate accounting records, which disclose with reasonable accuracy at any time the financial position of the Fund and enable them to ensure that the financial statements are prepared in accordance with IFRS as adopted by the European Union and comply with Irish statute comprising the Companies Act 2014, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended). They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Fund to the Depositary for safekeeping. In carrying out this duty, the Fund has delegated custody of the Fund's assets to Brown Brothers Harriman Trustee Services (Ireland) Limited.

## DIRECTORS' REPORT (CONTINUED)

---

### Statement of Manager's responsibilities

The Manager is responsible for monitoring the below managerial functions:

- Operational Risk Management - monitoring of delegates so that there are appropriate effective operational risk procedures;
- Fund Risk Management - monitoring through the delegates that the Sub-Funds' risks are identified and managed;
- Investment Management - monitoring that the Investment Manager is in compliance with the approved investment approach and on an ongoing basis monitoring the investment process and performance;
- Capital and Financial Management - monitors that relevant accounting records are properly maintained and that the assets and liabilities of the Sub-Funds are valued appropriately. The Manager also ensures it is appropriately capitalised at all times;
- Regulatory Compliance - monitors that the Sub-Funds are in compliance with regulatory obligations; and
- Distribution - monitors the approved distribution.

### Accounting records

The Directors are responsible for ensuring that adequate accounting records as outlined in Section 281 to 285 of the Companies Act 2014 are maintained by the Fund. To achieve this, the Directors have appointed a service organisation Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"). The Fund's accounting records are retained at Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2.

### Directors

The following Directors who held office on 31st December, 2023 or at any time during the year, under the Memorandum and Articles of Association, are not required to retire by rotation:

David Dillon – Irish<sup>1</sup>

John Walley – Irish<sup>2</sup>

James Tucker – British (Chairman)<sup>1</sup>

Go Hiramatsu – Japanese<sup>1</sup>

James Downing – British<sup>3</sup>

Tomohisa Hanabata – Japanese<sup>1</sup>

<sup>1</sup> Non-Executive Director.

<sup>2</sup> Independent Non-Executive Director.

<sup>3</sup> Non-Executive Director until 18th October, 2023.

Details of Directors' fees and expenses are given in Note 15.

### Directors' and Company Secretary's interests in shares and contracts

None of the Directors, the Company Secretary or their families, hold or held, at 31st December, 2023 or during the year, any direct and indirect interest in the shares of the Fund, with the exception of James Tucker as detailed under Note 17.

### Connected Parties

Regulation 43 of the Central Bank UCITS Regulations 2019 "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the shareholders of the UCITS".

As required under UCITS Regulation 81.4, the Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected party; and all transactions with a connected parties that were entered into during the financial period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

### Transactions involving Directors and Secretary

Except as noted in Note 17, there are no contracts or arrangements of any significance in relation to the business of the Fund in which the Directors or Company Secretary had any interest as defined in the Companies Act 2014 at any time during the year ended 31st December, 2023.

## **DIRECTORS' REPORT (CONTINUED)**

---

### **Directors' Compliance Statement**

It is the policy of the Fund to comply with its relevant obligations (as defined in the Companies Act 2014). As required by Section 225(2) of the Companies Act 2014, the Directors acknowledge that they are responsible for securing the Fund's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014 and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Fund's relevant obligations. In discharging their responsibilities under Section 225, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Fund's relevant obligations.

### **Statement of Relevant Audit Information**

The Directors in office at the date of this report have each confirmed that:

- as far as he/she is aware, there is no relevant audit information of which the Fund's auditor is unaware; and
- he/she has taken all the steps that he/she ought to have taken as a Director in order to make himself/herself aware of any relevant audit information and to establish that the Fund's auditor is aware of that information.

### **Review of business activities and future developments**

The change in the Net Asset Value of the Sub-Funds for the year in the Directors' opinion is a key indicator to the performance of the Fund, as well as to a detailed review of the business and future developments.

The Directors have directed the affairs of the Fund in accordance with the Irish Companies Act 2014. The Fund was incorporated on 13th April, 2006 and issued its Prospectus on 30th August, 2006, while an amended Prospectus was noted by the Central Bank on 24th November, 2023.

After making reasonable inquiries, the Directors have a reasonable expectation that the Fund has adequate resources to continue in operational existence for the foreseeable future. Accordingly financial statements have been prepared on a going concern basis.

### **Political donations**

There were no political donations made during the year ended 31st December, 2023 (31st December, 2022: Nil).

### **Risk management objectives and policies**

Investment in a Sub-Fund of the Fund carries with it a degree of risk including, but not limited to, the risks referred to in Note 16 of these financial statements.

### **Results for the year and assets, liabilities and financial position as at 31st December, 2023**

The Statement of Financial Position and the Statement of Comprehensive Income of the Fund are set out on pages 98 to 131.

### **Dividends**

Details of dividends declared by the Fund during the year ended 31st December, 2023 are disclosed in Note 21 of the financial statements.

### **Events during the year**

**Corporate Governance Statement****General Principles**

The Fund is obliged to comply with the requirements of the Companies Act 2014, Central Bank UCITS Regulations and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended), as applicable to the Fund.

The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report. The Fund is subject to corporate governance practices imposed by;

- i) The Companies Act 2014 which is available for inspection at the registered office of the Fund; and may also be obtained at <http://www.irishstatutebook.ie/>;
- ii) The Articles of Association of the Fund which are available for inspection at the registered office of the Fund and at the Companies Registration Office in Ireland;
- iii) The Central Bank in their Central Bank UCITS Regulations which can be obtained from the Central Bank's website at <https://www.centralbank.ie/regulation/industry-market-sectors/funds> and are available for inspection at the registered office of the Fund; and

On 14th December, 2011, Irish Funds ("IF") published a corporate governance code ("IF Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The IF Code became effective from 1st January, 2012 with a twelve month transitional period until 1st January, 2013. The IF Code reflects existing corporate governance practices imposed on Irish authorised collective investment schemes, as noted above. If the IF Code is adopted on a voluntary basis, it can be referred to in the disclosures made in the Directors' Report in compliance with the provisions of the European Communities (Directive 2006/46/EC) Regulations (i.e. S.I. 450 of 2009 and S.I. 83 of 2010).

On 31st December, 2012 the Board of Directors (the "Board") voluntarily adopted the Corporate Governance Code for Irish Domiciled Collective Investment Schemes as published by the Irish Funds, as the Fund's corporate governance code.

**DIRECTORS' REPORT (CONTINUED)**

---

**Internal Control and Risk Management Systems in Relation to Financial Reporting**

The Directors are responsible for the oversight of the implementation and operation of the internal controls and risk management systems of the Fund in relation to the financial reporting process, by way of delegation to third parties, namely the Administrator and the Investment Manager. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Fund's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. The Fund has procedures in place to ensure that all relevant accounting records are properly maintained and are readily available, including production of annual and half yearly financial statements. These procedures include appointing the Administrator to maintain the accounting records of the Fund independently of the Investment Manager and the Depositary. The Administrator is authorised and regulated by the Central Bank and must comply with the rules imposed by the Central Bank. From time to time, the Board of Directors examines and evaluates the Administrator's financial accounting and reporting routines. The annual financial statements of the Fund are produced by the Administrator and reviewed by the Investment Manager. They are required to be approved by the Board and the annual and half yearly financial statements of the Fund are required to be filed with the Central Bank.

During the period of these financial statements, the Directors were responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditors who report annually to the Directors on their findings.

The Directors monitor and evaluate the independent auditor's performance, qualifications and independence. As part of its review procedures, the Directors receive presentations from relevant parties including consideration of Irish accounting standards and their impact on the annual financial statements, and presentations and reports on the audit process.

The Directors also evaluate and discuss significant accounting and reporting issues as the need arises.

**Independent Auditors**

The Independent Auditors, EY, Chartered Accountants, have indicated their willingness to continue in office in accordance with Section 383(2) of the Companies Act 2014.

**REPORT OF THE DEPOSITARY TO THE SHAREHOLDERS**

---

We have enquired into the conduct of Nomura Funds Ireland Plc (the “Fund”) for the year ended 31st December, 2023, in our capacity as Depositary to the Fund.

This report including the opinion has been prepared for and solely for the shareholders in the Fund, in accordance with the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (S.I. No, 430 of 2019) (the “Central Bank UCITS Regulations”) and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

A UCITS V Depositary Agreement was signed with Brown Brothers Harriman & Co., effective from 21st March, 2016. As a result, the Custodian is hereinafter referred to as the Depositary.

**Responsibilities of the Depositary**

Our duties and responsibilities are outlined in the Central Bank UCITS Regulations. One of those duties is to enquire into the conduct of the Fund in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Fund has been managed in that period in accordance with the provisions of the Fund’s Memorandum and Articles of Association and the Central Bank UCITS Regulations. It is the overall responsibility of the Fund to comply with these provisions. If the Fund has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

**Basis of Depositary Opinion**

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Central Bank UCITS Regulations and to ensure that, in all material respects, the Fund has been managed:

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations; and
- (ii) otherwise in accordance with the Fund’s constitutional documentation and the appropriate regulations.

**Opinion**

In our opinion, the Fund has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Fund by the Memorandum & Articles of Association and by the Central Bank UCITS Regulations; and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Central Bank UCITS Regulations.

**NOMURA FUNDS IRELAND – INDIA EQUITY FUND**  
**INVESTMENT MANAGER’S REPORT**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	7.68	13.71	30.79	61.18	354.43
<b>Benchmark</b>	8.10	11.90	20.81	40.37	186.74
<b>Out/(Under) Performance</b>	-0.42	1.81	9.98	20.81	167.69

Source BBH; % Returns in USD. Benchmark is MSCI India Index.

\*Since Inception date is 13th January, 2007.

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund recorded a return of 30.79%, compared with the benchmark return of 20.81% and therefore outperformed the benchmark by 9.98%.

Both allocation and stock selection contributed positively to our performance. Key positive contributors were overweight positions in Real Estate and Consumer Discretionary, as well as stock selection in Materials, Industrials and Consumer Staples.

In Real Estate sector, market witnessed increased consolidation and strong pre-sales booking demand across new projects. Hence, our overweight positions in **Macrotech** and **Signature Global** has gained on the Sub-Fund’s performance.

Within Consumer Discretionary sector, hospitality and jewellery sub-sectors contributed positively due to resurgence in demand post-Covid and shift in demand away from the unorganized sector. Our overweight position in **Kalyan** outperformed consistently. Margins continue to improve as the company keeps expanding towards the north of India and away from South which is a relatively pure gold market. Expansion is aiding an addition to the double-digit sales growth which the company is already delivering for the past few quarters. However, our overweight position in retail stock, **Vedant Fashion** detracted from performance due to weak consumer sentiments.

In Materials, we added exposure to **Maharashtra Seamless** given its strong order book outlook. We also added to **Ultratech Cement**, where we expect double-digit volume growth and lower raw material costs to help profitability, and **Gravita India**, which will benefit from regulation on battery waste management. These stocks were positive contributors in this sector.

In Consumer Staples, **Varun Beverages** outperformed on expectations of strong growth and profitability to be sustained with outsized growth in sales of energy drink Sting, and good overseas performance in its key markets. The company has also been looking into new product lines like snack foods that could further boost growth.

**Investment Outlook**

Markets have outperformed the region strong economic growth, corporate earnings delivery, and stable domestic flows. Market valuation are at 21.5 times one year forward P/E and at a premium to history. Underlying momentum in the economy measured by high frequency indicators like credit growth, industrial order books, real estate demand, GST collections remains robust. India’s real GDP growth continues to be resilient, reporting 7.6% GDP growth YoY in the third quarter of 2023 and RBI revising its estimate to 7% in the financial year 2023 with accelerating integration of India into global supply chain, continued spending on corporate capex, lower borrowing costs, stabilizing inflation, and resilient underlying demand to support consumption. Inflation has been within RBI’s target zone at ~5% hence we do not expect any changes in monetary policy in first half of next year. External sector risks likely continue to remain due to protracted geopolitical conflicts leading to volatility in energy prices and expect the financial year 2024 CAD/GDP at 1.5% (vs 3.5% in the financial year 2023). Strong FX reserves provide comfort for the INR and RBI remains active in maintaining orderly depreciation of the currency. Corporate earnings growth is strong at 14% and 22% in the financial year 2024 and the financial year 2025, respectively. We expect market returns to track earnings growth.

Medium term prospects remain attractive with low corporate and individual leverage, well-capitalized banks past the peak of bad assets and supportive government policies in construction and manufacturing sectors which is already driving an uptick in orders.

Crude price, inflation trend, geopolitical developments, and monetary policy globally will be key risks to watch out for.

In terms of our strategy, we will continue to hold stocks with high visibility, strong earnings growth backed by quality management. We will evaluate opportunities amongst new listings to participate in long-term structural ideas as India continues to remain a structural overweight in spite of expensive valuations and exuberance in the markets. The broad basing of the markets and the strong economic momentum provides a wide array of opportunities to invest in and every correction is an opportunity here.

**NOMURA FUNDS IRELAND – JAPAN STRATEGIC VALUE FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

*Source BBH; % Returns in USD. Benchmark is TOPIX Index.*

*\*Since Inception date is 26th August, 2009.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund recorded a return of 34.17% compared to the benchmark return of 28.26%, therefore outperforming the benchmark by 5.91%.

During the first quarter of 2023 the TOPIX Index (total return base) gained 7.21% in local currency terms over the quarter and the yen depreciated by 1.4% against the US dollar (weakening from 131.1 to 132.9). The portfolio gained 6.05% (gross of fees), but underperformed the TOPIX Total Return index by 1.16% for this review period.

The financial and real estate sectors tumbled in the wake of regional bank failures in the United States and growing financial instability in Europe in March. On the other hand, semiconductor and electronics sector stock prices rose, following a period of adjustment since the previous year.

Looking at style-based performance, the Russell Nomura Total Value Index (RNTV) rose 6.24% over the quarter, underperforming the TOPIX Total Return index by 0.97%. Both the decline in the banking sector due to financial instability which started in the United States and spread to Europe and the decline in the insurance sector due to concerns about the impact of financial instability on the valuation of bond holdings, led to underperformance among value stocks.

With wage increases providing further evidence for Japan’s ability to sustain inflation going forward, we believe there should be a further rise in expectations that the Bank of Japan might adjust its monetary policy settings. Moreover, the decline in interest rates caused by the spread of financial instability in March and the narrowing of the US Federal Reserve's scope for raising interest rates had made it more likely that the Bank of Japan could revise its monetary policy in the near term.

In other news, initiatives by the Tokyo Stock Exchange have made it clear that it expects companies whose share prices are trading below their book value (PBR of less than 1.0) to improve ROE levels and raise share prices by improving their capital efficiency. Such efforts could generate significant tailwinds for the value style investment approach. Of more than 2000 stocks that make up the TOPIX index, approximately 1000 companies are trading below their book value, and we will look to identify companies in this group that can increase their valuations through business restructuring and improvements in shareholder returns.

During the second quarter the TOPIX Index (total return base) gained 14.45% in local currency terms over the quarter, and the yen depreciated by 8.6% against the US dollar (weakening from 132.9 to 144.3) over the quarter. The portfolio rose 17.53% (gross of fees), outperforming the TOPIX Total Return index by 3.08%.

As of June 2023, Japanese equities extended their winning streak for a sixth consecutive month. While global equity markets teetered around a possible inflexion point under the weight of bank failures, the impasse over US Federal debt ceiling negotiations, and the Federal Reserve Board’s ambiguous statement regarding further interest rate hikes, the relative strength of the Japanese equity market stood out during the quarter.

A smooth rotation of leading performers by sector supported the extended market rally. The Electronics sector boomed, as excitement surrounding the advances in generative AI following chipmaker NVIDIA’s dazzling sales upgrade sparked huge rallies among semiconductor stocks. The Automobiles and the Commodities sectors soon began to catch up, as belated production normalization thanks to the easing of semiconductor supply shortages and the weakening yen finally triggered a rally in automobile stocks. Trading/investment stocks continued to surge and show no signs of letting up after Berkshire Hathaway once again shared plans to increase investment stakes in Japanese general trading companies.

Looking at style-based performance, the Russell Nomura Total Value Index (RNTV) rose 17.5% over the quarter outperforming the TOPIX Total Return index by 3.1%. The market continued to alternate from month to month between favouring value and growth stocks, but the value style’s significant performance in June led it to outperform growth by 560 basis points (Russell Nomura data) or 300 basis points (MSCI data) over the full quarter. As for size, large-caps continued to outperform small-caps by a wide margin.

**NOMURA FUNDS IRELAND – JAPAN STRATEGIC VALUE FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

Against this backdrop, the portfolio outperformed the benchmark over the quarter, largely due to a positive stock selection effect. Sector allocation also added value. The absence of holdings in the Services sector, together with overweight positions in the Construction, Banks, and Wholesale Trade sectors contributed most to the performance. However, attribution analysis also revealed a substantial positive stock selection effect, with holdings in the Electric Appliances, Chemicals, and Precision Instruments sectors contributing the most.

During the six-month review period ended December 2023, the yen rebounded by 2.3% (from 144.3 to 141.0 against the US dollar), mainly due to narrowing interest rate differentials between the yen and the US dollar.

During the third quarter the TOPIX Index (total return base) gained 2.45% in local currency terms in the third quarter, and the yen depreciated by 3.5% against the US dollar (weakened from 144.3 to 149.4) over the quarter. The portfolio rose 4.02% (gross of fees) outperforming TOPIX TR index by 1.57%.

Financial stocks led the rally amid expectations for inflation to remain elevated due to wage increases and while companies raise prices to pass on higher costs to consumers. Automobile-related stocks also outperformed, supported by the weak yen and expected improvements in corporate governance.

Looking at styles, the Russell Nomura Total Value Index (RNTV) rose 8.56% over the quarter, outperforming the TOPIX by 6.11%. The value style performance was supported by the Financials sector, which benefitted from expectations that inflation would remain above the long term target rate.

Total share buybacks announced this fiscal year through the end of September reached approximately 6.6 trillion yen, which is 7% lower than last year but still a relatively high level. Within the portfolio, NTT and ITOCHU each announced share buyback plans of up to 200 billion yen and 25 billion yen, respectively. The governance reforms requested by the Tokyo Stock Exchange (TSE) and a continued low interest rate environment continued to encourage Japanese companies to improve shareholder returns, thus providing structural support to the Japanese stock market.

In the fourth quarter the TOPIX Index (total return base) gained 2.04% in local currency terms in the fourth quarter of 2023 and the yen appreciated by 5.6% against the US dollar (strengthened from 149.4 to 141) over the quarter. The portfolio appreciated by 4.03% (gross of fees), outperforming the TOPIX TR index by 1.99%.

Although the market experienced corrections in October and December, it finished the year on a positive quarterly note thanks to the market rally in November, breaking out of the historical range in which it has been constrained for more than 30 years. Market performance during the quarter was largely dictated by changing expectations for monetary policy reforms and fluctuations in the USD/JPY exchange rate. Initially, investors were forced to reassess the overall investment environment amid the risk of a “higher for longer” monetary policy regime as the 10-year US Treasury yield climbed rapidly and briefly touched the 5% level in October. Equity prices inevitably corrected as market participants struggled to determine where the benchmark risk-free rate would eventually settle. Shortly afterwards, investor sentiment swung from accepting the “higher for longer” scenario to anticipating that the first interest rate cut might come earlier than previously expected. Signs of normalizing inflationary pressures and some cooling of economic activity raised hopes of an end to the tightening cycle and even a pivot towards loosening. The 10-year US Treasury yield experienced a remarkable U-turn and dropped sharply to 3.8%, lower than where it stood at the beginning of the quarter. This helped to infuse some fresh optimism into the equity markets; accordingly, this stemmed the decline of the yen against the US dollar, and the Japanese currency began to appreciate toward the end of the year. However, this strengthening yen weighed on export-oriented sectors of the stock market, capping the market’s overall upside.

The Bank of Japan (BOJ) adjusted its Yield Curve Control (YCC) measures at the end of October, while keeping the overall policy framework unchanged. Instead of imposing a fixed upper bound of 1.0% on the 10-year Japanese government bond (JGB) yield, the BOJ set this level as a reference rate and decided to allow the 10-year JGB yield to rise above it while remaining prepared to counter any speculative movements. This fuelled speculation that the BOJ might soon unwind its negative interest rate policy settings, yet the BOJ made no further changes and Governor Ueda reiterated his view that the central bank would first need to be more confident that they had achieved a ‘virtuous cycle’ of wage growth and inflation.

**NOMURA FUNDS IRELAND – JAPAN STRATEGIC VALUE FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

Falling long-term US interest rates and the resulting yen strength led to a notable dispersion of returns by sector and style during the quarter. Value oriented sectors bore the brunt of the negative impact, including Automobiles, which declined by nearly 6%, and many Commodity sub-sectors; maritime shipping was the main exception due to expectations of tighter supply-demand conditions as shipping is re-routed from the busy Suez Canal route to around the Cape of Good Hope. The absence of substantive change to domestic monetary policy also prompted a sell-off in the Financials sector. On the other hand, Growth oriented sectors including Electronics and Information/System advanced, led by rallies in semiconductor, media and internet-related stocks. As a result, Value significantly underperformed Growth by approximately 6.8% according to Russell/Nomura figures and by 7.9% using MSCI data.

**Investment Outlook**

During 2024, we can expect a phase of increased stock market volatility as investors react to economic indicators and geopolitical developments from the US and other countries. However, we believe that this could be a good investment environment for value style opportunities, which focus on stock prices and corporate value, while a strategy of seeking Japanese companies with stable performance trends over the medium to long term looks promising.

Against this backdrop, we will continue to focus on companies with “enabling technologies” capable of supporting social and structural changes including semiconductor related names, companies with exposure to DX (digital transformation) and the reduction of greenhouse gases, as well as companies that are expected to benefit from the full recovery of domestic economic activity. We will also look for companies with strong competitive positions and high profitability that will give them the ability to strengthen their shareholder returns. Crucially, we aim to maximise potential upside by investing in stocks when their valuations are most attractive.

The Sub-Fund seeks out investment opportunities across the market and hence its sector allocation is purely an aggregation of its stock selection positions. With this in mind, at the end of December, the Sub-Fund’s biggest active sector overweight positions were in Electric Appliances, Construction, and Information & Communication. Its largest sector underweight positions were in Services, Machinery, and Pharmaceuticals.

Going forward, we believe the market environment will remain favourable for financial companies that are expected to increase their shareholder returns and for domestic demand-oriented sectors including Real Estate and Retail Trade, which should benefit from the normalization of economic activity.

According to the Nomura Securities Financial & Economic Research Centre, corporate earnings for the current fiscal year (ending March 2024) are expected to rise by 9.7% (yoy) based on forecasts as of 29th December, 2023 for the Russell/Nomura Large Cap Index, excluding financials and on a consolidated basis. Nomura’s corporate earnings growth forecast for fiscal year 2024 (ending March 2025) indicates a continuing earnings recovery, with growth of 7.1% in terms of recurring profits.

As for valuations, the market PBR was 1.49\* at the end of December. The earnings yield (i.e. earnings per share/stock price) was 6.98%\*. The expected dividend yield is 2.64%\*, which is higher than the long-term interest rate (10-year JGB yield) of 0.615%. (\*Source: Nomura Research Institute, based on the TOPIX).

INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	3.65	7.18	14.37	9.65	274.20
<b>Benchmark</b>	3.67	7.07	13.46	6.12	247.11
<b>Out/(Under) Performance</b>	-0.02	0.11	0.91	3.53	27.09

*Source BBH; % Returns in USD. Benchmark shown is the ICE BofA US High Yield Constrained Index (HUC0).*

*\*Since Inception date is 31st March, 2009.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 14.37% compared with the benchmark return of 13.46%, and therefore outperformed the benchmark by 0.91%.

Early in the year, evidence of disinflation was the key driver of the broad-based rally. The CPI for December, reported in mid-January, supported the disinflation thesis with moderation in core goods and core services prices. The market reset its expectations for near-term Fed policy, and the economic growth argument shifted as the market reconsidered whether the US could avoid a recession. In March, the unwinding of Silicon Valley Bank, Signature Bank, and Credit Suisse in quick succession led to a sharp decline in US Treasury rates as market participants reassessed the relative risks of growth and inflation in a potential banking crisis. Fast action by the Fed and other central banks to furnish liquidity eased the emerging crisis of confidence. A relief rally ensued, helping high yield bonds to strengthen into April. June saw a rally in the economically sensitive parts of both the equity and high yield market. The dramatic slowdown in both core and headline CPI was accompanied by broadly steady growth and continued high rates of employment relative to previous market fears. Crude oil began to rally in July from below \$70 a barrel in June, and would eventually reach an intra-year peak approaching \$95 by the end of the quarter, though much of this rise was retraced by the end of 2023. In September and October, with continued strong economic and employment data, along with considerable Treasury issuance, rates underwent a sell-off and rose steeply to around 5%. However, in November, with a weak employment report and continued progress on CPI, it became clear that the market had taken the “higher for longer” scenario too far, and a possible soft landing came into view, leading to a remarkable rally across risk assets. The rally was bolstered in December, as Fed Chair Powell mentioned that rate cuts were entering the conversation for 2024.

Our ratings posture contributed to outperformance, especially overweights to Bs and CCCs, as lower credit quality outperformed. The key sector contributors to positive relative performance included Recreation & Travel, Theaters & Entertainment, Oil Field Equipment & Services, and Automakers. In Travel, our overweight in cruise lines contributed to returns, as Carnival, Royal Caribbean, and Norwegian all benefited from the return to consumer travel spending. The main sector detractors were Specialty Retail, Financial Services, and Media Content. In Specialty Retail, we gave back alpha from not holding Carvana as the company managed to refinance and rallied before coming out of the index in Q4. In Financial Services, ATM maker Diebold faced liquidity issues and filed for Chapter 11 in early June.

**Investment Outlook**

Looking forward, a soft landing – including stable growth, moderating inflation, and Fed rate cuts – has become the market’s base case, so 2024 market performance will depend on the path of those key factors. In addition, the US election in November may or may not influence the market’s returns in 2024. With regard to growth, continuing fiscal stimulus and a strong stock market create a positive backdrop, though some drags from higher rates and slower growth overseas should be expected. Generally, we think business, consumer, and government spending will support a slow growth environment. With respect to inflation, goods deflation and manageable energy prices are helpful. Beyond these factors, we believe the labor market has been rebalancing, which should help control inflation in services, and a massive boom in apartment construction should help control inflation in rents. For these reasons, we believe inflation will probably continue to moderate, but how far it falls remains a key question. Clearly, the Fed would like to engineer a soft landing if possible, and progress on inflation has given them room to contemplate cuts. A cut in the first half and a few beyond that point are a reasonable base case, though the Fed will want to avoid prematurely declaring a full victory on inflation, so they may move somewhat carefully. Overall, we believe high yield can generate an attractive risk-adjusted return in 2024, given stable growth and Fed cuts, but some ebb and flow on valuations can be expected after the recent rally.

**NOMURA FUNDS IRELAND – JAPAN HIGH CONVICTION FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	3.03	7.47	14.95	-10.01	156.95
<b>Benchmark</b>	-0.23	2.04	28.26	41.05	158.91
<b>Out/(Under) Performance</b>	3.26	5.43	-13.31	-51.06	-1.96

*Source BBH; % Returns in USD. Benchmark is the TOPIX Index.*

*\*Since Inception date is 7th August, 2013.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 14.95% compared to the benchmark return of 28.26% therefore underperforming the benchmark by 13.31%.

Equity markets rallied through to mid-March in response to expectations that the US economy was unlikely to fall into recession. Rising stock prices in cyclical industries such as semiconductors were of particular note.

The position in Shin-Etsu Chemical made the largest positive contribution to the portfolio’s performance in the first quarter due to favourable business performance.

Although there was active buying of cyclical stocks during the first quarter, there was a sell off among defensive issues. Retreating share prices of companies with ongoing negative developments stood out. Consequently, the position in Nihon M&A Center had the largest negative impact on the portfolio performance in the first quarter. The company is taking time to rebuild its internal business structure after accounting irregularities were reported last year. Its share price tumbled due to expectations that earnings for this year would largely underperform relative to its forward guidance. Nevertheless, we purchased shares in this company during the price dip as it seemed to have become oversold based on its medium- to long-term growth potential.

The Sub-Fund trimmed the position in Nidec after the Growth Stock Committee determined that its five-year historical average return on equity (ROE) was deteriorating. We also took profits on shares that we believed had risen too far relative to our assessment of their corporate fundamentals, while we increased our purchases of stocks that have been lagging behind considering their fundamentals. The total number of holdings within the Sub-Fund remained unchanged at 31 at the end of the first quarter 2023.

In the April-June quarter, the Japanese equity markets rallied along with large scale capital inflows. Rising stock prices in cyclical industries such as semiconductors were of particular note.

Fast Retailing had the largest positive impact on the portfolio’s performance after its share price had rallied significantly following active buying of Nikkei 225 index futures, assumed to be from speculative overseas investors.

Meanwhile, although there was continued investor interest in cyclical issues, defensive stock prices were generally weak.

M3 had the largest negative impact on the Sub-Fund’s performance in the second quarter. The company has a large weighting in the portfolio, and its stock price was sluggish due to a temporary earnings slump in reaction to a high base effect from the pandemic period. Even so, without any change to our opinion regarding its medium-term growth potential, we marginally increased our purchases while the stock was underperforming.

The Sub-Fund opened new positions in Tokyo Electron and Sho-Bond Holdings. After business integration work with US-based AMAT, Tokyo Electron has been transformed into a company that we believe will be able to maintain high ROE levels by monetizing its services and reforming its cost structure. Sho-Bond is highly competitive in the concrete structure repair and reinforcement business. Meanwhile, we exited the position in Nidec. The company failed a GSC screening after the committee determined it would experience difficulty in maintaining its high ROE level. We also took profits on shares that we believe had risen too far after looking at corporate fundamentals, and we increased purchases of stocks that have been conversely lagging behind relative to their fundamentals. The total number of holdings within the Sub-Fund increased by one to end the review period at 32.

**NOMURA FUNDS IRELAND – JAPAN HIGH CONVICTION FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

During the July-September quarter, robust US employment statistics led to an increase in long-term Treasury bond yields. The foreign exchange market saw the yen trend towards depreciation against the US dollar, ultimately generating demand for export-related Japanese equities. Amid inflationary concerns, speculative trading in the crude oil futures market pushed energy-related stocks higher. Financial stocks also advanced due to expectations that the Bank of Japan might soon unwind its negative interest rate policy settings, resulting in growth stocks significantly underperforming relative to value stocks.

The largest positive contribution to the quarterly performance of the Sub-Fund came from the position in Chugai Pharmaceutical. This stock rallied as there were growing expectations for sales of obesity treatment drugs.

The most significant negative impact on the portfolio’s relative performance came from GMO Payment Gateway. Amid the small and medium-sized growth stock selloff that resulted from the rise in US long-term interest rates, concerns about a slowdown in growth also exacerbated the weakness of these stocks. However, given the company's commitment to a 25% increase in mid-term profits and its strong fundamentals, it was perceived as being oversold. This prompted us to buy on the dips as the stock price declined.

There were no new additions or portfolio liquidations in the third quarter.

In the October-December period, long-term interest rates in the United States unexpectedly decreased, leading to a widespread buyback of growth stocks that had previously been sold off. Stocks related to semiconductors also saw significant price increases. As a result, growth stocks significantly outperformed relative to value stocks.

The largest positive contribution to the quarterly Sub-Fund performance came from the position in Shin-Etsu Chemical. A strong market trend in favour of semiconductor-related stocks drove the rally in Shin-Etsu Chemical’s share price.

The most significant negative effect on the portfolio’s relative performance came from M3, Inc. When M3 announced a takeover bid for Benefit One, Dai-ichi Life responded with a counter offer. This raised concerns about the increased financial burden from an increase in the proposed acquisition price. However, as the company's inherent competitiveness and growth prospects remained unchanged, we decided to make value purchases as the stock price fell.

In the fourth quarter we added Itochu Corporation and LACS to the portfolio, while completely divesting the position in Relo Group. We positively evaluated Itochu Corporation's ability to continually enhance value in non-resource areas under the highly effective leadership of its CEO. The company has maintained a high ROE level over the long term. LACS is a SaaS company that specializes in cloud-based expense settlement systems for small and medium-sized enterprises, and we have a positive evaluation of its strong recurring revenue model. Meanwhile, we liquidated the position in Relo Group due to deepening uncertainty over growth potential in the provision of benefits for non-regular employees, who account for much of its potential market.

**Investment Outlook**

We expect the TOPIX to fluctuate in a range between 1,893-2,603 points over the next quarter.

The Japanese equity market performance was positive during the fourth quarter due to large scale capital inflows, but going forward we will pay close attention to the following potential risk factors:

(1) Changes in central bank monetary policy: We will assess the impact on the real economy due to changes in the Federal Reserve’s monetary policy. We will also pay close attention to the possibility of the Bank of Japan adjusting its policy as the central bank has made significant purchases of equity ETFs during the period of quantitative easing.

(2) Slowing Chinese economy: We will examine the effects of shadow-banking regulations imposed by the Chinese authorities. We will also pay attention to the default risk of financial instruments.

(3) Disruption in the US credit markets: We will monitor the risk of the US corporate bond and leveraged loan markets being thrown into confusion amid heightened concerns over defaults. These markets have more than doubled in size since the Global Financial Crisis. In turn, this could have an adverse impact on all financial markets.

**NOMURA FUNDS IRELAND – ASIA EX JAPAN HIGH CONVICTION FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>

<b>Benchmark</b>	3.52	6.43	5.98	-18.88	57.40
<b>Out/(Under) Performance</b>	0.07	-1.36	-0.28	-6.40	39.78

*Source BBH; % Returns in USD. Benchmark is MSCI All Country Asia Ex Japan Index.*

*\*Since Inception date is 4th September, 2013.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 5.70% compared with the benchmark return of 5.98% and therefore underperformed the benchmark by 0.28%.

Country allocation outcomes were negative, with our underweight to Taiwan and Korea the key detractors. Stock selection outcomes however were positive, with Taiwan, Korea, and India as the primary contributors to performance, pegged back by China/ HK.

At the beginning of 2023, would anyone have predicted such an outcome? Anyone could be forgiven for getting their market predictions wrong as global equity markets ended the year with significant gains despite the headwinds of rising interest rates through most major economies. Ironically, the best performing index was the growth oriented and technology heavy Nasdaq, which should have been the most vulnerable based on traditional equity market logic. This absolute roller coaster of a year started well, whipsawed in the middle of the year and ended on a high, with a net gain of more than 20% for global equities. Markets were massively influenced by monetary policies, the disappointment in China’s recovery, banking turmoil in the US, the AI mania and the lack of respite from geo-political events. While 10-year US Treasury yields ended the year almost where they began, it masked the enormous volatility caused by an interest rate hike following almost every Fed meeting, followed eventually by a potential pivot as inflation and employment data cooled off. China was the biggest let down of the year with the recovery flattering to deceive and the markets causing frustration to allocators and investors. In the ultimate analysis, China dragged down any index where it was a major component. Most regional indices ended with gains in the high teens or even higher, except for those including China. It was a similar story of volatility across different asset classes with crypto and gold ending the year with gains while the US dollar ended lower for the year. Although there were points in the year where the dollar was very strong on the back of high interest rates. The Energy sector was the other disappointment, ending the year negative despite all efforts by OPEC to restrict supply. The threat of a potential recession in the US and more so the lack of any economic momentum in China was the key cause of weakness in both oil as well as other commodities. The fourth quarter did restore the seasonal trend of a Santa rally, as most equity markets around the world ended the year with significant gains, with the primary catalyst being the potential pivot in the Federal Reserve’s interest rate policy.

Asian economies and markets were a little more consistent in their behavior through this year. As mentioned, China’s economic recovery continued to disappoint, with sustained weakness in economic indicators. Trouble continued in the property markets, with repeated doses of stimulus funding from the PBOC and the government proving to be just not enough – the “big bazooka” of policy stimulus was not on offer. Adding to these woes, further Sino-US disputes again impacted the sector; and to cap it all, hopes of an easier phase in the regulatory cycle were also threatened by periodic clampdowns on corruption. Hong Kong and China were possibly the only large markets to end the year in negative territory, dragging the entire emerging market (EM) and Asian market indexes down; even though on an ex-China basis, these baskets performed almost as well as the global equity markets. Coming out of a long era of deflation, Japanese markets were strong performers in local currency terms, but the reluctance of the Bank of Japan to give up on the ultra-easy monetary policy meant that the yen detracted again from the overall market gains. At the same time, sentiment has improved significantly for the Japanese markets and for foreign investors, which seemed to be coming back into favor. For the rest of Asia, Taiwan capitalized on the AI theme. Although narrow, this sector led to it becoming the best performing Asia ex-Japan market. Australia also benefitted from a strong domestic economy as well as following the performance of other developed markets; its performance could have been even better had commodities benefitted from a Chinese recovery. India was another stand out performer after a slow start, with exceptional momentum in economic activity, an improving political environment, upgrades to corporate earnings, and a broader market doing twice as much as the large indices. The smaller ASEAN markets were somewhat disappointing, losing economic momentum and therefore lacking visibility or any clear trends.

---

**NOMURA FUNDS IRELAND – ASIA EX JAPAN HIGH CONVICTION FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

China stock selection was the biggest drag on our performance. Our overweight in Beijing Oriental Yuhong underperformed as the stock has derated on the back of property concerns. Li Ning underperformed due to conservative guidance with growing competition from foreign brands, and weaker margins given the high base it had last year. Wuxi Biologics underperformed the market given its revenue exposure to the US as geopolitical tensions between the US and China remain a headwind for the stock. Our lack of exposure to PDD holdings had a negative effect on the portfolio as the stock surged after releasing stellar results in the third quarter of 2023. Alibaba had a negative impact on the performance as quarterly earnings were softer than expected and delayed spin offs hurt investor sentiment. Likewise, Tencent slumped following the introduction of recharge limit caps. HK listed but China linked exposures also detracted. The overweight position in Galaxy Entertainment detracted from the performance. Despite ongoing solid gaming revenue, market sentiment continued to suffer from a weak PMI reading in China, increasing uncertainty for the growth momentum of China’s leisure spending. Our overweight position in AIA also had a negative effect as the stock price suffered amid broader market weakness.

In Korea, our overweight position in SK Hynix was the most significant positive contributor to performance as DRAM prices showed signs of recovery after the main producers cut production and capital spending levels. The stock was also buoyed by the AI stock rally in global equity markets as it manufactures memory chips for AI servers. Our overweight in Posco also contributed due to bullish investor sentiment based on the company’s push into EV battery production, which caused the share price to surge. Classys also added value - the stock rallied as its aesthetic device business, including HIFU (High Frequency Ultrasound) and RF (Radio Frequency) treatment systems, is expected to maintain high sales growth.

In Taiwan, our overweight positions in Alchip Technologies and TSMC contributed to our performance as beneficiaries of the artificial intelligence theme, as well as the cyclical technology sector which has been on the recovery path since the second half of 2023 and is expected to continue through 2024. However, we were late to include server original design manufacturers (ODMs), like Quanta, which had rallied hard on positive earnings and guidance compared to its peers.

In India, Macrotech Developers contributed to our performance as the underlying dynamics of the Indian Housing markets remain favourable with declining ready inventory and improving demand. Management remains focused on ensuring that affordability (by implementing measured price increases) remains favourable for end consumers and at the same time, pursuing growth via a Joint Development Model. Ultratech Cement benefited from an uptick in demand from real estate and infrastructure which is supporting price strength in the cement sector. Tata Motors continues to do well on the cash generation front especially with the turnaround in the Jaguar Land Rover (JLR) division. Varun Beverages continued to deliver strong price performance for the quarter as well for the 2023 calendar year to date. The company continues to explore new growth opportunities (e.g. setting up a South Africa subsidiary) while investing in two greenfield projects domestically to add to capacity. Indian Hotels also added value with the stock price advancing on robust hotel demand from a slew of global events which supported earnings outlook.

In Singapore, SCI contributed to our performance on optimism from new renewables targets (25GW by 2028) set on its investor day held in November, as well as recent renewables deals. However, this was negated by our overweight positions in SEA Ltd weighed on the portfolio as investors were concerned about the strong competition in its ecommerce business and the company’s intention to invest more in this segment. Seatrium also detracted amid negative news about the US offshore wind sector, mainly stemming from supply-chain issues and higher financing costs.

**Investment Outlook**

As we enter 2024, probably the biggest driver for the year could be when the Federal Reserve changes course and starts cutting rates, including by how much. Fed Chair Powell appears to have prevailed in the battle against inflation, while employment is definitely slowing. The resilience of the US economy has been a puzzle and a surprise, so the question is whether the subsequent slowdown will be a soft landing or a short recession, anything worse would be a downside risk to the world and the markets. We would not expect any let up in geo-political events nor in local politics, which could have wider ramifications as the world enters a huge election year with more than half the global population voting to elect their respective governments. The November US elections will be a closely watched event, especially with the prospect of a Trump comeback and therefore a change in policies. We had expected a short sharp recession in the US with rate cuts towards the end of 2023; and while that forecast has been pushed out, the prediction of lower market interest rates did turn out to be correct. We still start the year with the prospect of a short sharp recession, but that does not threaten our broadly sanguine view of the equity markets. The “Fed put” seems to be in play purely from a policy perspective and the S&P can be expected to deliver decent earnings growth for the year. With rates heading lower through the year and keeping the US dollar in check if not driving it lower, the attraction of a high risk free US dollar return will probably turn into a tailwind for Asian currencies and flows into the regional markets. While Asia has lost a long battle to the US markets in terms of performance, this year could be more rewarding, and therefore we believe in a better year for Asia in 2024 compared to the Western developed markets.

**NOMURA FUNDS IRELAND – ASIA EX JAPAN HIGH CONVICTION FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

Within Asia, China has been a huge disappointment, as reflected in the performance of the domestic markets and the drag on Hong Kong as well. The HSCEI Index now has negative returns for three consecutive years and is on the verge of breaking the 2008 Global Financial Crisis (GFC) lows, with sentiment within the country at its lowest and frustration among both foreign and domestic investors at its highest. In our view, it is also safe to conclude that there is a big mismatch between investor expectations and what President Xi wants out of the Chinese economy. Therefore, it is only fair to expect a lower growth rate even as the desire of the authorities to deliver 5% growth finds little credibility. Common Prosperity as a theme is still very much in play, and the property sector has no immediate solutions. The desire to avoid a sudden collapse in currency value will prevent any big bang stimulus announcements and it therefore seems far-fetched to expect any meaningful recovery. The only glimmers of light for the Chinese market are valuations and dividends in some parts of it. We have therefore decided to capitulate and move China (combined with HK) to a larger underweight position. The biggest risk to our underweight position is the possibility of mean reversion in market performances, but having now borne the brunt of the underperformance we now prefer to look out for better visibility before returning to a more bullish call.

The funding released will be used to increase the overweight exposure to India and move Taiwan to an overweight position too. While they could be interpreted as momentum driven moves, these are markets where stock selection has worked in our favor and, more importantly, they both demonstrate more visibility than most others. AI is definitely an ongoing trend and more companies in Taiwan capture this than anywhere else; although stocks have done phenomenally well last year, this could well prove to be a secular growth trend. Also, the TSMC and technology ecosystem is helping the overall economy and the entrepreneurial nature of the country along. Taiwan’s recent elections also put another uncertainty behind. India on the other hand has significant momentum in terms of economic activity, further aided by almost a near certain market-positive political outcome of the Modi government returning to power. Both the economy and the markets are now significant in size and more importantly, tremendously broad based providing huge returns at a bottom up level and significant opportunities for investment. The strong performance of the real estate sector is a case in point of the above factors. India is now a significant overweight position in our allocation. South Korea is a market of two halves – the memory cycle is recovering and will have a large earnings growth number of a negative base, on the other hand the non-technology parts of the Korea market, including the much followed EV segment, seem to be losing favor. While retaining a sizable exposure to the technology segment in Korea, we remain underweight in this market overall.

Smaller ASEAN markets have been disappointing overall. Thailand’s political woes continued and the economy remains sluggish. Malaysia is a similar case. Indonesian momentum withered away, and the likely political outcome from the election later this year remains to be seen. New economy stocks disappointed a lot and failed to increase the breadth of the markets. On the positive side though, the currency is very stable and broader macro prospects are not negative. From an economic point of view the Philippines has everything in its favor now, including data on inflation, interest rates and twin deficits, but the markets suffer from a lack of size and liquidity. Finally, Singapore continues to make attempts to reinvent itself as an economy and has the support of a strong currency, providing investment opportunities. Overall, therefore we are underweight in the ASEAN sub-region with Indonesia the only small overweight, a neutral to Singapore and no exposure to Thailand, Malaysia, Philippines. In the near term, China might continue to weigh on the region’s performance, but we expect that to be nullified by the tech heavy markets of Taiwan and South Korea and these two along with India will also be expected to do the heavy lifting for the year resulting in a net positive outcome for Asia. There is potential upside risk if China is miraculously able to demonstrate some recovery, especially in markets that are totally out of favour for now.

**NOMURA FUNDS IRELAND – GLOBAL SUSTAINABLE HIGH YIELD BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

<b>Benchmark</b>	3.78	7.86	14.28	2.80	41.41
<b>Out/(Under) Performance</b>	0.06	-0.50	-1.75	-0.16	4.02

*Source BBH; % Returns in USD. Benchmark shown is the ICE BofA Global High Yield Constrained Index (HW0C) from inception to 29th September, 2017 and the ICE BofA Developed Markets High Yield Constrained Index (HYDC) from 2nd October, 2017.  
\*Since Inception date is 1st May, 2014.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 12.53% compared to the benchmark return of 14.28% and therefore underperformed the benchmark of 1.75%.

