Directors' Report

Report of the Directors

The Directors present herewith their report and unaudited financial statements for UBS (Irl) Investor Selection PLC (the "Company") for the period ended 31 March 2023.

Principal Activities

The Company is an open-ended investment company with segregated liability between its sub-funds and variable capital organised under the laws of Ireland.

The Directors have directed the affairs of the Company in accordance with the Companies Act 2014 (the "Act").

The Company comprises the following sub-funds:

UBS (Irl) Investor Selection - Currency Allocation Return Strategy

The investment objective of the sub-fund is to seek to achieve a return in excess of the reference index. The reference index is the sterling component of the Citigroup World Money Market Index Series - GBP 1 Month Euro Deposit.

UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund

The investment objective of the sub-fund is to seek to achieve risk-adjusted capital appreciation over a three year timeframe.

UBS (Irl) Investor Selection - Global Equity Long Short Fund

The investment objective of the sub-fund is to seek to deliver a positive return, over a three year timeframe, by exploiting mispriced stocks in equity markets around the world, including emerging markets. This sub-fund aims to demonstrate low correlation with, and less volatility than, equity markets.

UBS Global Emerging Markets Opportunity Fund

The investment objective of the sub-fund is to seek to achieve capital appreciation on a risk adjusted basis over the medium to long term.

UBS (Irl) Investor Selection PLC - O'Connor China Long/Short Alpha Strategies UCITS

The investment objective of the sub-fund is to seek to achieve capital growth by investing in an equity portfolio focused on the alpha opportunities in the Chinese equity markets.

UBS Global Emerging Markets Opportunity Reduced Carbon Fund

The investment objective of the sub-fund is to seek to achieve capital appreciation on a risk adjusted basis over the medium to long term.

There can be no guarantee that the sub-funds will be able to achieve their investment objectives or be profitable.

Business Review, Results, Activities and Future Developments

The results of operations are set out on page 9. A review of activities is contained in the Investment Manager's Reports for each sub-fund of the Company. Key Performance Indicators ("KPIs") monitored by the Directors are included in the Investment Manager's Reports for each of the sub-funds.

Structure

The Company is structured as an umbrella fund consisting of different sub-funds each comprising one or more share classes. Shares issued in each sub-fund will rank pari passu with each other in all respects except to the extent that they may differ in respect of certain matters including currency of denomination, hedging strategies, if any, applied to the currency of a particular class, dividend policy, voting rights, modifications on return of capital, the level of fees and expenses to be charged or the minimum subscription and minimum holding, if applicable. The assets of each sub-fund will be invested separately on behalf of each sub-fund in accordance with the investment objective and policies of each sub-fund. A separate portfolio of assets is not maintained for each class of share within a sub-fund.

Structure (continued)

As at 31 March 2023, the Company has established the sub-funds and classes which are set out in the supplements and the prospectus. Additional sub-funds in respect of which a supplement or supplements will be issued may be established by the Directors with the prior approval of the Central Bank (the "Central Bank"). Additional classes in respect of which a supplement or supplements will be issued may be established by the Directors upon notification to, and clearance in advance by the Central Bank.

Directors and Company Secretary

Claire Cawley* Naomi Daly* (*Chairperson*) Thomas Stokes Ian Fitzpatrick

* Non-executive Director independent of the Investment Manager. All Directors are non-executive.

Company Secretary details are disclosed on page 2.

In accordance with the Articles of Association, the Directors are not required to retire by rotation.

Directors' and Secretary's Interests

The Directors and Company Secretary who held office at 31 March 2023 had no interests in the shares or debentures of the Company during the year (2022: no interests in the Company).

Political Donations

The Company made no political donations during the financial period ended 31 March 2023 (2022: Nil).

Dividend Policy

The Directors will have absolute discretion as to the payment of dividends. No dividends were paid or payable for the periods ended 31 March 2023 