Global high yield started 2023 on a strong note, despite periods of volatility in the first quarter. While the economy remained robust in the face of dramatic monetary tightening around the world, the consequences of this tightening appeared in March as significant bank failures emerged in the US and Europe. This led to a sharp decline in US Treasury and Bund rates as market participants reassessed the relative risks of growth and inflation in a potential banking crisis. Fast action by the Fed and other central banks to furnish liquidity eased the emerging crisis of confidence. Explicit and implicit Fed support stemmed systemic risk, and while several banks did fail, the worst case scenario of contagion throughout the banking system did not materialize. A relief rally ensued, helping high yield bonds and other risk assets to strengthen into the spring. The European economy showed signs of slow growth, while emerging markets benefited from China re-opening and an inflation cycle that peaked earlier than developed markets. In September and October, with continued strong economic and employment data, along with considerable Treasury issuance, rates underwent a sell-off and rose steeply to around 5%. However, in November, with a weak employment report and continued progress on CPI, it became clear that the market had taken the “higher for longer” scenario too far, and a possible soft landing came into view, leading to a remarkable rally across risk assets. The rally was bolstered in December, as Fed Chair Powell mentioned that rate cuts were starting to enter the Fed conversation for 2024, with the 10-Year Treasury closing the year around 4%.

Our ratings posture detracted from performance, especially our overweight to BBBs and our underweight to CCCs, as lower credit quality outperformed. The key sector contributors to positive relative performance included Recreation & Travel, Tech Hardware & Equipment, and Auto Parts & Equipment. In Travel, our overweight in cruise lines contributed to returns, as Carnival benefited from the return to consumer travel spending. In Auto Parts & Equipment, our overweights in parts manufacturers Dana and Nemaq rallied with the market as well as the resolution of the UAW strike in the US and the positive outlook for 2024 OEM production. The main sector detractors were Electric Generation, Wireline Telecom, Financial Services, and Packaging. In Wireline, Altice was ensnared throughout the third quarter in a corruption probe and turbulence involving several high-level company executives. In Packaging, our overweights in Ardagh Group and Ardagh Finance had a negative impact on relative returns as the outlook for the company’s glass packaging business deteriorated in Europe, leading to uncertainty over the path to refinance their maturities in 2025 and beyond.

**Investment Outlook**

Looking forward, a soft landing – including stable growth, moderating inflation, and Fed rate cuts – has become the market’s base case, so 2024 market performance will depend on the path of those key factors. In addition, the US election in November may or may not influence the market’s returns in 2024. Continuing fiscal stimulus and a strong stock market create a positive backdrop, though some drags from higher rates and slower growth globally should be expected. Generally, we think business, consumer, and government spending will support a slow growth environment. With respect to inflation, goods deflation and manageable energy prices are helpful. We believe the labor market has been rebalancing, which should help control inflation in services, and a boom in apartment construction should help control inflation in rents. For these reasons, we believe inflation will probably continue to moderate, but how far it falls remains a key question. Clearly, the Fed would like to engineer a soft landing if possible, and progress on inflation has given them room to contemplate cuts. A cut in the first half and a few beyond that point are a reasonable base case, though the Fed will want to avoid prematurely declaring a full victory on inflation, so they may move somewhat carefully. Overall, we believe high yield can generate an attractive risk-adjusted return in 2024, but some ebb and flow on valuations can be expected.

**NOMURA FUNDS IRELAND – GLOBAL DYNAMIC BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	4.12	7.83	9.09	-6.21	36.07

*Source BBH; % Returns in USD. This Sub-Fund has no Benchmark.  
\*Since Inception date is 30th January, 2015.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund posted a return of 9.09%

The Sub-Fund was positioned for fixed income markets (both credit and duration markets) to rally going into 2023. In January, this positioning was handsomely rewarded with strong performance from almost all elements of the portfolio, but particularly from elevated duration positioning, significant allocations to European (including UK) bank and insurance credit and selected Emerging Markets.

The portfolio was then de-risked to a degree, which meant that, as fixed income markets fell in February, the Sub-Fund was less vulnerable to the downward pressure. In March, however, the Sub-Fund’s 14% position in the subordinated AT1 or “co co” debt of European banks suffered as stresses emerged in the US regional banking system and Credit Suisse was absorbed by UBS. The panic surrounding the AT1 market gradually subsided, but the initial reaction led to negative returns for the Sub-Fund.

From April to October, a broad summary of the return experience was that credit exposures were strongly positive, particularly in Financials and Convertibles, whereas duration positioning (which remained elevated throughout) was negative.

However, in the final quarter of the year, the Federal Reserve finally indicated that they had finished their rate hiking cycle and instead would begin cutting rates in 2024. Markets reacted extremely positively to this change of rhetoric, with government bond yields and credit spreads rising. The Sub-Fund was ideally positioned to capture the rally, earning strong positive returns through its long duration position (approximately 6 years) and meaningful allocations to Financials, selected EM and Convertibles.

**Investment Outlook**

The Fed have reiterated that they expect to cut rates by 75 basis points in 2024. They have not yet been specific as to the timing of those rate cuts, but have repeatedly stated that they expect to keep rates on hold for a period of time before they begin – they want further confirmation that inflation is trending down towards their 2% target. This fits closely with our view that rate cuts will begin around the middle of the year.

Recently released data indicating a relatively strong labour market and the upside inflationary risk associated with ongoing attacks in the Red Sea only serve to increase our belief that early rate cut expectations (in March, for instance) are likely to be disappointed.

We expect the ECB to keep rates on hold until the Fed begins cutting, despite the clear weakness in the Eurozone. The Bank of England has an even more thorny position to navigate, but inflation in the UK seems particularly persistent, so it seems unlikely that they will begin to cut rates imminently.

Four to five 25 basis points rate cuts are still being priced-in by markets, despite strong employment data, recovering ISM data and upside inflationary risk; we believe the market is getting ahead of itself and open to disappointment.

As a result, we have CDS-based hedging in place to guard against volatility in risk assets in the short term.

This short-term caution does not detract from our medium-term view. We expect the US economy to continue to cool, giving the Fed scope to cut rates in mid to late 2024 (and beyond).

Europe’s economy is more severely challenged but the ECB’s path to cut rates is made more difficult by more embedded services and wage inflation.

Nonetheless, we expect the materialisation of rate cuts in 2024 to lead to lower bond yield on both sides of the Atlantic. A large part of the move lower has occurred and the short-term caution we allude to above means that we expect the path lower to be anything but smooth.

**NOMURA FUNDS IRELAND – GLOBAL DYNAMIC BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

We expect this positive environment for fixed income assets to be reinforced later in 2024 by a partial reversal of the enormous flows we have seen into money market funds.

Our portfolio has been constructed to profit from this environment. We have reduced duration risk but still maintain exposure in the belly of the German curve and the long end in the UK, which offers greater value than European equivalents and a far more uncertain (and potentially bleak) economic outlook.

We hold senior European bank debt where default risk is low, but USD-hedged yields are mid-high single digit. We also hold the deeply subordinated AT1 or “co co” bonds of European banks which continue to be called (in the vast majority of cases) and will offer capital appreciation opportunities in addition to their highly attractive yields.

Selected EM central banks have begun to cut rates in response to lower inflationary pressure, in line with our expectations. Brazil is an example, and we have local currency exposure to Brazil and Mexico alongside hard currency carry opportunities in Bahrain and Egypt. We also allocate to some CEE sovereigns that are progressing towards EU membership.

Our Convertibles exposure is tilted to bluechip names which offer capital return potential allied to downside protection. Recently, given valuations, we have rotated into cyclical but relatively solid names in the US and Asia. Our High Yield exposures are limited and defensively-oriented. We are not negative on the asset class, but we do believe that weakening economic data could depress sentiment, particularly in more cyclical sectors.

**NOMURA FUNDS IRELAND – EMERGING MARKET LOCAL CURRENCY DEBT FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	3.42	7.10	12.52	-4.36	10.23
<b>Benchmark</b>	3.21	8.07	12.70	-9.17	8.07
<b>Out/(Under) Performance</b>	0.21	-0.97	-0.18	4.81	2.16

*Source BBH % Returns in USD. Benchmark shown is the JPMorgan GBI-EM Global Diversified USD Total Return Index.*

*\*Since Inception date is 27th February, 2015.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 12.52%, compared to the benchmark return of 12.70% and therefore underperformed the benchmark by 0.18%.

Emerging market (EM) local currency bonds thrived in 2023, outperforming developed market (DM) after the previous year’s bear market, making it one of the best performing bond markets. Both capital appreciation and interest income were drivers of the positive performance of EM local currency bonds, while more moderate currency gains came into play in the second half of the year.

During the first half of the year, we steadily increased our duration exposure, benefiting from the peak in inflation and high real interest rates in selected countries. In the second half of the year, currency weakness in some of our key overweight countries and the weakening of our USD holdings in the last quarter reduced our relative performance.

In terms of price returns, Hungary, Colombia and Brazil were the best performers, while Türkiye, Egypt and South Africa were the worst. Emerging market currencies mostly appreciated against the US dollar in 2023. The best performers were the Colombian peso and the Mexican peso, while the worst performers were the Turkish lira and the Egyptian pound.

The Sub-Fund benefited from overweight positions in Brazil and Mexico and underweight positions in Türkiye and Thailand. The main detractors were the long duration in South Africa, and the underweight in Colombia.

**Investment Outlook**

Emerging market local currency bonds had a remarkable year in 2023, delivering double-digit absolute returns and outperforming developed market bonds. This positive performance is expected to continue in 2024, driven by the ongoing monetary easing cycle and signs of recovery in the emerging markets.

Among EM central banks, Chile, Brazil and Hungary have been the countries that have cut interest rates the most due to the rapid improvement in inflation. This has led to a fall in bond yields, improving the returns for investors. In 2024, countries such as Mexico, Indonesia and South Africa are expected to join the monetary policy easing trend.

Several EM countries, particularly in Latin America, continue to offer high real interest rates, indicating prudent monetary policies. This attractive yield-to-volatility ratio makes EM local currency debt a compelling investment option for investors.

Although China-related growth challenges and subdued growth in developed economies have so far weighed on EM growth, early signs of recovery are positive for the EM economic outlook going forward. This positive sentiment could boost demand for goods and services from emerging markets, supporting EM currencies and further enhancing the appeal of EM bonds.

The EM outlook faces also potential headwinds. If the US Fed prolongs its pause on interest rates or begins to raise rates again, this could put upward pressure on EM bond yields. Furthermore, geopolitical tensions, particularly in the Middle East, Russia, and US-China relations, could pose risks to economic growth and investor sentiment, negatively impacting EM local currency sovereign debt.

Overall, the outlook for EM local currency bonds in 2024 is cautiously optimistic. Positive factors such as proactive central bank policies, a recovering global economy, high real interest rates, and a favorable risk-return profile, outweigh the risks. While disinflationary trends dominate in most emerging markets, we would like to see clearer signs of a slowdown in the US economy and labour market before further increasing our duration exposure to EM rates. We maintain our overweight bond positions in Brazil, Indonesia and Mexico. We are also increasing our exposure to India ahead of its inclusion in the benchmark, starting from June 2024. However, we remain cautious on countries with significant macroeconomic imbalances and governance concerns.

**NOMURA FUNDS IRELAND – ASIA HIGH YIELD BOND FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	2.12	6.81	2.99	-35.28	-14.62
<b>Benchmark</b>	2.01	6.28	4.76	-20.88	11.23
<b>Out/(Under) Performance</b>	0.11	0.53	-1.77	-14.40	-25.85

*Source: BBH % Returns in USD. Benchmark shown is the JP Morgan Asia Credit Non-Investment Grade Index.*

*\*Since Inception date is 6th March, 2015.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund recorded a return of 2.99% compared with the benchmark return of 4.76%, and therefore underperformed the benchmark by 1.77%.

Allocation in Sri Lanka, Pakistan and selection in India were the main contributors to the underperformance.

Our duration was shorter relative to the benchmark and had an insignificant negative impact on portfolio performance. The negative contribution from curve positioning was also immaterial.

The benchmark returned 4.76% for the full year of 2023, underperforming both Developed Markets HY performance of +13.44% and CEMBI Broad HY performance of +6.98%. The current benchmark yield of 14.1% and spread of 974 basis points is cheap when compared to EM and US HY levels.

**Investment Outlook**

Looking ahead to 2024, we believe there are causes of optimism for the Asia High Yield Bond Fund:

- **Potential rate cut** – The December 2023 FOMC effectively signals a pivot in the Fed’s rate outlook, as the Fed’s dot plot projected that the fed funds rate will fall by 75 basis points in 2024.
- **AHY default rate should improve** – China Property sector has been a major source of default contributor in the past 3 years and we expect the sector credit default rate to improve in 2024, primarily due to “survivor-basis” whereby the most marginal developers had already gone bust, with the stronger “surviving developers” left in the index.
- **China’s easing & accommodative basis** – We expect the Chinese government to maintain its easing fiscal bias (announced 1 trillion fiscal stimulus in the fourth quarter of 2023, bringing the financial year 2023 fiscal deficit from 3% to 3.8%) and accommodative monetary policy (RRR lowered 2 times in 2023, sixth cut since 2021).
- **Positive growth trajectory for rest of Asia (ex-China)** – Consensus growth forecast for the rest of Asia suggests positive trajectory, with India and Indonesia topping the estimate at 5% growth or more.
- **Attractive valuation** – AHY underperformance vs EM and developed market peers in 2023 has made it attractive from a relative value basis and we believe this attractive valuation will attract global investors.
- **More favorable technical** – We believe the demand-supply dynamic should be more favorable in 2024. Given the cheaper onshore rate and high USD rate, AHY USD supply has been muted in 2023 and we believe it will remain the same for 2024. As for the demand side, we believe that given our lower default expectation, we reckon demand for the AHY should be more stabilized. In addition, among EM investors, Asia has been a consistent UW allocation. A change in the Sub-Fund’s flow or allocation might force the EM investors to cover the UW bringing a positive bid for the Asia HY.

As such, we are cautiously optimistic on the asset class and will continue to maintain our portfolio discipline in allocation and credit selection.

**NOMURA FUNDS IRELAND – ASIA INVESTMENT GRADE BOND FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	3.09	5.77	8.26	-1.96	29.68
<b>Benchmark</b>	2.69	5.60	7.42	-3.35	27.30
<b>Out/(Under) Performance</b>	0.40	0.17	0.84	1.39	2.38

*Source: BBH % Returns in USD. Benchmark shown is the JP Morgan Asia Credit Investment Grade Index.*

*\*Inception date is 13th March, 2015.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund recorded a return of 8.26% compared with the benchmark 7.42% and therefore outperformed the benchmark by 0.84%.

The U.S. economy proved more resilient than initially anticipated in 2023, with inflation remaining high. As a result, the Federal Reserve continued raising interest rates for longer than the market had expected, and U.S. Treasury yields continued to rise until October. However, by year's end, due to easing inflation and other factors, the Fed's stance shifted towards dovishness, and the market began to price in rate cuts for 2024, causing the yield on 10-year U.S. Treasuries to fall back to the levels seen at the end of 2022.

The spread in the Asian investment-grade bond market continued to tighten in 2023. Since the second half of 2022, the issuance of new dollar-denominated corporate bonds in Asia has decreased, leading to a situation where investment demand significantly exceeded supply in the corporate bond market. There were no major credit events in the investment-grade bond market, and the gradual tightening of spreads continued until the end of the year. In our strategy, the overweight duration times spread (DTS) continued, and the tightening of spreads contributed to outperformance.

The largest factor in our outperformance was our credit selection, especially our selection in Korea, which contributed significantly. We assessed Korean financials as undervalued and we had an overweight position in financials in the Sub-Fund. The tightening of spreads across all our holdings outperformed the benchmark's tightening of spreads, contributing to our performance. Furthermore, our credit selection in China also contributed to the Sub-Fund's outperformance. We increased our overweight position as we viewed the spreads of technology company bonds as being relatively wide. Spreads of tech companies like Xiaomi and Tencent tightened significantly by year-end, contributing to the Sub-Fund's outperformance.

The benchmark returned 7.42% for the full year of 2023. The US Treasury factor contributed 3.92 % to the benchmark return. The 10 year US Treasury did not change so much from one year earlier, and income gain generated positive return. The benchmark spread tightened from 142 basis points to 108 basis points during the year 2023 and spread return including capital and income contributed 3.37% to the benchmark return. The benchmark yield at the end of 2023 was 5.13%, declined from 5.49% of 2022.

**Investment Outlook**

Major central banks have implemented significant and unusually rapid interest rate hikes from 2022 to 2023 in response to accelerating inflation. However, we believe 2024 will bring a policy reversal, with many central banks beginning to implement interest rate cuts. 2024 is poised to become a year of significant policy shift in monetary conditions.

Based on the policy interest rate outlook issued by FOMC members in December 2023, the so-called "dot-plot" implied that the Fed might implement a total of 75 basis points in interest rate cuts during 2024. We also expect the Fed to lower interest rates in 2024 as the US economy falls into recession. In Europe, we are also expecting the ECB to implement policy rate cuts more rapidly than the Fed in 2024.

While we are already observing signs of this shift, we also anticipate a change in market trends as monetary policy undergoes a significant transition. In the bond market, we expect a downward trend in yields, while in the currency market, there is some risk of a weaker US dollar and the potential for a significant rebound in the Japanese yen, depending on the policy stance of the Bank of Japan. With this substantial shift in monetary policy, we believe there is a need to remain cautious about the potential for significant market changes.

**NOMURA FUNDS IRELAND – ASIA INVESTMENT GRADE BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

In terms of the Asian corporate bond market, while 2023 saw continued tightening of spreads, we expect this trend to persist into 2024. We anticipate that the economic growth rates of emerging Asian countries will remain high and that the fundamentals of financial institutions and corporations will continue to be stable. Regarding China, the reopening in 2023 was expected to have an impact, but actual economic activity fell short of expectations due to a slump in the real estate market. It is likely that the economic growth rate will remain below 5% in 2024. However, we expect continued tightening of spreads for high-grade Chinese companies in 2024. Dollar-denominated Chinese corporate bonds continue to yield significantly higher than domestic yuan-denominated bonds, maintaining high investment demand for dollar-denominated bonds. On the other hand, new corporate bond issuance remains subdued, so we believe the market will continue to see investment demand outstripping supply.

Within the Asian investment-grade bond market, we see Korean financial institutions continuing to be relatively undervalued. Korea has seen a relatively stable tightening of spreads, but the pace of tightening is somewhat slower compared to other countries. Therefore, we believe there is more room for tightening compared to other countries, especially for Tier 2 bonds issued by major financial institutions with stable fundamentals.

*\*Since Inception date is 1st June, 2005 as the Nomura Funds Luxembourg China Opportunities Fund. The Nomura Funds Ireland - China Fund was launched on 27th April, 2015.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned -15.11% compared with the benchmark return of -11.20% and therefore underperformed the benchmark by 3.91%.

Attribution analysis shows that both allocation and selection effect made negative contribution.

In sector allocation, our underweight in Financials and Health Care sectors are negative contributors while the overweight in Communication Services and Industrials sectors are positive factors of the relative performance.

In stock selection, our overweight in Wuxi Biologics (Health Care) and Li Ning (Consumer Discretionary) made negative contribution due to the rising geopolitical risks and weakened consumption demands respectively. While positives come from overweight in PDD Holdings (Consumer Discretionary) and CNOOC Limited (Energy) due to strong revenue from overseas platform Temu and elevated oil prices respectively.

MSCI China remained weak in 2023 and it corrected by 11% as the market was pressured by a number of negative issues, namely rapid growth deceleration after the first quarter opening, macro’s structural downturn, continuous property weakness, soft external demands, intensified geopolitical tension, despite the government’s ongoing policy easing to further strengthen the pro-growth stance.

To recap, while the economy exhibited a strong recovery in the early first quarter of 2023 after the government took steps to end its long-standing zero-Covid policy, it witnessed a larger-than-expected growth deceleration into the second quarter of 2023 as the initial reopening impulse began to fade with some slowing factors, such as weak consumption, sluggish property sales, lackluster private investments and deflation risk started to drag the macro growth. The market sentiment meanwhile also turned more fragile and weaker with the second quarter of 2023 GDP growth (+6.3% yoy) largely missed the market expectation and failed to extend the strength from the first quarter of 2023 (+4.5% yoy). Though on the bright side, in response to the macro weakness, some growth-supportive measures were correspondingly rolled out targeting consumption spending such as household appliance and NEV. Regulatory stance across property and internet sectors also started to turn more lenient and accommodative as it was announced to ease home buying restrictions in nation’s biggest cities as well as finalizing the fine for Ant Group to mark the end of previous regulatory clampdown.

Going into second half of 2023, it is still encouraging to see the government continued its pro-growth stance with a series of accommodative fiscal and monetary policies supports roll-out, especially on the property side into the third quarter of 2023, such as fee cuts for home purchases, the first nationwide demand-side easing since 2015 and lowering down-payment ratios for first homes and second homes purchase. A number of meaningful policies easing measures were also launched in the fourth quarter such as the RMB 1trillion additional fiscal boost, RMB 350 billion PSL injection and RMB 100 billion support for rental housing loan. Having said that, throughout the period, the market still stayed weak and choppy as the macro continued to be dragged by ongoing deflation data, slumping property sales, consumption weakness and soft exports demands. Additionally, the sentiment was also hurt by issues like Evergrande default crisis and US sanction risk. Investors in general still lacked conviction and stood on the sidelines before seeing consistent macro data improvement. MSCI China stayed subdued and dropped by 6.5% during the second half of 2023.

**Investment Outlook**

While the market remained suppressed in 2023, we are seeing more signs government’s efforts to stabilize the capital market with the reported market stabilization fund, SOE reforms, requiring more share buyback from listco and CSRC increasing holdings on ETFs. On monetary front we also see larger than expected cuts in 5-year LPR and RRR recently.

**NOMURA FUNDS IRELAND – CHINA FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

Into 2024, we expect the policymakers will likely set the annual growth target at around 5% after the full-year 2023 GDP grew 5.2% yoy, exceeding the ~5% official growth target. A good combination of accommodative fiscal and monetary policies will be the swing factors for a sustainable recovery especially on the property side, of which the upside risk hinges on the return of homebuyer confidence and developers’ balance sheets improvement. We expect property policy easing should continue to provide credit support for developers and prioritizing the existing high housing inventory clearance. On the other hand, we also pay more attention on the fiscal side especially on the more concrete budget details to be revealed in March such as how to deploy the RMB 1 trillion new treasury bond issuance. Monetary accommodation is also vital in terms of providing liquidity for fiscal expansion through MLF rate and RRR cut.

While macro data remains fairly weak recently, we are seeing increasing policy supports which would be helpful in cushioning the macro downside risk in the short term. But more policy efforts on both fiscal and monetary ends are still needed for the consistent macro improvement to come through. Restoration of consumption confidence, solid manufacturing and property stabilization on the back of the government’s ongoing rescued measures, fiscal stimulus and accommodative monetary policies would be the backbones to contribute to the macro growth. In the meantime, the removal of regulatory overhang on various sectors such as Tech and Education would be positive for market re-rating. In terms of portfolio construction, we are positioned to the information technology sector such as Lenovo and Naura Technology to play the PC cycle recovery and localization in China wafer fab equipment respectively. We also favored power grid name like Pinggao as we expect more UHV lines to drive margin upgrades and home appliance name Midea and Gree due to its strong market position and low valuation.

\*Since Inception date is 21st December, 2015.

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 21.54%, compared to the benchmark return of 22.20% and therefore underperformed the benchmark by 0.66%.

Stock selection was strong in Healthcare (Novo Nordisk) and Communication Services (Alphabet), while stock selection was weaker in Utilities (NextEra Energy) and Information Technology (due to lack of exposure to Nvidia). Our cash holdings were also a drag in a year of strong equity returns.

We do not make top down allocations to sectors, the allocations are an outcome of our bottom up process, which looks for higher quality companies when they are trading at a discount to fair or intrinsic value.

In 2023, key market drivers were the inflation trends and how the central banks would react to them in adjusting interest rates. As the year 2023 unfolded, inflation continued to fall (also core inflation) and the FED raised its rates in July for the last time, while the ECB made their last hike in September. US 10 year government bond yields started the year at around similar levels they ended (3.7-3.8%), with a peak in mid-October at around 5%. The last two months of the year, we witnessed a rally in both the Equity and Bond markets in the US (and most European markets), as the market believes the FED has pivoted and now (in January 2024) expects six rate cuts in 2024.

Artificial intelligence (AI) has been the magic word companies have increasingly used to try to boost their multiples, while the poster child of its rapid growth has been Nvidia, where estimates for both revenues and EPS have exploded.

Market concentration has been increasingly discussed, with the weight of the largest seven companies in the S&P500 at record levels (around 28%). This group of companies (Apple, Microsoft, Amazon, Alphabet, Nvidia, Tesla and Meta) is referred to as the “Magnificent 7” and has driven the performance of the S&P500 in 2023. This time though (when compared vs. the dot-com bubble) this group of companies are extremely profitable (net margins more than double the other components of the S&P500) and have compounded their FCF at much higher rates than other companies, so we believe the multiples of many of them are well deserved. In fact, our GHC strategy is exposed to four of them (Apple, Microsoft, Amazon and Alphabet), which has contributed to our performance by +140 basis points.

For the Global High Conviction Fund the best performing stocks for the year were:

Alphabet, an internet service provider primarily deriving advertising revenue through its offerings such as internet search engine (Google) and video sharing (YouTube). We believe search is one of the best business models created. Users query what they are interested in which is valuable information to sell advertising. This type of advertising, called direct response, is more effective than traditional brand advertising when advertisers are looking to elicit an action such as online shopping or requesting additional information. The stock was one of the top three detractors in 2022, but reversed course in 2023, and it was the top contributor for the strategy performance.

Amazon, which was also a detractor to performance in 2022 (shares -50%), reversed course in 2023 (shares +81%). They overbuilt logistics capacity during the pandemic given the surge in e-commerce demand during lockdown. As the economies reopened, lower spending on e-commerce led to overcapacity in their fulfilment network, which negatively affected margins. We included Amazon in the Global High Conviction Fund portfolio in May 2022 when the share price was weak as we expected a rebound in e-commerce growth would soak up this excess capacity and operating leverage would return. We believed that their fast growing high margin advertising business including ads on Prime Video would also push up operating margins. Amazon Web Services (AWS) slowed down along with the industry as customers reduced Opex by reducing workloads, but that period of cost optimisation by their customers is ending and AWS growth is accelerating.

**NOMURA FUNDS IRELAND – GLOBAL HIGH CONVICTION FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

Novo Nordisk, a Danish pharmaceutical company, was up strongly in 2023 as well (top three contributor to performance in 2022). This was despite the relative underperformance of the Healthcare sector, as the success of its anti-obesity drug, Wegovy, has continued. The company has also tried other uses from the GLP1 molecule, with very positive results in the SELECT trial.

The worst performing stocks were:

NextEra Energy, which faced a combination of headwinds from higher interest rates and questions about growth and financing of the renewables business.

AiA, a Hong Kong based life insurer, suffered due to the disappointing impact of China reopening post Covid-19 restrictions, resulting in disappointing trends in the Value of New Business (VoNB) growth in China, combined with an increasing negative sentiment about the region.

Not owning Nvidia (stock +239% in 2023), the poster child of the AI revolution, was the third largest detractor to the strategy performance. While we like the company, we have preferred the risk-reward proposition from TSMC and ASML in the semiconductor industry, while we see our holdings in Microsoft, Alphabet and Amazon, benefitting from the AI development.

Aside from investment results, the Sub-Fund is an SFDR Article 8 strategy and as such has environmental, social and governance objectives as well. The Sub-Fund has been invested in companies that in aggregate are well within the Sustainable Development Scenario for climate change. The team maintains an exclusion list to avoid investments in the very worst companies from a sustainability perspective and during 2023 undertook multiple engagements with portfolio companies, some specifically intended to encourage the companies to adopt science-based targets for carbon emission reduction.

**Investment Outlook**

When 2023 started, most market participants were anticipating a recession, and they were looking forward to central banks to stop raising interest rates (the FED raised rates in July for the 11th and last time this cycle, to 5.5%, while the ECB raised for the last time in September to 4.0%), while inflation continued to reduce over the year. The recession fears did not materialise, with the US GDP growth accelerating in the second half of the year, in part thanks to a strong consumer, and a US labour market, which keeps adding jobs at a healthy clip.

In early January 2024, the market was expecting both the FED and the ECB to cut interest rates six times to 4.0% and 2.5% respectively by the end of the year. At the same time US inflation rates are expected to continue converging towards 2%. This is a goldilocks scenario, which has been increasingly priced by an optimistic market, pushing the S&P500 above 5,000 points after just 6 weeks.

Market concentration has been increasingly discussed, with the weight of the largest seven companies in the S&P500 at close to record levels (around 28%), and continuing to increase in 2024. This group of companies (Apple, Microsoft, Amazon, Alphabet, Nvidia, Tesla and Meta) is referred to as the “Magnificent 7”, and has driven the performance of the S&P500 in 2023. This time (vs. the dot-com bubble) this group of companies are extremely profitable (net margins more than double the other components of the S&P500) and have compounded their FCF at much higher rates than other companies, so we believe the multiples of many of them is well deserved. In fact, most of them have continued to rally early into 2024 (Tesla is more than 20% down in early February).

We do not have a strong view about the likelihood of a recession later in 2024, but we are confident our companies are well placed to withstand an economic headwind, having strong competitive advantages, higher margins than the market average, and a strong balance sheet.

*Source BBH; % Returns in EUR. Benchmark is ICE BofA European Currency High Yield Constrained Index (HPC0).  
\*Since Inception date is 8th November, 2017.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 12.71%, compared to the benchmark return of 12.68% therefore outperforming the benchmark by 0.03%.

European high yield started 2023 on a strong note despite periods of volatility in the first quarter. In March, significant bank failures occurred in both the US and Europe, leading to a sharp decline in US Treasury and Bund yields as market participants reassessed the relative risks of growth and inflation in a potential banking crisis. Fast action by central banks to furnish liquidity eased the emerging crisis of confidence. Furthermore, the SNB’s quick resolution of the issues at Credit Suisse put a line under systemic risk in Europe, and a relief rally ensued. The second quarter started off strongly as the market recovered, but the ECB continued to communicate a hawkish tone as core inflation remained sticky and above target. As a result, Bund yields increased, despite some weak economic data releases in Germany. The third quarter saw a strong start as the market continued to digest resilient economic growth and signs that inflation pressures were starting to abate, leading to strong equity performance with the hope of a “no landing” scenario. However, towards the end of August and into September, pressure increased on the global rates market as central banks continued their hawkish posture and commitment to bringing inflation back to stated long-term goals. In October, the market continued its sell-off as central banks established a hawkish posture, suggesting a higher for longer rate regime as inflation remained stubbornly high. Then, November saw a dramatic turnaround, driven by the FOMC meeting that suggested the central bank hiking cycle was nearing its end, and it was appropriate to think about rate cuts going into 2024. The rally remained strong in December as the Fed continued to turn dovish, even as the ECB reiterated their preference for a higher for longer environment.

Our ratings posture contributed to outperformance, especially our underweights in BBs overweight to Bs, while our allocation to BBB credits detracted. The key sector contributors to positive relative performance included Support Services, Recreation & Travel, Auto Parts & Equipment, and Specialty Retail. In Travel, our overweight in cruise lines contributed to returns, as Carnival benefited from the return to consumer travel spending. In Specialty Retail, our position in Lycra was up as an out-of-court restructuring generated value to the short-dated EUR notes. The main sector detractors were Banking, Gaming, Building Materials, and Real Estate. In Building Materials, our overweight in Consolis traded lower as the company struggled with tepid demand in the Nordic construction market and an overleveraged balance sheet. In Real Estate, our overweight in Signa Development hurt performance as the company’s asset sale plan was canceled due to challenging market conditions, leading to a difficult liquidity situation and eventual restructuring.

**Investment Outlook**

Looking ahead, the European economy is slowing, and we expect that various regions in the Eurozone will be in a recession in the first half of 2024. Inflation continues to be above target, and a recession alone will not be enough to cause the ECB to pivot. However, inflation readings have been encouraging and as a result, the market believes that the ECB can manufacture a sweet spot landing for the Eurozone, similar to hopes in the US. We think this is a reasonable assumption, and it follows that the total return outlook in European high yield for 2024 continues to be positive. In the short term, markets clearly traded ahead of central banks at the end of 2023 and pulled forward some of the potential return from 2024, and we expect some consolidation of bond prices at the beginning of the year. In addition, we do expect issuers to take advantage of current spread levels to refinance maturities for both 2024 and 2025 at attractive rates. The risks that are top of mind as we look forward to 2024 include a deeper-than-expected drop in economic output in the Eurozone, a reacceleration of inflation due to either continued labor tightness or geopolitical tensions, or a more hawkish ECB leading to a higher for longer rate environment. The set-up for 2024 continues to be broadly positive for European high yield, as lower rates should keep default rates low and spreads bound in the current range. As a result, we believe that the risk-adjusted returns in high yield will continue to look attractive relative to most other asset classes over the next 12 months.

**NOMURA FUNDS IRELAND – GLOBAL SUSTAINABLE EQUITY FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	4.65	9.34	16.65	18.02	52.13

*Source BBH; % Returns in USD. Benchmark is the MSCI All Country World Index.  
Gross return, close of day numbers.  
\*Inception date is 15th April, 2019.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 16.65% compared to the benchmark return of 22.20% and therefore underperformed the benchmark by 5.55%.

This was a difficult year for the Sub-Fund and the underperformance was mainly due to the Sub-Fund not participating in much of the extraordinary Magnificent 7 rally that drove so much of the market performance in addition to significant headwinds from the overweight to the high positive impact but highly interest rate sensitive Healthcare and Utilities sectors which are yet to recover.

The primary story of the year was, of course, the outperformance of Mega Cap Tech and the huge expectation within the market artificial intelligence is set to ramp up very quickly and will have broad reaching implications, but be particularly beneficial to Mega Cap Tech and those companies with the talent, experience and firepower to invest. There were two meaningful periods of market weakness through the year, first in March on the news of the bank runs at SVB and Signature Bank, and the takeover of Credit Suisse by UBS, in addition to an October pause as the US ten year pushed above 5% for the first time since 2007. However, on both occasions equity markets shifted back into bullish mode and recovered quickly to push ever higher. Markets finished the year in a jubilant mood as dovish central bank commentary, US inflation moderating faster than had been expected, and a surprise upward revision of US GDP all contributed to increased speculation that the Fed will cut faster and more aggressively with a soft or even no-landing scenario being achieved. Against this backdrop the S&P 500 returned 26% in 2023 whilst the Equally Weighted version returned 13% and the Magnificent 7 returned a staggering 107%. Across MSCI ACWI the Technology sector returned 55% in 2023, more than 50% in excess of Consumer Staples (+2%), Healthcare (+4%) or Utilities (0%).

Sector allocation through 2023 was the primary driver of the underperformance contributing ca. -300 basis points predominantly as a result of the large Healthcare overweight in addition to the overweight to Utilities and underweight to Consumer Discretionary. Selection was very strong in Healthcare and Industrials but this was more than offset by weak selection in Materials, Utilities and especially Technology. Adobe (+77%), Pentair (+64%), Novo Nordisk (+55%), Alphabet (+58%) and SAP (+52%) were the greatest contributors whilst NextEra Energy (-26%), not holding Nvidia (+239%), Johnson Controls (-8%), AiA Group (-20%) and not holding Apple (+49%) were the greatest detractors.

Despite a tough 2023, the strategy’s performance remains strong over the long term and stands out as exceptional over the past three years relative to the majority of the Global Sustainable Equity peers that the Sub-Fund is competing with. In 2021 and 2022, the Sub-Fund strongly outperformed its benchmark whilst the majority of peers, which have a strong growth bias, underperformed sharply on higher interest rates and inflation. In 2023 despite the very strong outperformance of Growth, sustainable funds are on average very underweight Mega Cap Tech on sustainability grounds – thus struggling to keep up in such a narrow mega cap tech led market – and experienced material headwinds from the huge underperformance of the renewables complex. As a result whilst the team are naturally disappointed with the headline numbers vs. MSCI ACWI in 2023 the longer term outperformance of the benchmark and far stronger performance than the majority of peers leaves the Sub-Fund well positioned for continuing to raise AUM.

**NOMURA FUNDS IRELAND – GLOBAL SUSTAINABLE EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook**

**Market Outlook**

The team remain very cautious on making any strong macro predictions for the year ahead and the approach remains to seek to minimise the unintended macro risk being taken and maximise the exposure of the portfolio to bottom up single stock investment decisions. Indeed 2023 was a year in which the majority of strategists came into it expecting recessions, the first prediction of a down year for stocks in decades, and a particularly tough year for Mega Cap in which inflation and their size would finally catch up with them! Entering 2024 comes on the back of two exceptional strong months for both bonds and equities, a huge near term shift in consensus towards a Fed pivot coinciding with a very gentle landing for the economy, and one of the most narrowly led market advances in history with enormous sector divergence. In dollar terms, the S&P 500 returned 26% in 2023 whilst the Equally Weighted version returned 13% and the Magnificent 7 returned a staggering 107%. Across MSCI ACWI the Technology sector returned 55% in 2023, more than 50% in excess of Consumer Staples (+2%), Healthcare (+4%) or Utilities (0%).

The team’s experience would suggest that in particular such narrowness simply cannot continue and the underperformance of high quality, low earnings variability stocks is somewhat reminiscent of early 2021 following a period of huge growth outperformance and then subsequently the rally in risky value stocks post the announcement of vaccines, which left low variability stocks behind almost forgotten. Of course stock prices must over the long term converge to their long term discounted flows and this was indeed what happened in 2021 across a number of the teams’ holdings particularly in Healthcare. That is not to say that the trends of 2023 cannot continue in the nearer term with a huge wall of money set to return to equities should money market funds continue to lose their appeal but the team remain confident that over the long term the headwinds of 2023 will reverse.

**Impact Outlook**

2023 marked the third year in a row that sustainable and impact funds have struggled to keep up with broader markets. The underperformance of renewables in particular and the severe sell off of a number of previously beloved impact stocks had particularly painful implications for the space. In retrospect, there was clear overcrowding and some managers did not do a good enough job with regards to making sure underlying business models and future long term free cash flows were understood. However the team feel there is actually a great deal to be optimistic about moving forward with the overly optimistic expectations now having died down within certain pockets. Indeed, it has long been a struggle for the team to invest in a number of high impact areas as a result of simply not being able to get comfortable on valuation and with many investors having had their fingers burnt in chasing ‘Impact at any Price’ this has created opportunities for those investors who are disciplined on long term valuation. The team are currently carrying out in-depth research on a number of companies that had previously been felt overcrowded and overextended with regards to valuation. However the team will not be compromising on quality and will remain disciplined in seeking high total impact stocks that are decent quality and attractively valued.

As always the team also remain acutely aware that investing sustainability is an evolving process as new research, evidence and societal understanding develops. Indeed, over the quarter the team carried out significant research into the area of ultra processed foods and reassessed areas of the portfolio that were exposed to this ultimately concluding that the suitability of two holdings was no longer appropriate for the portfolio. Whilst this was research that the team had intended to do the efforts were accelerated by our engagement with our clients and the collaborative and open minded approach the team take to working together with all stakeholders to support the best outcomes.

**AMERICAN CENTURY GLOBAL SMALL CAP EQUITY FUND  
INVESTMENT MANAGER'S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	8.00	7.68	11.77	-5.78	46.86
<b>Benchmark</b>	8.87	11.98	16.84	10.32	38.44
<b>Out/(Under) Performance</b>	-0.87	-4.30	-5.07	-16.10	8.42

*Source BBH; % Returns in USD. Benchmark is the MSCI All Country World Index Small Cap.  
\*Since Inception date is 2nd July, 2019.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 11.77% compared with the benchmark return of 16.84% and therefore underperformed the benchmark by 5.07%.

Global equities delivered positive returns despite periods of volatility, with small-cap stocks lagging large caps for the year. Equity markets were heavily impacted by the direction and outlook for interest rates globally as opposed to company fundamentals. By the end of the fourth quarter, however, easing inflation and hopes for a sustained pause in central bank rate hikes pushed global bond yields lower. This fuelled a broad-based equity market rally.

From a geographic perspective, investments in Japan detracted from relative performance, while allocations to Canada contributed.

On a sector basis, stock selection in Industrials weighed on relative performance. This was due in part to an investment in energy products distributor NOW. Stock selection in Health Care also detracted. Harmony Biosciences Holdings was a prominent detractor in Health Care, as the stock was pressured by the efforts of a short seller attempting to invalidate some of the company's patents. We exited the position. On a positive note, stock selection and an underweight in the Real Estate sector contributed to relative performance. Elsewhere in the portfolio, e.l.f. Beauty was a top individual contributor to relative performance. This cosmetics company has consistently beat consensus earnings estimates as its revenue growth has significantly outpaced that of its peers, aided by product innovations, increased shelf space and social media-driven marketing targeting younger consumers.

**Investment Outlook**

The portfolio continues to invest in companies where we believe fundamentals are strong and improving but share price performance does not fully reflect these factors. Our process is based on individual security selection, but broad themes have emerged.

**We remain committed to our disciplined process.** We believe our active, bottom-up approach has the potential to identify companies with accelerating and sustainable growth, supported by our balanced approach to risks and opportunities. Our focus remains on companies with pricing power and stock-specific drivers of earnings growth. We also favor companies with strong balance sheets and healthy free cash flow that reduces the need for capital markets funding.

**We remain positive on the outlook for Information Technology.** The digitization of the global economy is driving opportunities for information technology companies. We have continued to find compelling investments in software-as-a-service companies, including logistics software, with accelerating and sustainable growth prospects. We also see potential tied to innovations in artificial intelligence, which could fuel increased demand for computing capacity, data center space, advanced semiconductors and cybersecurity to safeguard networks.

**We have taken a selective approach to consumer discretionary stocks.** We have identified companies benefiting from increased travel-related spending in Asia. We also own businesses that may perform more defensively in a more challenged economic environment and have stock-specific drivers of sustainable earnings growth, including discount retailers.

**We are finding opportunities in Industrials, driven by our bottom-up stock process.** Investments include companies that are benefiting from increased spending on infrastructure and nearshoring. We also see opportunities in companies with end markets tied to factory automation and defense spending.

**Small-cap valuations remain attractive relative to large caps.** While economic uncertainty and slowing earnings growth may lead to near-term volatility, we continue to identify small-cap companies that we believe have the potential to deliver accelerating and sustainable earnings growth. Stable or declining interest rates may also continue to provide a tailwind for small-cap markets. We believe bottom-up stock selection and a prudent level of diversification remain critical, as we continue to find growth opportunities across a broad array of sectors and geographies.

**AMERICAN CENTURY GLOBAL GROWTH EQUITY FUND**  
**INVESTMENT MANAGER'S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	5.11	11.13	18.39	4.31	224.48
<b>Benchmark</b>	4.80	11.03	22.20	18.25	199.50
<b>Out/(Under) Performance</b>	0.31	0.10	-3.81	-13.94	24.98

*Source BBH; % Returns in USD. Net Returns. Institutional Class. Benchmark is the MSCI All Country World Index.*

*\*Since Inception date is 14th April, 2010 (Please note that this Sub-Fund became a sub-fund of Nomura Funds Ireland by way of a merger on 2nd August, 2019).*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 18.39% compared with the benchmark return of 22.20% and therefore underperformed the benchmark by 3.81%.

Global stocks rose during the year despite bank crises in March and indications for much of the year that central banks would keep interest rates higher for longer. The potential of artificial intelligence, moderating inflation and the avoidance of widespread recession buoyed investors. As the year wound down, markets surged amid rising expectations for a soft landing, continued easing in inflationary pressure and a more positive backdrop for corporate earnings in the new year.

From a geographic perspective, the portfolio was pressured significantly by its stock selection in the U.S., while an underweight allocation in China lifted relative results. On a sector basis, financials had the largest negative impact, whereas consumer discretionary provided a relative contribution. An underweight position in NVIDIA detracted for the period. The semiconductor manufacturer reported a record jump in revenues, fueled by increased adoption of artificial intelligence along with other long-term growth trends such as cloud computing and online gaming. The largest stock contributor was Stellantis. The Netherlands-based automaker, which includes Chrysler, Fiat and Peugeot brands, recently reported revenue and operating profit that exceeded analysts' estimates, fueled by solid pricing power. The company's electric vehicle lineup, plug-in hybrids in particular, logged notable sales growth in the U.S. and Europe.

**Investment Outlook**

**Focused on resilient earners.** Companies with highly resilient business models, such as those with recurring and predictable revenue profiles, are well represented in the portfolio. Businesses with revenues tied to long-term contracts or based on subscription models are particularly attractive.

**Evaluating stock-specific drivers of growth.** We believe businesses with the ability to grow and deliver earnings that are not dependent on the economic cycle will be rewarded as growth becomes increasingly scarce. We are also biased toward businesses with financial strength and low leverage. We expect these companies to remain profitable in a global economy where growth will remain under pressure.

**Secular growth remains well represented.** As economic growth slows in reaction to tighter monetary policies and rising costs, our bias moves toward businesses tied to structural drivers rather than growth that relies on a cyclical tailwind. The portfolio continues to have exposure to many secular trends, such as digitization, cloud computing, onshoring, the 5G network rollout, data center expansion and decarbonization. From a risk management perspective, we are mindful of taking unintended exposure to a few themes or to one economic outcome.

**Opportunities in the financial sector.** Our exposure in the financials sector includes insurers that we believe are benefiting from higher premiums. Other areas of emphasis in the sector include companies tied to capital markets, financial data providers and credit card companies.

**Headwinds continue for China.** The recovery in economic activity, as the country emerged from pandemic lockdowns, proved to be weaker than expected due to property market turmoil and weak private sector confidence. So far, new government policies aimed at supporting the economy have not been sufficient to improve investor sentiment.

**AMERICAN CENTURY CONCENTRATED GLOBAL GROWTH EQUITY FUND**  
**INVESTMENT MANAGER'S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	4.25	10.59	18.33	4.02	268.74
<b>Benchmark</b>	4.80	11.03	22.20	18.25	198.66
<b>Out/(Under) Performance</b>	-0.55	-0.44	-3.87	-14.23	70.08

*Source BBH; % Returns in USD. Benchmark is the MSCI All Country World Index.*

*\*Since Inception date is 7th November, 2011 (Please note that this Sub-Fund become a sub-fund of Nomura Funds Ireland by way of a merger on 2nd August, 2019).*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 18.33% compared with the benchmark return of 22.20% and therefore underperformed the benchmark by 3.87%.

Global stocks rose during the year despite bank crises in March and indications for much of the year that central banks would keep interest rates higher for longer. The potential of artificial intelligence (AI), moderating inflation and the avoidance of widespread recession buoyed investors. As the year wound down, markets surged amid rising expectations for a soft landing, continued easing in inflationary pressure and a more positive backdrop for corporate earnings in the new year.

From a geographic perspective, the portfolio was pressured significantly by its stock selection in the U.S., while a lack of exposure to China lifted relative results. On a sector basis, financials had the largest negative impact, whereas health care provided a relative contribution. An underweight position in NVIDIA detracted for the period. The semiconductor manufacturer reported a record jump in revenues, fuelled by increased adoption of AI along with other long-term growth trends such as cloud computing and online gaming. The largest stock contributor was another semiconductor company, Marvell Technology. Shares of Marvell rose following the release of quarterly earnings and revenues for the first quarter of fiscal year 2024 that beat consensus market expectations. In addition, a surge in AI-related demand for semiconductor chips further buoyed Marvell stock.

**Investment Outlook**

**Focused on resilient earners.** Companies with highly resilient business models, such as those with recurring and predictable revenue profiles, are well represented in the portfolio. Businesses with revenues tied to long-term contracts or based on subscription models are particularly attractive.

**Evaluating stock-specific drivers of growth.** We believe businesses with the ability to grow and deliver earnings that are not dependent on the economic cycle will be rewarded as growth becomes increasingly scarce. We are also biased toward businesses with financial strength and low leverage. We expect these companies to remain profitable in a global economy where growth will remain under pressure.

**Secular growth remains well represented.** As economic growth slows in reaction to tighter monetary policies and rising costs, our bias moves toward businesses tied to structural drivers rather than growth that relies on a cyclical tailwind. The portfolio continues to have exposure to many secular trends, such as digitization, cloud computing, onshoring, the 5G network rollout, data center expansion and decarbonization. From a risk management perspective, we are mindful of taking unintended exposure to a few themes or to one economic outcome.

**Opportunities in the financials sector.** Our exposure in the financials sector includes insurers that we believe are benefiting from higher premiums. Other areas of emphasis in the sector include companies tied to capital markets, financial data providers and credit card companies.

**Headwinds continue for China.** The recovery in economic activity, as the country emerged from pandemic lockdowns, proved to be weaker than expected due to property market turmoil and weak private sector confidence. So far, new government policies aimed at supporting the economy have not been sufficient to improve investor sentiment.

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 4.84% compared with the benchmark return of 9.83% and therefore underperformed the benchmark by 4.99%.

The investing environment of the prior year was characterized by shifting expectations for central bank monetary policy, with the year ending on an upswing as markets repriced the probability of a soft landing in the U.S. Emerging markets (EM) equities trailed their developed markets counterparts, largely due to weakness in China. Uncertainty around the country’s slowing economic growth weighed on investor sentiment, as optimism about an accelerated, post-pandemic reopening faded amid continuing property market woes and weaker-than-expected economic data, despite government support. Most other EM markets outperformed China, led by strength in Latin America. Mexican equities benefited from the country’s linkage to the U.S. and nearshoring potential. Brazilian inflation data continued to ease, supporting that market. Indian stocks advanced amid positive investor sentiment and large-scale foreign buying. On a sector basis, consumer discretionary was the largest relative detractor during the period, driven by a combination of stock selection and an overweight to the sector. An overweight to the hotels, restaurants and leisure industry weighed on relative returns. In contrast, stock selection and an underweight in materials made the sector the largest contributor on a relative basis. The single-largest detracting stock was ENN Energy Holdings. The China-based natural gas distributor’s earnings were weaker than expected, and ENN lowered guidance. The company reported declining retail gas volumes in the first half of 2023, due to weaker demand from power plants and industrial customers. Taiwan Semiconductor Manufacturing Co. (TSMC) was the largest individual contributor. TSMC’s shares advanced, bolstered by the world’s largest chipmaker’s continued dominance of leading-edge semiconductor production and strong market share. In early 2023, analysts revised TSMC’s earnings estimates upward, predicting a stronger period bolstered by leaner inventories. We believe green shoots of recovery in some end markets for chips provide reassurance for strong growth in 2024. From a geographic perspective, holdings in China, India and Thailand weighed the most on relative returns. Holdings in South Korea, Saudi Arabia and Mexico were among the largest contributors.

**Investment Outlook**

After a challenging year, we enter 2024 with a positive outlook for emerging markets (EM) equities. While EM trailed developed markets (DM) stocks in 2023, we believe EM economies may benefit from a continuing shift of relative growth momentum. Compelling valuations relative to DM peers is a key fundamental driver for EM in 2024, in our view, as is the fact that many global investors remain under allocated to EM equities.

EM central bank policy represents a potential tailwind, given the potential for continued easing, especially in Latin America. Many countries in the region have made considerable progress in tempering inflation because their central banks aggressively hiked interest rates well before their counterparts in DM. With inflation pressure easing, monetary policy easing has begun and has the potential to propel EM economic growth.

We believe Latin America is positioned to take advantage of concerns around global supply chains and U.S.-China trade tensions. The region offers significant potential in agriculture, green energy and minerals amid the world’s carbon-reduction transition. The region’s central banks were early interest rate hikers, and while the quest to bring inflation down to target is a work in progress, there has already been tangible and meaningful progress. We believe Mexico stands to benefit from its proximity to the U.S., competitive labor costs, demographics and an established manufacturing base.

**INVESTMENT MANAGER'S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

The market has recalibrated expectations for China. The recovery from pandemic lockdowns proved weaker than expected, due to property market turmoil and weak private sector confidence. Pressure from the housing market has persisted, but recent policy signals indicate Beijing's desire to support growth. We believe targeted efforts will likely stabilize growth, including fiscal and monetary stimulus, easing housing policy and measures to stabilize foreign trade and investment. So far, support has not been sufficient to lift investor sentiment. However, internet companies continue to deliver robust results, while health care and automotive stocks have seen earnings upgrades. International travel from China is recovering, which could benefit select hotel and consumer-oriented companies in the region.

We are finding opportunities in India and Saudi Arabia. Indian stocks outperformed the region in 2023, and the market appears well positioned with resilient domestic demand anchoring growth amid an improved macroeconomic environment. Demographic trends and potential benefits from reshoring may also provide tailwinds. We believe a recovery in rural demand will likely boost already robust consumption growth as the drag from higher inflation fades. In our view, Saudi Arabia has a compelling long-term thesis based on structural reform that differentiates it from other commodity-heavy markets.

For the year ended 31st December, 2023, the Sub-Fund returned 34.68% compared to the benchmark return of 22.20% and therefore outperformed the benchmark by 12.48%

**Market Review**

The first quarter

During the first quarter, the MSCI All Country World Index (Total Return, Net Dividend) rose by 7.3% in US dollar terms. Global equity markets advanced in the first quarter, supported by easing recessionary concerns despite the collapse of Silicon Valley Bank, which was followed soon after by further financial sector disruption in Europe. In early February, several macro data points, including stronger-than-expected payroll statistics, made market participants nervous that the US Federal Reserve (Fed) might raise interest rates and hold them there for a prolonged period of time. However, the collapse of Silicon Valley Bank changed this outlook, with the main concerns shifting from inflation to a liquidity crisis among regional banks. This could lead to slower growth and lower inflationary pressures in the economy. Accordingly, the central bank signaled caution about the banking crisis at the March FOMC meeting and indicated that rate hikes might be coming to an end.

Meanwhile, stock prices in China also rose during the first quarter, supported by government easing of Covid-19 restrictions that had hampered the country's economic recovery. Even so, emerging markets lagged behind the developed market index.

In terms of relative performance, growth stocks rebounded significantly in the first quarter after suffering their worst year since 2000. In terms of sectors, IT enjoyed its strongest relative performance since the second quarter of 2020, followed by Communication Services and Consumer Discretionary. On the other hand, defensive sectors underperformed during the quarter, especially Energy and Healthcare, which both ended lower.

The second quarter

During the second quarter, the MSCI ACWI rose by 6.2% in US dollar terms. Against a backdrop of a last minute resolution to the US debt ceiling impasse and easing fears of a systemic crisis following the collapse of Silicon Valley Bank, markets were supported by resilient economic growth as well as abundant liquidity accumulated during the Covid-19 crisis. Although core inflation data remains well above the Fed's target rate, it has started to decline. The PCE price index rose just 0.1% in May after April's upside surprise and trimmed its year-on-year increase to 3.8%, its lowest level since April 2021. At the same time, the ISM manufacturing index, a gauge for US factory activity, slowed month-over-month in May while orders contracted at a pace even faster than the ISM manufacturing index. Meanwhile a measure of material costs fell by the most in nearly a year.

For this review period, Japan was the best performing major equity market in local currency terms, supported by a weak yen. This was the result of the Bank of Japan maintaining its yield curve control policy while interest rates soared in most other countries. The US was the second best performing market, driven by mega-cap stocks, particularly those related to generative AI technologies. Meanwhile, emerging markets were held back by the loss of optimism surrounding China after the initial rally following its reopening.

In terms of relative performance at the sector level, growth stocks kept their lead during the second quarter. IT sector stocks made the strongest gains among the 11 GICS sectors, followed by Consumer Discretionary and Communication Services. On the other hand, defensive sectors as well as the Materials and Real Estate sectors underperformed the overall market.

**NOMURA FUNDS IRELAND – GLOBAL MULTI-THEME EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

The third quarter

During the third quarter, the MSCI ACWI fell by 3.4% in US dollar terms. Global equity markets retreated following a recovery in the first half of 2023, while bond prices also fell. Commodities were the clear outperformers, mainly because crude oil prices rose during the quarter supported by the announcement that Saudi Arabia and Russia would extend their voluntary oil output cuts throughout the year. As macro-economic data during the quarter implied a slowdown in the growth outlook, with services activity starting to show evidence of normalization together with continually decelerating inflation data, the market focus has shifted from the level of peak interest rates to speculation over how long central banks will hold interest rates at restrictive levels. Market participants increasingly viewed the “higher for longer” scenario as necessary. In emerging markets, renewed concerns about the property sector in China weighed on sentiment, as the government still seemed reluctant to undertake aggressive stimulus policy measures.

In terms of style and sector relative performance, value stocks outperformed growth. The Energy sector posted the strongest gains among the 11 GICS sectors, followed by Communication Services and Financials. On the other hand, typical growth sectors such as IT and Consumer Discretionary underperformed the overall market.

The fourth quarter

During the fourth quarter, the MSCI ACWI rose by 11.0% in US dollar terms. Global equity markets remained mostly unchanged from early to mid-October. Although various economic indicators pointed towards economic strength, there were concerns about additional monetary tightening by the Federal Reserve. However, US bond yields continued to rise, and comments from several Fed officials suggested that there might be less need for additional rate hikes; this was well received by the market. In late October, the market retreated due to the turmoil surrounding the movement to oust the sitting House Speaker and elect a replacement. Increasing uncertainty fueled by major IT companies reporting sluggish results for the July-September quarter also weighed on the market. In November it advanced as US corporate results for the July-September quarter were firm, beating market expectations, and the US CPI for October was below market expectations. In December, the market rallied as a leading semiconductor company made a significant upward revision to the AI semiconductor market outlook, while the FOMC raised expectations for possible interest rate cuts during 2024.

When looking at sector performance, the decline in long-term interest rates in the US eased concerns about an economic slowdown due to the interest rate burden and financial tightening, resulting in strong performances in the IT, Real Estate, and Industrials sectors. On the other hand, the Energy sector saw a negative impact from the decline in oil prices, while Consumer Staples and Health Care derived less benefit from the easing of economic growth concerns. As a result, these sectors underperformed the overall market.

**Portfolio Review and Investment Activities**

The first quarter

Positive results for the quarter came from our overweight positions in the IT sector and stock selection in the Financial sector. While we believe inflationary pressures in the economy are easing and market expectations of rising earnings for FY 2023 have been revised downwards over the period from July to December 2022, we made tactical changes to our portfolio by reducing our exposure to defensive names and adding companies with structural growth stories, especially in the IT sector.

Among individual stocks, overweight positions in structural growth companies such as MarketAxess in the Fintech theme, NVidia in New Technology, Meta in AI/Cloud, and Tesla in IoT/Smart Mobility were the main positive contributors. On the other hand, companies that detracted from our performance were from the stable growth themes that had made positive contributions in 2022. The stock with the largest negative impact was Allstate in the Fintech theme. We maintain our opinion for Allstate, as we believe the market is underestimating its growth potential as supported by their proactive repricing plan as well as cost savings. The decline in used car prices should also help their margins. The second largest negative impact came from Devon Energy, which fell short of expectations on their quarterly results in February due to lower price realization and higher costs. In addition, their first quarter of 2023 guidance was lower than expected due to infrastructure outages in the Delaware Basin; however, we have not altered our position in this stock.

**NOMURA FUNDS IRELAND – GLOBAL MULTI-THEME EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

**Portfolio Review and Investment Activities (continued)**

The first quarter (continued)

We made some adjustments to the portfolio in February for the purpose of reducing the cash level by adding IT stocks and reducing our exposure to the defensive Healthcare and Consumer Staples sectors. However, growth factors have not changed much from before as we added more attractively valued companies in the IT sector. The biggest changes included the addition of a position in Apple and the exit from Amazon. We expect Apple to deliver positive returns to shareholders, even in an uncertain economic environment, thanks to the stable earnings structure supported by their various business platforms. We believe the development of diversified business operations, including software, hardware, and services, will also contribute positively to their future corporate earnings. Meanwhile, we exited our position in Amazon. While the lagging profitability of its e-commerce business improved, it faces a slowdown in Amazon Web Services, its cloud services business.

The second quarter

Portfolio adjustments made in February also contributed positively to our performance in the second quarter, with the overweight position in IT sectors and the underweight position in Consumer Staples adding some value. Positions in the Energy and Materials sectors also contributed positively. Stock selection in Financials detracted from the portfolio performance, but this was more than offset by positive stock selection from other sectors, especially those added in February.

Among individual stocks, overweight positions in structural growth companies such as NVidia (New technology theme), Meta, Oracle, ServiceNow (all in AI/Cloud theme), as well as Intuitive Surgical (Global Aging) were the main positive contributors. The position in Teleperformance (Outsourcing) detracted most from the performance, followed by MarketAxess (Fintech). We maintain a positive view on these stocks and will keep the current exposure levels while keeping our eyes on their fundamentals. As for Teleperformance, investors were worried about the potential risks from AI disruption, as it could eventually replace many of their business operations through the application of various automation technologies. However, we believe it would create more commensurate opportunities for the company. Management also mentioned it has been working on AI applications, specifically using OpenAI, and there were multiple cases where it has been developing its own generative pre-trained transformer products. Regarding MarketAxess, we see the company as a clear beneficiary of structural growth from the digitalization of fixed income trading. It was historically focused on corporate credit trading, but it recently expanded into new product areas including credit derivatives, asset backed securities, mortgages, ETF trading, and China. These should enhance its long-term revenue opportunities.

Major transactions during the quarter included the purchase of Amazon. We re-opened the position in the company as we identified an attractive growth gap in their e-commerce business. We believe the deterioration in the growth projection of their cloud business has now been incorporated into the stock price. On the other hand, we exited our position in CME as we saw there was now less uncertainty about the macroeconomic outlook, including central bank monetary policy, and leading to lower market volatility. This could have a negative effect on trading volumes given CME’s business as a derivatives exchange operator.

The third quarter

The third quarter of 2023 underperformance against the benchmark was largely attributable to stock selection in the Healthcare sector. In terms of the allocation effect, the overweight position in IT had a negative impact, however this was more than offset by stock selection within the same sector. For sectors overall, Energy was the strongest out-performer. On the other hand, typical growth sectors such as IT and Consumer Discretionary underperformed the overall market in relative terms.

As for stocks that detracted most from the performance, medical technology companies Edwards Lifesciences and Intuitive Surgical (both from the Global Aging theme), weighed on the relative performance, largely due to GLP-1 (Glucagon-Like Peptide 1) risk concerns for a variety of surgical sub-specialties ranging from cardiovascular surgery to sleep medicine. However, all of the med-tech companies in our portfolio stated that no identifiable GLP-1 headwinds had materialized. We remain positive about these companies and will maintain our current exposure while keeping our eyes on fundamentals. Although Chewy (New Consumer), delivered good results in the second quarter of 2023 that exceeded market expectations, management guidance sounded more cautious - at least for the short term. While historically the pet industry has been fairly defensive, major operators including Chewy have commented on a recent shift to value among customers and increasingly unclear expectations for the growth of net additions in the second half of the year. As a result, we decided to exit the position and refrain from investing until the December Analyst Day, which should shed light on its long term targets, growth prospects for its average net sales per active customer, and new opportunities. Furthermore, Fortinet (AI/Cloud Service) detracted from the relative performance as the company reported a billing error and downgraded its growth expectations for the next few years on its second quarter of 2023 earnings results.

**NOMURA FUNDS IRELAND – GLOBAL MULTI-THEME EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

**Portfolio Review and Investment Activities (continued)**

The third quarter (continued)

After revisiting our discounted cash flow (DCF) model based on new information provided in this second quarter of 2023 result, we decided to divest our holdings. As one of the major positive Contributors, Constellation Energy (Energy/Infrastructure) has regained traction in the market as energy prices began to rise again in the third quarter of 2023. From a medium to long term perspective, it will benefit from the Inflation Reduction Act as it manages the largest US fleet of nuclear and other carbon-free electricity generating facilities.

Following the portfolio change carried out at the beginning of the year, when we reduced our exposure to defensive issues and added companies with structural growth stories, especially in the IT sector, we maintained this positioning in the second and the third quarter. In the third quarter of 2023, we made just a few slight adjustments.

For major purchases, we expect mid to long term growth for Eaton (IoT/Smart Mobility), which will be driven mainly by growing investment in the electric power grid supported by President Biden’s infrastructure bill and expanding demand for data centers against the backdrop of greater use of AI. For Arista (New Technology) we also expect there to be some mid-to long-term growth potential with the increased demand for communication equipment that enables the high-speed connection of multiple servers. For major sales, we exited our position in Lam Research (New Technology). Even if memory market conditions improve, we believe it will take some time longer for capital expenditure to recover. We liquidated our holdings in Fortinet (AI/Cloud Service) due to concerns about a slowdown in business growth as its customers enter an inventory adjustment phase against the backdrop of normalizing supply chains. We also exited our position in LVMH (New Consumer) amid concerns about the outlook for the EU economy, although the market still expects fairly robust growth for the company.

The fourth quarter

At the end of November 2023, we updated our growth themes, and currently there are eight in place: Entertainment/Experience, Tech Solution, Established Brands, New Technology, AI/Data Science, IoT/Reshoring, Demographic Dividend, and Global Aging.

Stock selection was the major contributor for the fourth quarter of 2023. Being overweight in the IT sector and good stock selection results within it were of particular note. Stock selection in the Health Care sector also contributed positively to our performance.

Among individual stocks, holding overweight exposures to structural growth companies such as selections from the AI/Data Science theme added significant value. CrowdStrike and Zscaler (AI/Data Science) rallied on expectations of continued sales growth and improved profitability following their most recent quarterly results announcement that exceeded market expectations and an upward revision of their full-year guidance. For ServiceNow (AI/Data Science), macroeconomic concerns are causing companies to become increasingly cautious about future business prospects, resulting in them prioritizing operational efficiency, which is causing them to consider consolidating business tools provided by ServiceNow. Its stock price increased as it maintained a stable growth rate supported by subscription sales from strong customer demand. On the other hand, as one of the major negative contributors, Coterra Energy (Energy/Infrastructure, new theme: Satellite) has underperformed as commodity prices, including natural gas prices, deteriorated in the fourth quarter of 2023. Commodities account for the bulk of its production.

During the fourth quarter, we made some minor adjustments to the portfolio based on fundamental considerations. In terms of major purchases, CME (FinTech, new theme: Tech Solution) was added considering the expected benefits when market volatility rises as a result of increased uncertainty. We also incorporated Inspire Medical Systems (Tech Solution) as we expect its future growth will be driven by treatments using new medical devices for patients with Obstructive Sleep Apnea. We believe this mask-free solution has the potential to replace traditional CPAP (continuous positive airway pressure) therapy. Among the major sales, we exited our position in Constellation Energy (Energy/Infrastructure, new theme: IoT/Reshoring), as the market seems to be underestimating the associated risk, namely that its stock price was lifted by the government support for zero-carbon electricity. We also trimmed our position in Apple (New Technology). Even though we continue to positively evaluate its high profitability and business stability, we determined that mid-term growth expectations from its diverse businesses operations in software and services have already been partially factored into the share price.

**NOMURA FUNDS IRELAND – GLOBAL MULTI-THEME EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook**

We are still considering several different scenarios, including the potential for a soft landing, no landing at all, or a mild recession where none of these outcomes are likely to be quite what they seem. However, we think there is one scenario that we can probably ignore in 2024. There is little reason to expect inflation to rebound to 4% or higher, although it could remain elevated just below this level for some time. That makes it likely that the Fed will not hike interest rates again and even more so likely that it will cut rates to some degree. We think the Fed’s actions will be less important in 2024 than they were in 2023, and the strength of corporate profits will be a more important market influence in 2024.

Regarding portfolio construction, we will maintain our quality bias as macroeconomic factors continue to drive sentiment, at least in the short term, and we will remain selective in taking risks. We will focus on identifying companies with balance sheet resilience, high quality management, and operational agility that we think can overcome recent headwinds and perform well over the medium to long term. Meanwhile, we will deliberately avoid companies with weak balance sheets.

Over the longer term, we uphold our focus on attractive themes such as Digital Transformation, Cybersecurity, and the transition to a carbon-neutral society. The pandemic has accelerated many emerging technology trends and has changed working styles as well as consumer behaviors. Beneficiaries will not just be technology companies but will include any company that better utilizes data and new technologies.

**NOMURA FUNDS IRELAND – JAPAN SMALL CAP EQUITY FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	1.41	2.55	30.42	41.81	49.72
<b>Benchmark</b>	0.96	2.71	23.48	35.39	37.84
<b>Out/(Under) Performance</b>	0.45	-0.16	6.94	6.42	11.88

*Source BBH; % Returns in USD. Benchmark is the Russell Nomura Small Cap (RNS) Index.  
\*Since Inception date is 7th February, 2020.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund recorded a return of 30.42% compared with the benchmark return of 23.48% and therefore outperformed the benchmark by 6.94%.

The benchmark (RNS index) rose by 23.48% in the calendar year ending December 2023, during which it recorded performance figures of +5.6% in the first quarter, +9.0% in the second, +4.4% in the third, and +2.7% over the fourth quarter in local currency terms. The RNS index underperformed relative to the TOPIX index, which rose by 28.3% over the same review period. In the first quarter, the Japanese stock market experienced a sharp decline in March due to the failure of several US regional banks and credit market instability undermining some major European financial institutions. However, Japanese markets later recovered, helped by changes to the Tokyo Stock Exchange's corporate governance policies, which have raised expectations of capital efficiency improvements among Japanese companies. During the second quarter, the Japanese stock market rose as the yen weakened following the decision at the Bank of Japan's (BOJ) Monetary Policy Meeting to maintain its current easy monetary settings. Foreign investors also supported the market as they continued to pour funds into Japanese equities. Moving into the third quarter, in July the BOJ announced that its Yield Curve Control (YCC) settings would become more flexible. The Federal Reserve raised interest rates in the same month and raised its September outlook for policy rates. Equity markets, particularly value stocks, appreciated as long-term interest rates rose in Japan and the United States. In the fourth quarter, the BOJ revised its YCC policy in October, and towards the end of the year there were increasing expectations that the US Fed would halt its interest rate hikes. Japanese stocks were weighed down by a stronger yen in October. However, firm US share prices in the wake of lower long-term US interest rates supported the Japanese equity market.

Sector allocation had a positive effect on the relative performance for the annual review period. While an underweight position in the Rubber Products sector and an overweight position in the Chemicals sector detracted from the relative performance, the portfolio benefitted from overweight positions in the Metal Products and Construction sectors.

Stock selection added value to the relative performance. Positive stock selection contributions over the review period came from positions in Central Automotive Products in the Wholesale Trade sector and Osaka Steel in the Iron & Steel sector. Meanwhile, holdings in Nippon Shinyaku in the Pharmaceutical sector and Open Door in the Information & Communication sector had a negative impact on the Sub-Fund's relative performance. Central Automotive Products is financially sound and highly profitable, with nationwide sales of proprietary automotive products such as body coatings for new vehicles. Meanwhile, Osaka Steel is an electric furnace steelmaker affiliated with Nippon Steel. As several activist investors have reported large stakes, other investors were expected to buy the stock in anticipation of efforts to improve governance and unwind the parent company-subsidary listing. Nippon Shinyaku is a pharmaceutical manufacturer that focuses on four areas: urology, hematology, intractable/rare diseases, and gynecology. Its stock price fell because distribution of its nucleic acid drugs business in the US market has been slower than expected. Meanwhile, Open Door operates "Travelko," a travel comparison site. Due to poor demand for travel following the Covid-19 pandemic, the company's business performance has been sluggish for several years. Currently, Japanese domestic travel demand is approaching pre-pandemic levels, while overseas travel demand has lagged behind in terms of traveler numbers.

In this review period, we added a new portfolio position in Open Door. The company has been slow to recover earnings, partly because demand for international travel accounted for half of its sales before the pandemic. However, in anticipation of a recovery in domestic and international travel demand, we determined the current stock price levels to be attractive and accordingly increased our position. On the other hand, we sold the position in Osaka Soda in the Chemicals sector for profit taking. The stock price soared on expectations of growth in purification materials for diabetes drugs.

**NOMURA FUNDS IRELAND – JAPAN SMALL CAP EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook**

In 2023, the RNS index appreciated by 23.48%, the RNS Value Index rose 31.6%, and the RNS Growth Index rose 11.2%. The small-cap growth vs value stock valuation gap, which had been widening since the Covid-19 pandemic, has narrowed over the past two years and has now normalized to the pre-pandemic levels seen in 2018 or 2019. However, looking back to pre-pandemic figures, it is apparent that even when the valuation gap had historically widened, market participants still tended to prefer growth stocks. Considering that there has been broad progress in the capital efficiency improvement measures of Japanese companies, supported by market reforms at the Tokyo Stock Exchange, value stocks still look attractive today. Our portfolio has a barbell structure in terms of its exposure to value and growth stocks (i.e. no particular style bias), but we have maintained a position with a tilt towards value. While we maintain this positioning, we expect it to normalize very slowly if value stocks continue to outperform. We will continue to base our investment decisions on thorough fundamental analysis. At the end of December 2023, the Price-to-Book Ratio (PBR) of the benchmark RNS Index was 1.08 and the portfolio’s PBR was lower at 0.90 (Source: Nomura Asset Management).

We will continue to actively seek out companies whose stock prices are currently judged to be trading below their "intrinsic value". We will select stocks from a wide range of industries, particularly companies that have not received much attention from the market despite their excellent business strategies, companies where management has shown signs of change due to internal reforms, and companies where capital efficiency is expected to improve due to changes in their attitude toward shareholder returns. In the Japanese stock market, we have seen increasing involvement of activist funds. Year by year, traditional asset management companies are engaging more with listed companies, and there is increasing demand to improve capital efficiency. In addition to the corporate governance code, external pressure has led to a gradual rise in the number of small-cap companies that are working to improve corporate governance and investor relations while adopting a more shareholder-friendly management approach. We continue to focus on companies with rich cash flows, and we also emphasize progress in improving the governance of Japanese companies. This includes issues such as the dual listing of parent and subsidiary companies.

While we tend to focus on determining whether it is possible to maintain long-term sustainable growth and a high ROIC (return on invested capital) in order to identify the “intrinsic investment value” of a company, we are also paying attention to whether it is possible to maintain or improve ROE (Return on Equity) through appropriate capital policies. The main points of this analysis are summarised in our assessment of how competitive the company is (i.e., its strengths and weaknesses). In addition to analysing the strengths of business operations, we also place importance on analysing what we call the "vitality" of a company, such as the quality of management leadership and employee awareness. In addition to analysing financial statements, which are the result of management actions, we believe that stable investment performance can be achieved over the long term by conducting careful research and analysis of companies from the viewpoint of management quality.

**AMERICAN CENTURY EMERGING MARKETS SUSTAINABLE IMPACT EQUITY FUND  
INVESTMENT MANAGER'S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	5.02	7.64	2.81	-28.10	-5.80
<b>Benchmark</b>	3.91	7.87	9.83	-14.47	8.52
<b>Out/(Under) Performance</b>	1.11	-0.23	-7.02	-13.63	-14.32

*Source BBH; % Returns in USD. Benchmark is the MSCI Emerging Markets (Net) Index.  
\*Since Inception date is 4th March, 2020.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 2.81% compared with the benchmark return of 9.83% and therefore underperformed the benchmark by 7.02%.

The investing environment of the prior year was characterized by shifting expectations for central bank monetary policy, with the year ending on an upswing as markets repriced the probability of a soft landing in the U.S. Emerging markets (EM) equities trailed their developed markets counterparts, largely due to weakness in China. Uncertainty around the country's slowing economic growth weighed on investor sentiment, as optimism about an accelerated, post-pandemic reopening faded amid continuing property market woes and weaker-than-expected economic data, despite government support. Most other EM markets outperformed China, led by strength in Latin America. Mexican equities benefited from the country's linkage to the U.S. and nearshoring potential. Brazilian inflation data continued to ease, supporting that market. Indian stocks advanced amid positive investor sentiment and large-scale foreign buying. On a sector basis, consumer discretionary was the largest relative detractor during the period, driven by a combination of stock selection and an overweight to the sector. Positioning in Chinese education stocks, which declined during the period, was a key driver of underperformance. In contrast, stock selection and an underweight allocation in materials contributed on a relative basis. The single-largest detracting stock was AIA Group. Despite the insurer's solid fundamentals, shares declined amid lowered earnings estimates due to a slowing macroeconomic environment and growing economic uncertainty in China. Sub-Fund outflows also weighed on the stock at times as foreign investors trimmed exposure to Chinese shares. Leejam Sports was the largest individual contributor. The fitness centre operator benefited from increased utilization of existing centres, improving margins and cost optimization, amid strong growth in the underpenetrated Saudi Arabian market and an accelerating ramp-up in the female segment. From a geographic perspective, holdings in China, Taiwan and Hong Kong weighed the most on relative returns. Holdings in Saudi Arabia, Mexico and the Philippines were among the largest contributors.

**Investment Outlook**

After a challenging year, we enter 2024 with a positive outlook for emerging markets (EM) equities. While EM trailed developed markets (DM) stocks in 2023, we believe EM economies may benefit from a continuing shift of relative growth momentum. Compelling valuations relative to DM peers is a key fundamental driver for EM in 2024, in our view, as is the fact that many global investors remain underallocated to EM equities.

EM central bank policy represents a potential tailwind, given the potential for continued easing, especially in Latin America. Many countries in the region have made considerable progress in tempering inflation because their central banks aggressively hiked interest rates well before their counterparts in DM. With inflation pressure easing, monetary policy easing has begun and has the potential to propel EM economic growth.

We believe Latin America is positioned to take advantage of concerns around global supply chains and U.S.-China trade tensions. The region offers significant potential in agriculture, green energy and minerals amid the world's carbon-reduction transition. The region's central banks were early interest rate hikers, and while the quest to bring inflation down to target is a work in progress, there has already been tangible and meaningful progress. We believe Mexico stands to benefit from its proximity to the U.S., competitive labor costs, demographics and an established manufacturing base.

The market has recalibrated expectations for China. The recovery from pandemic lockdowns proved weaker than expected, due to property market turmoil and weak private sector confidence. Pressure from the housing market has persisted, but recent policy signals indicate Beijing's desire to support growth. We believe targeted efforts will likely stabilize growth, including fiscal and monetary stimulus, easing housing policy and measures to stabilize foreign trade and investment. So far, support has not been sufficient to lift investor sentiment. However, internet companies continue to deliver robust results, while health care and automotive stocks have seen earnings upgrades. International travel from China is recovering, which could benefit select hotel and consumer-oriented companies in the region.

**AMERICAN CENTURY EMERGING MARKETS SUSTAINABLE IMPACT EQUITY FUND  
INVESTMENT MANAGER'S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

We are finding opportunities in India and Saudi Arabia. Indian stocks outperformed the region in 2023, and the market appears well positioned with resilient domestic demand anchoring growth amid an improved macroeconomic environment. Demographic trends and potential benefits from reshoring may also provide tailwinds. We believe a recovery in rural demand will likely boost already robust consumption growth as the drag from higher inflation fades. In our view, Saudi Arabia has a compelling long-term thesis based on structural reform that differentiates it from other commodity-heavy markets.

**AMERICAN CENTURY US FOCUSED INNOVATION EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	7.00	11.23	37.50	N/A	-13.15
<b>Benchmark</b>	3.92	13.62	46.47	N/A	10.87
<b>Out/(Under) Performance</b>	3.08	-2.39	-8.97	N/A	-24.02

*Source BBH; % Returns in USD. Benchmark is the MSCI USA Growth Index.  
\*Since Inception date is 30th June, 2021.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund returned 37.50% compared with the benchmark return of 46.47% and therefore underperformed the benchmark by 8.97%.

There was considerable volatility during the year as investors weighed the impacts of the inflationary environment, rising interest rates as the Fed sought to cool inflation and the prospects for a recession. As the year ended, there were clear signs that inflation was moving closer to the Fed’s desired level and that the economy would maintain modestly positive growth - a soft landing. As a result, stocks posted a very strong return for the year across all market capitalizations, led by large-cap growth stocks. The S&P 500 Index ended just short of its all-time high.

Stock selection in industrials and an overweight allocation in the sector helped drive underperformance. Paylocity Holding, a provider of payroll and human resources software, reported strong revenue and earnings but offered disappointing revenue guidance. Japan-based automation company FANUC fell as revenues, new order volumes and margins all declined. The company said it does not expect to see a meaningful recovery in demand until 2024. Despite cyclical weakness, particularly in China, we believe it is a leader in the secular shift to factory automation and robotics. Elsewhere, Facebook’s parent company Meta Platforms outperformed after reporting quarterly earnings that beat expectations. The company’s advertising business has stabilized and finally moved beyond the impact from Apple’s 2021 privacy changes. We own Meta but hold less than the benchmark, which hurt relative performance. The alcoholic beverage producer Constellation Brands lagged on concerns about weakness in its wine and spirits segments. Nevertheless, Constellation continues to gain market share in the beer market. It also recently divested its low-end wine business and is building more efficient bottling plants, among other positive changes.

The consumer discretionary sector led positive contributors. Tesla was a top contributor in the sector. The electric vehicle maker rebounded sharply from a difficult 2022. New car deliveries beat expectations, buoyed by price cuts on some models. The stock also benefited from expectations that artificial intelligence will advance autonomous driving. Toward the end of 2023, Tesla rose on the rollout of its long-awaited Cybertruck and the prospect of lower interest rates. Amazon reported good quarterly results led by its international retail business. Also, margins improved notably. Customers focused on developing artificial intelligence capabilities and achieving greater information technology efficiency in an uncertain economic environment should drive adoption of Amazon’s cloud computing services. NVIDIA was one of the year’s biggest winners. The chipmaker’s stock surged 25% in one trading day after increasing its future business guidance well above Wall Street analysts’ expectations. NVIDIA’s growth is being driven by its data center business, which reflects the demand for computing power required for artificial intelligence applications. Salesforce.com, a provider of cloud-based customer relationship management software, outperformed after the company reported better-than-expected earnings and offered positive guidance. Much of the upside is coming from the integration of artificial intelligence into salesforce.com’s products, spurring strong customer demand.

**Investment Outlook**

Market volatility is likely to remain high as investors shift their focus from inflation and Fed interest rate policy to fundamentals such as the pace of economic and corporate earnings growth. Consensus earnings forecasts for 2024 predict solid growth year over year. The investment manager believes that this is optimistic given the current level of interest rates, the shape of the yield curve and the level of economic growth. As a result, the investment manager is looking for companies with the financial strength to navigate an extended period of economic weakness, in addition to those benefiting from enduring growth trends. Examples include digital advertising and business transformation, the reliance on the cloud and mobile, process automation and electric vehicle adoption, among others.

**AMERICAN CENTURY US FOCUSED INNOVATION EQUITY FUND  
INVESTMENT MANAGER'S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

Owning solid businesses is more important than making investment-style calls. There is a tendency to view the investing world in style terms such as growth versus value or small versus large. The hazard of making such top-down market calls is obvious at times such as these, when economic uncertainty is so high. Indeed, the investment manager thinks about the world a little differently. Instead of thinking about where a company might fit in a style framework, the investment manager would question, "Is this a solid business?" and "Where is it in its stage of development?" The investment manager believes buying and holding young, growing businesses that are well positioned competitively is the best way to compound value for shareholders over time.

Business conditions vary quarter to quarter and year to year, and stocks go up or down in the near term for any number of reasons. But the investment manager believes companies with solid long-term growth prospects are better situated to ride out uncertainty relating to economic and earnings growth. As a result, the investment manager believes that the Sub-Fund investments have significant long-term fundamental growth opportunities, which should ultimately lead to wealth creation over time. As ever, the investment manager will remain vigilant in monitoring the fundamental progress and risks of the investments. The investment manager will utilize short-term volatility as an opportunity to add to positions when they see share prices disconnect from their assessment of long-term fundamentals.

Individual security selection is preferable to binary market calls. There is a tendency to think in binary terms about potential Fed rate changes and economic uncertainty. The investment manager would argue that individual companies respond differently to macroeconomic conditions. Indeed, the investment manager is finding opportunities in diverse companies developing new products and technologies that are transforming entire sectors and industries. The investment manager does not view these as top-down solutions. Rather, the investment manager believes the best approach is to rely on bottom-up, fundamental research to identify individual companies innovating and reimagining their competitive landscape. For that reason, the investment manager will buy dynamic, innovative growth companies with healthy balance sheets and cash flows that they believe can improve throughout the economic cycle.

**NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY GROWTH FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	1.77	6.28	29.05	N/A	10.46
<b>Benchmark</b>	-0.23	2.04	28.26	N/A	32.42
<b>Out/(Under) Performance</b>	2.00	4.24	0.79	N/A	-21.96

*Source BBH; % Returns in USD. Benchmark is the TOPIX Index.  
\*Since Inception date is 30th July, 2021.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund recorded a return of 29.05% compared to the benchmark return of 28.26% and therefore outperformed the index by 0.79%.

The Japanese equity market rose throughout the first quarter of the review period, supported by expectations that the US economy would be able to avoid a recession.

Of the Sub-Fund holdings, Renesas Electronics added value. Its stock price rose sharply, fueled both by solid earnings against a backdrop of improved inventory management capabilities, mainly for automotive semiconductors, and share buyback announcements. Suggestions that the company might restore dividends also supported the share price. Meanwhile, the position in Nihon M&A Center Holdings detracted from the portfolio’s relative performance. The company is spending time improving its turnover and internal structure, but the share price fell due to sluggish earnings as sales lagged behind.

In terms of investment activity, we increased our purchases of Internet Initiative Japan after introducing this stock to the portfolio during the October–December 2022 quarter. Through its responsible approach to IT infrastructure, which includes promoting internet and related security, the company has made a particular contribution to SDG No. 9, “Industry, Innovation and Infrastructure”. We also determined that the company would be able to maintain a high cash-flow return on invested capital (CFROIC). Meanwhile, the Sub-Fund reduced the position in Shimano. The company lowered its outlook for cash-flow return on invested capital (CFROIC), indicating that the surge in demand for bicycle gears and components had run its course. The Sub-Fund did not open any new positions or perform any liquidations in the first quarter.

The Japanese equity market also advanced throughout the second quarter. Economically sensitive stocks were especially strong thanks to the depreciation of the yen against the US dollar.

Of the Sub-Fund holdings, Renesas Electronics added value for another consecutive quarter. Its stock price rose following the skyrocketing value of semiconductor-related equities due to solid business performance in its automotive semiconductor business and increased demand in generative AI-related technology. Meanwhile, the position in Unicharm detracted from the portfolio’s relative performance. Even though the company had entered a profit recovery phase thanks to lower raw material prices, while passing on prices to customers, the company’s share price slumped following results for the first quarter that fell short of market expectations after the company had missed its sales targets.

In terms of investment activity, we opened new positions in Tokio Marine Holdings and Denso. The former has contributed to loss avoidance in the non-life insurance business, as well as SDG No. 13, "Climate action." We believe the company will be able to maintain a high ROE over the medium term. The company excels in M&A, and we are focused on its expanding overseas business. Denso operates automotive electronics-related businesses and has made a particularly strong contribution to SDG No. 13, "Climate action." We determined that the company will be able to maintain a high CFROIC over the medium term. Denso has strength in inverter technology, and we have taken particular notice of prospects for growth in its electrical components business, which is not exclusively aimed at Toyota. Meanwhile, we exited the positions in Makita and Pigeon. Makita has taken time to reduce its inventory, and its financial position has deteriorated; we determined that its low CFROIC would continue. There were concerns that there would also be some deterioration in both Pigeon’s sales of its mainstay child-care products and CFROIC due to the declining birthrate in China.

The Japanese equity market continued to advance throughout the third quarter, supported by expectations that a US recession could be averted.

---

**NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY GROWTH FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

Of the Sub-Fund holdings, Toyota Tsusho added value. The stock rallied due to announcements of strong performance from its Africa business and an upward revision to its corporate guidance. Meanwhile, the absence of a position in Toyota Motor and the holdings in Sysmex detracted from the relative portfolio performance. Toyota’s stock price continued to push higher due to strong auto sales, while Sysmex fell due to concerns that anti-corruption measures in China would hamper demand.

In terms of investment activity, we opened a position in Sankyu. The company has a strong capacity to mobilize personnel and is actively engaged with climate change mitigation policies. It is undertaking decarbonisation-related construction work at customer plants and therefore the company is making a particular contribution to SDG No. 9, “Industry, Innovation and Infrastructure”. In our assessment, Sankyu will also be able to maintain a high level of CFROIC over the medium term. On the other hand, we exited the position in Nidec. The company’s high-profit hard disk drive (HDD) motors business has been shrinking, and in the face of fierce competition it has been difficult for EV motors to turn a profit. Meanwhile, the macro environment will deteriorate due to declining automobile production and rising costs. Finally, we made the sale after determining that a slump in its CFROIC level could be prolonged due to frequent succession changes.

The Japanese equity market continued to advance throughout the fourth quarter, with gains concentrated in growth stocks following the apparent peak in US interest rates.

Of the Sub-Fund holdings, Denso detracted from the relative portfolio performance. The company’s share price fell due to concerns about near term supply and demand dynamics for the stock after announcing it would unwind its group cross-shareholdings. Meanwhile, Shin-Etsu Chemical, Disco, and Tokyo Electron added value to the portfolio. Shin-Etsu Chemical’s stock price rose with increasing expectations for improvement in the vinyl chloride resin business following a peak in US interest rates, and Disco and Tokyo Electron’s shares rallied after the semiconductor market bottomed out and led to higher demand expectations for semiconductor manufacturing equipment for power and AI use semiconductors.

In terms of investment activity, we opened a new position in Tokyo Electron. Being responsible for the manufacturing technology of high-performance semiconductors, it has made a particular contribution to SDG No. 9, “Industry, Innovation and Infrastructure,” and we have also determined that it will be able to maintain a high cash-flow return on investment (CFROIC) in the medium term. We also believe we can expect growth in products with high value added through the development of new technologies. We also added a new position in Isuzu Motors. By improving logistics efficiency due to the diminishing number of commercial vehicle industry players, the company has made a particular contribution to SDG No. 11, “Mobilize Sustainable Cities and Communities,” and we have also determined that it will be able to maintain a high CFROIC in the medium term. Meanwhile, we exited the position in Nihon M&A Center. Its CFROIC, which had hitherto been at a high level, began to decline following an increase in the number of consultants leaving the company due to accounting irregularities. We determined that an expedient recovery was unlikely in the future. Finally, we also exited the position in MonotaRO. Business models and investment plans that fit into a deflationary environment no longer function well. Even so, the company decided to invest in logistics facilities where investment costs were significantly higher than expected. Accordingly, taking into account the declining growth rate and the expansion of fixed assets, we determined that we could expect a future decline in CFROIC.

**Investment Outlook**

We expect the TOPIX to fluctuate in a range between 2,040-2,580 points over the next quarter.

Monetary tightening measures over the past two years in Europe and the United States have helped to curb inflation and are starting to slow the global economy. Although there are downside risks to the economy in the short term, world economic output is expected to move towards a recovery in the medium term as inflation subsides. While the equity market has begun to price in a rate cut and an economic recovery, there are sectors and stocks that still offer attractive investment opportunities given the medium term outlook. However, in the short term the outlook for the timing and the eventual level of interest rate cuts and the economic recovery is likely to fluctuate depending on global economic and inflation trends.

**Corporate performance and valuation**

Operating profit forecasts for the Russell Nomura Large Cap Index (excluding financial institutions) suggest an increase of 14.7% for the fiscal year to March 2024. The assumed exchange rate is JPY142.95/US dollar and JPY153.68/Euro. The expected TOPIX EPS on a top-down forecast basis is 156.30. At a TOPIX level of 2400 points, the expected P/E ratio is 15.4 with an actual PBR for the fiscal year to March 2023 of 1.44.

Operating profit forecasts for the Russell Nomura Large Cap Index (excluding financial institutions) suggest an increase of 9.4% for the fiscal year to March 2025. The assumed exchange rate is JPY145.0/US dollar and JPY154.0/Euro. The expected TOPIX EPS on a top-down forecast basis is 167.64. At a TOPIX level of 2400 points, the expected P/E ratio is 14.3.

**NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY GROWTH FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

Investment strategy

We believe it is necessary to identify changes in social structure such as public awareness of work style shifts and digital investment brought about by the pandemic; changes in economic security policy due to increasing geopolitical risks such as those relating to energy, raw materials, and critical components; and changes in environmental policies in Japan, the United States, and Europe. It will also be necessary to review the profitability outlook for the groups of stocks in which we invest.

Recently, there have been price increases due in part to higher raw material costs and an economic downturn due to global monetary tightening. In these conditions, we believe the market will test the ability of companies to execute business strategies that will make stable profit generation possible. As part of our investment strategy, we will continue to monitor carefully the ability of long term stable-growth companies to respond to environmental changes and their ability in terms of business execution.

Although the global economy is expected to slow down, the portfolio’s holdings have strong business execution capabilities, and we believe stable profit growth in the future could lead to steady investment returns. In addition, in light of the recent shift in focus towards ESG themes, it has become increasingly important to expand business initiatives based on the social value of products and services. We believe the portfolio is composed of highly attractive investments. We will continue to focus on improving returns in the medium term by appropriately rebalancing (adjusting the investment weightings) in reference to short-term stock price overreactions. Meanwhile, we will assess the degree of corporate social value created in the medium to long term and the levels of CFROIC that can be realized in the future.

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	0.14	3.20	27.71	N/A	24.98
<b>Benchmark</b>	-0.23	2.04	28.26	N/A	25.23
<b>Out/(Under) Performance</b>	0.37	1.16	-0.55	N/A	-0.25

*Source BBH; % Returns in USD. Benchmark is the TOPIX Index.  
\*Since Inception date is 30th March, 2022.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund recorded a return of 27.71% compared to the benchmark return of 28.26% and therefor underperformed the benchmark by 0.55%.

The Japanese equity market rose significantly over the first half of calendar year 2023. In addition to the easing of concerns that the US economy might fall into recession, investors took a favourable view of developments such as the relatively macroeconomic environment in Japan, the weakening of the yen against the US dollar, and expectations for the Tokyo Stock Exchange’s reforms for companies with price-to-book ratios falling below one. There was pronounced appreciation among large cap stocks, and among economically sensitive sectors like Electronics, Automobiles, Capital Goods, and Commodities.

Of the Sub-Fund holdings, Renesas Electronics added the most value. The company announced relatively strong corporate earnings results due to changes in management’s focus on profitability and improvements in its ability to capture demand trends. Compared to the past, these changes were evaluated more positively this time. The second highest contributor to the portfolio performance was NEC. Investors had a favourable view of the company’s achievements, and its guidance significantly exceeded market expectations, partly due to a resolution of the semiconductor shortages. In third place was Asics, which is achieving earnings growth with improved profitability by focusing resources on higher margin business. The underperformance of Benesse Holdings, Biprogry, and Casio caused these holdings to have the largest negative impact on the portfolio’s relative portfolio performance. Order and sales results fell below market expectations.

In terms of investment activity, we opened new positions in five companies and liquidated the positions in two.

NTT was the largest purchase. The company has excellent cost control, and we judged that we can expect stable earnings growth and high shareholder returns from synergy through integration. The second largest purchase was Sony. The company has a wealth of content and we expect the company to expand over the medium term, especially in its game business. The third largest purchase was TOTO. Despite a slowdown in sales of advanced ceramic components for semiconductor manufacturing equipment, we believe its exposure to China’s real estate market offers an attractive investment opportunity given the scope for a demand recovery.

Astellas Pharma was the largest sales transaction, given the company’s delayed opportunity to re-evaluate a new drug development pipeline. The second largest sale was of Asahi Kasei Corporation, which has become less attractive as an investment opportunity in relative terms given that its forward guidance for the fiscal year ending March 2024 has been below market expectations. The third largest sales transaction was Renesas Electronics. We trimmed the position to take profits after its share price had rallied significantly.

The Japanese equity market continued to rise significantly over the second half of calendar year 2023, with catalysts similar to the first half of the year. In addition to the easing of concerns that the US economy might fall into recession, investors took a favourable view of developments such as the relatively benign macroeconomic environment in Japan, the weakening of the yen against the US dollar, and expectations for the Tokyo Stock Exchange’s reforms for companies with price-to-book ratios falling below one. In addition to the market favouring value stocks, there was pronounced appreciation among large cap stocks and among economically sensitive sectors like Financials, Automobiles, Electronics, and Commodities.

**NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY CORE FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Performance Commentary (continued)**

Of the Sub-Fund holdings, Renesas Electronics again added the most value. The company shared relatively strong corporate results due to changes in management’s focus on profitability and improvements in its ability to capture demand trends. Compared to the past, these changes were evaluated more positively this time. The second highest contributor to portfolio performance was NEC. Investors had a favourable view of the company’s improved profitability in its domestic IT services business as well as structural reforms and strengthened shareholder returns. In third place was Canon Marketing Japan, which benefitted from growth in its IT solutions business. Meanwhile, underperformance by Yamaha, TOTO, and Daiichi Sankyo had the largest negative impact on the portfolio’s relative performance. Yamaha and TOTO suffered from downgraded corporate earnings forecasts due to the prolonged inventory adjustment processes. Daiichi Sankyo was negatively impacted by dampening expectations for the expanded application of its new cancer drug, for which there are long-term growth expectations.

In terms of investment activity, we added new positions in eight companies and liquidated the positions in six.

Sony was the largest purchase. The company has a wealth of content and we expect the company to expand over the medium term, especially in its game business. The second largest purchase was NTT. The company has excellent cost control, and we judged that we can expect stable earnings growth and high shareholder returns from synergy through integration. The third largest purchase was Daiichi Sankyo. In our assessment, the company was attractively valued as its stock price had remained sluggish in contrast to its high growth potential over the medium term.

Recruit Holdings was the largest sales transaction. We reduced its portfolio weighting in light of its stock price rally. The second largest sale was Astellas Pharma, given the company’s delayed opportunity to re-evaluate a new drug development pipeline. The third largest sales transaction was Daikin Industries. We reduced the portfolio weighting to guard against the risk of the share price appreciating and a slowdown in its near-term performance.

**Investment Outlook**

Monetary tightening measures over the past two years in Europe and the United States have helped to curb inflation and are starting to slow the global economy. Although there are downside risks to the economy in the short term, world economic output is expected to move towards a recovery in the medium term as inflation subsides. While the equity market has begun to price in a rate cut and an economic recovery, there are sectors and stocks that still offer attractive investment opportunities given the medium-term outlook. However, in the short term the outlook for the timing and the eventual level of interest rate cuts and the economic recovery is likely to fluctuate depending on global economic and inflation trends.

We believe companies with business operations that can contribute to achieving a sustainable society can improve their enterprise value over the long term. We invest in these companies based on the philosophy that they are investment opportunities that contribute to strengthening social initiatives and can achieve high investment performance. In terms of contributions, we value a carbon neutral society, the conservation of natural capital, and achieving a healthy, prosperous society. We are investing in companies that contribute to these areas.

In selecting stocks, we base decisions on individual fundamentals in light of changes in the external environment. In this context, we will focus on identifying equities whose valuation levels are cheap relative to fundamentals among firms with impressive medium- to long-term growth potential, which are highly competitive and which are expected to undergo structural changes.

At present, we are focusing on companies that are less negatively affected by changes in the external environment and those that are expected to benefit from structural reforms such as reducing fixed costs. We are also looking at semiconductor-related companies with structural growth prospects, companies that have high medium-term growth potential in the face of challenging short-term performance, companies that are expected to benefit from environmental changes such as decarbonisation, and companies that are reforming their balance sheets as well as business portfolios.

**NOMURA FUNDS IRELAND – ASIA SUSTAINABLE EQUITY FUND**  
**INVESTMENT MANAGER’S REPORT (CONTINUED)**  
**For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	4.27	7.36	4.56	N/A	-10.17
<b>Benchmark</b>	4.65	7.84	7.36	N/A	-6.06
<b>Out/(Under) Performance</b>	-0.38	-0.48	-2.80	N/A	-4.11

*Source BBH; % Returns in USD. Benchmark is the MSCI All Country Asia Pacific Ex-Japan Index.  
\*Since Inception date is 31st March, 2022.*

**Performance Commentary**

For the year ended 31st December, 2023, the Sub-Fund posted a return of 4.56% against the benchmark return of 7.36%, therefore underperforming the benchmark by 2.80%.

For country/asset allocation, the overweight position in Korea, underweight positions in China and Thailand added value to relative performance over the period while the overweight position in Hong Kong and underweight position in India and Australia detracted value.

As for the stock selection in China, the overweight position in ENN Energy Holdings was main dragger as its gas distribution business suffer from natural gas price hike and demand volume decline. Li Auto and outperformed backed by strong its eco-friendly car sales. The overweight position in Lenovo added value due to demand recovery for PC in China and expectation for gaining order for its AI-server products. The underweight position in internet stocks such as Alibaba Group Holdings, JD.com and Meituan contributed positively as domestic consumption has been remained sluggish. In Hong Kong, the overweight position in AIA Group and Hong Kong Exchange and Clearing (HKEX) detracted value. AIA Group fell due to concern for slowdown insurance sales in China. HKEX underperformed dragged by low turnover of China related stocks listed in Hong Kong.

In Korea, the overweight position in the EV battery stocks such as SK Innovation, Samsung SDI and LG Energy Solution detracted value Their share price dragged by battery order delay by some auto OEM clients due to inventory digestion as a result of weak EV demand. On the other hand, the overweight position in SK Hynix added value on the expectation for DRAM price recovery and higher revenue growth in AI related chips. In Taiwan, the overweight position in Taiwan Semiconductor added value due to the expectation for higher utilization of its fab and more sales contribution for AI related chips. However, some AI related stocks which the Sub-Fund does not hold outperformed massively such as Quanta Computer and Mediatek.

In Australia, the underweight position in material stocks such as BHP and Fortescue detracted value as the material stocks outperformed backed by resilient iron ore price movement. IDP Education fell due to the concern for tightening student visa policy in Australia and Canada. In Philippine, ACEN share fell due to the increasing interest rates costs and construction costs for new renewal energy projects.

**Investment Outlook**

As we enter 2024, the probably the biggest driver for the year could be when the Federal Reserve changes course and starts cutting rates, including by how much. Fed Chair Powell appears to have prevailed in the battle against inflation, while employment is definitely slowing. The resilience of the US economy has been a puzzle and a surprise, so the question is whether the subsequent slowdown will be a soft landing or a short recession, anything worse would be a downside risk to the world and the markets. We would not expect any let up in geo-political events nor in local politics, which could have wider ramifications as the world enters a huge election year with more than half the global population voting to elect their respective governments. The November US elections will be a closely watched event, especially with the prospect of a Trump comeback and therefore a change in policies. We had expected a short sharp recession in the US with rate cuts towards the end of 2023; and while that forecast has been pushed out, the prediction of lower market interest rates did turn out to be correct. We still start the year with the prospect of a short sharp recession, but that does not threaten our broadly sanguine view of the equity markets. The “Fed put” seems to be in play purely from a policy perspective and the S&P can be expected to deliver decent earnings growth for the year. With rates heading lower through the year and keeping the US dollar in check if not driving it lower, the attraction of a high risk free US dollar return will probably turn into a tailwind for Asian currencies and flows into the regional markets. While Asia has lost a long battle to the US markets in terms of performance, this year could be more rewarding, and therefore we believe in a better year for Asia in 2024 compared to the Western developed markets.

---

**NOMURA FUNDS IRELAND – ASIA SUSTAINABLE EQUITY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

Within Asia, China has been a huge disappointment, as reflected in the performance of the domestic markets and the drag on Hong Kong as well. The HSCEI Index now has negative returns for three consecutive years and is on the verge of breaking the 2008 Global Financial Crisis (GFC) lows, with sentiment within the country at its lowest and frustration among both foreign and domestic investors at its highest. In our view, it is also safe to conclude that there is a big mismatch between investor expectations and what President Xi wants out of the Chinese economy. Therefore, it is only fair to expect a lower growth rate even as the desire of the authorities to deliver 5% growth finds little credibility. Common Prosperity as a theme is still very much in play, and the property sector has no immediate solutions. The desire to avoid a sudden collapse in currency value will prevent any big bang stimulus announcements and it therefore seems far-fetched to expect any meaningful recovery. The only glimmers of light for the Chinese market are valuations and dividends in some parts of it. We have therefore decided to capitulate and move China to an underweight position, especially when combined with Hong Kong and more so in view of these markets’ diminishing weights in the Asia region. The biggest risk to our underweight position is the possibility of mean reversion in market performances, but having now borne the brunt of the underperformance we now prefer to look out for better visibility before returning to a more bullish call.

The big move from overweight to underweight releases a lot of funding, which in turn will be used to increase the overweight exposure to India and move Taiwan to an overweight position too. While they could be interpreted as momentum driven moves, these are markets where stock selection has worked in our favor and, more importantly, they both demonstrate more visibility than most others. AI is definitely an ongoing trend and more companies in Taiwan capture this than anywhere else; although stocks have done phenomenally well last year, this could well prove to be a secular growth trend. Also, the TSMC and technology ecosystem is helping the overall economy and the entrepreneurial nature of the country along. Taiwan’s recent elections also put another uncertainty behind. India on the other hand has significant momentum in terms of economic activity, further aided by almost a near certain market-positive political outcome of the Modi government returning to power. Both the economy and the markets are now significant in size and more importantly, tremendously broad based providing huge returns at a bottom up level and significant opportunities for investment. The strong performance of the real estate sector is a case in point of the above factors. India is now a significant overweight position in our Asia ex-Japan allocation. South Korea is a market of two halves – the memory cycle is recovering and will have a large earnings growth number of a negative base, on the other hand the non-technology parts of the Korea market, including the much followed EV segment, seem to be losing favor. While retaining the overweight exposure to the technology segment in Korea, we remain underweight in this market overall.

Smaller ASEAN markets have been disappointing overall. Thailand’s political woes continued and the economy remains sluggish. Malaysia is a similar case. Indonesian momentum withered away, and the likely political outcome from the election later this year does not look market positive regardless of the result. New economy stocks disappointed a lot and failed to increase the breadth of the markets. On the positive side though, the currency is very stable and broader macro prospects are not negative. From an economic point of view the Philippines has everything in its favor now, including data on inflation, interest rates and twin deficits, but the markets suffer from a lack of size and liquidity. Finally, Singapore continues to make attempts to reinvent itself as an economy and has the support of a strong currency, providing investment opportunities. Overall, therefore we are neutral in the ASEAN sub-region with a favorable view on the Philippines and Singapore, neutral on Indonesia and negative on Thailand and Malaysia. In the near term, China might continue to weigh on the region’s performance but we expect that to be nullified by the tech heavy markets of Taiwan and South Korea and these two along with India will also be expected to do the heavy lifting for the year resulting in a net positive outcome for Asia. There is potential upside risk if China is miraculously able to demonstrate some recovery, especially in markets that are totally out of favor for now.

**NOMURA FUNDS IRELAND – CORPORATE HYBRID BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	3.31	6.27	N/A	N/A	6.30
<b>Benchmark</b>	2.90	5.51	N/A	N/A	5.49
<b>Out/(Under) Performance</b>	0.41	0.76	N/A	N/A	0.81

*Source BBH; % Returns in EUR. Benchmark is the ICE BofA Global Hybrid Non-Financial 5% Constrained Custom Index.  
\*Since Inception date is 9th August, 2023.*

**Performance Commentary**

For the period ended 31st December, 2023, the Sub-Fund returned 6.30% compared with the benchmark return of 5.49%, and therefore outperformed the benchmark by 0.81%.

Whilst we do not place any emphasis on short-term numbers, we are encouraged by the fundamental performance of many of the issuers we own. More importantly, we still view our portfolio and the broader asset class as being materially undervalued despite delivering attractive returns in recent months. Corporate Hybrids are still yielding well in excess of historical averages, with valuations that are compelling versus virtually all other liquid, developed credit markets.

For example, it makes little sense to us that Corporate Hybrids trade wide to EUR BBs, despite being rated two notches higher at the bond level and four to five notches better at the issuer level. The latter is also comprised of smaller, less diversified and far more economically sensitive companies.

An additional comparison can be made versus CoCos which trade broadly in-line with Corporate Hybrids. This is despite them being many orders of magnitude riskier from a structural perspective as famously demonstrated most recently by Credit Suisse.

We strongly believe this backdrop should be supportive for Corporate Hybrid investors over the medium to long term.

December was the main period of outperformance with +46 basis points of excess returns. This was driven by security selection and four issuers in particular:

- Rogers Communications was among the best performers as it continues to deleverage more quickly than market expectations. The company is also spending much less than originally estimated on 5G spectrum which is a positive surprise given that Canadian spectrum valuations are among the highest globally. We expect S&P to revise their outlook to positive in 2024;
- Volkswagen reported that an independent audit of their plant in Xinjiang found no indications of forced labour. MSCI consequently removed their red flag on the company. This had been a negative ESG overhang for some time and the market reacted positively to the news;
- National Grid saw limited fundamental developments over the month but remains attractively priced in our view;
- EDF continues to benefit from the recently approved nuclear re-regulation which will come into force in 2025. We view the improved leverage guidance from management as an additional catalyst.

**Investment Outlook**

The Sub-Fund is significantly more diversified than the benchmark, particularly at the single name level. However, following a long term value approach, we allocate a considerable portion of the portfolio to the Utilities sector, alongside Telecoms and high quality Energy Issuers. Our decisions, on a bond-by-bond basis, are driven by valuations considered in the context of an overall low business risk, low peak-to-trough EBITDA level and – for utilities - a favourable regulatory backdrop. In terms of other high conviction positions, Ausnet, BT and Rogers Communications each account for significant overweights versus the benchmark. We expect strong performance from each of these going forward.

Our key aims are to produce both attractive total returns and attractive returns relative to our benchmark over the long term. At the same time, we need to ensure that the issuers we hold remain within the portfolio guidelines and continue to pay their coupons and redeem their instruments at par at the first call date. For the bonds we hold in the portfolio – outside of Real Estate - we continue to expect all issuers to fulfil these expectations.

**NOMURA FUNDS IRELAND – CORPORATE HYBRID BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

---

**Investment Outlook (continued)**

We continue to believe that the Corporate Hybrid market trades significantly wide of fair value.

- There are various attractive security selection ideas available from a relative value perspective.
- The long-term growth of the new issue market will provide further diversification and relative value opportunities.
- We believe that the combination of:
  1. An elevated initial yield;
  2. Spread tightening;
  3. Security selection opportunities;
  4. New issuance at attractive prices;should lead, over time, to a positive outcome for investors.

**NOMURA FUNDS IRELAND – US HIGH YIELD BOND CONTINUUM FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	3.45	7.23	N/A	N/A	6.56
<b>Benchmark</b>	3.67	7.07	N/A	N/A	6.77
<b>Out/(Under) Performance</b>	-0.22	0.16	N/A	N/A	-0.21

*Source BBH; % Returns in USD. Benchmark is the ICE BofA US High Yield Constrained Index (HUC0).  
\*Since Inception date is 23rd August, 2023.*

**Performance Commentary**

For the period ended 31st December, 2023, the Sub-Fund returned 6.56% compared with the benchmark return of 6.77%, and therefore underperformed the benchmark by 0.21%.

Early in the year, evidence of disinflation was the key driver of the broad-based rally across Treasuries, equities, and high yield. In September and October, with continued strong economic and employment data, along with considerable Treasury issuance, rates underwent a sell-off and rose steeply to around 5%. However, in November, with a weak employment report and continued progress on CPI, it became clear that the market had taken the “higher for longer” scenario too far, and a possible soft landing came into view, leading to a remarkable rally across risk assets. The rally was bolstered in December, as Fed Chair Powell mentioned that rate cuts were starting to enter the Fed conversation for 2024, with the 10-Year Treasury closing the year around 4%.

Security selection in the BB and B segments detracted from relative returns, Bs and BBs, as lower credit ratings outperformed higher quality. The key sector contributors to positive relative performance included Air Transportation, Automakers, and Pharmaceuticals. In Air Transportation, we did not hold Spirit, which struggled as its proposed acquisition by JetBlue remained mired in doubt and as its debt was downgraded in light of continued losses. In Autos, the largest contributor was Ford, which was upgraded to investment grade in the fourth quarter, while outperformance in Pharmaceuticals was driven by our underweight to the sector. The main sector detractors were Health Facilities, Cable & Satellite TV, and Software Services. In Software, our overweight in GoTo Group, a remote IT management software platform, traded lower as the company reached a deal with a select group of bondholders to exchange into senior bonds with longer maturity, thus layering our existing bonds.

**Investment Outlook**

Looking forward, a soft landing – including stable growth, moderating inflation, and Fed rate cuts – has become the market’s base case, so 2024 market performance will depend on the path of those key factors. In addition, the US election in November may or may not influence the market’s returns in 2024. With regard to growth, continuing fiscal stimulus and a strong stock market create a positive backdrop, though some drags from higher rates and slower growth overseas should be expected. Generally, we think business, consumer, and government spending will support a slow growth environment. With respect to inflation, goods deflation and manageable energy prices are helpful. Beyond these factors, we believe the labor market has been rebalancing, which should help control inflation in services, and a massive boom in apartment construction should help control inflation in rents. For these reasons, we believe inflation will probably continue to moderate, but how far it falls remains a key question. Clearly, the Fed would like to engineer a soft landing if possible, and progress on inflation has given them room to contemplate cuts. A cut in the first half and a few beyond that point are a reasonable base case, though the Fed will want to avoid prematurely declaring a full victory on inflation, so they may move somewhat carefully. Overall, we believe high yield can generate an attractive risk-adjusted return in 2024, given stable growth and Fed cuts, but some ebb and flow on valuations can be expected after the recent rally.

**NOMURA FUNDS IRELAND – EMERGING MARKET CORPORATE BOND FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	3.14	6.10	N/A	N/A	5.32
<b>Benchmark</b>	3.07	5.52	N/A	N/A	4.93
<b>Out/(Under) Performance</b>	0.07	0.58	N/A	N/A	0.39

*Source BBH; % Returns in USD. Benchmark is the JPMorgan Corporate Emerging Market Bond Index Broad Diversified (CEMBI BD).  
\*Since Inception date is 12th September, 2023.*

**Performance Commentary**

For the period ended 31st December, 2023, the Sub-Fund returned 5.32% compared with the benchmark return of 4.93%, and therefore outperformed the benchmark by 0.39%.

Treasury volatility throughout the fourth quarter of 2023 had a meaningful impact on emerging market credit strategies. In October, with continued strong economic and employment data, along with considerable Treasury issuance, rates continued their fall sell-off. However, in November, with a weak employment report and continued progress on CPI, it became clear that the market had taken the “higher for longer” scenario too far, and a possible soft landing came into view, leading to a remarkable rally across risk assets. The rally was bolstered in December, as Fed Chair Powell mentioned that rate cuts were entering the conversation for 2024. Strong market fundamentals were supported throughout November and December by positive technicals, as inflows and very light new issuance drove bond prices higher across the board.

Sector and country weighting as well as credit selection drove outperformance in 2023. Strong credit selection in the Asian high yield segment as well as selective TMT overweights were positive contributors. Furthermore, selection and allocation in the investment grade segment contributed meaningfully to positive relative performance as rates rallied into year end. Underweights in financials also added value. Sectors that detracted from relative returns included Industrials and Infrastructure, mainly driven by an idiosyncratic credit event.

**Investment Outlook**

Looking forward, we expect EM hard currency markets to generate solid returns in 2024. Key corporate credit metrics are expected to remain at decade peak levels, while default rates should normalize. A busy EM election calendar combined with US elections may offer alpha generating opportunities. Additionally, valuations remain compelling, while strong market technicals are supporting a credit spread tightening narrative – particularly in the EM corporate segment.

We expect sovereign balance sheets to remain stable in 2024, with fiscal and primary deficits to stay in line with 2023 levels. We believe that election-driven and idiosyncratic credit stories will offer opportunities, though policy continuity is our base case overall. For corporates, we expect market technicals to remain highly constructive in 2024. Strong balance sheets, healthy cash flows, and conservative liquidity profiles allow corporate issuers to be selective and opportunistic in tapping the external debt markets – particularly as access to alternative sources of funding, such as local bond markets, have become more viable. We see a range of interesting themes developing in the EM credit markets that may offer alpha opportunities. Notably, and similar to a trend seen in the US high yield market, more companies are taking a proactive and collaborative approach to materially improving their maturity schedules. These “self-help” initiatives can significantly improve credit profiles. Against a strong fundamental backdrop, we expect attractive returns relative to other credit asset classes on a through-the-cycle basis.

**NOMURA FUNDS IRELAND – CHINA A-SHARES AI QUANT STRATEGY FUND  
INVESTMENT MANAGER’S REPORT (CONTINUED)  
For the year ended 31st December, 2023**

**Investment Performance**

	<b>1 Month</b>	<b>3 Month</b>	<b>1 Year</b>	<b>3 Year</b>	<b>Since Inception*</b>
<b>Sub-Fund</b>	-0.40	N/A	N/A	N/A	-0.81
<b>Benchmark</b>	-1.64	N/A	N/A	N/A	-1.66
<b>Out/(Under) Performance</b>	1.24	N/A	N/A	N/A	0.85

*Source BBH; % Returns in USD. Benchmark is the MSCI China A Net Return USD Index.  
\*Since Inception date is 27th November, 2023.*

**Performance Commentary**

For the period ended 31st December, 2023, the Sub-Fund returned -0.81% compared with the benchmark return of -1.66% and therefore outperformed the benchmark by 0.85%.

MSCI China A Index declined in the early December, due to the lower-than-expected China Manufacturing PMI (Purchasing Managers' Index) of November. After that, major credit rating agency lowered its outlook for China and CPI (Consumer Price Index) statistics for November fell short of market expectations, which led to further drop in the index. Meanwhile, stock prices rose toward the end of the month on the back of the announcement of accelerated growth for industrial production in November from the previous month, but fell for the entire period.

Attribution analysis shows that stock selection effect and risk factor effect were positive while sector allocation made slightly negative contribution.

In stock selection, our overweight on Shenzhen New Industries Biomedical Engineering (Health Care) and overweight on Xinfengming Group (Materials) which were highly evaluated based on our proprietary quantitative model, made positive contribution. While, negative came from overweight in Anhui Guangxin Agrochemical (Materials) which was highly evaluated based on our model. Breaking down contribution from the two models utilized, both the AI and the non-financial model positively affected while the AI model’s contribution is higher.

As for risk factor effect, low volatility and price momentum characteristics affected positively.

In sector allocation, our underweight on Information Technology and overweight on Consumer Staples sectors were negative contributors while the overweight on Energy sector was positive factor of the relative performance.

**Investment Outlook**

In terms of the economic environment, we expect that the Chinese economy will gradually start stabilizing with policy support in 2024. In particular, the additional infrastructure investments of about 1 trillion yuan approved in October 2023 is expected to boost domestic demand in the first half of 2024. However, the recovery momentum will likely lack strength because of the following two reasons. First, if the US and European economies experience slowdown in growth, it will be a drag on the Chinese economy through the deceleration of exports. Second, various problems currently faced by the Chinese economy will continue going forward. In particular, activities in the real estate market are unlikely to improve markedly in 2024. The stagnant real estate market is expected to cause negative impacts on the economy mainly through the negative wealth effect of falling housing prices on consumption and increasing pressure on local government finance due to decrease in proceeds from the sales of land use rights.

In terms of our model’s characteristics on risk factors, the model has tendency to have stocks with cheaper value, strong price momentum and low volatility compared to the benchmark at the end of December 2023. We understand that was because the China A-shares market was in downward trend in 2023, which led to stocks with those characteristics more attractive to the model by reflecting the recent price movement. Looking ahead to 2024, there is a possibility that those characteristics will remain the same given the decelerated growth forecast of the country.

Besides, non-financial perspective will continue to be focused by investors through various aspects in our understanding. For example, in April 2023, the State Council of China announced the new directive to further optimize the investment director system of listed companies, which is related to “Governance” pillar of ESG topics and expected to improve profitability of companies including SOEs (State-Owned Enterprises). We believe that our strategy considering such kind of aspects will achieve strong performance going forward.

We will continue to manage the portfolio by appropriately reflecting our model’s evaluation on stocks.

## **INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOMURA FUNDS IRELAND PLC**

### **Report on the audit of the financial statements**

#### **Opinion**

We have audited the financial statements of Nomura Funds Ireland Plc ('the Company') for the year ended 31 December 2023 which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Cash Flows and notes to the financial statements, including the summary of material accounting policy information set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards ('IFRS') as adopted by the European Union.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2023 and of its profit for the year then ended;
- have been properly prepared in accordance with IFRS as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Conclusions relating to going concern**

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

## **INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOMURA FUNDS IRELAND PLC**

### **Other information**

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

### **Opinions on other matters prescribed by the Companies Act 2014**

In our opinion, based solely on the work undertaken in the course of the audit, we report that:

- the information given in the directors' report for the financial year ended for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report has been prepared in accordance with applicable legal requirements.

We have obtained all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

### **Matters on which we are required to report by exception**

Based on the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures required by sections 305 to 312 of the Act, which relate to directors' remuneration and transactions are not complied with by the Company. We have nothing to report in this regard.

## **INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOMURA FUNDS IRELAND PLC**

### **Respective responsibilities**

#### **Responsibilities of directors for the financial statements**

As explained more fully in the directors' responsibilities statement set out on page 31, the directors are responsible for the preparation of the financial statements in accordance with the applicable financial reporting framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

#### **Auditor's responsibilities for the audit of the financial statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: [http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description\\_of\\_auditors\\_responsibilities\\_for\\_audit.pdf](http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf).

This description forms part of our auditor's report.

#### **The purpose of our audit work and to whom we owe our responsibilities**

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Kieran Daly

for and on behalf of  
Ernst & Young Chartered Accountants and Statutory Audit Firm  
Dublin, 25 April 2024

**For the year ended 31st December, 2023**

---

**1. Summary of significant accounting policies**

The principal accounting policies applied in the preparation of these financial statements are set out below.

**Basis of preparation of financial statements**

The financial statements of Nomura Funds Ireland Plc (the “Fund”) have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union and Irish statute comprising the Companies Act 2014, the requirements of the Central Bank UCITS Regulations and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) (the “UCITS Regulations”) and any regulations made thereafter.

The financial statements are prepared under the historical cost convention, as modified to include investments at valuation. Valuation time is 3pm (Irish time) on a Dealing Day or such other time or times in such place as the Directors may from time to time determine and notify to shareholders in relation to any Sub-Fund with the approval of Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the “Administrator”).

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the Fund’s accounting policies. Uncertainty about these estimates and assumptions could result in outcomes that might require a material adjustment to the carrying amount of the asset or liability affected in future periods. Certain reclassifications have been made to previously reported amounts to conform to current year presentation, which had no impact on reported net assets.

*Going concern*

The Fund’s management has made an assessment of the Fund’s ability to continue as a going concern and is satisfied that the Fund has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Fund’s ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

*Taxes*

Uncertainties exist with respect to the interpretation of complex tax regulations and changes in tax laws on foreign withholding tax. Given the wide range of international investments, differences arising between the actual investment income and assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax expense already recorded. The Fund establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it invests. The amounts of such provisions are based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective investment’s domicile. As the Fund assesses the probability for litigation and subsequent cash outflow with respect to taxes as remote, no contingent liability has been recognised.

**Standards, amendments and interpretations effective for annual period beginning on 1st January, 2023**

There are no new standards, amendments to existing standards and interpretations that are effective for the first time for the annual period beginning on 1st January, 2023 that have a material effect of the financial statements of the Fund.

**Accounting standards in issue that are not yet effective and have not been early adopted**

There are no new standards not yet effective which will have a material impact on the Fund.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

---

**1. Summary of significant accounting policies (continued)****Financial assets and financial liabilities at fair value through profit or loss***(a) Classification*

The Fund has assessed the classification of financial instruments as at the date of initial application and has applied such classification retrospectively. Based on that assessment:

- All financial assets previously held at fair value continue to be measured at fair value.
- Debt instruments and equity instruments, are acquired for the purpose of generating short-term profit. Therefore, they meet the hold-for-trading criteria and are required to be measured at fair value through profit or loss.
- Financial assets previously classified as receivables are held to collect contractual cash flows and give rise to cash flows representing solely payments of principal and interest. Thus, such instruments continue to be measured at amortised cost under IFRS 9.
- The classification of financial liabilities under IFRS 9 remains broadly the same as under IAS39.

*Impairment*

IFRS 9 requires the Fund to record expected credit losses (“ECLs”) on all of its debt securities, loans, trade receivables, either on a 12- month or lifetime basis. Given the limited exposure of the fund to credit risk, this amendment has not had a material impact on the financial statements. The Fund only holds trade receivables with no financing component and that have maturities of less than 12 months at amortised cost. Therefore, it has adopted an approach similar to the simplified approach to ECLs.

*Hedge accounting*

The Fund has not applied hedge accounting under IAS 39 nor will it apply hedge accounting under IFRS 9.

*(b) Recognition/Derecognition*

The Fund recognises a financial asset or a financial liability when, and only when, it becomes a party to the contractual provisions of the instrument. Purchases and sales of financial assets at fair value through profit or loss are recognised on trade date – the date on which the Fund commits to purchase or sell the financial instrument.

A financial asset (or, where applicable, part of a financial asset or a part of a group of similar financial assets) is derecognised where the rights to receive cash flows from the asset have expired, or the Fund has transferred its rights to receive cash flow from the asset, or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement and either:

- (a) the Fund has transferred substantially all of the risks and rewards of the asset.

Or

- (b) the Fund has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

When the Fund has transferred its right to receive cash flows from an asset (or has entered into a pass-through arrangement), and has neither transferred nor retained substantially all of the risk and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Fund’s continuing involvement in the asset. In that case, the fund also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the fund has retained.

The Fund derecognises a financial liability when the obligation under the liability is discharged, cancelled or expired.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2023**

---

**1. Summary of significant accounting policies (continued)****Financial assets and financial liabilities at fair value through profit or loss (continued)***(b) Recognition/Derecognition (continued)*

Realised fair value gains and losses on disposals of financial instruments are calculated using the average cost method for the Nomura Funds Ireland - India Equity Fund and the first in, first out method for the Nomura Funds Ireland - Fundamental Index Global Equity Fund, the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - European High Yield Bond Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the American Century Emerging Markets Debt Total Return Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund, the Nomura Funds Ireland - Corporate Hybrid Bond Fund, the Nomura Funds Ireland - US High Yield Bond Continuum Fund, the Nomura Funds Ireland - Emerging Market Corporate Bond Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund.

*(c) Measurement*

Financial assets and financial liabilities at fair value through profit or loss are recorded in the Statement of Financial Position at fair value. The main impact on measurement from the classification of liabilities under IFRS 9 relates to the element of gains and losses for financial liabilities designated as at fair value through profit or loss attributable to changes in credit risk. IFRS 9 requires that such element be recognised in other comprehensive income, unless this treatment creates or enlarged an accounting mismatch in profit or loss, in which case, all gains and losses on that liability (including the effects of changes in credit risk) should be presented in profit or loss. The Fund has not designated any financial liabilities at fair value through profit or loss. Therefore, this requirement has not had an impact on the Fund.

Transaction costs are expensed in the Statement of Comprehensive Income. Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers and brokers. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value (see Note d).

Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Statement of Comprehensive Income in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within operating income when the Fund's right to receive payments is established.

*(d) Determination of fair value*

Fair value is the amount for which an asset could be exchanged or a liability settled, between knowledgeable willing parties in an arm's length transaction. The fair value of financial instruments traded in active markets (such as trading securities) is based on quoted market prices at 3pm (Irish time) on the relevant dealing day. For the purpose of these financial statements, the quoted market price used is the quoted market prices at 3pm (Irish time) on the relevant dealing day. The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Sub-Funds use a variety of methods and make assumptions that are based on market conditions existing at each statement of financial position date.

Units or shares in collective investment schemes are valued at the bid quotation or if unavailable the latest available Net Asset Value or, if listed or traded on a regulated market, at the latest quoted trade price or the mid quotation or, if unavailable or unrepresentative, the latest available Net Asset Value as deemed relevant to the collective investment scheme.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

---

**1. Summary of significant accounting policies (continued)****Foreign currency translation***Functional and presentation currency*

The functional and presentation currency of the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Fundamental Index Global Equity Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the American Century Emerging Markets Debt Total Return Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund, the Nomura Funds Ireland - US High Yield Bond Continuum Fund, the Nomura Funds Ireland - Emerging Market Corporate Bond Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund is US Dollar. The functional and presentation currency of the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund and the Nomura Funds Ireland - Japan Sustainable Equity Core Fund is Japanese Yen. The functional and presentation currency of the Nomura Funds Ireland - European High Yield Bond Fund and the Nomura Funds Ireland - Corporate Hybrid Bond Fund is Euro. The presentation currency of the aggregated financial statements is US Dollar.

*Transactions and balances*

Assets and liabilities denominated in currencies other than the functional currency of the Sub-Fund are translated into the functional currency at the exchange rates ruling at the statement of financial position date. Transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the year. Proceeds from subscriptions and amounts paid for redemptions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions.

**Futures contracts**

Upon entering into a futures contract, a Sub-Fund is required to deposit with its futures broker, an amount of cash in accordance with the initial margin requirements of the broker or exchange. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. The Sub-Fund and the broker agree to exchange an amount of cash equal to the daily fluctuations in the value of the futures contract (“variation margin”).

For open futures, changes in the value of the contract are recognised as unrealised gains or losses by “marking-to-market” the value of the contract at the statement of financial position date. When the contract is closed, the difference between the proceeds (or cost) of the closing transactions and the original transaction is recorded as a realised gain or loss in the Statement of Comprehensive Income.

**Forward foreign currency contracts**

All forward foreign currency contract commitments are marked to market at the applicable translation rates and any resulting unrealised gains or losses are recorded in the Statement of Comprehensive Income. The Sub-Fund records realised gains or losses upon closing of the forward foreign currency contracts. Where the Sub-Fund enters into forward foreign currency contracts as a way of managing foreign exchange risk for specific unit classes, gains and losses from these contracts are allocated solely to the corresponding unit classes. Purchases and sales of forward foreign currency contracts having the same notional value, settlement date and counterparty are generally offset and any realised gains or losses are recognised on settlement date. Forward foreign currency contracts may result in credit exposure to the counterparty.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

---

**1. Summary of significant accounting policies (continued)****Swaps**

Swap agreements are privately negotiated agreements between a Sub-Fund and a counterparty to exchange or swap investment cash flows, assets, foreign currencies, market-linked returns or other identified amounts at specified future intervals. In connection with these agreements, securities or cash may be identified as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Swaps are marked-to-market daily based upon quotations received from counterparties or valued using a pricing service and in other cases based upon calculations using valuation models.

The significant assumptions and the formula behind the calculations used in the valuation models are defined explicitly in the individual term sheets. Generally, the total returns are determined by the daily index level or daily price multiplied by a predetermined notional amount and the financing portion is built-in to create an all-in valuation.

Changes in valuations, if any, are recorded as unrealised gains or losses. Payments received or made are recorded as realised gains or losses.

*Credit Default Swaps*

A credit default swap is a bilateral financial contract under which the protection buyer pays a fee, usually expressed in basis points per annum on the notional amount, in return for a payment by the protection seller contingent on the occurrence of a credit event, such as a bankruptcy, default, or restructuring, with respect to a referenced entity. The credit events and applicable settlement mechanism used to determine the contingent payment are negotiated between the counterparties at the time of trading. Once the credit event has been declared, the protection buyer has the right to settle the contract. Settlement is usually physical, with the protection buyer having the right to deliver bonds of the reference entity up to the notional amount of the contract. In return, the protection buyer receives the par value of those obligations. Selling protection is the synthetic equivalent of buying a bond or alternative form of debt. Buying protection is the equivalent of synthetically shorting or hedging a bond or other credit exposure.

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the reference entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardised terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices change periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Sub-Fund may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds with a credit default swap on indices which may be less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swaps on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

The use of credit default swap contracts is restricted to the extent that the benefits to the Sub-Fund mirror that which could be obtained by direct investment in the underlying instruments and that the swaps do not expose the Sub-Fund to risks which it would not otherwise assume (other than the exposure to the credit default swap counterparty). The upfront payment received by a Sub-Fund, as protection seller, is recorded as a liability on the Sub-Fund's books. An upfront payment made by a Sub-Fund, as protection buyer, is recorded as an asset on the Sub-Fund's books.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

---

**1. Summary of significant accounting policies (continued)****Swaps (continued)***Swaptions*

When a Sub-Fund writes a swaption, an amount equal to the premium received by the Sub-Fund is recorded as a liability and is subsequently adjusted to the current fair value of the swaption written. Premiums received from the written swaptions which expire unexercised are treated by the Sub-Fund on the expiration dates as realised gains. If a written call swaption is exercised, the premium is added to the proceeds from the sale of the underlying swap in determining the realised gain or loss. If a written put swaption is exercised, the premium reduces the cost basis of the swap purchased.

When a Sub-Fund purchases a swaption, an amount equal to the premium paid by the Sub-Fund is recorded as an asset and is subsequently adjusted to the current fair value of the swaption purchased. Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Sub-Fund has realised a gain or a loss. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been swapped.

**Options contracts**

The unrealised gain or loss on open option contract is calculated and recorded as the fair value of the option contract less the premium paid on that option. The fair value of the options contracts which are dealt in on a securities market are the settlement price as determined by the market. Unrealised gains or losses on open options contracts are included in financial assets and liabilities at fair value through profit or loss in the Statement of Financial Position.

The premium on purchased put options contracts exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options contracts exercised is added to the cost of the securities or foreign currency purchased. Premiums paid from the purchase of options contracts, which expire unexercised, are treated as realised losses.

**Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

**Due from and due to brokers**

Amounts due from and to brokers represent receivables for securities sold and payables for securities purchased respectively, that have been contracted for but not yet settled or delivered on the statement of financial position date.

These amounts are recognised initially at fair value and subsequently measured at amortised cost, less provision for impairment for amounts due from brokers, if any. A provision for impairment of amounts due from brokers is established when there is objective evidence that the Fund will not be able to collect all amounts due from the relevant broker.

**Cash at bank**

Cash at bank includes cash in hand, deposits held on call with banks or brokers and other short-term highly liquid investments with original maturities of three months or less. Cash and other liquid assets are valued at their face value with interest accrued, where applicable, to the valuation point on the relevant dealing day, unless in the opinion of the Directors (in consultation with Nomura Asset Management U.K. Limited (the "Investment Manager") and the Administrator), any adjustment should be made to reflect the true value thereof.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

---

**1. Summary of significant accounting policies (continued)****Cash at bank (continued)***Company cash accounts*

A number of Company cash accounts are being operated by the Administrator, on behalf of the Company pursuant to the Central Bank of Ireland Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies. These cash accounts, held with Brown Brothers Harriman Trustee Services (Ireland) Limited (the “Depositary”) for collection of unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors for the Company are deemed assets of the Company. The balance on these cash accounts is reflected on the Statement of Financial Position of the Company with an appropriate equal and opposite liability.

**Amounts due from broker on margin accounts**

The amounts receivable from brokers on margin accounts include cash held with the futures brokers as well as the appropriate payable or receivable for the change in value when the futures contracts are marked to market each day.

Amount due from broker on margin account are detailed in Note 4.

**Redeemable participating shares**

The Fund issues redeemable participating shares, which are redeemable at the holder’s option and are classified as financial liabilities. Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the particular Sub-Fund’s Net Asset Value. The redeemable participating share is carried at the redemption amount that is payable at the statement of financial position date if the holder exercises the right to put the share back to the Fund.

Redeemable participating shares are issued and redeemed at the holder’s option at prices based on the Sub-Fund’s Net Asset Value per share at the time of issue or redemption. The Sub-Fund’s Net Asset Value per share is calculated by dividing the net assets attributable to the holders of redeemable participating shares with the total number of outstanding redeemable participating shares. In accordance with the provisions of the Fund’s regulations, investment positions are valued based on the last traded market price for the purpose of determining the Net Asset Value per share for subscriptions and redemptions.

**Dividend income**

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as “ex-dividend” to the extent that information thereon is reasonably available to the Sub-Fund. Dividend income is accounted for gross of any non-reclaimable/irrecoverable withholding taxes and net of any tax credits.

**Interest income**

Interest income and expense are recognised in the Statement of Comprehensive Income at nominal rate for financial instruments at fair value through profit or loss and on an effective yield methodology for bank interest income.

**Accrued expenses**

All expenses, including management fees and performance fees, are recognised in the Statement of Comprehensive Income on an accrual basis.

**Reimbursement expense policy**

Fund reimbursement expense policy is at the sole discretion of the Investment Manager. The reimbursement is set with reference to a maximum Total Expense Ratio (“TER”) per share class, and may be utilized for the purpose of setting TER at specific level.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31st December, 2023

**1. Summary of significant accounting policies (continued)****Distribution policy**

Distributions proposed and approved by the Board of Directors subsequent to the financial year end are not recognised as a liability at the financial year end date.

Distributions are recognised in the financial year that they are approved by the Board of Directors.

The Nomura Funds Ireland - Fundamental Index Global Equity Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the American Century Emerging Markets Debt Total Return Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund, the Nomura Funds Ireland - Emerging Market Corporate Bond Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund are accumulating Sub-Funds and therefore they do not currently intend to distribute dividends to the holders of redeemable participating shares. The income and earnings of these Sub-Funds will be accumulated and reinvested on behalf of the holders of redeemable participating shares.

The Articles of Association of the Fund empower the Directors to declare dividends in respect of any shares in the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - European High Yield Bond Fund, the Nomura Funds Ireland - Corporate Hybrid Bond Fund and the Nomura Funds Ireland - US High Yield Bond Continuum Fund out of the net income of the Sub-Funds whether from dividends, interest or otherwise and/or net realised gains (i.e. realised gains net of realised and unrealised losses) or net realised and unrealised gains (i.e. realised and unrealised capital gains net of all realised and unrealised losses), subject to certain adjustments.

The Fund currently makes a distribution out of the net assets of Class AD, Class ID and Class RD of the Nomura Funds Ireland - Japan Strategic Value Fund, Class AD, Class BD, Class D, Class ID, Class TD and Class TID of the Nomura Funds Ireland - US High Yield Bond Fund, Class ID of the Nomura Funds Ireland - Japan High Conviction Fund, Class FD and Class ID of the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, Class BD, Class FD, Class ID and Class TD of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, Class AD, Class AD2, Class AD3, Class BD, Class CD, Class FD, Class ID, Class ID2, Class ID3, Class RD, Class SD, Class TD and Class TID of the Nomura Funds Ireland - Global Dynamic Bond Fund, Class AD, Class FD, Class ID and Class SD of the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, Class SD of the Nomura Funds Ireland - Asia High Yield Bond Fund, Class SD of the Nomura Funds Ireland - Asia Investment Grade Bond Fund, Class SD of the Nomura Funds Ireland - European High Yield Bond Fund and Class FD of the Nomura Funds Ireland - Corporate Hybrid Bond Fund.

It is not the current intention of the Directors to make distributions in respect of the net assets of Class A, Class I, Class S, Class T and Class Z of the Nomura Funds Ireland - India Equity Fund, Class A, Class B, Class I, Class R and Class T of the Nomura Funds Ireland - Japan Strategic Value Fund, Class A, Class C, Class I, Class T, Class TI and Class Z of the Nomura Funds Ireland - US High Yield Bond Fund, Class A, Class F, Class I, Class R and Class Z of the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, Class A, Class F, Class I, Class T, Class TI and Class R of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, Class A, Class C, Class F, Class I, Class R, Class S, Class T and Class Z of the Nomura Funds Ireland - Global Dynamic Bond Fund, Class A, Class F, Class I, Class R and Class Z of the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, Class A, Class F, Class I and Class Z of the Nomura Funds Ireland - Asia High Yield Bond Fund, Class A, Class F, Class I and Class Z of the Nomura Funds Ireland - Asia Investment Grade Bond Fund, Class A and Class I of the Nomura Funds Ireland - European High Yield Bond Fund, Class A, Class F and Class I of the Nomura Funds Ireland - Corporate Hybrid Bond Fund and Class A and Class I of the Nomura Funds Ireland - US High Yield Bond Continuum Fund. The income, earnings and gains of these Classes are accumulated and reinvested on behalf of the shareholders of the Sub-Funds. Distributions to holders of Redeemable Participating Shares are recognised as finance costs in the Statement of Comprehensive Income.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

**1. Summary of significant accounting policies (continued)**

**Distribution policy (continued)**

A new reporting fund regime was introduced by HM Revenue and Customs with effect from 1st December, 2009. The reporting regime removes the requirement for an offshore fund to seek certification as a distributing fund following the end of each financial year and instead permits an offshore fund to seek advance approval from HM Revenue and Customs to be treated as a “reporting fund” for accounting periods commencing on or after 1st December, 2009. Once an “Offshore fund” has been granted “reporting fund” status it will maintain that status for so long as it continues to satisfy the conditions to be a “reporting fund” without a requirement to apply for further certification by HM Revenue and Customs.

The share classes below, with their date of approval, have been approved by HM Revenue and Customs as having “reporting fund” status under the United Kingdom Income and Corporation Taxes Act 1988, as amended, for the purposes of UK taxation.

<b>Sub-Fund</b>	<b>Share Class</b>	<b>Date of approval</b>

**Taxation**

Under current law and practice, the Fund qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or capital gains. However, Irish tax can arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption or transfer of shares. A chargeable event can also include a deemed disposal of shares every eight years beginning from the date of acquisition of those shares.

No Irish tax will arise on the Fund in respect of chargeable events in respect of:

- a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidated Act, 1997 as amended, are held by the Fund; and
- certain exempted Irish tax resident shareholders who have provided the Fund with the necessary signed statutory declarations.

Capital gains, dividends, and interest received (if any) by the Fund may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Fund or its shareholders.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2023**

---

**1. Summary of significant accounting policies (continued)****Taxation (continued)**

Where there is uncertainty over future income tax treatments that may arise on the sale of investments an accrual is in place for capital gains tax and is disclosed separately in the Statement of Financial Position. This accrual currently relates to Indian emerging market investments and can change depending on the market value of these investments. A decrease in the market value of these investments may require a reduction in the accrual which can result in a negative value in the Statement of Comprehensive Income. A holding period of up to one year is classified as short-term and anything more than that is long-term.

**Income from Securities Lending**

The Fund may lend portions of its securities to third parties. The volume of the securities lending transactions is kept at an appropriate level. The Fund is entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations. It is ensured that securities lending transactions do not jeopardise the management of the Fund's assets in accordance with its investment policy. The income earned from the securities lending program is included in "Operating income" in the Statement of Comprehensive Income and detailed in "Securities lending income" in Note 10. Income from securities lending is accounted for on a receipt basis.

**Swing Pricing**

Under certain circumstances and unless otherwise provided in the Supplement relating to a Sub-Fund, the Directors have the power to adjust the Net Asset Value per share applicable to the issue price (the "Swing Pricing"). In any case, the adjustments to the Net Asset Value per share applicable at any valuation point shall be identical for all issues dealt with as of that business day.

Under certain circumstances (for example, large volumes of deals), investment and/or disinvestment costs may have an adverse effect on the shareholders' interests in a Sub-Fund. In order to prevent this effect, called "dilution", the Directors may determine that the Swing Pricing methodology applies so as to allow for the Net Asset Value per share to be adjusted upwards or downwards by dealing and other costs and fiscal charges which would be payable on the effective acquisition or disposal of assets in the relevant Sub-Fund if the net capital activity exceeds, as a consequence of the aggregate transactions in that Sub-Fund on a given business day, a threshold set by the Directors from time to time.

If the net cash movement of subscriptions and redemptions into and out of a particular Sub-Fund across all share classes on a given business day (the "Net Capital Activity") leads to a net inflow of assets in excess of the threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Sub-Fund is adjusted upwards by the swing factor set by the Directors from time to time. If the Net Capital Activity on a given business day leads to a net outflow of assets in excess of the threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Sub-Fund is adjusted downwards by the swing factor set by the Directors from time to time.

In any case, the swing factor shall not exceed 1.00% of the Net Asset Value per share of the relevant Sub-Fund. Further, for the purpose of calculating the expenses of a Sub-Fund which are based on the Net Asset Value of the relevant Sub-Fund, the Administrator will continue to use the un-swung Net Asset Value.

\* The Fund Totals as at 31st December, 2023 and 31st December, 2022, have been adjusted to account for balances in the name of the Fund. In line with the Central Bank of Ireland (the “CBI”) Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies published in March 2016, one or more Company cash accounts are being operated by the Administrator, on behalf of the Company, in accordance with the requirements of the CBI. Such Company cash accounts are designed to hold unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors. As at 31st December, 2023, the amount held in these cash accounts was USD 8,560,523 (31st December, 2022: USD 1,088,593). The Fund Total overdraft of USD 2,200,808 was held with Brown Brothers Harriman & Co. as at 31st December, 2023 (31st December, 2022: USD 36). All cash at bank balances at the year end are held with Brown Brothers Harriman & Co. or with third party institutions approved by the Fund on overnight deposit or directly with a sub-custodian.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

**3. Security lending**

The following tables show the fair value of securities on loan at 31st December, 2023 and at 31st December, 2022 as well as the collateral held and collateral level.

In accordance with the Securities Lending Agency Agreement (SLAA), for each loan of securities Brown Brothers Harriman & Co. ("BBH") accepts non-cash collateral on behalf of the Nomura Funds participating in the BBH Securities Lending Program. Non-cash collateral is limited to securities issued or fully guaranteed by the United States government or issued and unconditionally guaranteed by any agencies thereof or issued or fully guaranteed by any of the G-10 sovereigns.

The sovereign debt currently accepted by BBH on behalf of the Nomura Funds which participate in the BBH Securities Lending Program are: US, UK, Sweden, Switzerland, France, Germany and Netherlands.

The following table is presented in USD as all of the collateral referred to is USD denominated.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31st December, 2023

**8. Net Asset Value per redeemable participating share reconciliation**

The Net Asset Value per redeemable participating share is calculated by dividing the total net assets (as calculated for shareholder dealing purposes) of the Sub-Fund by the number of redeemable participating shares of that class in issue. The Net Asset Value per redeemable participating share reported in the Statement of Financial Position is that used for financial statement purposes.

Organisational expenses totalling USD 13,548 for the American Century Advanced Medical Impact Equity Fund, USD 16,703 for the American Century US Focused Innovation Equity Fund and JPY 1,436,222 for the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund were written off in the year ended 31st December, 2021. Organisational expenses totalling USD 10,550 for the American Century Advanced Medical Impact Equity Fund were written off in the year ended 31st December, 2022. Organisational expenses totalling EUR 13,809 for the Nomura Funds Ireland - Corporate Hybrid Bond Fund, USD 15,326 for the Nomura Funds Ireland - US High Yield Bond Continuum Fund and USD 15,100 for the Nomura Funds Ireland - Emerging Market Corporate Bond Fund were written off in the year ended 31st December, 2023.

For the purpose of calculating the Net Asset Value per share for shareholder dealing, organisational expenses are being amortised over the first five financial years of the lifetime of the Fund, USD 45,714 (31st December, 2022: USD 10,550) was amortised for the year ended 31st December, 2023. For the purpose of calculating the Net Asset Value per share for shareholder dealing, swing pricing mechanism was adopted to protect the interest of the shareholders of the Sub-Fund, USD Nil (31st December, 2022: USD Nil) was adjusted for the year ended 31st December, 2023.

The amounts in the following tables are presented in the functional currency of the share class.

	<b>European High Yield Bond Fund 31st December, 2021 Class I Euro EUR</b>	<b>European High Yield Bond Fund 31st December, 2021 Class I Sterling Hedged GBP</b>	<b>European High Yield Bond Fund 31st December, 2021 Class SD JPY Hedged JPY</b>	<b>American Century Global Small Cap Equity Fund 31st December, 2021 Class A Euro EUR</b>

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31st December, 2023

## 9. Share capital

## Authorised

The authorised share capital of the Fund is EUR 300,000 divided into 300,000 redeemable non-participating shares of EUR 1 each and 500,000,000,000 Redeemable Participating Shares of no par value. One redeemable non-participating share has been paid up and is beneficially owned by Nomura Asset Management USA Inc. which, along with the Investment Manager, is a wholly owned subsidiary of Nomura Asset Management Co Ltd. (Japan). A redeemable non-participating share carries voting rights, it does not entitle the holder thereof to any dividend and on a winding up entitles the holder thereof to receive the amount paid up thereon but does not otherwise entitle them to participate in the Net Asset Value of the Fund. They are thus disclosed in the financial statements by way of this note only.

The following tables set out the movement of shares in issue for the year ended 31st December, 2023 and 31st December, 2022 respectively:

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2023****12. Investment Management expense and performance expense**

Nomura Asset Management U.K. Limited, the Investment Manager earned a fee of USD 59,654,894 for the year ended 31st December, 2023 (31st December, 2022: USD 69,081,434), of which USD 15,334,417 (31st December, 2022: USD 15,136,157) was due at the year end.

The Investment Management expense is calculated and accrued daily and payable quarterly in arrears. The Investment Manager is entitled to be reimbursed by the Sub-Funds for reasonable out-of-pocket expenses incurred by it and any VAT on fees and expenses payable to or by it. The Investment Manager shall pay, out of its own fee, the fees of any Sub-Investment Managers appointed in respect of one or more Sub-Funds. The Investment Manager may from time to time, at its sole discretion, and out of its own resources, rebate to affiliated entities/intermediaries and/or shareholders, part or all of the Investment Management Fee and/or the Incentive Fee. This Incentive Fee is calculated and paid as agreed directly between the Investment Manager and the relevant individual Shareholder. There was no performance fees charged during the year ended 31st December, 2023 (31st December, 2022: none), none of which was due at the year end (31st December, 2022: none).

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

---

**13. Manager's expense**

Bridge Fund Management Limited, the Manager, earned a fee of USD 473,642 for the year ended 31st December, 2023 (31st December, 2022: USD 368,438), of which USD 51,226 (31st December, 2022: USD 69,501) was due at the year end.

Pursuant to the Management Agreement, the Manager is entitled to charge the Fund an annual fee not to exceed a maximum of 0.01% of the Net Asset Value of the Fund. The Manager's fee shall be subject to the imposition of VAT, if required. The fee will be calculated and accrued daily and is payable monthly in arrears. The Manager's expense may be waived or reduced by the Manager, in consultation with the Directors.

The Manager shall also be entitled to be repaid all of its out-of-pocket expenses out of the assets of the Fund. The Manager shall be entitled to be reimbursed out of the assets of the Fund for any VAT on all fees and expenses payable to or by it.

**14. Administration, Depositary, Brokerage and Audit fees**

The Fund pays to the Administrator, out of the assets of each Sub-Fund, an annual fee, accrued at each valuation point and payable monthly in arrears, at a rate between 0.015% and 0.045% which shall not exceed 0.045% per annum of the aggregate value of all Sub-Funds under the Fund umbrella. The rate of 0.045% is subject to an aggregate annual minimum fee of USD 48,000 per Sub-Fund plus VAT, if any, thereon. The Administrator is also entitled to receive a monthly fee of USD 333.33 per share class of a Sub-Fund launched (such fee will not be applied to the first three share classes of a Sub-Fund launched by the Fund).

The Administrator is entitled to receive a register fee per Sub-Fund of USD 10,000 per annum and also receives registration fees, and transaction charges as agreed at normal commercial rates and is also entitled to be repaid out of the assets of the Sub-Fund all of its reasonable out-of-pocket expenses incurred on behalf of the Fund which shall include legal fees, couriers' fees and telecommunication costs and expenses together with VAT, if any, thereon. Each Sub-Fund will bear its proportion of the fees and expenses of the Administrator.

The Administrator earned a fee of USD 4,152,170 for the year ended 31st December, 2023 (31st December, 2022: USD 6,381,881), of which USD 1,075,429 (31st December, 2022: USD 686,014) was due at the year end.

Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") is entitled to receive, out of the assets of each Sub-Fund, a trustee fee, accrued at each valuation point and payable monthly in arrears, of 0.0125% per annum of the Net Asset Value of each Sub-Fund. The Depositary is also entitled to receive, out of the assets of each Sub-Fund, a depositary fee, accrued at each valuation point and payable monthly in arrears, which shall not exceed 0.4% per annum, calculated by reference to the fair value of the investments that the Sub-Fund may make in each relevant market, subject to a minimum annual fee of USD 12,000 per annum.

The Depositary is also entitled to agree upon transaction charges and to recover properly vouched out-of-pocket expenses out of the assets of the relevant Sub-Fund (plus VAT thereon, if any), including legal fees, couriers' fees and telecommunication costs and expenses and the fees, transaction charges and expenses of any sub-custodian appointed by it which shall be at normal commercial rates (plus VAT thereon, if any). Each Sub-Fund will bear its proportion of the fees and expenses of the Depositary.

The Depositary earned a fee of USD 2,142,947 for depositary and trustee services for the year ended 31st December, 2023 (31st December, 2022: USD 2,406,830), of which USD 543,333 (31st December, 2022: USD 370,606) was due at the year end.

Sub-Funds may be subject to a brokerage fees related to financial derivative instruments which are listed on Recognised Exchanges. There was no brokerage fees charged during the year ended 31st December, 2023 (31st December, 2022: none), none of which was due at the year end (31st December, 2022: none).

Audit fees accrued for the year amounted to USD 353,991 (31st December, 2022: USD 491,406), including VAT, of which USD 214,823 (31st December, 2022: USD 340,404) was due at the year end. Differences between the amounts charged to the Statement of Comprehensive Income and the figures noted above are in relation to under and over accruals for the respective years.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

**14. Administration, Depositary, Brokerage and Audit fees (continued)**

Statutory auditors' fees in respect of the financial year are analysed as follows:

	<b>31st December, 2023</b>	<b>31st December, 2022</b>
	<b>EUR</b>	<b>EUR</b>
Audit of individual company accounts	257,599	224,356
Other assurances services	-	-
Tax advisory services	-	-
Other non-audit services	-	-
	<u>257,599</u>	<u>224,356</u>

**15. Directors' fees and expenses**

Each Director is entitled to charge a fee for their services at a rate determined by the Directors up to a maximum fee per Director of EUR 40,000 per annum (plus VAT) and may be entitled to special remuneration if called upon to perform any special or extra services to the Fund. The Directors fees are fixed annually by the Board of Directors. All Directors are entitled to reimbursement by the Fund of expenses properly incurred in connection with the business of the Fund or the discharge of their duties.

Directors' fees accrued for the year amounted to USD 42,967 (31st December, 2022: USD 19,600) of which USD 263 was due at the year end (31st December, 2022: USD 6,880). The Directors' fees paid during the year ended 31st December, 2023 were USD 43,260 (31st December, 2022: USD 39,393).

**16. Financial risk management**

**Strategy in using financial instruments**

The investment objective of the Sub-Funds is to achieve long-term capital growth through investment in an actively managed portfolio of global emerging market securities (Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, American Century Emerging Markets Equity Fund and American Century Emerging Markets Sustainable Impact Equity Fund), Indian securities (Nomura Funds Ireland - India Equity Fund), Asian securities (Nomura Funds Ireland - Asia Sustainable Equity Fund), Asian (excluding Japan) securities (Nomura Funds Ireland - Asia Ex Japan High Conviction Fund), global equity securities (Nomura Funds Ireland - Global High Conviction Fund, Nomura Funds Ireland - Global Sustainable Equity Fund, American Century Global Small Cap Equity Fund, American Century Global Growth Equity Fund, American Century Concentrated Global Growth Equity Fund, Nomura Funds Ireland - Global Multi-Theme Equity Fund and Nomura Funds Ireland - Japan Small Cap Equity Fund), Japanese equity securities (Nomura Funds Ireland - Japan Strategic Value Fund, Nomura Funds Ireland - Japan High Conviction Fund, Nomura Funds Ireland - Japan Sustainable Equity Growth Fund and Nomura Funds Ireland - Japan Sustainable Equity Core Fund), high yield debt securities (Nomura Funds Ireland - US High Yield Bond Fund, Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, Nomura Funds Ireland - European High Yield Bond Fund and Nomura Funds Ireland - US High Yield Bond Continuum Fund), debt securities (Nomura Funds Ireland - Global Dynamic Bond Fund, Nomura Funds Ireland - Asia High Yield Bond Fund and Nomura Funds Ireland - Asia Investment Grade Bond Fund) or Chinese securities (Nomura Funds Ireland - China Fund and Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund). The investment objective of the Sub-Fund is to provide a total return that exceeds the Index through investment in a concentrated, actively managed portfolio of companies with significant long-term potential (American Century US Focused Innovation Equity Fund). The investment objective of the Sub-Funds is to achieve an attractive level of total return through investment in corporate hybrid bonds (Nomura Funds Ireland - Corporate Hybrid Bond Fund) or debt securities (Nomura Funds Ireland - Emerging Market Corporate Bond Fund).

In pursuing its investment objectives, the Fund is exposed to a variety of financial risks: market risk (including market price risk, currency risk and interest rate risk), credit risk and liquidity risk that could result in a reduction in the Fund's Net Asset Value. The Fund's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Sub-Funds' financial performance.

The risks, and the Directors' approach to the management of the risks, are as follows.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

---

**16. Financial risk management (continued)****Market price risk**

Market price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices.

The Fund's assets consist principally of quoted equities and debt securities, the values of which are determined by market forces. All security investments present a risk of loss of capital. The Investment Manager moderates this risk through a careful selection of securities within specified limits including maximum overweight limits for individual stocks and country weights versus the benchmark. The maximum risk resulting from financial instruments is determined by the fair value of the financial instruments. The Board of Directors manage the market price risks inherent in the investment portfolios by ensuring full and timely access to relevant information from the Investment Manager.

The Board of Directors meets regularly and at each meeting reviews investment performance and overall market positions. They monitor the Investment Manager's compliance with the Fund's objectives and are directly responsible for investment strategy and asset allocation. There were no material changes to the Fund's policies and processes for managing market risk and the methods used to measure risk since the prior year end.

The Board of Directors is ultimately responsible for identifying and controlling risks, however the Investment Manager is responsible for the day to day monitoring of risk, and will bring any material events in relation to any changes in the risk profile of the Sub-Funds to the attention of the Directors. The Sub-Funds' global exposure is managed through the use of the "Commitment Approach" method or the value at risk ("VaR") approach. Where using the Commitment Approach, the global exposure through the use of derivatives is limited to 100 percent of the Net Asset Value of the Sub-Fund. Additionally, the Sub-Investment Managers monitor the risk of the Sub-Funds using a variety of proprietary and third party analysis tools to analyse the risk characteristics of the portfolios. The impact of individual trades on the risk profile of the Sub-Fund is also considered before the investment decision is made.

The Sub-Funds' equity securities are susceptible to market price risk arising from uncertainties about future prices of the instruments. The Sub-Funds' market price risk is managed through diversification of the investment portfolio ratios by exposures. An analysis of the Sub-Funds investment portfolio is shown in the Statement of Investments on pages 418 to 659. The equity securities are selected from a variety of regulated stock exchanges as detailed in the prospectus.

At 31st December, 2023 and 31st December, 2022, a 5% increase in equity security prices would have increased the net assets attributable to holders of redeemable participating shares of each Sub-Fund as outlined in the tables below; an equal change in the opposite direction would have decreased the net assets attributable to holders of redeemable shares by an equal but opposite amount.

**Currency risk**

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Certain, of each Sub-Fund's, assets, liabilities and income are denominated in currencies other than the Sub-Fund's functional currency. They are, therefore, exposed to currency risk as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates. Income denominated in foreign currencies is converted to the Sub-Fund's functional currency on receipt.

In accordance with the Fund's policy, the Investment Manager monitors the Fund's currency position on a daily basis and will bring any material events to the attention of the Board of Directors. There were no material changes to the Fund's policies and processes for managing currency risk and the methods used to measure risk since the prior year end. The following tables list the exposure to currencies with a value of greater than 5% of the net assets of each Sub-Fund.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

**16. Financial risk management (continued)**

**Interest rate risk (continued)**

A bond's sensitivity to interest rates can be expressed in terms of duration, which gives the estimated percentage change in portfolio value, associated with a 1% increase in interest rates.

The following analysis is estimated based on the duration calculations as at 31st December, 2023 and 31st December, 2022. This analysis is intended as a relative estimate of interest rate risk for the Sub-Fund rather than as precise numbers. Therefore, the amounts presented represent hypothetical outcomes which are not intended to be predictive, as future market conditions could vary significantly from those experienced in the past.

Also shown in the tables is the estimated impact on the portfolio of a 1 basis point (0.01 of 1 per cent) increase in interest rates. The sensitivity analysis is based on a small parallel shift of the yield curve (interest rates of all maturities moving in unison). A 1 basis point decrease would have an equal but opposite effect.

At 31st December, 2023	Portfolio Value	Duration	Return expected if Interest Rates Rise by 1 Basis Point	
	USD		%	Total USD
Nomura Funds Ireland - US High Yield Bond Fund	3,039,203,661	3.79	(0.038)%	(1,150,395)

The concentration of credit risk, split out by the country and the industry each security is invested in, is included in the Statement of Investments on pages 418 to 659.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

Cash held via accounts opened on the books of Brown Brothers Harriman & Co. ('BBH') are obligations of BBH while cash held in accounts opened directly on the books of a third party cash correspondent bank, sub-custodian or a broker (collectively, 'agency accounts') are obligations of the agent. Cash held via agency cash accounts are liabilities of the agent, creating a debtor/creditor relationship directly between the agent and the Fund. Accordingly, while BBH is responsible for exercising reasonable care in the administration of such agency cash accounts where it has appointed the agent (i.e., in the case of cash correspondent banks and sub-custodians), it is not liable for their repayment in the event the agent, by reason of its bankruptcy, insolvency or otherwise, fails to make repayment. At 31st December, 2023, all institutions holding cash on behalf of the Fund had an F1 or better short-term credit rating as measured by Fitch's. At 31st December, 2022, all institutions holding cash on behalf of the Fund had an F2 or better short-term credit rating as measured by Fitch's. The institutions holding cash on behalf of the Fund at 31st December, 2023 and 31st December, 2022 are listed in Note 2. At 31st December, 2023, all derivative assets and liabilities were held with the counterparties that had an A- or better long-term credit rating as measured by Fitch's. At 31st December, 2022, all derivative assets and liabilities were held with the counterparties that had a BBB+ or better long-term credit rating as measured by Fitch's. The counterparties of derivatives assets and liabilities are disclosed in the Statements of Investments.

The Trustee must ensure that there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. As Trustee, Brown Brothers Harriman Trustee Services (Ireland) Ltd. must ensure the ownership of each asset and the location of documents of title for each asset.

<sup>3</sup>The US High Yield Bond Continuum Fund was launched on 23rd August, 2023.

<sup>4</sup>The Emerging Market Corporate Bond Fund was launched on 12th September, 2023.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31st December, 2023

**16. Financial risk management (continued)****Liquidity risk**

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with liabilities.

The Sub-Funds are exposed to daily cash redemptions of redeemable participating shares. The Sub-Funds therefore invest the majority of their assets in financial instruments that are traded in an active market and can be readily disposed of; they may invest a limited proportion of their assets in investments not actively traded on a stock exchange.

The Sub-Funds' listed securities are considered readily realisable, as they are listed on the regulated stock exchanges as detailed in the prospectus. The Sub-Funds have the ability to borrow in the short-term to ensure settlement. At 31st December, 2023, the Nomura Funds Ireland - Global Dynamic Bond Fund had no overdraft cash balance (31st December, 2022: USD 16), the American Century Global Small Cap Equity Fund had an overdraft cash balance of USD 2,200,808 (31st December, 2022: USD 10), the American Century Global Growth Equity Fund had no overdraft cash balance (31st December, 2022: USD 4), the American Century Concentrated Global Growth Equity Fund had no overdraft cash balance (31st December, 2022: USD 1) and the American Century Emerging Markets Debt Total Return Fund had no overdraft cash balance (31st December, 2022: USD 5).

In accordance with the Fund's policy, the Investment Manager monitors the Sub-Funds' liquidity position on a daily basis and will bring any material events to the attention of the Board of Directors. There were no material changes to the Fund's policies and processes for managing liquidity risk and the methods used to measure risk since the prior year end.

A detailed analysis of the Sub-Funds' assets is not shown as they are considered liquid based on the fact that they could be converted to cash at close to their carrying value.

The tables that follow analyse the Sub-Funds' liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows. Balances due within twelve months equal their carrying balances, as the impact of discounting is not significant.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

**16. Financial risk management (continued)**

**Fair value estimation**

The Fund has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- (i) Level 1: Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities and exchange traded derivatives. Quoted prices for these instruments are not adjusted.
- (ii) Level 2: Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade corporate bonds, listed equities on markets that are not active and over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information. Investments classified within Level 2 are the following asset classes: bonds, forward foreign currency contracts, swaps and OTC derivatives. Forward Foreign Currency Contracts are priced based on the current spot rate, provided by financial FX vendors, plus or minus the applicable number of forward points. This is the forward rate. The number of forward points on a given exchange rate is determined by the prevailing interest rates in each market, the time period between the spot and forward rates as well as other market factors. Bonds are valued based on the latest bid prices obtained from Markit as per the Nomura Funds Ireland Plc pricing hierarchy. Swaps are valued at single price obtained from Markit prior day as per the Nomura Funds Ireland Plc pricing hierarchy. All assets that are not exchange traded but where the price is observable either directly or indirectly is deemed to be a Level 2.
- (iii) Level 3: Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Pricing inputs are unobservable for the investment and include situations where there is little, if any, market activity for the Instrument. The inputs into the determination of fair value require significant management judgement or estimation. As observable prices are not available for these securities, the Fund has used valuation techniques to derive the fair value, if applicable.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the financial asset or liability.

The determination of what constitutes ‘observable’ requires significant judgement by the Directors in consultation with the Investment Manager. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables analyse within the fair value hierarchy the Sub-Funds’ financial assets and financial liabilities measured at fair value at 31st December, 2023 and 31st December, 2022:

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31st December, 2023

## 16. Financial risk management (continued)

## Offsetting

The Fund is required to disclose the impact of offsetting assets and liabilities represented in the Statement of Financial Position to enable users of the financial statements to evaluate the effect or potential effect of netting arrangements on its financial position for recognized assets and liabilities. These recognized assets and liabilities are derivative instruments that are either subject to an enforceable master netting arrangement or similar agreement or meet the following right of set-off criteria: the amounts owed by the Fund to another party are determinable, the Fund has the right to set-off the amounts owed with the amounts owed by the other party, the Fund intends to set-off on a net basis, and the fund right of set-off is enforceable at law.

For financial reporting purpose, the Fund does not offset derivative assets and derivative liabilities in the Statement of Financial Position. The following tables present the Fund's derivative assets and liabilities by counterparty, net of amounts available for offset under a master netting agreement and net of the related collateral received by the Fund for assets and pledged by the Fund for liabilities as at 31st December, 2023 and 31st December, 2022:

The Board of Directors are not aware of any transactions with related parties during the year ended 31st December, 2023 and 31st December, 2022, other than those disclosed in the financial statements.

**18. Efficient portfolio management**

The Fund may employ (subject to the conditions and within the limits laid down by the Central Bank techniques and instruments relating to transferable securities, including but not limited to futures contracts, swaps, options contracts, stock-lending, repurchase agreements and reverse repurchase agreements and any other techniques and instruments the Investment Manager may consider appropriate for efficient portfolio management purposes. Efficient portfolio management transactions may be entered into by the Investment Manager with one of the following aims: a) a reduction of risk; b) a reduction of cost with no increase or a minimal increase in risk; c) generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return). The techniques and instruments employed during the year were futures contracts, swaps, options contracts and stock-lending. Details of stock-lending, including counterparties, are presented in Note 3.

The use of financial derivative instruments by a Sub-Fund may create leverage. To the extent that leverage is employed, leverage will be measured using the commitment approach of measuring risk, whereby such leverage cannot exceed 100 per cent of the Net Asset Value of a Sub-Fund. Where a Sub-Fund invests in financial derivative instruments for such purposes, a risk management process will be submitted to the Central Bank by the Fund, prior to a Sub-Fund engaging in such transactions in accordance with the Central Bank's requirements as set out in UCITS Regulations. It is expected at the use of financial derivative techniques and instruments will not increase a Sub-Fund's risk level.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**  
**For the year ended 31st December, 2023**

---

**19. Global Exposure**

UCITS funds are required to monitor exposures on a daily basis by utilising either the commitment approach or the value at risk (“VaR”) approach when financial derivative instruments are held by the Sub-Funds. With the exception of the Nomura Funds Ireland - Global Dynamic Bond Fund and the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Investment Manager utilises the commitment approach in monitoring the exposures of the Sub-Funds as the market risk can be adequately monitored through this method. The use of financial derivative instruments by a Sub-Fund may create leverage. The leverage of a sub-fund cannot exceed 100 per cent of the Net Asset Value of the Sub-Fund. With the exception of the Nomura Funds Ireland - Global Dynamic Bond Fund and the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, derivatives will be primarily used to achieve one of the following aims: a) a reduction of risk; b) a reduction of cost with no increase or a minimal increase in risk; c) generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return).

Although permitted to hold derivatives, the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund and the Nomura Funds Ireland - Asia Sustainable Equity Fund did not hold any derivatives at 31st December, 2023 and 31st December, 2022, the American Century Concentrated Global Growth Equity Fund, the Nomura Funds Ireland - US High Yield Bond Continuum Fund and the Nomura Funds Ireland - China A-Shares AI Quant Strategy Fund did not hold any derivatives at 31st December, 2023, the American Century Advanced Medical Impact Equity Fund did not hold any derivatives at 31st December, 2022. These Sub-Funds held equities, bonds and collective investment schemes at 31st December, 2023 and 31st December, 2022, respectively. These Sub-Funds are monitored regularly for any change that would require FDI risk monitoring.

The Nomura Funds Ireland - Japan Strategic Value Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023 and 31st December, 2022. The Nomura Funds Ireland - US High Yield Bond Fund held equities, bonds, warrants, term loans and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023 and 31st December, 2022. The Nomura Funds Ireland - Japan High Conviction Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023 and 31st December, 2022. The Nomura Funds Ireland - Global Sustainable High Yield Bond Fund held bonds, equities, term loans and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023 and bonds, equities, term loans, warrants and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022. The Nomura Funds Ireland - Asia High Yield Bond Fund held bonds and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023 and 31st December, 2022. The Nomura Funds Ireland - Asia Investment Grade Bond Fund held bonds, futures contracts and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023 and 31st December, 2022. The Nomura Funds Ireland - Global High Conviction Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023 and 31st December, 2022. The Nomura Funds Ireland - European High Yield Bond Fund held bonds, equities, term loans, warrants and forward foreign currency forwards for the purposes of currency hedging at 31st December, 2023 and equities, bonds, term loans and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022. The American Century Global Small Cap Equity Fund held equities, collective investment schemes and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023 and 31st December, 2022. The Nomura Funds Ireland - Corporate Hybrid Bond Fund held bonds and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2023. The Nomura Funds Ireland - Emerging Market Corporate Bond Fund held bonds and futures contracts at 31st December, 2023. The American Century Concentrated Global Growth Equity Fund held equities, collective investment schemes and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022.

Breaches of exposure limits, if any, are identified using the commitment approach, addressed by the Investment Manager and reported to the Directors. An annual FDI report is provided to the Central Bank detailing any exposures breached during the year and any material changes to the risk monitoring process.

The purpose of a VaR model is the quantification of the maximum potential loss which might be generated by a Sub-Fund's portfolio in normal market conditions. This loss is estimated on the basis of a given holding period and a certain confidence interval. The Nomura Funds Ireland uses a Monte Carlo methodology for VaR calculation. The Monte Carlo simulation approach is used to model the probability of different outcomes in a process in which there are interventions of random variables and refers to any method that randomly generates trials. The holding period of VaR analysis used for the Nomura Funds Ireland - Global Dynamic Bond Fund and the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund is 1 day, for the American Century Emerging Markets Debt Total Return Fund is 20 days, the length of the historical data window period is 250 days based on the full revaluation approach.

<sup>1</sup> The American Century Emerging Markets Debt Total Return Fund was fully redeemed on 9th March, 2023.

---

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2023**

---

**20. Soft commissions**

In accordance with its obligations under MiFID, the Investment Manager shall return to the relevant Sub-Fund any fees, commissions or other monetary benefits paid or provided by a third party in relation to the investment management services provided by the Investment Manager to the Fund as soon as reasonably possible after receipt.

In particular, where the Investment Manager successfully negotiates the recapture of a portion of the commissions charged by brokers or dealers in connection with the purchase and/or sale of securities, permitted derivative instruments or techniques and instruments for the Fund or a Sub-Fund, the rebated commission shall be paid to the Fund or the relevant Sub-Fund as the case may be.

The Investment Manager shall however be permitted to retain minor non-monetary benefits received from third parties where the benefits are such that they could not impair the Investment Manager from complying with its obligation to act in the best interests of the Fund, provided they are disclosed to the Fund prior to the provisions of investment management services by that entity. A list of acceptable “minor non-monetary” benefits is set out in the Commission Delegated Directive (EU) 2017/593.

The Investment Manager may only receive third-party investment research, provided it is received on such basis that it does not contravene MiFID.

Investment research will not constitute an inducement under MiFID where it is paid for by the Investment Manager itself out of its own resources or out of a research payment account funded by a specific research charge to the applicable Sub-Fund.

In this regard, the Investment Manager may discharge the charges relating to investment research which is or may be used by the Investment Manager in managing the assets of the Fund out of its own resources or out of a research payment account funded by a specific research charge to the applicable Sub-Fund.

There were no soft commission arrangements entered into by the Investment Manager or its delegate, on behalf of the Fund during the year ended 31st December, 2023 (31st December, 2022: none).

**21. Dividends**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)****For the year ended 31st December, 2023****23. Notional foreign exchange adjustment**

For the purposes of reporting the combined results of the Fund at 31st December, 2023, the results of the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund and the Nomura Funds Ireland - Japan Sustainable Equity Core Fund have been translated into US Dollars at the closing rate at the year end date 1 USD = 141.4550 JPY (31st December, 2022: 1 USD = 131.8350 JPY) for Statement of Financial Position items and the average rate for the year from 1st January, 2023 to 31st December, 2023 1 USD = 140.2721 JPY (2022: 1 USD = 130.6848 JPY) for the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. The results of the Nomura Funds Ireland - European High Yield Bond Fund and the Nomura Funds Ireland - Corporate Hybrid Bond Fund have been translated into US Dollars at the closing rate at the year end date 1 USD = 0.9033 EUR (31st December, 2022: 1 USD = 0.9358 EUR) for Statement of Financial Position items and the average rate for the year from 1st January, 2023 to 31st December, 2023 1 USD = 0.9246 EUR (2022: 1 USD = 0.9494 EUR) for the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. A notional currency adjustment of USD (71,186,327) (31st December, 2022: USD (252,494,837)) arises from the translation of the opening net assets, the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. The method of translation has no effect on the value of net assets allocated to the individual Sub-Funds.

In accordance with the UCITS Regulations, the annual report documents material changes that have occurred in the disposition of the assets of the Company during the financial year. A material change is defined as aggregate purchase of a security exceeding 1 percent of the total value of purchased for the financial year and/or aggregate disposals greater than 1 percent of the total value of sales for the financial year. If there are fewer than 20 purchases/sales that meet the material change definition, the Company shall disclose those purchase/sales and such number of the next largest purchases/sales so at least 20 purchases/sales are disclosed.

**APPENDIX 1 – SECURITIES FINANCING TRANSACTIONS REGULATION**

Securities Financing Transaction Regulation (“SFTR”) introduces reporting requirements for securities financing transactions (“SFTs”) and total return swaps.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at 31st December, 2023 the Sub-Funds held securities lending as types of instruments under the scope of the SFTs.

The following tables are presented in USD as all of the collateral referred to is USD denominated.

**Global Data**

The amount of assets across all SFTs as at 31st December, 2023 is as follows:

Nomura Funds Ireland - Japan Strategic Value Fund

Type of asset	Amount*	% of NAV	% of lendable assets
Securities lending	USD 99,351,111	8.58%	9.27%

**APPENDIX 2 (UNAUDITED) – REMUNERATION DISCLOSURE**

The below disclosure is made in respect of the remuneration policies of Bridge Fund Management Limited (“Manager”) in accordance with the European Union Directive 2014/91/EU as implemented in Ireland by European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016. This requires UCITS management companies to establish and apply remuneration policies and practices that promote sound and effective risk management, and do not encourage risk taking which is inconsistent with the risk profile of the UCITS.

The Manager has designated the following persons as Identified Staff:

- Executive and Non-Executive members of the management body of the Manager e.g. CEO, Directors, Executive and Non-Executive partners;
- Senior management;
- Risk takers – staff who can exert material influence on the Manager or on the UCITS or AIFs it manages;
- Those in control functions: Operations, HR, Compliance, Finance where applicable;
- Staff whose total remuneration takes them into the bracket of senior management and risk takers, whose professional activities have a material impact on the Manager’s risk position or those of the UCITS and/or AIFs it manages; and
- Categories of staff of the entities to which portfolio management or risk management activities have been delegated whose professional activities have a material impact on the Manager’s risk position or those of the UCITS and/or AIFs it manages.

The Remuneration Policy is designed to discourage risk taking that is inconsistent with the risk profile of the UCITS and the Manager is not incentivised or rewarded for taking excessive risk.

The Manager is required under UCITS regulations to make quantitative disclosures of remuneration. Disclosures are provided in relation to Identified Staff who are employed directly by the Manager and Identified Staff who have the ability to materially impact the risk profile of the UCITS including individuals who, although not directly employed by the Manager, are assigned by their employer to carry out services directly by the Manager.

All remuneration paid to Identified Staff can be divided into:

- Fixed remuneration (payments or benefits without consideration of any performance criteria); and
- Variable remuneration (additional payments or benefits depending on performance or, in certain cases, other contractual criteria) which is not based on the performance of the UCITS.

Remuneration details for the Manager are disclosed below:

<b>Description</b>	<b>Number of beneficiaries</b>	<b>Total remuneration paid</b>	<b>Fixed remuneration paid</b>	<b>Variable remuneration paid</b>
Total Staff Remuneration	45	€3,948,284	€3,503,284	€445,000
Senior Management (including executives), risk takers and other identified staff	8	€1,194,440	€952,440	€242,000

Details of the Remuneration Policy, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits is available at the following website:

<https://bridgefundservices.com/media/ceupd4jd/remuneration-policy.pdf>

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions and sustainable, fair and inclusive business practices as its environmental and social characteristics.

The environmental characteristic was pursued through focusing on companies that contribute to reduction of GHG emissions through products and services which improve energy efficiency of manufacturing industry as a whole, and products and services which enables electrification of automobiles and alike.

The social characteristic was pursued mainly through the exclusions applied for the Sub-Fund which limited the Sub-Fund's exposure in certain businesses and sectors such as gambling, thermal coal, tobacco and controversial weapons as well as compliance with the UN Global Compact principles.

The extent of the Sub-Fund’s impact and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

Contribution to reduction of greenhouse gas emissions:

- GHG emissions per unit revenue: The weighted average Scope 1 and 2 GHG intensity (Scope 1 & 2 emissions per USD1 million of revenue) was 75.8 tonnes, whereas that of the TOPIX index (the “Index”) was 92.1 tonnes.

Sustainable, fair and inclusive business practices:

- Women in senior management: The percentage of female directors was 18.62% as opposed to % 17.84% of the companies in the Index.
- Compliance with UN Global Compact principles: No holdings fell outside compliance with UN Global Compact principles through the year.
- Exposure to controversial weapons: No holdings had exposure to controversial weapons through the year.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2023 and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used the data provided by third-party data providers, ISS-ESG and MSCI, as well as research conducted by in-house analysts.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)
GHG emissions per unit revenue (weighted average Scope 1 and 2 GHG intensity)	81.04 tonnes	75.8 tonnes
Women in senior management	16.99%	18.62%
Compliance with UN Global Compact	All holdings	All holdings
Exposure to controversial weapons	No holdings	No holdings

An energy company with a commitment to reducing GHG emissions over medium-term has contributed to the lower GHG intensity through the reduction of Scope 1 and Scope 2 GHG emissions. Additionally, lower weight invested in an airline company has also contributed to the lower GHG intensity compared to the previous period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Percentage of female board members has improved mainly due to many companies across the board have recently increased female board members with the help of the listing rule reform by Tokyo Stock Exchange.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	21,153.78	100.00	44,473.15	97.99
1.1.2	Scope 2 GHG emissions	18,152.42	100.00	18,198.17	97.99
1.1.3	Scope 3 GHG emissions	491,188.48	100.00	511,532.99	97.97

1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	97.46

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.4 (Exposure to companies active in the fossil fuel sector): While the impact was lower than that of the Index, the Sub-Fund reported 7.42% exposure to companies active in the fossil fuel sector. The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are mainly trading companies with diverse businesses that include small proportion of fossil fuel-related activities, and an oil and gas exploration and production company. These companies either contribute to transition to renewable energy through their access to resources or promoting the development of renewable energy sources such as hydrogen and ammonia.
- #1.6.2 (NACE Code B): Regarding NACE Code B (Mining and Quarrying), the Sub-Fund invested in an oil and gas exploration and production company. The company commits to net zero by 2050 (Scope 1 & 2) and plans to invest more than 20% of the CapEx in decarbonisation projects including the expansion of hydrogen and ammonia businesses. While the PAI data of the Sub-Fund exceeds that of the Index (1.75 and 0.47, respectively), the Investment Manager considers that the commitment and activities of the company will contribute to the promotion of the environmental characteristic of the Sub-Fund.
- #1.6.6 (NACE Code F): Regarding NACE Code F (Construction), the Sub-Fund holds construction companies that provide energy-efficient houses in Japan and overseas.

While the impact for the Sub-Fund underperformed at 0.23 GWh/million EUR of revenue in comparison to 0.19 of the Index, the Investment Manager believes that these companies contribute to the environmental characteristic of the Sub-Fund through the reduction of Scope3 GHG emissions with their houses. One of the companies sources timber from their sustainably-managed forestry business.

- #1.6.7 (NACE Code G): Regarding NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles), the Sub-Fund holds trading companies. While engaging in various businesses, these companies are working on reducing GHG emissions through investments in expanding renewable energy and utilizing hydrogen and ammonia. Additionally, they are engaged in recycling businesses in emerging countries which the Investment Manager considers contribute to the environmental characteristic of the Sub-Fund by promoting circular economy.
- #1.13 (Board gender diversity): The Investment Manager has added exposure to companies that respect the importance of diversity which resulted in the Sub-Fund's outperformance on the board gender diversity (19.81%) against the Index (18.66%). The Investment Manager will continue to engage with companies to encourage further improvement.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Index is a broad market index and not consistent with the environmental and social characteristics promoted by the Sub-Fund.

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
NIPPON TELEGRAPH & TELEPHONE CORPORATION	Communication Services	5.33	Japan
SONY GROUP CORP	Consumer Discretionary	4.46	Japan
MITSUBISHI UFJ FINANCIAL	Financials	4.42	Japan
TOKYO ELECTRON LTD	Information Technology	3.62	Japan
SHIN-ETSU CHEMICAL CO LTD	Materials	2.97	Japan
SCREEN HOLDINGS CO LTD	Information Technology	2.88	Japan
HITACHI LTD	Industrials	2.76	Japan
SUMITOMO MITSUI FINANCIAL	Financials	2.49	Japan
DAIWA HOUSE INDUSTRY CO	Real Estate	2.41	Japan
NINTENDO CO LTD	Communication Services	2.08	Japan
FUJIFILM HOLDINGS CORP	Information Technology	1.93	Japan
ITOCHU CORP	Industrials	1.90	Japan
ASAHI GROUP HOLDINGS LTD	Consumer Staples	1.89	Japan
DENSO CORP	Consumer Discretionary	1.87	Japan
DAIICHI SANKYO CO LTD	Health Care	1.79	Japan

\* Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.**

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

**Asset allocation** describes the share of investments in specific assets.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 99.2% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

The Sub-Fund did not make any sustainable investments at this time.

#### #2 Other

The remaining 0.8% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 98.4%
- #2 Other: 1.6%

### ● **In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
Communication Services	Telecommunication Services	5.33
Communication Services	Media & Entertainment	3.39
Consumer Discretionary	Consumer Durables & Apparel	7.86

Consumer Discretionary	Automobiles & Components	6.53
Consumer Discretionary	Consumer Discretionary Distribution	3.64
Consumer Staples	Food, Beverage & Tobacco	1.91
Consumer Staples	Consumer Staples Distribution	1.39
Energy	Energy	1.34
Financials	Banks	9.53
Financials	Insurance	2.47
Financials	Financial Services	1.19
Health Care	Pharmaceuticals, Biotechnology	4.24
Health Care	Health Care Equipment & Services	0.06
Industrials	Capital Goods	13.46
Industrials	Transportation	4.87
Information Technology	Semiconductors & Semiconductor	11.53
Information Technology	Technology Hardware & Equipment	4.18
Information Technology	Software & Services	3.69
Materials	Materials	6.21
Real Estate	Real Estate Management & Development	6.35

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
Turnover	0%	0%	100%	100%
CapEx	0%	0%	100%	100%
OpEx	0%	0%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

### **What was the share of socially sustainable investments?**

Not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

One of the Sub-Fund's holdings is a consumer discretionary company which is a leading company in gender diversity among its peers but has not yet signed up to the UNGC. Through its direct engagement with the company, the Investment Manager has learned that the company believed it was operating in compliance with the UNGC while it is not a signatory. The Investment Manager previously presented its view on the importance of becoming a signatory with the formal disclosure obligations and monitoring processes in place. Through continuous engagement, the Investment Manager is of the view that the company will become a signatory to the UNGC in the near future and will keep monitoring the development of the company.

The Investment Manager has closely monitored a financial institution which has been on “Watchlist” rating since the previous reference period (ending 31 December 2022) due to its relatively low commitment from the company's management on social and governance issues. The Investment Manager has continued to engage with the company on these issues particularly relating to the number of female directors. As the company has started to take actions on some issues, the Investment Manager will continue to engage for further improvement.

During the reference period, the Sub-Fund divested from a company which was deemed to contradict with the environmental and social characteristics of the Sub-Fund. The Sub-Fund had held a position in a company that provides intralogistics solutions. The Investment Manager had considered that the company contributed to the environmental characteristic through electrification of its products and electric compressors for EVs. The divestment decision followed the company's alleged falsification of emission test results of petrol and diesel engines for forklifts in Japan in March 2023. It was announced that the products in question had or would have produced GHG emissions exceeding the limit set by the Japanese emission regulation when/if used in a deteriorated condition after prolonged use. The Investment Manager determined that the issue had a significantly negative impact on the environmental and social characteristics of the Sub-Fund given that the company continued to sell the products while acknowledging their negative impact.

The Sub-Fund initiated an investment in a leading electric motor manufacturer which has developed and launched a new, high-efficiency motors at low cost without using permanent magnets. These motors significantly improve energy efficiency while reducing environmental negative impact by not using rare earth materials such as neodymium. In addition to the contribution to the environmental characteristic of the Sub-Fund, the Investment Manager valued the commitment of the company in board gender diversity by appointing five female directors for its board of ten.

## ANNEX

Product name: Nomura Funds Ireland – Japan High Conviction Fund  
 Legal entity identifier: 549300J9GYEF5XW0TG70

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions and sustainable, fair and inclusive business practices as its environmental and social characteristics.

The environmental characteristic was pursued through focusing on companies working towards GHG emissions reduction. Within its investment process, the Investment Manager has taken into account companies' GHG emission reduction targets and monitored current and future emissions of the Sub-Fund in comparison to the carbon budgets for the International Energy Agency (IEA) Sustainable Development Scenario (SDS).

The social characteristic was pursued mainly through the exclusions applied for the Sub-Fund which limited the Sub-Fund's exposure in certain businesses and sectors such as alcohol, adult entertainment, gambling, nuclear weapons, thermal coal, tobacco and controversial weapons as well as compliance with the UN Global Compact principles.

The extent of the Sub-Fund’s impact and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● **How did the sustainability indicators perform?**

Contribution to reduction of greenhouse gas emissions:

- GHG emissions per unit revenue: The weighted average Scope 1 and 2 GHG intensity (Scope 1 & 2 emissions per USD1 million of revenue) was 42.9 tonnes, whereas that of the TOPIX index (the “Index”) was 92.1 tonnes.

Sustainable, fair and inclusive business practices:

- Management remuneration: 47.5% of the investee companies have disclosed their remuneration policies with emphasis on the relationship between remuneration and the effectiveness of management as opposed to 70.8% of the companies in the Index.
- Percent women on the corporate board: The percentage of female directors was 17.20% as opposed to 17.84% of the companies in the Index.
- Compliance with UN Global Compact: No holdings fell outside compliance with UN Global Compact through the year.
- Exposure to controversial weapons: No holdings had exposure to controversial weapons through the year.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2023 and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used the data provided by third-party data providers, ISS-ESG and MSCI, as well as research conducted by in-house analysts.

● **...and compared to previous periods?**

<b>Sustainability indicators</b>	<b>31 December 2022 reference period (reported in 2023 periodic report)</b>	<b>31 December 2023 reference period (reported in 2024 periodic report)</b>
GHG emissions per unit revenue (weighted average Scope 1 and 2 GHG intensity)	45.3 tonnes	42.9 tonnes
Management remuneration	58.5%	47.5%
Percent women on the corporate board	16.21%	17.20%
Compliance with UN Global Compact	All holdings	All holdings
Exposure to controversial weapons	No holdings	No holdings

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

GHG emissions per unit of revenue (weighted average Scope 1 & 2 GHG intensity) of the Sub-Fund has decreased slightly compared to the previous year. The Sub-Fund has avoided investing in companies with high level of Scope 1 and 2 GHG emissions without any credible plans to reduce them.

The proportion of companies in the Sub-Fund that disclosed remuneration policies, including executive compensation, has decreased materially compared to the previous reference period. The main reason behind the deterioration is the enhancement in the indicator's calculation methodology. Under the new methodology, quality of disclosures is additionally assessed to determine whether a company discloses remuneration policies. Some companies that were identified as "disclosed" their remuneration policies in the previous period no longer meet the quality criteria and reassessed as "not disclosed". The Investment Manager has engaged with those companies with no or low quality of disclosures for improvement and will continue to engage with them.

The percentage of women on the corporate board has increased compared to the previous period. However, the indicator underperformed against the Index due to more improvements were seen in larger companies that are constituents of the Index. Towards the end of the reference period, the Investment Manager initiated investments in companies with higher ratio of female directors and as of the end of December 2023, the Sub-Fund recorded higher female director ratio than the Index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	1,308.94	100.00	16,051.75	97.99
1.1.2	Scope 2 GHG emissions	2,677.13	100.00	6,584.32	97.99
1.1.3	Scope 3 GHG emissions	46,434.15	100.00	184,749.35	97.97
1.1.4	Total GHG emissions	50,420.23	100.00	207,403.96	97.96
1.2	Carbon Footprint	175.34	100.00	752.14	97.96
1.3	GHG intensity of investee company	563.49	100.00	857.72	97.97
1.4	Exposure to companies active in the fossil fuel sector	0.52	100.00	8.98	97.12

1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	97.46

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.6.3 (NACE Code C): Regarding NACE Code C (Manufacturing), the data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The Sub-Fund holds large chemical manufacturers, who offer products such as polyvinyl chloride and silicon wafers, which have relatively high energy consumption. However, these companies are also working to reduce energy consumption and therefore the Investment Manager will continue to monitor and engage with them.
- #1.8 (Emissions to water): Based on the Data Provider's data, the Sub-Fund's weighed average emissions to water per EUR1 million invested were 0.46 tonnes and higher than those of the Index, 0.15 tonnes. The data coverage for both the Sub-Fund and the Index is currently extremely limited for this indicator with data available only for chemical manufacturer holdings (engaged in pesticides and

electronic materials) held by the Sub-Fund. The Investment Manager will monitor the development of data availability for this indicator.

- #1.9 (Hazardous waste and radioactive waste ratio): Based on the Data Provider's data, the Sub-Fund has indicated a higher negative impact than that of the Index. The data coverage of this indicator for both the Sub-Fund and the Index is currently limited and only 2 companies within the Sub-Fund had the data. In addition, the Investment Manager has identified a discrepancy between company-report data and the data provided by the Data Provider for one of the companies, which has been confirmed by the Data Provider as an error.
- #1.11 (Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines): The Investment Manager will engage with those companies that lack in processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines.
- #1.12 (Unadjusted gender pay gap): The data coverage for both the Sub-Fund and the Index is currently limited for this indicator with data available for only one holding within the Sub-Fund. The Investment Manager will monitor the development of data availability for this indicator.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Index is a broad market index and not consistent with the environmental and social characteristics promoted by the Sub-Fund.

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
UNICHARM CORP	Consumer Staples	5.46	Japan
SHIN-ETSU CHEMICAL CO LTD	Materials	5.40	Japan
CHUGAI PHARMACEUTICAL CO	Health Care	5.21	Japan
KEYENCE CORP	Information Technology	5.21	Japan
FAST RETAILING CO LTD	Consumer Discretionary	5.16	Japan
M3 INC	Health Care	5.10	Japan
GMO PAYMENT GATEWAY INC	Financials	4.67	Japan
DAIKIN INDUSTRIES LTD	Industrials	4.52	Japan

MURATA MANUFACTURING CO	Information Technology	3.32	Japan
ASAHI INTECC CO LTD	Health Care	3.15	Japan

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.**

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 96.5% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

The Sub-Fund did not make any sustainable investments at this time.

#### #2 Other

The remaining 3.5% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 96.9%
- #2 Other: 3.1%

### ● **In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
Consumer Discretionary	Consumer Discretionary Distribution	5.16
Consumer Discretionary	Consumer Durables & Apparel	2.90
Consumer Discretionary	Automobiles & Components	1.79
Consumer Staples	Household & Personal Products	8.34

Consumer Staples	Consumer Staples Distribution	1.47
Financials	Financial Services	5.69
Health Care	Health Care Equipment & Services	14.40
Health Care	Pharmaceuticals, Biotechnology	5.21
Industrials	Capital Goods	15.69
Industrials	Commercial & Professional Services	8.26
Information Technology	Technology Hardware & Equipment	8.53
Information Technology	Software & Services	4.61
Information Technology	Semiconductors & Semiconductor	4.02
Materials	Materials	8.35
Real Estate	Real Estate Management & Development	2.07

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
Turnover	0%	0%	100%	100%
CapEx	0%	0%	100%	100%
OpEx	0%	0%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

### **What was the share of socially sustainable investments?**

Not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In order to promote the environmental characteristic of the Sub-Fund, the Investment Manager believes that it is essential to further accelerate the reduction of GHG emissions by those companies that are already deemed to be contributing to environmental characteristics. Based on this belief, the Investment Manager has engaged with companies to understand their carbon neutrality targets and to promote Science Based Targets (SBT) accreditation.

One of the Sub-Fund's holdings is a company that manufactures optical and electronic products. This company is engaged in social contribution activities, such as improving access to ophthalmic medical care in developing countries. However, the company had lacked in efforts in disclosing sustainability information particularly in terms of medium- to long-term reduction targets for its GHG emissions. Since 2021, the Investment Manager has been engaging with the company with a particular focus on requesting them to demonstrate efforts towards achieving carbon neutrality. In April 2023, the company disclosed a scenario analysis based on the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) for the first time, and announced its carbon neutrality targets for 2040 concerning scope 1 and 2 GHG emissions. The Investment Manager will continue its engagement to encourage the company to disclose scope 3 GHG emissions and other sustainability information.

For the social characteristics of the Sub-Fund, the Investment Manager believes in the importance of creating a welcoming and efficient working environment, meeting the diverse needs of customers, and making effective decisions to expand demand over the medium to long term. One of the Sub-Fund's holdings is a company that provides credit insurance for accounts receivable generated from daily transactions mainly for small and medium-sized enterprises. The Investment Manager has been engaging with the company on board diversity such as the number of external directors and female directors since 2021. In June 2023, the company has introduced the first female external director to the board and since then the company has shown its intention of increasing the number of external directors. The Investment Manager will continue its engagement activities.

During the reference period, the Sub-Fund divested a major manufacturer of electric motors used in hard disk drives, consumer electronics, automobiles, and industrial and manufacturing equipment. The Sub-Fund had kept the company on close monitoring due to its less effective governance model observed in aspects such as its ongoing challenges in appointing a business successor to the founder and the lack of experience among external directors in managing companies. While the Investment Manager had engaged with the company to address these issues, the speed and extent of the progress had not been sufficient to satisfy the standards of good governance practices pursued by the Sub-Fund and these issues have started to cause negative impact on the financial results of the

company. As a result, the Investment Manager sold all holdings of this company in June 2023.

### **Disclaimer**

This disclosure was developed using information from MSCI ESG Research LLC or its affiliates or information providers. ## ANNEX

Product name: Nomura Funds Ireland – Global Sustainable High Yield Bond Fund

Legal entity identifier: 549300BLIU8FQVR1RG50

# Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 81.2%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 16.2%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund has sustainable investment as its investment objective. In order to achieve its sustainable investment objective, the Sub-Fund invested in securities of issuers that the Investment Manager viewed as contributing to environmental and/or social objectives. The environmental and social objectives of the Sub-Fund are to contribute to:

Environmental objectives:

- Climate Mitigation - Own Operations
- Climate Mitigation - Enabling Activities
- Climate Adaptation
- Efficient use of raw materials
- Sustainable use of water and land
- Minimizing waste production
- Mitigating impact on biodiversity
- Support the circular economy

#### Social objectives:

- Tackling inequality
- Fosters social cohesion
- Encourages social integration
- Investment in human capital
- Investment in economically or socially disadvantaged communities

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the above environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions and contribution assessment, and categorised into the appropriate contribution category of “direct contribution”, “indirect contribution” or “transition”. The details of the contribution categories and the binding strategies are further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

The summary of the sustainable investments made by the Sub-Fund aligned with the above environmental and/or social objectives is below:

#### Environmental objectives:

- Climate Mitigation - Own Operations
  - Sustainable investments in this objective have made commitments to reduce GHG emissions, which in most cases are either SBTi approved or in line with the commitments of the Paris Agreement. Companies invested have made medium and long term commitments to GHG reductions, track their GHG emissions on a yearly basis and have concrete plans towards their planned targets.
- Climate Mitigation - Enabling Activities
  - Sustainable investments in this objective have offered, as their economic activity, products or services that helped their customers reduce their GHG emission profile. The largest exposure in this objective was in renewable power companies that generate a majority of their electricity through wind or solar generating capacity.
- Efficient use of raw materials
  - Sustainable investments in this objective have industry leading processes to reduce raw materials used in their production process.
- Sustainable use of water and land
  - Sustainable investments in this objective manufacture products that help consumers reduce water usage, such as the installation of water saving fixtures in the home.
- Minimizing waste production
  - Sustainable investments in this objective contribute to reducing waste production in their own operations. For example, a building materials company implementing measures to maximize lumber utilization.
- Support the circular economy
  - Sustainable investments in this objective are committing to increasing the amount of recycled or recyclable materials in their products.

#### Social objectives:

- Tackling inequality
  - Sustainable investments in this objective have had strong commitments and measurable targets to equality, diversity and inclusion within their employee base.
- Fosters social cohesion
  - Sustainable investments in this objective have provided services such as basic internet access in underserved areas.

- Encourages social integration
  - Sustainable investments in this objective provided services to inform and engage minority populations where their native language services were not otherwise available.
- Investment in human capital
  - Sustainable investments in this objective contributed to the development, training and education of society.
- Investment in economically or socially disadvantaged communities
  - Sustainable investments in this objective provided services such as financing, healthcare, internet service to economic or socially disadvantaged communities.

The extent of the Sub-Fund's sustainability outcome and/or contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

### ● **How did the sustainability indicators perform?**

The Sub-Fund's sustainability indicators performed as below:

- Greenhouse gas (GHG) emissions: The weighted average scope 1 and 2 GHG emissions was 2,832,590 tonnes.
- GHG intensity: The weighted average scope 1 & 2 GHG intensity (scope 1 and 2 GHG emissions per USD1 million of revenue) was 229.8 tonnes.
- Subsidised healthcare provided to economically or socially disadvantaged communities: The subsidised healthcare per USD1 million revenue was USD139,713. Subsidised healthcare are health care services provided that are either subsidised by government programs or uncompensated. The calculation uses the aggregate of subsidised and uncompensated healthcare for 2023. The amount of subsidised health care is based on revenues from services provided by investee companies that are paid by Medicaid, and the amount of uncompensated health care is an estimate for the cost of care provided by investee companies. The total sum of subsidised and uncompensated health care is then divided by the aggregate revenues reported by each issuer for 2023. The Investment Manager calculated the weighted average of the subsidised healthcare for the four issuers that align with this objective as of the end of December 2023.

Please note that the sustainability indicator data generally becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report. Unless otherwise stated, the data has been calculated using the quarter-end average weights of holdings held in the Sub-Fund in 2023, and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports as well as data provided by a third-party data provider, Sustainalytics.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)
GHG emissions (scope 1 & 2)	2,346,761 tonnes	2,264,215 tonnes
GHG intensity (scope 1 & 2)	359.6 tonnes	206.6 tonnes
Subsidised healthcare provided to economically or socially disadvantaged communities (per USD1 million revenue)	USD143,190*	USD139,713

\*Regarding the amount of subsidised healthcare provided to economically or socially disadvantaged communities, the Sub-Fund reported USD36,957 for the reference period ending 31 December 2022, as it only counted the amount of uncompensated healthcare provided. For this indicator, the Sub-Fund calculates the aggregate of subsidised and uncompensated healthcare. Therefore, investors are advised that the aggregate amount of subsidised and uncompensated healthcare for the reference period ending 31 December 2022 was USD 143,190 compared to USD139,713 for the reference period ending 31 December, 2023.

The Sub-Fund's reduction in GHG emissions and intensity was due to a reduction in the portfolio's exposure to certain high carbon intensity industries, such as leisure, transportation, utility and energy.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used in-house research and analysis taking into account reported data and data provided by third party data providers, Sustainalytics and Bloomberg, where available.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager considered the following principal adverse impacts ("PAI") indicators, either directly or indirectly, throughout the investment process through certain product-, activity- or conduct-based exclusions, proprietary ESG scores and contribution assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGCP) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below) as further described under "What investment strategy does this financial product follow?".

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violations of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

The Investment Manager has also taken into account other relevant PAI indicators depending on the business activities, behaviours of a company and the availability of data. Where there was no sufficient data to make credible assessment, the Investment Manager supplemented with its qualitative research and engagement. Engagement with companies takes place on an ongoing basis.

Please note that data from the third party data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Exposure to companies deemed to be in violation of UNGC and OECD Guidelines as assessed by the Investment Manager using inputs from third-party data providers (threshold 0%)

For the following PAI indicators, the Investment Manager's analysts consider the PAI for each investment of the Sub-Fund to understand and mitigate the impacts. Where quantitative data was available, the Investment Manager sought to invest in companies with lower negative impacts when other characteristics (such as contribution to environmental or social objectives) were similar. However, data continues to be limited for

PAI, particularly for US based investee companies. In these situations, the Investment Manager analysed the company's goals, policies and activities to judge the company's impact on PAI qualitatively. Where there are concerns, the Investment Manager's analysts document how the company plans on mitigating or the company's initiatives to confirm if the investments still qualify as sustainable investments. The Investment Manager used sources such as company sustainability reports and filing, as well as third party providers, Sustainalytics and Bloomberg, to perform this analysis.

- GHG emissions (Scope 1 GHG emissions, and Scope 2 GHG emissions, Scope 1&2 GHG emissions)
- Scope 1&2 Carbon footprint
- Scope 1&2 GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Board gender diversity
- Share of securities not issued under Union legislation on environmentally sustainable bonds
- Number of days lost to injuries, accidents, fatalities or illness

Please note that data from the third party providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.

Largest investments	Sector	% Assets	Country
Cash	N/A	2.54	N/A
Pattern Energy Group Inc. PEGI 4.500% 08/15/28	Utility	1.54	USA
Atlantica Yield PLC AY 4.125% 06/15/28	Utility	1.51	Spain

Ford Motor Company F 3.375% 11/13/25	Automotive	0.83	USA

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets classified as "#Not sustainable" (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

### ● *What was the asset allocation?*

#### #1 Sustainable

The Investment Manager has invested 97.4% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#### #2 Not sustainable

The remaining 2.6% of investments were primarily cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

Within this 2.6%, a small proportion constitutes certain legacy debt instruments held by the Sub-Fund from the time prior to the recategorisation of the Sub-Fund as an Article 9 fund within the meaning of SFDR in November, 2021. The Investment Manager continues to seek to divest such legacy debt instruments and has not written off such holdings taking into account the best interest of shareholders and potential future increase in liquidity. The proportion of legacy debt instruments account for 0.04% of the Sub-Fund using the quarter-end average weights of Sub-Fund holdings. These holdings did not affect the delivery of the sustainable investment objective in the reference period due to the limited proportion.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Sustainable: 92.6 (split as to Environmental: 80.7% and Social: 11.9%)
- #2 Not Sustainable: 7.4%

### ● *In which economic sectors were the investments made?*

Sector	Sub-Sector	% Assets
Automotive	Auto Loans	2.16

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas     In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
<b>Turnover</b>	0%	0%	100%	100%
<b>CapEx</b>	0%	0%	100%	100%
<b>OpEx</b>	0%	0%	100%	100%

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 81.2%.

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 16.2%.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments made by the Sub-Fund were primarily cash held as ancillary liquidity, along with a small proportion of certain legacy debt instruments as further detailed under the section “What was the proportion of sustainability-related investments?”. They did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and/or the nature of those instruments.

## **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Investment Manager conducts deep dive engagements to address particular sustainability-related issues. For example, initiatives and timelines for climate change mitigation plans were discussed to ascertain how committed companies were to their GHG emission reduction goals and their ability to achieve those goals. The Investment Manager engaged with 24 high-yield bond issuers, which include potential investee companies that are not held within the Sub-Fund, in 2023.

For example, the Investment Manager conducted an engagement with a company that engineers, manufactures, and distributes components and systems for worldwide automotive, heavy truck, off-highway, engine, and industrial markets. The Investment Manager believes the company to be a sustainable investment which contribute to Climate Mitigation objective (via its own operations) and engaged with the company to verify how it will achieve market-based carbon neutrality by 2040, and to better understand its new product development in the EV space.

The company is aiming to achieve carbon neutrality by 2040, aligned with SBTi and its net zero standard. Its interim goal is to reduce 75% of Scope 1 & 2 GHG emissions by 2030, and 25% of Scope 3 GHG emissions by 2030. On its market-based Scope 3 GHG emissions, the company has created a flexible product offering such as motors that could work with biofuel, fossil fuels, fuel cells and/or battery power. The company's main initiative to reduce Scope 1 & 2 GHG emissions is through increasing its use of solar power at production facilities and purchasing electricity from renewable sources. The company is committed to sourcing from suppliers that are close to its operations, which helps reduce the carbon footprint of the supply chain and monitor suppliers' efforts in sustainable business practices. At the time of the engagement, the company has recycled 74.1% YTD of the waste it generated, including about 6.3% considered hazardous. About 65% of its new backlog is dedicated to either electrification or other clean energy technologies.

The company will publish an extensive integrated sustainability report for 2023 in the first half of 2024. The company is showing good progress toward meeting GHG emissions goals. The Investment Manager's ESG rating remains 3 (on its 1-8 scale with 1 being the best), and the Investment Manager plans to follow up in 12 months.

The Sub-Fund initiated an investment in the US dollar-denominated new issue of a Germany-based automotive supplier of electronics, drivetrain and e-mobility products. The investment thesis was supported by sustainability factors, including the company's growing electrification business and also its strong governance which can be seen in the fact that the issuer is owned by a German municipality where it is headquartered and has no record of governance challenges. The firm is on track to achieve its goal of reducing its scope 1 and 2 emissions by 80% by 2040. The company expects to achieve this goal by purchasing 100% of its electricity from renewable sources by 2030, while continuing to expand its electrification business.

## ANNEX

Product name: Nomura Funds Ireland – Global High Conviction Fund  
 Legal entity identifier: 549300RRS0HBO8UNLZ19

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions and sustainable, fair and inclusive business practices as its environmental and social characteristics. The Sub-Fund particularly focused on the areas covered by the following six “Impact Goals”.

#### Impact Goals:

1. Mitigate Climate Change
2. Mitigate Natural Capital Depletion
3. Eliminate Communicable Disease
4. Mitigate the Obesity Epidemic
5. Global Access to Basic Financial Services
6. Global Access to Clean Drinking Water

The environmental characteristic, mainly represented by Impact Goals 1 and 2 above, was pursued as explained below:

1. Mitigate Climate Change – The Sub-Fund has:
  - Consistently shown forecast compliance with the International Energy Agency (IEA) Sustainable Development Scenario (SDS) for climate change (according to ISS-ESG), that is global warming kept well below 2 degrees centigrade. While the Sub-Fund’s emissions are low, the investments have also included companies whose activities actively reduce the emissions of others through product efficiency improvement or the stimulation of investment in low carbon power generation.
  - Invested in companies that offer products to improve the efficiency of buildings (heating and cooling).
  - Invested in a leading operator of renewable power generation in the USA and several very low carbon emissions companies including one that has committed to ultimately mitigating all the carbon emissions it has produced in its history.
  - The Investment Manager has also engaged with several companies to encourage them to set Science Based Targets (SBTs) for GHG emission reduction.
2. Mitigate Natural Capital Depletion – The Sub-Fund has:
  - Engaged with a company that consumes palm oil to ensure that the impact of palm oil production on deforestation is appropriately monitored and mitigated.

The social characteristic, mainly represented by Impact Goals 3, 4, 5 and 6 above, was pursued as explained below:

3. Eliminate Communicable Disease - The Sub-Fund has:
  - Invested in a leading vaccine company and a company that supplies equipment and consumables to the pharmaceutical industry. The Sub-Fund also invested in a health insurance company that helps support the public health primarily in the USA.
4. Mitigate the Obesity Epidemic – The Sub-Fund has:
  - Invested in a company that produces insulin and other diabetes related treatments as well as a drug to help people lose weight because diabetes is often a consequence of obesity.
5. Global Access to Basic Financial Services – The Sub-Fund has:
  - Invested in a company that supports payments infrastructure worldwide.
6. Global Access to Clean Drinking Water – The Sub-Fund did not invest in companies specifically addressing this Impact Goal during the reference period.

The extent of the Sub-Fund’s impact and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● ***How did the sustainability indicators perform?***

Contribution to reduction of greenhouse gas emissions:

- GHG emissions per unit revenue: The weighted average Scope 1 and 2 GHG intensity (Scope 1 and 2 GHG emissions per USD1 million of revenue) was 68.22 tonnes. The average GHG intensity for the MSCI All Country World Index (the “Index”) was 117.50 tonnes. The Sub-Fund’s highest emitting company had the GHG intensity of 1,581 tonnes but the company is also a very large generator of renewable power.

Sustainable, fair and inclusive business practices:

- Management remuneration: The weighted average annual total compensation for the Sub-Fund’s holdings’ CEOs (or equivalent) was USD34.4 million including stock awards of USD25.8 million. This compares to USD26.1 million in total compensation and USD21.6 million in stock awards for the Index companies. Many companies in the Index do not provide this remuneration

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

data, with transparency typically limited in emerging markets. Therefore, the Index averages reflect largely developed market companies.

- Percent women on the corporate board: The weighted average percent of female directors is 34% for the Sub-fund compared to 30% for the Index.
- Compliance with UN Global Compact principles: No holdings fell outside compliance with UN Global Compact through the year.
- Exposure to controversial weapons: No holdings had exposure to controversial weapons through the year.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2023, and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports and third-party data providers, ISS-ESG and MSCI.

● ***...and compared to previous periods?***

<b>Sustainability indicators</b>	<b>31 December 2022 reference period (reported in 2023 periodic report)</b>	<b>31 December 2023 reference period (reported in 2024 periodic report)</b>
GHG emissions per unit revenue (weighted average Scope 1 and 2 GHG intensity)	44.25 tonnes	68.22 tonnes
Management remuneration (weighted average annual total compensation for the Sub-Fund's holdings' CEOs)	USD 28.9 million (including USD 20 mil. stock awards)	USD 34.4 million (including USD 25.8 mil. stock awards)
Percent women on the corporate board (weighted average percent of female directors)	25%	34%
Compliance with UN Global Compact principles	All holdings	All holdings
Exposure to controversial weapons	No holdings	No holdings

The higher Scope 1 and 2 GHG intensity was due to the higher average weight invested in an energy company compared to the previous reference period ending 31 December 2022. The company is heavily involved in renewable energy.

The Sub-Fund has shown improvement on the female director ratio on the corporate board compared to the previous period due to a combination of some companies having materially increased the number of female directors and the Sub-Fund having initiated investment in companies with higher percentage of female directors.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGCP) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	861.04	100.00	4,791.68	99.88
1.1.2	Scope 2 GHG emissions	335.22	100.00	1,096.21	99.88
1.1.3	Scope 3 GHG emissions	13,366.35	100.00	37,240.89	99.79
1.1.4	Total GHG emissions	14,562.61	100.00	43,131.72	99.79
1.2	Carbon Footprint	148.43	100.00	432.66	99.79

1.6.3	NACE Code C (Manufacturing)	0.13	46.79	0.47	38.10
1.6.4	NACE Code D (Electricity, Gas, Steam and Air Conditioning Supply)	11.98	3.22	7.75	1.99
1.6.5	NACE Code E (Water Supply; Sewerage, Waste Management and Remediation Activities)	N/A	0.00	1.17	0.31
1.6.6	NACE Code F (Construction)	0.03	2.46	0.23	0.57
1.6.7	NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles)	0.07	8.11	0.15	5.61
1.6.8	NACE Code H (Transportation and Storage)	N/A	0.00	1.77	1.72
1.6.9	NACE Code L (Real Estate Activities)	N/A	0.00	0.49	1.48
1.7	Activities negatively affecting biodiversity-sensitive areas	0.00	100.00	0.19	99.77
1.8	Emissions to water	N/A	0.00	0.27	0.69
1.9	Hazardous waste and radioactive waste ratio	0.12	36.36	5.20	36.73
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	0.61	99.85

1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	42.99	100.00	54.99	99.62
1.12	Unadjusted gender pay gap	8.34	42.76	10.85	23.77
1.13	Board gender diversity	34.21	100.00	32.88	99.92
1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.41	99.93

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.4 (Exposure to companies active in the fossil fuel sector): The Sub-Fund reported 6.61% for this indicator which was much lower than that of the Index. The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from relevant fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies involved in the renewable energy transition. One of them is heavily involved in renewable energy and the other company is a supplier of equipment to the renewables industry.
- #1.6.4 (NACE Code D): Regarding NACE Code D (Electricity, Gas, Steam and Air Conditioning Supply), the Sub-Fund is invested in a company that is heavily involved in renewable energy and the Investment Manager views the company as contributing to the reduction of GHG emissions.
- #1.11 (Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines): While the Sub-Fund showed the favourable impact compared to the Index, the Investment Manager sees this as an area for improvement and will keep engaging with issuers without a process and compliance mechanisms.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Index is a broad market index and not consistent with the environmental and social characteristics promoted by the Sub-Fund.

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	7.24	USA
ALPHABET INC-CL A	Communication Services	6.40	USA
APPLE INC	Information Technology	6.40	USA
MASTERCARD INC - A	Financials	5.21	USA
LVMH MOET HENNESSY LOUIS	Consumer Discretionary	4.61	France

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.**

NESTLE SA-REG	Consumer Staples	4.58	Switzerland
AMAZON.COM INC	Consumer Discretionary	4.55	USA
COMPASS GROUP PLC	Consumer Discretionary	4.18	UK
TAIWAN SEMICONDUCTOR MAN	Information Technology	4.15	Taiwan
CASH	N/A	3.95	N/A
THERMO FISHER SCIENTIFIC INC	Health Care	3.92	USA
NOVO NORDISK A/S-B	Health Care	3.92	Denmark
MOODY'S CORP	Financials	3.91	USA
UNITEDHEALTH GROUP INC	Health Care	3.55	USA
ASTRAZENECA PLC	Health Care	3.54	UK

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental / social characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 96.1% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

The Sub-Fund did not make any sustainable investments at this time on the basis that no sustainable investment framework has been adopted for this Sub-Fund and investments have not been screened against the sustainable investment criteria set down in SFDR.

#### #2 Other

The remaining 3.9% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 94.5%
- #2 Other: 5.5%

● **In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	6.40
Consumer Discretionary	Consumer Discretionary Distribution	7.79
Consumer Discretionary	Consumer Durables & Apparel	6.97
Consumer Discretionary	Consumer Services	4.18
Consumer Staples	Food, Beverage & Tobacco	8.08
Financials	Financial Services	9.12
Financials	Insurance	6.05
Health Care	Pharmaceuticals, Biotechnology	11.39
Health Care	Health Care Equipment & Services	3.55
Industrials	Capital Goods	10.26
Information Technology	Software & Services	7.24
Information Technology	Technology Hardware & Equipment	6.40
Information Technology	Semiconductors & Semiconductor	5.53
Utilities	Utilities	3.09

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported below and in the graphs set out in the following section are an incidental result of the investment strategy of the Sub-Fund and the environmental and social characteristics promoted by the Sub-Fund.

The extent to which sustainable investments with an environment objective were aligned with the EU Taxonomy were:

- 0% as measured in turnover
- 0.18% as measured in capital expenditure (CapEx)
- 0% as measured in operational expenditure (OpEx)

0.18% as measured in CapEx (as above) was aligned with the environmental objective of a) Climate Change Mitigation under the EU Taxonomy based on company reported data. There was no available data in respect of the extent to which sustainable investments were aligned with the following objectives under the EU Taxonomy:

- b) climate change adaptation:
- c) the sustainable use and protection of water and marine resources:
- d) the transition to a circular economy:
- e) pollution prevention and control:
- f) the protection and restoration of biodiversity and ecosystems:

The EU Taxonomy alignment data in this report was calculated based on the alignment ratios reported by investee companies which were obtained from a third-party data provider and does not include estimates provided by companies or third-party data providers. The compliance of the investments of the Sub-Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

As the Sub-Fund did not hold any sovereign bonds for the reference period, the alignment ratios with the EU Taxonomy were identical between calculations including sovereign bonds and excluding sovereign bonds.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
<b>Turnover</b>	0%	0%	100%	100%
<b>CapEx</b>	0%	0.18%	100%	99.82%
<b>OpEx</b>	0%	0%	100%	100%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable. For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported above are an incidental result of the investment strategy of the Sub-Fund and the environmental and social characteristics promoted by the Sub-Fund.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Manager undertook a total of 50 engagements with portfolio companies during the reference period. There were 12 in Europe, 27 in North America, 6 in Asia and Japan, 5 in Japan and none in Africa. This broadly reflects the location of the headquarters of the investee companies held by the Sub-Fund during the period. 23 of the engagements included issues relating to the environment and 30 included issues relating to social considerations. As further described in Annex 1 attached to the Sub-Fund’s Supplement, the Investment Manager particularly focuses on the areas covered by its six Impact Goals

to promote the environmental and social characteristics of the Sub-Fund. Among the engagements undertaken, 9 related to Mitigate Climate Change, 3 related to Mitigate Natural Capital Depletion, 2 related to Eliminate Communicable Disease, 10 related to Mitigate the Obesity Epidemic. The total number of Impact Goal-related engagements was 24, fewer than the total number of engagements as the Impact Goals relate to a narrower set of engagement topics than the broader subjects tackled by the Investment Manager's engagement activity.

The Sub-Fund has kept portfolio-level carbon emissions below those required to limit the potential global temperature increase to the target of the IEA (International Energy Agency) SDS (Sustainable Development Scenario). The portfolio is estimated to be approximately 30% better than the necessary SDS emissions budget by 2050, which means that the Sub-Fund is within the necessary emissions to achieve a potential temperature increase of 1.5 degrees centigrade. These estimates were calculated using the analysis by a third-party data provider (source: ISS-ESG) based on the quarter-end average weights of holdings held in the Sub-Fund during the reference period.

Product name: Nomura Funds Ireland – Global Sustainable Equity Fund  
 Legal entity identifier: 213800J5LRHOLZRU5724

# Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<p><input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 52.2%</b></p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy *</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 47.0%</b></p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

\* The EU Taxonomy alignment figures reported herein are an incidental result of the sustainable investment objective pursued by the Sub-Fund. Please see further below under "To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?"

### To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive impact on society (meaning the environment, society, customers, suppliers, employees and investors). Based on the sustainable investment objective above, the Investment Manager sought to invest in companies with the greatest total positive impact on all stakeholders by mainly focusing on the following six UN Sustainable Development Goals ("SDGs") aligned "Impact Goals":

1. Mitigate Climate Change
2. Mitigate Natural Capital Depletion
3. Eliminate Communicable Disease
4. Mitigate the Obesity Epidemic
5. Global Access to Basic Financial Services
6. Global Access to Clean Drinking Water

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed

against the proprietary ESG ratings, exclusions, SDGs assessment, contribution assessment and proprietary total stakeholder impact assessment, and categorised into the appropriate contribution category of “direct contribution” and “indirect contribution”. The details of the contribution categories and the binding strategies are further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

As further described under the section “How did the sustainability indicators perform?”, the Investment Manager has measured the impact of the Sub-Fund’s investments through the metric of impact of the underlying holdings per USD 1 million invested in the Sub-Fund. The Investment Manager has observed positive contribution across all six Impact Goals particularly in the social Impact Goals of 3) Eliminate Communicable Disease and 4) Mitigate the Obesity Epidemic.

The extent of the Sub-Fund’s impact and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section “What was the proportion of sustainability-related investments?” below.

### ● **How did the sustainability indicators perform?**

The Sub-Fund’s sustainability indicators performed as below (impact of the underlying holdings per USD 1 million invested in the Sub-Fund):

- Tonnes of carbon avoided as a result of an investee company’s products and services: (Scope 1+2+3) 68.23 tonnes
- Number of low income patients reached with drugs and treatments through company’s access strategies: 24 patients
- Number of people reached with financial services that were previously unbanked: 111
- Litres of clean drinking water provided as a result of a company’s technology: 1578 litres

The following indicators were not included as the sustainability indicators indicated within Annex 1 attached to the Sub-Fund’s Supplement but have been added in this report to provide shareholders and potential investors with better understanding of the impact of the Sub-Fund’s investments during the reference period. Some or all of the following indicators may not be relevant for future reference periods because of the idiosyncratic nature of the indicators that reflect certain particular investments held by the Sub-Fund during the current reference period.

- Tonnes of carbon avoided relative to the MSCI All Country World Index (the “Index”): 378 tonnes
- Number of diabetes patients treated: 3 patients
- Amount of industrial and precious metal recycled: 828 tonnes
- Financial amount of mortgages provided to low income and economically deprived population: USD 272.
- Total financial amount of loans to micro, small and medium enterprises in Indonesia: USD 19,283.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2023, market capitalisation data as of 2023 December-end and the fiscal year-end impact data for 2022. Sustainability indicators above do not take

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports and a third-party data provider, ISS-ESG.

● **...and compared to previous periods?**

<b>Sustainability indicators</b>	<b>31 December 2022 reference period (reported in 2023 periodic report)</b>	<b>31 December 2023 reference period (reported in 2024 periodic report)</b>
Tonnes of carbon avoided as a result of an investee company's products and services (Scope 1+2+3)	78.35 tonnes*	68.23 tonnes
Number of low income patients reached with drugs and treatments through company's access strategies	24 patients	24 patients
Number of people reached with financial services that were previously unbanked	114	111
Litres of clean drinking water provided as a result of a company's technology	1532 litres	1578 litres
Tonnes of carbon avoided relative to the Index (Scope 1+2+3)	157 tonnes	378 tonnes
Number of diabetes patients treated	5 patients	3 patients
Amount of industrial and precious metal recycled	722 tonnes	828 tonnes
Financial amount of mortgages provided to low income and economically deprived population	USD 976	USD 272
Total financial amount of loans to micro, small and medium enterprises in Indonesia	USD 22,546	USD 19,283

\*For the reference period ending 31 December 2022, the Sub-Fund reported the tonnes of carbon avoided as a result of an investee company's products and services as 157 tonnes, which in fact was the tonnes of carbon avoided relative to the Index. Investors are advised that the tonnes of carbon avoided as a result of an investee company's products and services for the reference period ending 31 December 2022 was 78.35 tonnes compared to 68.23 tonnes for the reference period ending 31 December 2023.

The Sub-Fund has a low turnover in the range of 20-25% and therefore the Investment Manager expects that these metrics should not change materially on a year-on-year basis.

The lower tonnes of carbon avoided as a result of an investee company's products and services (Scope 1+2+3), and the higher tonnes of carbon avoided relative to the Index (Scope 1+2+3) were as a result of the divestment of a company that had particularly high scope 3 emissions while their products significantly contributed to high Scope 4 avoided emissions.

The number of diabetes patients treated declined due to a combination of the strong performance of the underlying holding and the Sub-Fund maintaining its weight in the company which has contributed to reducing the proportional ownership of the Sub-Fund in the company despite the company itself has shown improvement with respect to the number of patients it reached. In the reference period, HDFC Group merged with HDFC Bank. As a result, the Sub-Fund has a smaller proportional ownership in the company which impacted the lower value of mortgages provided to low income and economically deprived population.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager considered the following principal adverse impacts (“PAI”) indicators, either directly or indirectly, throughout the investment process through certain product-, activity- or conduct-based exclusions, proprietary ESG ratings, SDGs assessment, contribution assessment and proprietary total stakeholder impact assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below) as further described under “What investment strategy does this financial product follow?”.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violations of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Investment Manager has also taken into account other relevant PAI indicators depending on the business activities, behaviours of a company and the availability of data. Where there was no sufficient data to make credible assessment, the

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Investment Manager supplemented with its qualitative research and engagement. Engagement with companies takes place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	335.61	100.00	1,553.91	99.88

1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	41.88	98.78	54.99	99.62
1.12	Unadjusted gender pay gap	7.99	27.81	10.85	23.77
1.13	Board gender diversity	35.83	100.00	32.88	99.92
1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.41	99.93

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.1.1 to 1.3 (GHG emissions, Carbon footprint and GHG intensity): All of these PAI indicators were significantly lower than those of the Index due to the Sub-Fund's focus on the companies that have both lower operational GHG emissions and contribute to reducing emissions through their products and services. Overall total GHG emissions were 37% of the Index. Scope 3 GHG emissions may become higher once the estimates are replaced by investee companies' reported data.
- #1.4 (Exposure to companies active in the fossil fuel sector): While the impact was lower than that of the Index, the Sub-Fund reported 6.94% exposure to companies active in the fossil fuel sector. The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies heavily involved in the renewable energy transition.
- The Sub-Fund outperformed the Index on all other environmental PAI indicators such as hazardous waste and radioactive waste emissions and the share of non-renewable energy consumption.
- #1.11 (Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines): While the Sub-Fund showed the favourable impact

compared to the Index, the Investment Manager sees this as an area for improvement and will keep engaging with issuers without a process and compliance mechanisms.

- #1.12 & 1.13 (Unadjusted gender pay gap & Board gender diversity): While the Sub-Fund showed the favourable impacts compared to the Index, the Investment Manager sees these PAI indicators as areas for improvement. The Investment Manager will keep engaging with issuers to encourage further improvement.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	4.09	USA
MASTERCARD INC - A	Financials	4.03	USA
JOHNSON CONTROLS INTERNATION	Industrials	3.82	USA
THERMO FISHER SCIENTIFIC INC	Health Care	3.77	USA
NOVO NORDISK A/S-B	Health Care	3.73	Denmark
ASML HOLDING NV	Information Technology	3.63	Netherlands
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	3.49	Taiwan
NEXTERA ENERGY INC	Utilities	3.46	USA
ADOBE INC	Information Technology	3.08	USA
CISCO SYSTEMS INC	Information Technology	3.06	USA
BOSTON SCIENTIFIC CORP	Health Care	3.06	USA
ALPHABET INC-CL A	Communication Services	2.99	USA
VISA INC-CLASS A SHARES	Financials	2.89	USA
UNITEDHEALTH GROUP INC	Health Care	2.85	USA
BECTON DICKINSON AND CO	Health Care	2.82	USA

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

### What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

#### ● **What was the asset allocation?**

##### #1 Sustainable

The Investment Manager has invested 99.2% of the Sub-Fund's assets in sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

Further details on how the Investment Manager identifies sustainable investments are described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

## #2 Not sustainable

The remaining 0.8% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

\* The EU Taxonomy alignment figures reported herein are an incidental result of the sustainable investment objective pursued by the Sub-Fund. Please see further below under “To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?”

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Sustainable: 99.1% (split as to Environmental: 50.5% and Social: 48.6%)
- #2 Not Sustainable: 0.9%

## ● In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	2.99
Communication Services	Telecommunication Services	0.22
Consumer Staples	Food, Beverage & Tobacco	1.82
Consumer Staples	Household & Personal Products	1.62
Financials	Financial Services	9.19
Financials	Insurance	7.48
Financials	Banks	2.91
Health Care	Pharmaceuticals, Biotechnology	14.63
Health Care	Health Care Equipment & Servic	11.39
Industrials	Capital Goods	12.80
Industrials	Commercial & Professional Serv	4.40
Information Technology	Software & Services	9.83
Information Technology	Semiconductors & Semiconductor	7.12
Information Technology	Technology Hardware & Equipmen	3.06
Materials	Materials	2.85
Utilities	Utilities	6.84

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported below and in the graphs set out in the following section are an incidental result of the sustainable investment objective pursued by the Sub-Fund.

The extent to which sustainable investments with an environment objective were aligned with the EU Taxonomy were:

- 1.85% as measured in turnover
- 2.73% as measured in capital expenditure (CapEx)
- 3.23% as measured in operational expenditure (OpEx)

Following is the breakdown of the proportion of the investments per each of the environmental objectives under the EU Taxonomy reported by investee companies.

- climate change mitigation:
  - 0.64% as measured in turnover
  - 1.38% as measured in CapEx
  - 1.72% as measured in OpEx
- climate change adaptation: data not available
- the sustainable use and protection of water and marine resources: data not available
- the transition to a circular economy: data not available
- pollution prevention and control: data not available
- the protection and restoration of biodiversity and ecosystems: data not available

The EU Taxonomy alignment data in this report was calculated based on the alignment ratios reported by investee companies which were obtained from a third-party data provider and does not include estimates provided by companies or third-party data providers. The compliance of the investments of the Sub-Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

As the Sub-Fund did not hold any sovereign bonds for the reference period, the alignment ratios with the EU Taxonomy were identical between calculations including sovereign bonds and excluding sovereign bonds.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Within the meaning of the EU Taxonomy, the share of investments in transitional activities was 0%. The share of investments in enabling activities was as below.

- 0.64% as measured in turnover
- 1.38% as measured in CapEx
- 1.72% as measured in OpEx

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
Turnover	0%	1.85%	100%	98.15%
CapEx	0%	2.73%	100%	97.27%
OpEx	0%	3.23%	100%	96.77%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was below:

- 50.34% as measured in turnover
- 49.46% as measured in CapEx
- 48.96% as measured in OpEx

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported above in response to the question “To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?” are an incidental result of the sustainable investment objective pursued by the Sub-Fund.

### What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 47.0%.

### What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “#2 Not sustainable” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

### What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager has conducted the following engagement activities in each quarter during the reference period. The Investment Manager utilised milestone progress tracking in its engagement which is broken down into the following 5 stages:

- Stage I: Communicate issues to portfolio companies
- Stage II: Company shares a recognition of the issues
- Stage III: Company formulates countermeasures
- Stage IV: Company implements countermeasures
- Stage V: Completion

1. The Investment Manager undertook 35 engagements for impact with portfolio companies in Q1. Of these, the breakdown of engagement activities and the targeted Impact Goals are following: 22 were focused on Mitigate the Obesity Epidemic, 8 were on Mitigate Climate Change, 1 was on Eliminate Communicable Disease, 1 was on Mitigate Natural Capital Depletion and 3 were on other sustainability matters. Of the 35 engagements undertaken, 26 were ongoing engagements whilst 9 were one-off engagements. Of these ongoing engagements the breakdown by milestone was: 12

were at milestone Stage I, 8 were at Stage II, 2 were at Stage III, 2 were at Stage IV, 2 were at Stage V.

2. The Investment Manager undertook 20 engagements for impact with portfolio companies over 2Q. Of these, the breakdown of engagement activities and the targeted Impact Goals are following: 9 were focused on Mitigate the Climate Change, 1 was on Mitigate Natural Capital Depletion, 1 was on Global Access to Clean Drinking Water, 1 was on Global Access to Basic Financial Services, 1 was on Mitigate the Obesity Epidemic and 7 were on other sustainability matters. Of the 20 engagements undertaken, 16 were ongoing engagements whilst 4 were one-off engagements. Of these ongoing engagements, the breakdown by milestone was: 4 were at milestone Stage I, 5 at Stage II, 2 at Stage III, 0 at Stage IV and 2 at Stage V. 3 had to be closed without success to prioritise other engagements given the limited prospect for success through further engagement, or where one company had not been able to participate in the Investment Manager's intercompany collaboration project. For those closed without success, while the engagements were not successful, the Investment Manager believed that the companies still had sufficient positive total impact and are qualified as sustainable investments.
3. The Investment Manager undertook 8 engagements for impact with portfolio companies over 3Q. Of these, the breakdown of engagement activities and the targeted Impact Goals are following: 2 were focused on Eliminate Communicable Disease, 1 was on Mitigate Natural Capital Depletion, 1 was on Mitigate Climate Change, 1 was on Mitigate the Obesity Epidemic and 4 were on other sustainability matters. Of the 8 engagements undertaken, 6 were ongoing engagements whilst 2 were one-off engagements. Of these ongoing engagements the breakdown by milestone was: 4 were at milestone Stage II and 2 at Stage IV.
4. The Investment Manager undertook 10 engagements for impact with portfolio companies over Q4. Of these, the breakdown of engagement activities and the targeted Impact Goals are following: 4 were focused on Mitigate Climate Change impact goal, 4 were on Mitigate the Obesity Epidemic, and 2 were on other sustainability matters. Of the 10 engagements undertaken, 6 were ongoing engagements whilst 4 were one-off engagements. Of these ongoing engagements the breakdown by milestone was: 4 were at milestone Stage I, 1 at Stage II and 1 at Stage V (completed).

The Investment Manager strongly believes that investing sustainably is an evolving process as new research, evidence and societal understanding develop. In the final quarter of the reference period, the Investment Manager carried out in-depth research into the area of ultra processed foods (UPF) and reassessed areas of the portfolio that were exposed to this. After rigorous discussions, the Investment Manager concluded that two holdings were no longer appropriate for the portfolio and did not align with the Sub-Fund's Impact Goal of Mitigate the Obesity Epidemic. Please note that those companies were still held during the reference period but were fully exited in January 2024. In this process, Investment Manager's research on UPF was further accelerated through collaborative and open-minded engagement with shareholders of the Sub-Fund. The Investment Manager will remain engaged on the issue of UPF and be open to reassess companies if improvements are made to mitigate the negative impact of UPF.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- **Exclusions** – The Investment Manager has excluded companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption as well as avoiding, in whole or in part, companies with exposure to controversial weapons, tobacco production, and thermal coal extraction.
- **ESG Assessment** – The Investment Manager has developed a proprietary ESG assessment which is comprised of an ESG score and trend signal. At least 85% of net assets, excluding cash, short-term debt instruments, and collective investment schemes (“Excluded Investments”), were invested in companies that received an ESG score that fell in the top 75% of the investee company’s universe (“the 85% Threshold”) at time of purchase. Compliance with the 85% Threshold was monitored on an ongoing basis.

- **Engagement** – The Investment Manager has also, to a limited extent, invested in companies with an ESG score in the bottom 25% of each’s respective universe based on the Investment Manager’s assessment that the companies were transitioning to more sustainable business practices. The Investment Manager has actively engaged with these transitioning investee companies. The Investment Manager, based on its assessment, did not identify any investee companies assessed to have newly identified severe controversies as determined by a third-party data provider. Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

The extent of the Sub-Fund’s compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund’s Supplement is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● ***How did the sustainability indicators perform?***

- **Exclusions** – No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with exposure in whole or in part to controversial weapons, tobacco production or thermal coal extraction.
- **ESG Assessment** – The proportion of the net assets, excluding Excluded Investments, invested within the 85% Threshold was 97%. The proportion of companies with ESG scores in the bottom 25% of each’s respective universe was 3%. These proportions were calculated based on the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2023. For the previous reference period ending 31 December 2022, the relevant proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund. The Investment Manager has changed the calculation methodology to appropriately capture the frequency of changes in ESG scores during the reference period ending 31 December 2023.
- **Engagement** – As at the end of December 2023, the aggregate number of investee companies engaged with, as a result of the Investment Manager’s ESG assessment, was 46. This includes those investee companies assessed by the Investment Manager as having ESG scores in the bottom 25% of each’s respective universe. No investee companies were assessed as having a newly identified severe controversy by a third-party data provider in the reference period.

For the sustainability indicators above, the Investment Manager has used the Investment Manager’s proprietary data, as well as data provided by third party providers such as FactSet and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)
Exclusions	No exposure	No exposure
ESG Assessment (within top 75% ESG scores)	92%	97%
Engagement (as a result of ESG assessment)	35	46

Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons), based on a third-party classification (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines), based on a third-party classification (threshold 0%)

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.**

Largest investments	Sector	% Assets	Country
SAMSONITE INTERNATIONAL	Consumer Discretionary	1.64	USA
ASICS CORP	Consumer Discretionary	1.53	Japan
STANTEC INC	Industrials	1.41	Canada
KINSALE CAPITAL GROUP INC	Financials	1.34	USA
CLEAN HARBORS INC	Industrials	1.26	USA
TOLL BROTHERS INC	Consumer Discretionary	1.21	USA
RYMAN HOSPITALITY PROPERTIES	Real Estate	1.15	USA

INTERMEDIATE CAPITAL GROUP	Financials	1.00	UK

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 96.7% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to

**Asset allocation** describes the share of investments in specific assets.

the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

The Sub-Fund did not make any sustainable investments at this time.

## #2 Other

The remaining 3.3% of investments were unscreened investments (collective investment schemes) for efficient portfolio management purposes, or cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2023 to calculate the allocations above. For the previous reference period ending 31 December 2022, the relevant proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund. The Investment Manager has changed the calculation methodology to appropriately capture the frequency of changes in ESG scores during the reference period ending 31 December 2023.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 98.5%
- #2 Other: 1.5%

## ● In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	3.01
Consumer Discretionary	Consumer Durables & Apparel	7.24
Consumer Discretionary	Distributors	4.20
Consumer Discretionary	Consumer Services	2.51
Consumer Discretionary	Automobiles & Components	0.88
Consumer Staples	Household & Personal Products	1.80
Consumer Staples	Food, Beverage & Tobacco	1.65
Consumer Staples	Distribution	1.47
Energy	Energy	4.46

Financials	Financial Services	4.48
Financials	Banks	4.01
Financials	Insurance	2.35

Health Care	Pharmaceuticals, Biotechnology	1.93
Industrials	Capital Goods	12.79
Industrials	Commercial & Professional Services	6.52
Industrials	Transportation	2.04
Information Technology	Software & Services	7.81
Information Technology	Semiconductors & Semiconductor Equipment	4.11
Information Technology	Technology Hardware & Equipment	3.61
Materials	Materials	5.45
Real Estate	Equity Real Estate Investment	4.33
Real Estate	Real Estate Management & Development	2.34
Utilities	Utilities	1.27

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity and collective investment schemes used for efficient portfolio management.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
<b>Turnover</b>	0%	0%	100%	100%
<b>CapEx</b>	0%	0%	100%	100%
<b>OpEx</b>	0%	0%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

### **What was the share of socially sustainable investments?**

Not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were unscreened investments (collective investment schemes) for efficient portfolio management purposes, or cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2023, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager’s analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as improved health outcomes, energy transition and decarbonization. For example, the Sub-Fund invested in companies that provide innovative and important solutions supporting emissions reduction and solar energy. The Investment Manager has also identified companies held by the portfolio that contribute to health care innovation and pharmaceuticals, such as the investment in companies engaged in the discovery, development and manufacture of treatments for rare conditions.

The Investment Manager engaged with 46 investee companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager’s Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the Investment Manager’s investment research platform. Engagement summaries catalogue objectives, record a company’s progress, and document outcomes.

In 2023, the Investment Manager engaged with the management of investee companies on 26 different topics. The five topics most frequently addressed in engagements during the period were ESG due diligence and risk management, human capital, data privacy and security, general governance, and greenhouse gas emissions. Some of these engagements were identified for follow up in the prior reporting year.

In most situations, engagement resulted in a better understanding of the sustainability risks facing the company and, more importantly, how company management is addressing those risks. For 27 engagements spanning 24 investee companies, the Investment Manager identified situations where further follow up was warranted, most often as part of an ongoing process to seek additional information or disclosure. Pursuant to its policy, the Investment Manager will revisit and re-engage with management on those situations.

**Disclaimer**

## ANNEX

Product name: American Century Global Growth Equity Fund  
 Legal entity identifier: 2138007FEAPWMZL96K86

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- **Exclusions** – The Investment Manager has excluded companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption as well as avoiding, in whole or in part, companies with exposure to controversial weapons, tobacco production, and thermal coal extraction.
- **ESG Assessment** – The Investment Manager has developed a proprietary ESG assessment which is comprised of an ESG score and trend signal. At least 85% of net assets, excluding cash, short-term debt instruments, and collective investment schemes (“Excluded Investments”), were invested in companies that received an ESG score that fell in the top 75% of the investee company’s universe (“the 85% Threshold”) at time of purchase. Compliance with the 85% Threshold was monitored on an ongoing basis.

- **Engagement** – The Investment Manager has also, to a limited extent, invested in companies with an ESG score in the bottom 25% of each’s respective universe based on the Investment Manager’s assessment that the companies were transitioning to more sustainable business practices. The Investment Manager has actively engaged with these transitioning investee companies. The Investment Manager has also engaged with investee companies that have newly identified severe controversies as determined by a third-party data provider. Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

The extent of the Sub-Fund’s compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund’s Supplement is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

### ● ***How did the sustainability indicators perform?***

- **Exclusions** – No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with exposure in whole or in part to controversial weapons, tobacco production or thermal coal extraction.
- **ESG Assessment** – The proportion of the net assets, excluding Excluded Investments, invested within the 85% Threshold was 99%. The proportion of companies with ESG scores in the bottom 25% of each’s respective universe was 1%. These proportions were calculated based on the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2023. For the previous reference period ending 31 December 2022, the relevant proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund. The Investment Manager has changed the calculation methodology to appropriately capture the frequency of changes in ESG scores during the reference period ending 31 December 2023.
- **Engagement** – As at the end of December 2023, the aggregate number of investee companies engaged with, as a result of the Investment Manager’s ESG assessment, was 43. This includes those investee companies assessed by the Investment Manager as having ESG scores in the bottom 25% of each’s respective universe and two investee companies assessed as having a newly identified severe controversy by a third-party data provider.

For the sustainability indicators above, the Investment Manager has used the Investment Manager’s proprietary data, as well as data provided by third party providers such as FactSet and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period reported in 2024 periodic report)
Exclusions	No exposure	No exposure
ESG Assessment (within top 75% ESG scores)	98%	99%
Engagement (as a result of ESG assessment)	35	43

Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons), based on a third-party classification (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines), based on a third-party classification (threshold 0%)

## What were the top investments of this financial product?

The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental and/or social characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 98.4% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.

Asset allocation describes the share of investments in specific assets.

the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

The Sub-Fund did not make any sustainable investments at this time.

## #2 Other

The remaining 1.6% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2023 to calculate the allocations above. For the previous reference period ending 31 December 2022, the relevant proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund. The Investment Manager has changed the calculation methodology to appropriately capture the frequency of changes in ESG scores during the reference period ending 31 December 2023.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 98.3%
- #2 Other: 1.7%

## ● *In which economic sectors were the investments made?*

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	3.69
Communication Services	Telecommunication Services	1.60
Consumer Discretionary	Distributors	5.15
Consumer Discretionary	Automobiles & Components	2.56
Consumer Discretionary	Consumer Durables & Apparel	1.08
Consumer Discretionary	Consumer Services	0.21
Consumer Staples	Food, Beverage & Tobacco	1.69
Consumer Staples	Distribution	0.42
Consumer Staples	Household & Personal Products	0.20
Energy	Energy	4.54
Financials	Financial Services	10.69

Financials	Banks	6.20
Financials	Insurance	4.82
Health Care	Pharmaceuticals, Biotechnology	9.25
Health Care	Health Care Equipment & Services	4.60
Industrials	Capital Goods	6.19
Industrials	Commercial & Professional Services	3.00
Industrials	Transportation	2.73
Information Technology	Software & Services	10.31
Information Technology	Semiconductors & Semiconductor Equipment	5.57
Information Technology	Technology Hardware & Equipment	1.52
Materials	Materials	5.64
Real Estate	Equity Real Estate Investment	6.72
Utilities	Utilities	0.89

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
<b>Turnover</b>	0%	0%	100%	100%
<b>CapEx</b>	0%	0%	100%	100%
<b>OpEx</b>	0%	0%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

### **What was the share of socially sustainable investments?**

Not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2023, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager’s analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, alternative energy, clean water technologies and companies providing innovative health care services and solutions. Further, the Investment Manager is invested in companies based in developing markets, which they believe also contribute to the financial inclusion in their respective countries.

The Investment Manager engaged with 43 investee companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager’s Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the Investment Manager’s investment research platform. Engagement summaries catalogue objectives, record a company’s progress, and document outcomes.

In 2023, the Investment Manager engaged with the management of investee companies on 26 different topics. The five topics most frequently addressed in engagements during the period were ESG due diligence and risk management, human capital, greenhouse gas emissions, labour practices and supply chain management, and clean technology and renewable energy opportunities. Some of these engagements were identified for follow up in the prior reporting year.

The Investment Manager also engaged two investee companies assessed as having a newly identified severe controversy, as determined by a third-party data provider. According to the data provider, the first investee company was involved in a severe controversy related to labour management relations due to allegations of poor working conditions and low wages. The Investment Manager engaged the company’s executive management on their premises and toured their fulfilment center to better understand the conditions of the employees working there. The Investment Manager plans to monitor progress toward the company’s commitment to increase disclosure of worker safety information in future.

The second company was flagged by a third-party data as being involved in a severe controversy related to supply chain standards. The Investment Manager engaged the

company on the topics of controversial sourcing and supply chain management policies. While the company was unable to directly address the supply chain labour standards controversy, the Investment Manager assessed its supply chain management policies and procedures and found them to be robust. After speaking with the company, the Investment Manager believes that the company has taken appropriate actions to remediate these allegations.

In most situations, including the controversy-related engagements, engagement resulted in a better understanding of the sustainability risks facing the investee company, and more importantly, how company management is addressing those risks. For 22 engagements spanning 20 investee companies, the Investment Manager identified situations where further follow up was warranted, most often as part of an ongoing process to seek additional information or disclosure. Pursuant to its policy, the Investment Manager will revisit and re-engage with management on those situations.

### **Disclaimer**

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- **Exclusions** – The Investment Manager has excluded companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption as well as avoiding, in whole or in part, companies with exposure to controversial weapons, tobacco production, and thermal coal extraction.
- **ESG Assessment** – The Investment Manager has developed a proprietary ESG assessment which is comprised of an ESG score and trend signal. At least 85% of net assets, excluding cash, short-term debt instruments, and collective investment schemes (“Excluded Investments”), were invested in companies that received an ESG score that fell in the top 75% of the investee company’s universe (“the 85% Threshold”) at time of purchase. Compliance with the 85% Threshold was monitored on an ongoing basis.

- **Engagement** – For the reference period, the Investment Manager, based on its assessment, did not invest in companies with an ESG score in the bottom 25% of each’s respective universe. To the extent the Investment Manager invests in companies assessed to be in the bottom 25% of each’s respective universe in future reference periods, it will actively engage with these transitioning investee companies. The Investment Manager has actively engaged with one investee company assessed to have a newly identified severe controversy, as determined by a third-party data provider. Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

The extent of the Sub-Fund’s compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund’s Supplement is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● ***How did the sustainability indicators perform?***

- **Exclusions** – No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with exposure in whole or in part, to controversial weapons, tobacco production or thermal coal extraction.
- **ESG Assessment** – The proportion of the net assets, excluding Excluded Investments, invested within the 85% Threshold was 100%. The proportion of companies with ESG scores in the bottom 25% of each’s respective universe was 0%. These proportions were calculated based on the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2023. For the previous reference period ending 31 December 2022, the relevant proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund. The Investment Manager has changed the calculation methodology to appropriately capture the frequency of changes in ESG scores during the reference period ending 31 December 2023.
- **Engagement** – As at the end of December 2023, the aggregate number of investee companies engaged with, as a result of the Investment Manager’s ESG assessment, was 14. There were no engagements resulting from investee companies with ESG scores in the bottom 25% of each’s respective universe. The Investment Manager engaged with one investee company as determined by a third-party data provider as having a newly identified severe controversy.

For the sustainability indicators above, the Investment Manager has used the Investment Manager’s proprietary data, as well as data provided by third party providers such as FactSet and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)
Exclusions	No exposure	No exposure
ESG Assessment (within top 75% ESG scores)	100%	100%
Engagement (as a result of ESG assessment)	15	14

Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons), based on a third-party classification (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines), based on a third-party classification (threshold 0%)

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 99.4% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

The Sub-Fund did not make any sustainable investments at this time.

## #2 Other

The remaining 0.6% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2023 to calculate the allocations above. For the previous reference period ending 31 December 2022, the relevant proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund. The Investment Manager has changed the calculation methodology to appropriately capture the frequency of changes in ESG scores during the reference period ending 31 December 2023.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 98.2%
- #2 Other: 1.8%

## ● In which economic sectors were the investments made?

Real Estate	Real Estate Management & Development	2.68
Utilities	Utilities	0.60

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
<b>Turnover</b>	0%	0%	100%	100%
<b>CapEx</b>	0%	0%	100%	100%
<b>OpEx</b>	0%	0%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

### **What was the share of socially sustainable investments?**

Not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2023, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager’s analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, alternative energy, clean water technologies and companies providing innovative health care services and solutions. Further, the Investment Manager is invested in companies based in developing markets, which they believe also contribute to the financial inclusion in their respective countries.

The Investment Manager engaged with 14 investee companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager’s Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the Investment Manager’s investment research platform. Engagement summaries catalogue objectives, record a company’s progress, and document outcomes.

In 2023, the Investment Manager engaged with the management of investee companies on 17 different topics. The five topics most frequently addressed in engagements during the period were ESG due diligence and risk management, labour practices and supply chain management, human capital, diversity, equity and inclusion, and proxy voting. Some of these engagements were identified for follow up in the prior reporting year.

The Investment Manager also engaged one investee company assessed to have a newly identified severe controversy, as determined by a third-party data provider. According to the data provider, the investee company was involved in a severe controversy related to labour management relations due to allegations of poor working conditions and low wages. The Investment Manager engaged the company’s executive management on their premises and toured their fulfilment center to better understand the conditions of the employees working there. The Investment Manager plans to monitor progress toward the company’s commitment to increase disclosure of worker safety information in future.

In most situations, including the controversy-related engagement, engagement resulted in a better understanding of the sustainability risks facing the investee company, and more importantly, how company management is addressing those risks. In 2023, the Investment Manager identified situations where further follow up was warranted for an additional seven

investee companies, most often as part of an ongoing process to seek additional information or disclosure. Pursuant to its policy, the Investment Manager will revisit and re-engage with management on those situations.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- **Exclusions** – The Investment Manager has excluded companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption as well as avoiding, in whole or in part, companies with exposure to controversial weapons, tobacco production, and thermal coal extraction.
- **ESG Assessment** – The Investment Manager has developed a proprietary ESG assessment which is comprised of an ESG score and trend signal. At least 85% of net assets, excluding cash, short-term debt instruments, and collective investment schemes (“Excluded Investments”), were invested in companies that received an ESG score that fell in the top 75% of the investee company’s universe (“the 85% Threshold”) at time of purchase. Compliance with the 85% Threshold was monitored on an ongoing basis.

- **Engagement** – The Investment Manager has also, to a limited extent, invested in companies with an ESG score in the bottom 25% of each’s respective universe based on the Investment Manager’s assessment that the companies were transitioning to more sustainable business practices. The Investment Manager has actively engaged with these transitioning investee companies. The Investment Manager has also engaged with an investee company that has a newly identified severe controversy as determined by a third-party data provider. Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

The extent of the Sub-Fund’s compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund’s Supplement is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● ***How did the sustainability indicators perform?***

- **Exclusions** – No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with exposure in whole or in part to controversial weapons, tobacco production or thermal coal extraction.
- **ESG Assessment** – The proportion of the net assets, excluding Excluded Investments, invested within the 85% Threshold was 99.8%. The proportion of companies with ESG scores in the bottom 25% of each’s respective universe was 0.2%. These proportions were calculated based on the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2023. For the previous reference period ending 31 December 2022, the relevant proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund. The Investment Manager has changed the calculation methodology to appropriately capture the frequency of changes in ESG scores during the reference period ending 31 December 2023.
- **Engagement** – As at the end of December 2023, the aggregate number of investee companies engaged with, as a result of the Investment Manager’s ESG assessment, was 12. This includes those investee companies assessed by the Investment Manager as having ESG scores in the bottom 25% of each’s respective universe and one investee company assessed as having a newly identified severe controversy by a third-party data provider.

For the sustainability indicators above, the Investment Manager has used the Investment Manager’s proprietary data, as well as data provided by third-party providers such as FactSet and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)
Exclusions	No exposure	No exposure
ESG Assessment (within top 75% ESG scores)	100%	99.8%
Engagement (as a result of ESG assessment)	19	12

Details of the engagement activities are described in the section under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

The Sub-Fund did not make any sustainable investments at this time.

## #2 Other

The remaining 1.3% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the 12-month average weights of holdings held in the Sub-Fund during the reference period ending 31 December 2023 to calculate the allocations above. For the previous reference period ending 31 December 2022, the relevant proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund. The Investment Manager has changed the calculation methodology to appropriately capture the frequency of changes in ESG scores during the reference period ending 31 December 2023.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Aligned with E/S characteristics: 98.0%
- #2 Other: 2.0%

## ● *In which economic sectors were the investments made?*

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	8.52
Communication Services	Telecommunication Services	1.24
Consumer Discretionary	Distributors	6.59
Consumer Discretionary	Consumer Services	6.51
Consumer Discretionary	Automobiles & Components	2.50
Consumer Discretionary	Consumer Durables & Apparel	0.64
Consumer Staples	Consumer Staples Distribution	4.13
Consumer Staples	Food, Beverage & Tobacco	3.24
Consumer Staples	Household & Personal Products	0.66
Energy	Energy	6.38

Financials	Banks	15.78
Financials	Financial Services	2.31
Financials	Insurance	0.98
Health Care	Pharmaceuticals, Biotechnology	4.14
Health Care	Health Care Equipment & Services	1.74
Industrials	Capital Goods	2.79
Industrials	Transportation	0.80
Information Technology	Semiconductors & Semiconductor Equipment	11.89
Information Technology	Technology Hardware & Equipment	8.76
Information Technology	Software & Services	2.17
Materials	Materials	1.96
Real Estate	Real Estate Management & Development	3.16
Utilities	Utilities	0.79

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
<b>Turnover</b>	0%	0%	100%	100%
<b>CapEx</b>	0%	0%	100%	100%
<b>OpEx</b>	0%	0%	100%	100%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

### **What was the share of socially sustainable investments?**

Not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In 2023, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager's analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, energy transition and decarbonization. For example, the Sub-Fund invested in companies that provide innovative and important solutions supporting vehicle electrification, solar and wind power, and fuel efficiency. The Investment Manager has also identified companies held by the portfolio that contribute to health care innovation and pharmaceuticals, such as the Sub-Fund's investment in companies engaged in the discovery, development and manufacture of biologics services. The Sub-Fund has also invested in companies tied to financial inclusion, such as innovative companies that help provide access to financial services to the underbanked and underprivileged sections of the rural population.

The Investment Manager engaged with 12 investee companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2023, the Investment Manager engaged with the management of investee companies on 12 different topics. The five topics most frequently addressed in engagements during the period were human capital, ESG due diligence and risk management, labour practices and supply chain management, general governance, and proxy voting. Some of these engagements were identified for follow up in the prior reporting year.

The Investment Manager also engaged one investee company assessed as having a newly identified severe controversy, as determined by a third-party data provider. According to the data provider, the investee company was involved in a severe controversy related to civil liberties. The Investment Manager engaged with the investee company on the allegations of civilian surveillance and the policies the investee company has in place to protect civil liberties and comply with local regulation. The Investment Manager continues to monitor the situation.

In most situations, including the controversy-related engagement, engagement resulted in a better understanding of the sustainability risks facing the company, and more importantly, how company management is addressing those risks. For two engagements spanning two companies, the Investment Manager identified situations where further follow up was warranted, most often as part of an ongoing process to seek additional information or disclosure. Pursuant to its policy, the Investment Manager will revisit and re-engage with management on those situations.

### **Disclaimer**

This disclosure was developed using information from MSCI ESG Research LLC or its affiliates or information providers. Although American Century Investment Management, Inc. information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. ## Sustainable investment objective

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 15.0%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 82.1%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent was the sustainable investment objective of this financial product met?**

The sustainable investment objective of the Sub-Fund is to create a positive societal and/or environmental impact through investment in an actively managed portfolio of emerging markets equity securities. Based on the sustainable investment objective above, the Investment Manager sought to invest in companies that create a positive, measurable social and/or environmental impact (a “sustainable impact”), as demonstrated by their contribution to at least one or more of five sustainable investment themes: 1) Health Care, 2) Empowerment, 3) Sustainable Living, 4) Climate, and 5) Technological Advancement. Each of these sustainability themes were guided by sub-themes which are aligned with the UN Sustainable Development Goals (“SDGs”).

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the SDGs above. Each sustainable investment was assessed against the exclusions, contribution assessment and SDGs alignment assessment, and categorised into the appropriate contribution category of “direct contribution”. The details of the contribution categories and the binding strategies are further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

### ● **How did the sustainability indicators perform?**

The Sub-Fund's sustainability indicators performed as described below:

- 8.04%\* of the portfolio's revenue is derived from investee companies offering products and/or services that improve access to health care or sustainable living to lower-income populations;

\* Note that investee companies may derive revenue from multiple business lines not associated with improving access to health care and/or sustainable living for lower-income populations. Those investee companies assessed as having at least 20% of their revenue (latest available) aligned with these primary themes are considered to be contributing to improving access to health care or sustainable living for lower-income populations. It should also be noted that as data availability and quality continue to evolve, the Investment Manager will seek to improve upon the quality of this reporting - one potential impact may be decreases in future datapoints as accuracy and precision improve.

- Innovation and technological advancement as measured by capital expenditures resulted in EUR16,815 per EUR1 million invested in the Sub-Fund in calendar year 2022, which is the most recent data available at the time of this report.
- The carbon footprint of the portfolio based on the weighted average measurement of greenhouse gas (GHG) emissions was 177 tonnes of CO<sub>2</sub>e per EUR 1 million invested.
- Over the reference period, 26% of the Sub-Fund's assets were in companies with gender diverse boards as assessed by the Investment Manager.
- Over the reference period, 53% of the Sub-Fund's assets were in companies with independent board of directors.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report. Unless otherwise stated, the data has been calculated using the quarter-end average weights of holdings held in the Sub-Fund in 2023, enterprise values data as of 2023 December-end and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports, information obtained through the Investment Manager's engagement directly with investee companies, Factset, and MSCI. Regarding data from third-party data providers, the Investment Manager is not able to verify the accuracy of the data, nor the sources from which the data is collected.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)
Revenue or percent of revenue from portfolio holdings that offers products and/or services that improve access to health care or sustainable living to lower-income populations	7% of revenue	8.04% of revenue
Innovation and technological advancement as measured by capital expenditures (per EUR 1 million invested in the Sub-Fund)	EUR11,801	EUR16,815
Carbon footprint metrics of the portfolio based on the measurement of greenhouse gas (GHG) emissions (per EUR 1 million invested in the Sub-Fund)	177 tonnes of CO2e	177 tonnes of CO2e
Board gender diversity (as identified by the Investment Manager)	25% of Sub-Fund's holdings	26% of Sub-Fund's holdings
Independent board of directors	51% of Sub-Fund's holdings	53% of Sub-Fund's holdings.

For this reference period, the Sub-Fund experienced improvements in four out of five sustainability indicators, while the fifth indicator, carbon footprint, remained unchanged compared to the prior reporting period. Capital expenditures (per EUR 1 million invested in Sub Fund) notably improved with the addition of a new semiconductor holding, and as all semiconductor-related holdings ramped up CapEx investments.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has considered certain indicators for adverse impacts on sustainability factors, as described below.

Within this assessment, the Investment Manager used in-house research and analysis taking into account data provided by a third party data provider, MSCI, where available.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager considered the following principal adverse impacts (“PAI”) indicators, either directly or indirectly, throughout the investment process through certain product-, activity- or conduct-based exclusions, contribution assessment and SDGs alignment assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below), as further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violation of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Investment Manager has also considered other relevant PAI indicators depending on the business activities and behaviours of the respective company. The Investment Manager has monitored the availability of data regarding investee companies and engaged with those companies that the Investment Manager has determined have insufficient data to make a credible assessment of the company's impact on sustainability factors. These engagements, which include requesting disclosure and implementation of procedures to mitigate PAI, take place on an ongoing basis.

Please note that data from the the third party data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments were aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights because companies that the Investment Manager deemed to be in violation of UNGC and OECD Guidelines were excluded from the portfolio.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons), based on a third-party classification (threshold 0%)
- Exposure to companies deemed to be in violation of UNGC and OECD Guidelines, based on a third-party classification (threshold 0%)

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MAN	Information Technology	9.32	Taiwan
TENCENT HOLDINGS LTD	Communication Services	6.18	China
SAMSUNG ELECTRONICS CO	Information Technology	5.68	South Korea
ALIBABA GROUP HOLDING-SP	Consumer Discretionary	3.29	China
CASH	N/A	3.26	N/A
AL RAJHI BANK	Financials	2.95	Saudi
ICICI BANK LTD-SPON	Financials	2.84	India
GENTERA SAB DE CV	Financials	2.58	Mexico
AIA GROUP LTD	Financials	2.69	Hong Kong
GRUPO FINANCIERO BANORTE	Financials	2.46	Mexico
BDO UNIBANK INC	Financials	2.46	Philippines
BANGKOK DUSIT MED SERVICES	Health Care	2.16	Thailand
CHAILEASE HOLDING CO LTD	Financials	2.23	Taiwan
SUN PHARMACEUTICAL INDUSTRIES	Health Care	1.84	India
CP ALL PCL FOREIGN	Consumer Staples	1.95	Thailand

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets classified as “#Not sustainable” (i.e., all investments of the Sub-Fund).

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:  
1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Sustainable

The Investment Manager has invested 97.1% of the Sub-Fund’s assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

#### #2 Not sustainable

The remaining 2.9% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

**Asset allocation** describes the share of investments in specific assets.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Sustainable: 99.1% (split as to Environmental: 17.6% and Social: 81.5%)
- #2 Not Sustainable: 0.9%

● ***In which economic sectors were the investments made?***

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	6.29
Communication Services	Telecommunication Services	0.84
Consumer Discretionary	Distributors	5.99
Consumer Discretionary	Consumer Services	5.04
Consumer Discretionary	Consumer Durables & Apparel	1.53
Consumer Discretionary	Automobiles & Components	1.04
Consumer Staples	Distribution	3.87
Consumer Staples	Food, Beverage & Tobacco	0.63
Energy	Energy	0.42
Financials	Banks	20.34
Financials	Financial Services	6.95
Financials	Insurance	3.75
Health Care	Health Care Equipment & Services	6.35
Health Care	Pharmaceuticals, Biotechnology	4.59
Industrials	Capital Goods	4.26
Industrials	Commercial & Professional Services	0.35
Information Technology	Semiconductors & Semiconductor Equipment	10.26
Information Technology	Technology Hardware & Equipment	7.94
Information Technology	Software & Services	1.79
Materials	Materials	0.43
Real Estate	Real Estate Management & Development	0.11
Utilities	Utilities	3.97

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
Turnover	0%	0%	100%	100%
CapEx	0%	0%	100%	100%
OpEx	0%	0%	100%	100%

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 15.0%.

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not.

- **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 82.1%.

- **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

- **What actions have been taken to attain the sustainable investment objective during the reference period?**

In 2023, the Sub-Fund sought to enable the growth of companies with opportunities for current or projected net-positive growth by specifically investing in companies the Investment Manager believed to be aligned with at least one or more of five sustainable

investment themes: 1) Health Care, 2) Empowerment, 3) Sustainable Living, 4) Climate, and 5) Technological Advancement. Each of these sustainability themes were guided by sub-themes which are aligned with the SDGs.

The Sub-Fund also excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies do not cause significant harm to any environmental or social sustainable investment objective. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC principles.

The Investment Manager's analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, energy transition and decarbonization. For example, the Sub-Fund invested in companies that provide innovative and important solutions supporting vehicle electrification, solar and wind power, and fuel efficiency. The Investment Manager has also identified and invested in companies that contribute to health care innovation and pharmaceuticals, such as companies engaged in the discovery, development, and manufacture of biologics services. The Sub-Fund also invested in companies tied to financial inclusion, such as innovative companies that help provide access to financial services to the underbanked and underprivileged sections of the rural population.

The Investment Manager engaged with 10 investee companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material sustainability-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the Investment Manager believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication, and industry forums, summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2023, the Investment Manager engaged with the management of investee companies on 10 different topics. The five topics that were the most frequently engaged during the period were ESG due diligence and risk management, human capital, biodiversity, labour practices and supply chain management, general governance, and modern slavery. Some of these engagements were identified for follow up in the prior reporting year.

The Investment Manager also engaged one investee company assessed as having a newly identified severe controversy, as determined by a third-party data provider. According to the data provider, the investee company was involved in a severe controversy related to civil liberties. The Investment Manager engaged with the investee company on the allegations of civilian surveillance and the policies the investee company has in place to protect civil liberties and comply with local regulation. The Investment Manager continues to monitor the situation.

In most situations, including the controversy-related engagement, engagement resulted in a better understanding of the sustainability risks the company is facing and, more importantly how company management is addressing those risks. For three engagements spanning three companies, the Investment Manager identified situations where further follow up is warranted, most often as part of an ongoing process to seek additional information or disclosure. Pursuant to the Investment Manager's policy, it will revisit and reengage with management on those situations.

## **Disclaimer**

None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

## ANNEX

Product name: Nomura Funds Ireland – Japan Sustainable Equity Growth Fund

Legal entity identifier: 213800Q2NXQGYA2F3N25

# Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 28.5%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 70.6%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive environmental and/or societal impact. Based on the sustainable investment objective above, the Sub-Fund has mainly focused on the following five UN Sustainable Development Goals (“SDGs”) aligned “Impact Goals”:

1. Mitigate Climate Change
2. Mitigate Natural Capital Depletion
3. Promote Good Health and Well-Being
4. Improve Quality of Life
5. Promote Sustainable Industrialisation and Foster Innovation

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions and contribution assessment, and categorised into the appropriate contribution category of “direct contribution. The details of the contribution categories and the binding strategies are further described under “What

investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

As further described under the section “How did the sustainability indicators perform?”, the Investment Manager has measured the impact of the Sub-Fund’s investments through the metric of impact of the underlying holdings per JPY100 million invested in the Sub-Fund.

The Investment Manager has particularly focused on the following sustainable investments in relation to the above environmental and social objectives:

1. **Mitigate Climate Change:** Sustainable investments in this objective have contributed to reducing GHG emissions through their products with lower GHG emissions. For example, one of the Sub-Fund’s holdings measures the amount of GHG emissions avoided through the use of its high efficiency air conditioning equipment, which produces lower GHG emissions.
2. **Mitigate Natural Capital Depletion:** Sustainable investments in this objective have contributed to the conservation of natural capital mainly through recycling and sustainable sourcing of materials. For example, one of the Sub-Fund’s holdings measures the impact of recycling by the number of plastic bottles recycled into carpet materials they produce.
3. **Promote Good Health and Well-Being:** Sustainable investments in this objective have contributed to improving health and well-being in both developed and emerging countries mainly through the provision of drugs and medical devices. The Investment Manager measures the impact through the number of patients treated with drugs and medical devices provided by investee companies. However, the Investment Manager have also used the amount of R&D investments spent by investee companies on the development of new drugs and medical devices as an alternative way to measure the impact in order to supplement lack of disclosure by investee companies.
4. **Improve Quality of Life:** A sustainable investment in this objective has contributed particularly to the improvement of sanitation and education. The company provides education to women on topics such as menstruation and financial independence to support independence for women in emerging countries. The Sub-Fund measured the impact through the number of education projects provided by the investee company.
5. **Promote Sustainable Industrialisation and Foster Innovation:** A sustainable investment in this objective has contributed to the conservation of industries and social capital, as well as improving productivity through the provision of products and services. This company provides M&A advisory services including rescuing Japanese mid-to-small sized businesses from going out of business through offering succeeding business partners. The Sub-Fund measured the impact through the number of business successions assisted by the investee company.

The extent of the Sub-Fund’s impact and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section “What was the proportion of sustainability-related investments?” below.

● ***How did the sustainability indicators perform?***

The Sub-Fund’s sustainability indicators performed as below (impact of the underlying holdings per JPY 100 million invested in the Sub-Fund):

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

- Tonnes of carbon avoided as a result of an investee company's products and services: (Scope 1+2+3) 96.7 tonnes
- Number of low income patients reached with drugs and treatments through company's access strategies: 14 patients
- Amount of R&D investment spent on promoting the development of new drugs and medical equipment: JPY 372,549
- Level of economic loss avoided by successful business succession of small to mid-sized companies: JPY 555,866

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2023, market capitalisation data as of 2023 December-end and the fiscal year-end impact data for 2022. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports.

● **...and compared to previous periods?**

<b>Sustainability indicators</b>	<b>31 December 2022 reference period (reported in 2023 periodic report)</b>	<b>31 December 2023 reference period (reported in 2024 periodic report)</b>
Tonnes of carbon avoided as a result of an investee company's products and services (Scope 1+2+3)	46.8 tonnes	96.7 tonnes
Number of low income patients reached with drugs and treatments through company's access strategies	4 patients	14 patients
Amount of R&D investment spent on promoting the development of new drugs and medical equipment	JPY 340,851	JPY 372,549
Level of economic loss avoided by successful business succession of small to mid-sized companies	JPY 877,704	JPY 555,866

Higher tonnes of carbon avoided as a result of an investee company's products and services for the reference period ending 31 December 2023 was due to more companies started reporting this metric.

The amount of economic loss avoided by successful business succession of small to mid-sized companies was lower than the previous reference as the Investment Manager divested from a holding which had significant contribution to this metric due to concerns around its performance and outflow of core employees.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on

sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager considered the following principal adverse impacts (“PAI”) indicators, either directly or indirectly, throughout the investment process through certain product-, activity- or conduct-based exclusions, proprietary ESG scores and contribution assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below) as further described under “What investment strategy does this financial product follow?”.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violations of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Investment Manager has also taken into account other relevant PAI indicators depending on the business activities, behaviours of a company and the availability of data. Where there was no sufficient data to make credible assessment, the Investment Manager supplemented with its qualitative research and engagement. Engagement with companies takes place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	22.49	100.00	105.01	97.99
1.1.2	Scope 2 GHG emissions	43.90	100.00	42.99	97.99
1.1.3	Scope 3 GHG emissions	797.66	100.00	1207.95	97.97
1.1.4	Total GHG emissions	864.05	100.00	1356.07	97.96
1.2	Carbon Footprint	479.60	100.00	752.14	97.96
1.3	GHG intensity of investee company	709.58	100.00	857.72	97.97
1.4	Exposure to companies active in the fossil fuel sector	6.66	100.00	8.98	97.12
1.5	Share of non-renewable energy consumption and production	82.12	47.96	82.40	48.38
1.6.1	NACE Code A (Agriculture, Forestry and Fishing)	N/A	0.00	N/A	0.00

1.6.2	NACE Code B (Mining and Quarrying)	N/A	0.00	0.47	1.50
1.6.3	NACE Code C (Manufacturing)	0.44	45.63	0.40	36.75
1.6.4	NACE Code D (Electricity, Gas, Steam and Air Conditioning Supply)	N/A	0.00	2.20	0.72
1.6.5	NACE Code E (Water Supply; Sewerage, Waste Management and Remediation Activities)	N/A	0.00	0.17	0.13
1.6.6	NACE Code F (Construction)	N/A	0.00	0.19	1.39
1.6.7	NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles)	0.12	4.52	0.27	4.83
1.6.8	NACE Code H (Transportation and Storage)	N/A	0.00	8.36	1.52
1.6.9	NACE Code L (Real Estate Activities)	N/A	0.00	0.12	1.25
1.7	Activities negatively affecting biodiversity-sensitive areas	0.00	100.00	0.00	97.31
1.8	Emissions to water	0.46	2.18	0.15	1.05
1.9	Hazardous waste and radioactive waste ratio	1.30	12.24	0.74	17.88
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	96.55	0.17	95.93
1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	45.34	100.00	41.44	97.28
1.12	Unadjusted gender pay gap	16.53	4.58	19.52	4.52
1.13	Board gender diversity	18.92	100.00	18.66	97.16
1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	97.46

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.1.2 (Scope 2 GHG emissions): Based on the Data Provider's data, the Sub-Fund has reported higher emissions than that of the TOPIX index (the "Index"). The Sub-Fund held a manufacturer of industrial gases and chemicals which accounted for more than half of the total scope 2 GHG emissions of the Sub-Fund. The company has set a carbon neutral goal for Scope 1 and 2 emissions by 2050 and currently is working towards its interim goal of reducing 30% of its Scope 1 and 2 emissions by 2030.
- #1.6.3 (NACE Code C): Regarding NACE Code C (Manufacturing), the data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The holdings within the Sub-Fund with reported data for this metric include chemical manufacturers, healthcare and household product manufacturer and electronic component manufacturer. The Investment Manager believes that those companies do not display significant impact on this metric.
- #1.8 (Emissions to water): The data coverage of this indicator for both the Sub-Fund and the Index is particularly limited. The Sub-Fund had one holding that had data for this indicator which was a chemical company. The Investment Manager found that the company looked after the local community they operate in by treating the water appropriately and conducting learning workshops for the local community.
- #1.9 (Hazardous waste and radioactive waste ratio): Based on the Data Provider's data, the Sub-Fund has indicated a higher negative impact than that of the Index. The data coverage of this indicator for both the Sub-Fund and the Index is currently limited and only 4 companies within the Sub-Fund reported the data. However, the Investment Manager has identified a discrepancy between company-report data and the data provided by the Data Provider for one of holdings for this impact.

- #1.11 (Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines): The Investment Manager will engage with those companies that lack in processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines.
- #1.13 (Board gender diversity): The Investment Manager has engaged with the companies held in the Sub-Fund to increase the proportion of female directors on their boards. While the data coverage is high for both the Sub-Fund and the Index when calculated by weight, the data coverage for the Index falls significantly when calculated by the number of companies. Therefore, if the data for small-cap companies becomes available, the indicator for the Index may likely appear less favourable.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

## What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
SHIN-ETSU CHEMICAL CO LTD	Materials	5.42	Japan
HITACHI LTD	Industrials	4.73	Japan
SONY GROUP CORP	Consumer Discretionary	4.43	Japan
DAIWA HOUSE INDUSTRY CO	Real Estate	4.30	Japan
TOYOTA TSUSHO CORP	Industrials	4.11	Japan
CHUGAI PHARMACEUTICAL CO	Health Care	3.79	Japan
UNICHARM CORP	Consumer Staples	3.54	Japan
OBIC CO LTD	Information Technology	3.49	Japan
SOMPO HOLDINGS INC	Financials	3.17	Japan
KEYENCE CORP	Information Technology	3.15	Japan
DAIKIN INDUSTRIES LTD	Industrials	3.13	Japan
KOMATSU LTD	Industrials	3.08	Japan
RENESAS ELECTRONICS CORP	Information Technology	2.67	Japan
MURATA MANUFACTURING CO	Information Technology	2.67	Japan
DENSO CORP	Consumer Discretionary	2.63	Japan

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

**1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.**

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Sustainable**

The Investment Manager has invested 99.1% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

**#2 Not sustainable**

The remaining 0.9% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Sustainable: 98.2% (split as to Environmental: 24.0% and Social: 74.2%)
- #2 Not sustainable: 1.8%

● **In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
Communication Services	Telecommunication Services	2.15
Consumer Discretionary	Consumer Durables & Apparel	6.51
Consumer Discretionary	Consumer Discretionary Distribution	4.49
Consumer Discretionary	Automobiles & Components	3.14
Consumer Staples	Household & Personal Products	3.68
Financials	Insurance	5.51
Financials	Financial Services	2.60
Health Care	Pharmaceuticals, Biotechnology	7.25
Health Care	Health Care Equipment & Services	6.58
Industrials	Capital Goods	16.49
Industrials	Commercial & Professional Services	3.04
Industrials	Transportation	0.89
Information Technology	Technology Hardware & Equipment	9.03
Information Technology	Semiconductors & Semiconductor	6.05
Information Technology	Software & Services	3.49

Materials	Materials	13.96
Real Estate	Real Estate Management & Development	4.30

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)				Non Taxonomy-aligned			
	31 2022 period	December reference period	31 2023 period	December reference period	31 2022 period	December reference period	31 2023 period	December reference period
<b>Turnover</b>	0%		0%		100%		100%	
<b>CapEx</b>	0%		0%		100%		100%	
<b>OpEx</b>	0%		0%		100%		100%	

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28.5%.

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not.

- **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 70.6%.

- **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

- **What actions have been taken to attain the sustainable investment objective during the reference period?**

During the reference period, the Investment Manager engaged with a portfolio company that produces sensors and measuring instruments for factory automation. Its business model is referred to as “fabless” which means the company designs and markets products while outsourcing the products’ fabrication to a third-party partners. The Investment Manager believes that the company contributes to the Sub-Fund’s Impact Goal 5, Promote Sustainable Industrialisation and Foster Innovation, through its wide range of technologies.

However, there have been some concerns around its supply chain labour-related risks in countries without effective labour standards, which are reflected in the assessment by the Corporate Human Rights Benchmark. In response to this, the company has disclosed a full list of smelters (suppliers) and conducted due diligence exercises to the smelters. The Investment Manager will continue to monitor the development and request for greater disclosures on human rights due diligence.

One of the portfolio holdings is an electronics manufacturer which the Investment Manager deems to contribute to the Sub-Fund's Impact Goal 5, Promote Sustainable Industrialisation and Foster Innovation, through its social and technological innovation. The company has a Scope 1, 2 & 3 carbon neutral target by 2050, a Scope 1 & 2 carbon neutral target by 2030 and a target of 100 million tons of avoided GHG emissions per year by fiscal year 2024 through its products and services. To further push the company's efforts, the Investment Manager has encouraged the company to disclose the progress on its avoided emissions as well as setting a longer term goal for its avoided emissions.

The Investment Manager also engaged with a manufacturer of optical and electronic products which contributes to the Sub-Fund's Impact Goal 3, Promote Good Health and Well-Being, through its products and services. However, the company had lacked in efforts in disclosing sustainability information particularly in terms of medium- to long-term reduction targets for its GHG emissions. Since 2021, the Investment Manager has been engaging with the company with a particular focus on requesting them to demonstrate efforts towards achieving carbon neutrality. In April 2023, the company disclosed a scenario analysis based on the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) for the first time, and announced its carbon neutrality targets for 2040 concerning scope 1 and 2 GHG emissions. The Investment Manager will continue its engagement to encourage the company to disclose scope 3 GHG emissions and other sustainability information.

## **Disclaimer**

This disclosure was developed using information from MSCI ESG Research LLC or its affiliates or information providers. ## ANNEX

Product name: Nomura Funds Ireland – Japan Sustainable Equity Core Fund

Legal entity identifier: 213800OZBIQ3K5QR5E90

# Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 66.6%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 32.4%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive environmental and/or societal impact. Based on the sustainable investment objective above, the Sub-Fund has mainly focused on the following three UN Sustainable Development Goals (“SDGs”) aligned “Impact Goals”:

1. Mitigate Climate Change
2. Mitigate Natural Capital Depletion
3. Promote Good Health and Well-Being

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions and contribution assessment, and categorised into the appropriate contribution category of “direct contribution”. The details of the contribution categories and the binding strategies are further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

As further described under the section “How did the sustainability indicators perform?”, the Investment Manager has measured the impact of the Sub-Fund’s investments through the metric of impact of the underlying holdings per JPY100 million invested in the Sub-Fund.

The Investment Manager has particularly focused on the following sustainable investments in relation to the above environmental and social objectives:

1. Mitigate Climate Change: Sustainable investments in this objective have offered products and/or services that enables others to reduce their energy emissions, or produced energy through renewable sources such as wind and solar power.
2. Mitigate Natural Capital Depletion: Sustainable investments in this objective have reduced their wastes through recycling, or offered products and/or services that are more resource-efficient to reduce environmental impact.
3. Promote Good Health and Well-Being: Sustainable investments in this objective have provided medical care and products, high quality education or basic infrastructures for healthy life in developed and/or emerging countries.

The extent of the Sub-Fund’s impact and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section “What was the proportion of sustainability-related investments?” below.

#### ● **How did the sustainability indicators perform?**

The Sub-Fund’s sustainability indicators performed as below (impact of the underlying holdings per JPY100 million invested in the Sub-Fund):

- Tonnes of carbon avoided as a result of an investee company’s products and services: (Scope 1+2+3) 65 tonnes. The amount of carbon avoided was calculated using the quarter-end average weights of holdings held in the Sub-Fund in 2023, market capitalisation data as of the end of December 2023 and fiscal year-end impact data for 2022.
- Amount of natural resources avoided in manufacturing and servicing of an investee company’s products: Water consumption avoided was 13.2 m3. Energy consumption avoided was 10.6 MWh. The water and energy consumption avoided were the amount of consumption reduced on a year on year basis within the manufacturing and servicing process of investee companies’ products between the fiscal year 2021 and 2022. These indicators were calculated based on the quarter-end average weights of holdings held in the Sub-Fund in 2023 and market capitalisation data as of the end of December 2023.
- Amount of R&D investment spent on promoting the development of new drugs and medical equipment: JPY 0.59 million. This is the aggregate financial amount of R&D investment spent during the reference period.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report as indicated above. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports as well as data obtained by a third-party data provider, MSCI.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)
Tonnes of carbon avoided as a result of an investee company's products and services (Scope 1+2+3)	374 tonnes	65 tonnes
Amount of natural resources avoided in manufacturing and servicing of an investee company's products	Water: 17.2 m3 Energy: 44.0 MWh (between 2019/2020)*	Water: 13.2 m3 Energy: 10.6 MWh (between 2021/2022)*
Amount of R&D investment spent on promoting the development of new drugs and medical equipment	JPY 0.44 million	JPY 0.59 million

\* Due to the data availability at the time of the reporting for the reference period ending 31 December 2022, the Sub-Fund reported the amount of natural resources avoided in manufacturing and servicing of an investee company's products by using the data from 2019 and 2020. As companies' disclosures improved, the Sub-Fund has reported the same indicator based on the data from 2021 and 2022 for the reference period ending 31 December 2023.

The Sub-Fund reported significantly lower tonnes of carbon avoided as a result of an investee company's products and services (Scope 1+2+3) during the reference period due to changes in holdings. This was due to the divestment of a company, which accounted for about 300 tonnes of carbon avoided. Based on the holdings held in the Sub-Fund at 31 December 2023, the same indicator has improved compared the previous period.

The lower amount of natural resources avoided in manufacturing and servicing of an investee company's products was due to the impact of the expansion of economic activities. Total sales of investee companies increased by about 13%. When measured in water and energy intensity of the investee companies, both have shown improvements.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager considered the following principal adverse impacts ("PAI") indicators, either directly or indirectly, throughout the investment process

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

through certain product-, activity- or conduct-based exclusions, proprietary ESG scores and contribution assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below) as further described under “What investment strategy does this financial product follow?”.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violations of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Investment Manager has also taken into account other relevant PAI indicators depending on the business activities, behaviours of a company and the availability of data. Where there was no sufficient data to make credible assessment, the Investment Manager supplemented with its qualitative research and engagement. Engagement with companies takes place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	201.08	100.00	618.01	97.99
1.1.2	Scope 2 GHG emissions	255.49	100.00	252.95	97.99
1.1.3	Scope 3 GHG emissions	5,023.22	100.00	7108.92	97.97
1.1.4	Total GHG emissions	5,479.80	100.00	7980.61	97.96
1.2	Carbon Footprint	508.79	100.00	752.14	97.96
1.3	GHG intensity of investee company	555.98	100.00	857.72	97.97
1.4	Exposure to companies active in the fossil fuel sector	0.00	100.00	8.98	97.12
1.5	Share of non-renewable energy consumption and production	83.48	49.76	82.40	48.38
1.6.1	NACE Code A (Agriculture, Forestry and Fishing)	N/A	0.00	N/A	0.00
1.6.2	NACE Code B (Mining and Quarrying)	N/A	0.00	0.47	1.50
1.6.3	NACE Code C (Manufacturing)	0.19	41.03	0.40	36.75
1.6.4	NACE Code D (Electricity, Gas, Steam and Air Conditioning Supply)	N/A	0.00	2.20	0.72
1.6.5	NACE Code E (Water Supply; Sewerage, Waste Management and Remediation Activities)	0.08	0.47	0.17	0.13
1.6.6	NACE Code F (Construction)	0.63	1.80	0.19	1.39
1.6.7	NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles)	0.59	3.00	0.27	4.83
1.6.8	NACE Code H (Transportation and Storage)	0.30	2.30	8.36	1.52
1.6.9	NACE Code L (Real Estate Activities)	0.02	3.28	0.12	1.25

1.7	Activities negatively affecting biodiversity-sensitive areas	0.00	100.00	0.00	97.31
1.8	Emissions to water	N/A	0.00	0.15	1.05
1.9	Hazardous waste and radioactive waste ratio	0.29	15.21	0.74	17.88
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.65	0.17	95.93
1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	29.06	100.00	41.44	97.28
1.12	Unadjusted gender pay gap	19.61	4.56	19.52	4.52
1.13	Board gender diversity	20.36	100.00	18.66	97.16
1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	97.46

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.1.2 (Scope 2 GHG emissions): The Sub-Fund has reported higher Scope 2 GHG emissions compared to the TOPIX (the "Index"). Some of the contributors to higher Scope 2 GHG emissions were a bearing manufacturer and machinery manufacturer. Both companies contribute to the reduction of GHG emissions of their customers through low emission products.
- #1.5 (Share of non-renewable energy consumption and production): The Sub-Fund had slightly higher negative impact on this indicator compared to the Index. One of the holdings, for example, is an electronic manufacturer which reported relatively high share of non-renewable energy consumption. The Investment Manager deems the company contributes to the Impact Goal of Promote Good Health and Well-Being through provision of education.
- #1.6.6 (NACE F): Regarding NACE Code F (Construction), the data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The Sub-Fund holds a construction company which the Investment Manager deems to contribute to the Sub-Fund's Impact Goal of Mitigate Climate Change through its products. The Investment Manager believes that the negative impact of the company on this PAI has not been significant.
- #1.6.7 (NACE G): Regarding NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles), the data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The major contributor to the higher intensity of the Sub-Fund was an information technology company, which the Investment Manager deems to contribute to the Sub-Fund's Impact Goal of Mitigate Climate Change through its solution services. The Investment Manager believes that the negative impact of the company on this PAI has not been significant.
- #1.12 (Unadjusted gender pay gap): The data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited with only two holdings reported data. However, the Investment Manager has identified a discrepancy between company-report data and the data provided by the Data Provider for one of the companies, which has been confirmed by the Data Provider as an error.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.

Largest investments	Sector	% Assets	Country
SONY GROUP CORP	Consumer Discretionary	5.06	Japan
NIPPON TELEGRAPH & TELEP	Communication Services	4.89	Japan
SANTEN PHARMACEUTICAL CO	Health Care	4.09	Japan
RECRUIT HOLDINGS CO LTD	Industrials	4.02	Japan
DAIICHI SANKYO CO LTD	Health Care	3.91	Japan
BIPROGY INC	Information Technology	3.71	Japan
SOMPO HOLDINGS INC	Financials	3.58	Japan
RENESAS ELECTRONICS CORP	Information Technology	3.43	Japan
DAITO TRUST CONSTRUCT CO	Real Estate	3.25	Japan
ORIX CORP	Financials	3.10	Japan
FUJIFILM HOLDINGS CORP	Information Technology	3.09	Japan
NEC CORP	Information Technology	3.06	Japan
CANON MARKETING JAPAN IN	Information Technology	2.97	Japan
SUMITOMO MITSUI TRUST HOLDINGS INC	Financials	2.80	Japan
YAMAHA CORP	Consumer Discretionary	2.79	Japan

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Sustainable

The Investment Manager has invested 99.0% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#### #2 Not sustainable

The remaining 1.0% of investments were cash held as ancillary liquidity.

**Asset allocation** describes the share of investments in specific assets.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Sustainable: 98.9% (split as to Environmental: 75.9% and Social: 23.0%)
- #2 Not Sustainable: 1.1%

● **In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
Communication Services	Telecommunication Services	4.89
Consumer Discretionary	Consumer Durables & Apparel	10.43
Consumer Discretionary	Automobiles & Components	6.18
Consumer Discretionary	Consumer Services	1.58
Financials	Insurance	5.59
Financials	Financial Services	4.59
Financials	Banks	2.80
Health Care	Pharmaceuticals, Biotechnology	10.57
Industrials	Capital Goods	12.05
Industrials	Commercial & Professional Services	4.02
Industrials	Transportation	2.28
Information Technology	Technology Hardware & Equipment	11.93
Information Technology	Software & Services	8.32
Information Technology	Semiconductors & Semiconductor	3.43
Materials	Materials	5.13
Real Estate	Real Estate Management & Development	5.24

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

\* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
<b>Turnover</b>	0%	0%	100%	100%
<b>CapEx</b>	0%	0%	100%	100%
<b>OpEx</b>	0%	0%	100%	100%

### **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 66.6%.

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not.

### **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 32.4%.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Investment Manager has invested in a bearing manufacturer based on the company's contribution to the Sub-Fund's Impact Goal of Mitigate Climate Change through lower emission products such as bearings and electronic power steering. Since 2015 the company has improved its score assigned by CDP for its disclosures and environmental performance and was scored as A in 2023 (A- since 2017). The Investment Manager has engaged with the company to encourage more enhanced and comprehensive disclosure of its effort and commitment in reducing negative environmental (in particular, climate) impacts. The Investment Manager has also requested the company to set a SBTi approved targets. In 2023, the company improved its integrated report with more details on non-

financial activities and submitted a commitment letter to the SBTi, which is an initial step in setting a science-based target.

The Investment Manager also engaged with a machinery manufacturer whom the Investment Manager has deemed as contributing to the Sub-Fund's Impact Goal of Mitigate Climate Change through its lower emission products. The main focus of the engagement was insufficient disclosure by the company on its effort and commitment in reducing negative environmental (in particular, climate) impacts. Investment Manager has addressed this issue with the senior management of the company since 2022. The senior management has become more proactive and committed to the company's environmental strategies and disclosure has improved. In 2023, the momentum has further accelerated as the company submitted a commitment letter to the SBTi, which is an initial step in setting a science-based target.

### **Disclaimer**

## ANNEX

Product name: Nomura Funds Ireland – Asia Sustainable Equity Fund

Legal entity identifier: 213800V1RG4MVLPA6B05

# Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 91.5%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 5.1%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive environmental and/or societal impact. Based on the sustainable investment objective above, the Sub-Fund has mainly focused on the following six UN Sustainable Development Goals (“SDGs”) aligned “Impact Goals”:

1. Mitigate Climate Change
2. Mitigate Natural Capital Depletion
3. Global Access to Basic Financial Services
4. Global Access to Clean Drinking Water
5. Eliminate Communicable Disease
6. Mitigate the Obesity Epidemic

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions, contribution assessment and proprietary total stakeholder impact assessment, and categorised into the appropriate contribution

category of “direct contribution” and “indirect contribution”. The details of the contribution categories and the binding strategies are further described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

For Mitigate Climate Change and Mitigate Natural Capital Depletion, the Investment Manager has mainly invested in companies that make “direct contribution” to these Impact Goals through their products (for example, electric vehicle (EV) manufacturers, EV battery manufacturers, renewable utilities) and services (for example, providing financing for emerging technologies). For Global Access to Basic Financial Services, the Sub-Fund has mainly invested in financial institutions that provide their financial services to population in low-income blanket or focus on providing finance to small and medium-sized enterprises. For Global Access to Clean Drinking water, the Investment Manager invested in a company that makes “indirect contribution” through their project focusing on providing safe and clean water to wide community in Malaysia, as well as companies focused on 3Rs (reduce, reuse and recycle) for optimal water consumption. The Investment Manager also invested in companies that make “direct contribution” to Eliminate Communicable Disease and Mitigate the Obesity Epidemic through innovative research for development of new drugs and medical devices.

As further described under the section “How did the sustainability indicators perform?”, the Investment Manager has measured the impact of the Sub-Fund’s investments through the metric of impact of the underlying holdings per USD 1 million invested in the Sub-Fund.

The extent of the Sub-Fund’s impact and/or contribution is further described in the section “How did the sustainability indicators perform?” and “How did this financial product consider principal adverse impacts on sustainability factors?” below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section “What was the proportion of sustainability-related investments?” below.

### ● **How did the sustainability indicators perform?**

The Sub-Fund’s sustainability indicators performed as below (impact per USDm invested in the Sub-Fund):

- Tonnes of carbon avoided as a result of an investee company’s products and services: 188.94 tonnes
- Amount of investment that financed sustainable projects and deprived or underprivileged communities: the amount of green finance (loans to renewable projects) was USD 22,046.80 and the amount of loans provided to low income population was USD 21,458.17
- Amount of R&D investment spent on promoting the development of new drugs and medical equipment: USD 2,755.38
- Total amount of water saved by water recycling: 14.44 tonnes

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2023, market capitalisation data as of 2023 December-end and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● **...and compared to previous periods?**

Sustainability indicators	31 December 2022 reference period (reported in 2023 periodic report)	31 December 2023 reference period (reported in 2024 periodic report)
Tonnes of carbon avoided as a result of an investee company's products and services	142.17 tonnes	188.94 tonnes
Amount of investment that financed sustainable projects and deprived or underprivileged communities	Green finance (loans to renewable projects) : USD 42,162.24  loans provided to low income population: USD 2,394.60	Green finance (loans to renewable projects) : USD 22,046.80  loans provided to low income population: USD 21,458.17
Amount of R&D investment spent on promoting the development of new drugs and medical equipment	USD 5,206.34	USD 2,755.38
Total amount of water saved by water recycling	13.95 tonnes	14.44 tonnes

The Sub-Fund reported higher tonnes of carbon avoided as a result of an investee company's products and services. Main contributor to this indicator was a renewable energy distributor who has expanded its storage facilities and power grid capacity. Smaller amount of green finance and larger amount of loans provided to low income population were due to the changes in the portfolio holdings.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager considered the following principal adverse impacts ("PAI") indicators, either directly or indirectly, throughout the investment process through certain product-, activity- or conduct-based exclusions, proprietary ESG scores, contribution assessment and proprietary total stakeholder impact assessment.

The exclusions include controversial weapons (#14 below), thermal coal (climate-related PAI indicators), and companies deemed to be in violation of the UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (#10 below) as further described under "What investment strategy does this financial product follow?".

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- 1) GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- 2) Carbon footprint
- 3) GHG intensity of investee companies
- 4) Exposure to companies active in the fossil fuel sector
- 5) Share of non-renewable energy consumption and production
- 6) Energy consumption intensity per high impact climate sector
- 7) Activities negatively affecting biodiversity-sensitive areas
- 8) Emissions to water
- 9) Hazardous waste and radioactive waste ratio
- 10) Violations of UNGC and OECD Guidelines
- 11) Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- 12) Unadjusted gender pay gap
- 13) Board gender diversity
- 14) Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Investment Manager has also taken into account other relevant PAI indicators depending on the business activities, behaviours of a company and the availability of data. Where there was no sufficient data to make credible assessment, the Investment Manager supplemented with its qualitative research and engagement. Engagement with companies takes place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	89.50	100.00	368.82	99.89
1.1.2	Scope 2 GHG emissions	68.91	100.00	87.06	99.89
1.1.3	Scope 3 GHG emissions	1,034.83	100.00	1778.24	99.87
1.1.4	Total GHG emissions	1,193.24	100.00	2234.27	99.86
1.2	Carbon Footprint	361.59	100.00	660.37	99.86
1.3	GHG intensity of investee company	649.39	100.00	1388.68	99.86
1.4	Exposure to companies active in the fossil fuel sector	9.06	97.27	11.44	99.03
1.5	Share of non-renewable energy consumption and production	86.40	72.03	84.94	62.68
1.6.1	NACE Code A (Agriculture, Forestry and Fishing)	N/A	0.00	0.98	0.03
1.6.2	NACE Code B (Mining and Quarrying)	N/A	0.00	2.44	4.52
1.6.3	NACE Code C (Manufacturing)	0.54	41.24	0.84	31.18
1.6.4	NACE Code D (Electricity, Gas, Steam and Air Conditioning Supply)	4.68	4.77	30.30	1.32
1.6.5	NACE Code E (Water Supply; Sewerage, Waste Management and Remediation Activities)	N/A	0.00	2.96	0.04
1.6.6	NACE Code F (Construction)	5.69	0.87	0.30	1.65
1.6.7	NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles)	N/A	0.00	0.25	6.54
1.6.8	NACE Code H (Transportation and Storage)	N/A	0.00	2.39	1.55
1.6.9	NACE Code L (Real Estate Activities)	0.19	1.71	0.16	1.78
1.7	Activities negatively affecting biodiversity-sensitive areas	0.00	97.27	0.19	99.85
1.8	Emissions to water	0.00	1.42	0.00	0.82
1.9	Hazardous waste and radioactive waste ratio	1.08	46.49	3.39	40.32
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	2.74	100.00

1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	59.56	97.27	63.39	99.05
1.12	Unadjusted gender pay gap	23.10	4.48	15.29	8.49
1.13	Board gender diversity	23.95	100.00	22.99	99.93
1.14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.45	100.00

\*Where there was no impact data and/or no data coverage for an indicator, the value is shown as "N/A" above. The PAI data above represents the average of four quarter-end impacts obtained from MSCI (the "Data Provider") at the time of this periodic report. The data coverage for #1.6.1 to #1.6.9 has been calculated by the Investment Manager based on the Data Provider's data.

- #1.4 (Exposure to companies active in the fossil fuel sector): The Sub-Fund reported 9.06% for this PAI which was lower than that of the MSCI All Countries Asia Pacific ex Japan Index (the "Index"). The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies heavily involved in the renewable energy transition.
- #1.5 (Share of non-renewable energy consumption and production): Based on the Data Provider's data, the Sub-Fund has reported a higher negative impact than that of the Index. Many emerging market companies have not currently disclosed the use of renewable energy. The Investment Manager will engage with those companies within the Sub-Fund on this topic.
- #1.6.6 (NACE Code F): Regarding NACE Code F (Construction), While the impact for the Sub-Fund underperformed at 5.69 GWh/million EUR of revenue in comparison to 0.30 of the Index, the data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The Sub-Fund holds a holding company that engage in various business activities based in Philippine. The Investment Manager believes that the company contributes to the Sub-Fund Impact Goal of Mitigate Climate Change through construction of renewable energy generation capacity.
- #1.6.9 (NACE Code L): Regarding NACE Code L (Real Estate Activities), While the impact for the Sub-Fund underperformed at 0.19 GWh/million EUR, the data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The Sub-Fund holds a property company in Australia. The Investment Manager believes that the company contributes to the Sub-Fund Impact Goal of Mitigate Climate Change through provision of energy-efficient buildings.
- #1.12 (Unadjusted gender pay gap): The Sub-Fund has reported 23.10% for this PAI and was higher than that of the Index. For this PAI, the data coverage is less than 10% for both the Sub-Fund and the Index and the data only represents only one holding of the Sub-Fund. The Investment Manager will keep engaging with issuers to encourage further improvement and monitor the data coverage.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAI of the Sub-Fund are compared against the PAI of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment

of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1<sup>st</sup> January 2023 to 31<sup>st</sup> December 2023.**

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MAN	Information Technology	9.03	Taiwan
TENCENT HOLDINGS LTD	Communication Services	7.00	China
HDFC BANK LTD	Financials	5.86	India
SK HYNIX INC	Information Technology	4.55	South Korea
SAMSUNG ELECTRONICS CO L	Information Technology	4.32	South Korea
SK INNOVATION CO. LTD	Energy	4.21	South Korea
LENOVO GROUP LTD	Information Technology	4.13	China
AIA GROUP LTD	Financials	3.48	Hong Kong
CASH	N/A	3.38	N/A
DBS GROUP HOLDINGS LTD	Financials	3.36	Singapore
DELTA ELECTRONICS INC	Information Technology	3.29	Taiwan
ENN ENERGY HOLDINGS LTD	Utilities	3.01	China
BYD CO LTD-H	Consumer Discretionary	2.98	China
CSL LTD	Health Care	2.96	Australia
SHINHAN FINANCIAL GROUP	Financials	2.67	South Korea

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The list of top investments is reflective of the general portfolio composition including assets classified as "#Not sustainable" (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Sustainable

The Investment Manager has invested 96.6% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#### #2 Not sustainable

The remaining 3.4% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

**Asset allocation** describes the share of investments in specific assets.

For the previous reference period ending 31 December 2022, the asset allocation was as below:

- #1 Sustainable: 96.1% (split as to Environmental: 90.0% and Social: 6.1%)
- #2 Not Sustainable: 3.9%

● **In which economic sectors were the investments made?**

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	7.00
Communication Services	Telecommunication Services	1.49
Consumer Discretionary	Automobiles & Components	4.71
Consumer Discretionary	Consumer Services	0.78
Consumer Discretionary	Consumer Durables & Apparel	0.75
Energy	Energy	4.23
Financials	Banks	17.33
Financials	Insurance	4.94
Financials	Financial Services	4.17
Health Care	Pharmaceuticals, Biotechnology	4.33
Industrials	Capital Goods	3.66
Information Technology	Technology Hardware & Equipment	15.92
Information Technology	Semiconductors & Semiconductor	15.42
Information Technology	Software & Services	1.96
Real Estate	Real Estate Management & Development	2.63
Real Estate	Equity Real Estate Investment	1.65
Utilities	Utilities	5.65

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:  
 In fossil gas     In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

	Taxonomy-aligned (No gas and nuclear)		Non Taxonomy-aligned	
	31 December 2022 reference period	31 December 2023 reference period	31 December 2022 reference period	31 December 2023 reference period
<b>Turnover</b>	0%	0%	100%	100%
<b>CapEx</b>	0%	0%	100%	100%
<b>OpEx</b>	0%	0%	100%	100%

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 91.5%.

The Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 5.1%.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such “#2 Not sustainable” investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

During the reference period, the Investment Manager conducted 10 engagements with investee companies on various issues such as carbon reduction strategies, management’s KPIs related to ESG, clean energy generation/usage strategies, water recycling technologies, and gender diversity of corporate board of directors/employees.

Within the above engagements, the Investment Manager engaged with a technology company to better understand and further encourage its strategies for achieving net-zero and promoting circular economy. The company pledged to achieve net-zero carbon

emissions by 2050 and announced its net-zero strategy under three major pillars of business operations, products & services, and supply chain. In business operations, the company has introduced reporting based on the Task Force on Climate-Related Financial Disclosures (TCFD) and the internal carbon pricing mechanism to monitor climate risks and opportunities. The company has a Science Based Targets initiative (SBTi) approved target which is aligned with the 1.5°C carbon reduction pathway and committed to achieve a 50% carbon reduction in operational emissions (Scope 1+2 GHG emissions) by 2030 compared to 2019. In products & services, the company incorporates the circular economy concept and considers the product life cycle in R&D and design to reduce the environmental impact and balance product management and environmental performance. In addition, since 2017, the company has been implementing actions targeting greener supply chain through supply chain audits.

### **Disclaimer**

## ANNEX

Product name: Nomura Funds Ireland – Corporate Hybrid Bond Fund  
 Legal entity identifier: 213800MJTEQ25TDKRG04

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund sought to contribute to reduction of greenhouse gas (GHG) emissions as its environmental characteristics by investing primarily in issuers that are committed to decarbonisation as well as exhibiting declining GHG emissions.

The extent of the Sub-Fund's contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

- GHG emissions:
  - Scope 1: 5,480.40 tonnes
  - Scope 2: 847.36 tonnes
  - Scope 3: 28,544.67 tonnes
  - Total (Scope 1+ 2+3): 34,872.44 tonnes
- Carbon footprint: The total GHG emissions (Scope 1+2+3) per EUR 1 million invested in the Sub-Fund was 1,078.78 tonnes.
- GHG intensity: The weighted average GHG intensity (Scope 1+2+3 GHG emissions per EUR 1 million revenue) was 1,375.89 tonnes.
- Proportion of the Sub-Fund that reduced GHG emissions on a year on year basis:
  - 32.1% has reduced total Scope 1+2+3 GHG emissions
  - 32.0% has reduced carbon footprint
  - 58.9% has reduced GHG intensity

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, GHG emissions, carbon footprint and GHG intensity data provided above have been calculated based on the impact data and estimates available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund and the quarter-end average net assets of the Sub-Fund since 9 August 2023 (the launch date of the Sub-Fund) to 31 December 2023. Sustainability indicators above do not take into account companies without relevant data or estimates.

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports and data and estimates provided by a third-party data provider, MSCI.

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions as further described in Annex 1 to the Sub-Fund’s Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGCP) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

For the following PAI indicators, the Sub-Fund monitors the indicators on an individual issuer-level and intends to engage with the issuers whose GHG emissions (as measured in GHG emissions, carbon footprint and GHG intensity) are not declining on a year on year basis and/or who the Investment Manager deems are failing to meet their decarbonisation plans based on the mid to long term trajectory. Due to the short period of time since the launch of the Sub-Fund, the number of engagements with portfolio companies undertaken by the Investment Manager during the reference period was limited to 3, as further described under “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”.

- GHG emissions of investee companies
- Carbon footprint
- GHG intensity of investee companies

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **9<sup>th</sup> August 2023 to 31<sup>st</sup> December 2023.**

Largest investments	Sector	% Assets	Country
AUSNET SERVI V/R 03/11/81	Utilities	6.98	Australia
BP CAPITAL MAR V/R /PERP	Energy	6.32	UK

TRANSCANADA TRUST V/R 03/15/77	Energy	2.99	Canada
BERTELSMANN V/R 04/23/75	Communications	2.95	Germany

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period (9 August 2023, the launch date of the Sub-Fund, to 31 December 2023). The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental characteristics during the reference period is provided below.

**Asset allocation** describes the share of investments in specific assets.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 61.7% of the Sub-Fund's assets in investments which are aligned with the environmental characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

Within the context of the binding criterion of iii) GHG emission profile and engagement, the proportion was calculated as the aggregate proportion of 1) issuers that reduced total Scope1+2+3 GHG emissions, carbon footprint and/or GHG intensity between 2021 and 2022, and 2) issuers whose increase in total Scope 1+2+3 GHG emissions, carbon footprint and/or GHG intensity between 2021 and 2022 was assessed as temporary and not affecting their mid to long term trajectory.

The Sub-Fund did not make any sustainable investments at this time on the basis that no sustainable investment framework has been adopted for this Sub-Fund and investments have not been screened against the sustainable investment criteria set down in SFDR.

### #2 Other

The remaining 38.3% of investments were cash held as ancillary liquidity (4.5%), forward currency contracts for hedging purposes (0.2%), and issuers who did not meet the criteria of 1) or 2) above under “#1 Aligned with E/S characteristics” and were yet to be engaged with by the Investment Manager due to the short period of time since the launch of the Sub-Fund (33.6%). At the time of this report, the Investment Manager has made some progress on its engagement activities with the companies that require engagement. Engagement progress and results will be periodically assessed and unsuccessful engagement may lead to divestment.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period (9 August 2023, the launch date of the Sub-Fund, to 31 December 2023) to calculate the allocations above.

### ● ***In which economic sectors were the investments made?***

Sector	Sub-Sector	% Assets
Communications	Telephone-Integrated	7.23
Communications	Cellular Telecom	5.60
Communications	Publishing-Periodicals	2.95
Consumer, Cyclical	Auto-Cars/Light Trucks	5.24
Consumer, Non-cyclical	Medical-Drugs	1.47
Consumer, Non-cyclical	Human Resources	0.82
Energy	Oil Comp-Integrated	16.02
Energy	Pipelines	6.26
Financial	REITS-Diversified	2.10
Financial	Real Estate Operating Companies /Development	1.50
Industrial	Building-Heavy Construct	1.88
Industrial	Transport-Rail	1.05
Utilities	Electric-Integrated	17.06
Utilities	Electric-Generation	9.55

Utilities	Electric-Distribution	6.98
Utilities	Electric-Transmission	3.82
Utilities	Gas-Distribution	2.75
Utilities	Water	2.37
Utilities	Gas-Transportation	0.62

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period (9 August 2023, the launch date of the Sub-Fund, to 31 December 2023). The denominator includes cash held as ancillary liquidity and derivatives used for hedging purposes.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported below and in the graphs set out in the following section are an incidental result of the investment strategy of the Sub-Fund and the environmental characteristics promoted by the Sub-Fund.

The extent to which sustainable investments with an environment objective were aligned with the EU Taxonomy were:

- 4.21% as measured in turnover
- 12.12% as measured in capital expenditure (CapEx)
- 7.75% as measured in operational expenditure (OpEx)

Following is the breakdown of the proportion of the investments per each of the environmental objectives under the EU Taxonomy reported by investee companies.

- a) climate change mitigation:
  - 4.17% as measured in turnover
  - 12.00% as measured in CapEx
  - 7.63% as measured in OpEx
- b) climate change adaptation:
  - 0.01% as measured in OpEx
- c) the sustainable use and protection of water and marine resources: data not available
- d) the transition to a circular economy: data not available
- e) pollution prevention and control: data not available
- f) the protection and restoration of biodiversity and ecosystems: data not available

The EU Taxonomy alignment data in this report was calculated based on the alignment ratios reported by investee companies which were obtained from a third-party data provider and does not include estimates provided by companies or third-party data providers. The compliance of the investments of the Sub-Fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

As the Sub-Fund did not hold any sovereign bonds for the reference period, the alignment ratios with the EU Taxonomy were identical between calculations including sovereign bonds and excluding sovereign bonds.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas  In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was as below.

Enabling activities:

- 1.22% as measured in turnover
- 3.81% as measured in CapEx
- 2.39% as measured in OpEx

Transitional activities:

- 0.00% as measured in turnover
- 0.14% as measured in CapEx
- 0.06% as measured in OpEx

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable. For the reference period, the Sub-Fund did not use the EU Taxonomy classification system in determining whether economic activities of investee companies have contributed to an environmental objective or not. Therefore, the EU Taxonomy alignment figures reported above are an incidental result of the investment strategy of the Sub-Fund and the environmental characteristics promoted by the Sub-Fund.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity, forward currency contracts for hedging purposes, and issuers who did not meet the criteria of 1) or 2) above under “#1 Aligned with E/S characteristics” and were yet to be engaged with by the Investment Manager due to the short period of time since the launch of the Sub-Fund. While the investments in cash and forward currency contracts did not follow any minimum environmental or social safeguards, the remaining proportion followed minimum environmental and social safeguards by complying with i) proprietary credit ESG scores and ii) exclusions described under “What investment strategy does this financial product follow?” in Annex 1 attached to the Sub-Fund’s Supplement.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Due to the short period of time since the launch of the Sub-Fund, the number of engagements with portfolio companies undertaken by the Investment Manager during the reference period was limited to 3. Engagements with portfolio companies have focused on environmental topics including carbon footprint, GHG intensity and sustainability strategies. The Investment Manager plans to conduct appropriate engagement with all of the relevant companies that require engagement within the next reporting period.

As at the time of this report, 46.6% of the Sub-Fund’s asset is invested in issuers with SBTi approved mid term targets based on a third-party data provider’s data. The Investment Manager intends to engage with portfolio companies on setting credible plans including SBTi targets where appropriate.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions by investing in issuers that exhibit low or declining GHG emissions characteristics.

The Sub-Fund sought to contribute to the environmental characteristics through investments in issuers that have lower GHG intensity and issuers who have shifted their business to more sustainable models such as taking measures including adopting more fuel efficient equipment and leveraging renewable energy.

The extent of the Sub-Fund's contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Sub-Fund’s sustainability indicators performed as below:

- GHG intensity: Scope 1 and 2 GHG intensity were 243.6 tonnes for the Sub-Fund and 280.7 for the ICE BofA US High Yield Constrained Index (the “Index”). 67.7% of the Sub-Fund’s assets had reported or estimated GHG intensity data to enable this calculation.
- Total GHG emissions for corporate issuers (scope 1 and 2): 2,453,502 tonnes

Please note that the sustainability indicator data generally becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the latest reported or estimated impact data available at the time of this periodic report, which is typically lagged by at least one full year (i.e. 2022). For the calculation of the above sustainability indicators, the Investment Manager has used the quarter-end average weights of holdings held in the Sub-Fund during the reference period (23 August 2023, the launch date of the Sub-Fund, to 31 December 2023).

Sustainability indicators above do not take into account companies without relevant reported or estimated data.

For the sustainability indicators above, the Investment Manager has used reported and estimated data provided by a third-party data provider, Sustainalytics.

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicator as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement (“Annex 1”). The Sub-Fund complied with the exclusion based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (revenue threshold 5%)

For the following PAI indicators, the Sub-Fund managed to limit its portfolio average adverse impact (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. The Investment Manager used reported and estimated data from a third party provider, Sustainalytics, to perform this analysis.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, and Scope 1&2 GHG emissions)

Please note that data from the third party provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **23<sup>rd</sup> August 2023 (the launch date of The Sub-Fund) to 31<sup>st</sup> December 2023.**

Largest investments	Sector	% Assets	Country
Cash	N/A	2.83	N/A

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period (23 August 2023, the launch date of the Sub-Fund, to 31 December 2023). The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental characteristics during the reference period is provided below.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 97.2% of the Sub-Fund's assets in investments which are aligned with the environmental characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria of i) proprietary ESG scoring and ii) exclusions, as set out under "What investment strategy does this financial product follow" in Annex 1. These criteria were used to attain the Sub-Fund's environmental characteristics as set out in Annex 1.

The binding criterion of iii) ESG constraint (where the Sub-Fund will constrain the weighted average GHG intensity of the corporate issuers held in the Sub-Fund to be below that of the Index), described under "What investment strategy does this financial product follow" in Annex 1, was also applied to the Sub-Fund's assets in respect of which reported or estimated GHG intensity data was available (which assets comprised 67.7% of the Sub-Fund's investments).

The Sub-Fund did not make any sustainable investments at this time.

**Asset allocation** describes the share of investments in specific assets.

## #2 Other

The remaining 2.8% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period (23 August 2023, the launch date of the Sub-Fund, to 31 December 2023) to calculate the allocations above.

## ● In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Automotive	Auto Loans	1.55

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period (23 August 2023, the launch date of the Sub-Fund, to 31 December 2023). The denominator includes cash held as ancillary liquidity.

### **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
- In fossil gas  In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Manager conducts deep dive engagements to address particular sustainability-related issues. For example, initiatives and timelines for climate change mitigation plans were discussed to ascertain how committed companies were to their GHG emission reduction goals and their ability to achieve those goals. The Investment Manager engaged with 23 U.S. high-yield bond issuers, which include potential investee companies that are not held within the Sub-Fund, in 2023.

For example, the Investment Manager conducted an engagement with a company that offers, designs and builds single and multi-family houses, apartments and condominiums in the U.S. The Investment Manager believes that the company contributes to reduction of GHG emissions through its construction services and has engaged with the company to validate its Net Zero Energy Ready commitment. The Investment Manager considered that one of the goals within the commitment was ambitious, which was to have a Home Energy Rating System (“HERS”) Index Score for all new houses provided by the company to be 45 or less by the end of 2025. The Investment Manager’s engagement with the company has found that the average HERS Index Score for all houses built by the company in 2022 was 54 with the highest and lowest being around 60 and 30. In December 2020, the company became the first national homebuilder to publicly commit to ensuring that every house built by the company will meet the requirements of the Net Zero Energy Ready Home program set by the US Department of Energy. The “Net Zero Energy Ready” commitment means that every houseowner of the company’s houses will be able to achieve “net zero energy” by attaching an appropriate renewable energy system, such as a solar photovoltaic system, that will generate as much energy as the house consumes. The company’s management explained that all divisions have houses under construction that will be net zero energy ready. The company explained that the full development of a typical new construction site takes about three years with 25-30% progress per year. Since every site started now is for net zero energy ready houses, the percentages of those houses within the company will start increasing rapidly.

The Investment Manager assigned the company an ESG rating of 3 (on its 1-8 scale with 1 being the best) and the rating may be upgraded if the company stays on track to achieve its Net Zero Energy Ready and HERS goals for 2025.

One of the holdings the Sub-Fund invested in was a passenger airline that entered into a joint venture (JV) to collaborate on a project to commercialize sustainable aviation fuel

(SAF). The JV partners plan to develop and commercialize a novel SAF technology that uses ethanol as feedstock. If successful, the JV will begin construction of a pilot facility in 2024 and a full-scale facility with commercial operations by 2028. Once operational, the entity has the potential to provide up to 135mm gallons of fuel annually.

## ANNEX

Product name: Nomura Funds Ireland – Emerging Market Corporate Bond Fund  
 Legal entity identifier: 213800S8S3LY5PVCL933

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions as its environmental characteristics by investing in issuers that exhibit low or declining GHG emissions.

The Sub-Fund sought to contribute to the environmental characteristics through investments in issuers that have lower GHG intensity and issuers who have shifted their business to more sustainable models such as taking measures including adopting more fuel efficient equipment and leveraging renewable energy.

The extent of the Sub-Fund's contribution is further described in the section "How did the sustainability indicators perform?" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Sub-Fund’s sustainability indicators performed as below:

- GHG intensity (scope 1 and 2): 537 tonnes for the Sub-Fund and 581 tonnes for the J.P. Morgan CEMBI Broad Diversified Index (the “Index”). 86.3% of the Sub-Fund’s assets had reported or estimated GHG intensity data to enable this calculation.
- Total GHG emissions (scope 1 and 2): 9,494,161 tonnes

Please note that the sustainability indicator data generally becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the latest reported or estimated impact data available at the time of this periodic report, which is typically lagged by at least one full year. For the calculation of the above sustainability indicators, the Investment Manager has used the quarter-end average weights of holdings held in the Sub-Fund during the reference period (12 September 2023, the launch date of the Sub-Fund, to 31 December 2023).

In-scope securities for the above sustainability indicators are securities with direct exposure to issuers and do not include financial derivative instruments, on the basis that financial derivative instruments were used for hedging or efficient portfolio management purposes and were not used to attain the environmental characteristics promoted by the Sub-Fund. Sustainability indicators above do not take into account companies without relevant reported or estimated data.

For the sustainability indicators above, the Investment Manager has used reported and estimated data provided by a third-party data provider, Sustainalytics.

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impact (PAI) indicator as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund’s Supplement (“Annex 1”). The Sub-Fund complied with the exclusion based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (revenue threshold 5%)

For the following PAI indicators, the Sub-Fund managed to limit its portfolio average adverse impact (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. The Investment Manager used reported and estimated data from a third party provider, Sustainalytics, to perform this analysis.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, and Scope 1&2 GHG emissions)

Please note that data from the third party provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAI of a security or issuer in the Sub-Fund.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **12<sup>th</sup> September 2023 (the launch date of The Sub-Fund) to 31<sup>st</sup> December 2023.**

\*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period (12 September 2023, the launch date of the Sub-Fund, to 31 December 2023). The list of top investments is reflective of the general portfolio composition including assets which are not aligned with the environmental characteristics promoted by the Sub-Fund (i.e. all investments of the Sub-Fund).

## What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental characteristics during the reference period is provided below.

**Asset allocation** describes the share of investments in specific assets.

### ● **What was the asset allocation?**

#### #1 Aligned with E/S characteristics

The Sub-Fund invested 93.9% of the Sub-Fund's assets in investments which are aligned with the environmental characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria of i) proprietary ESG scoring and ii) exclusions, as set out under "What investment strategy does this financial product follow" in Annex 1. These criteria were used to attain the Sub-Fund's environmental characteristics as set out in Annex 1.

The binding criterion of iii) ESG constraint (where the Sub-Fund will constrain the weighted average GHG intensity of the Sub-Fund to be below that of the Index), described under "What investment strategy does this financial product follow" in Annex 1, was also applied to the Sub-Fund's assets in respect of which reported or estimated GHG intensity data was available (which assets comprised 86.3% of the Sub-Fund's investments).

The Sub-Fund did not make any sustainable investments at this time.

## #2 Other

The remaining 6.1% of investments were cash held as ancillary liquidity and financial derivative instruments used for efficient portfolio management and hedging purposes, and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period (12 September 2023, the launch date of the Sub-Fund, to 31 December 2023) to calculate the allocations above.

## ● *In which economic sectors were the investments made?*

\*The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period (12 September 2023, the launch date of the Sub-Fund, to 31 December 2023). The denominator includes cash held as ancillary liquidity and derivatives used for efficient portfolio management and hedging purposes.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0% respectively.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Other” investments made by the Sub-Fund were cash held as ancillary liquidity, and financial derivative instruments used for efficient portfolio management and hedging purposes, and they did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

As of the end of the reference period, the Investment Manager has not conducted engagement activities on companies that are held within the Sub-Fund due to the short period of time since the launch of the Sub-Fund. However, the Investment Manager plans to conduct deep dive engagements to address certain sustainability-related issues. For example, initiatives and timelines for climate change mitigation plans are discussed to ascertain how committed companies are to their GHG emission reduction goals and their ability to achieve those goals.

One of the holdings the Sub-Fund invested in was a renewable energy generator operating in five Central American countries. Of the company’s 763 megawatts of installed capacity, 42% is hydro, 42% is wind and 16% is solar energy. The company continues to grow with an expectation of adding an additional 330MW by 2030, mainly in wind and solar energy. The specific issue held by the Sub-Fund is a green bond where the proceeds can only be used to fund green energy production projects.
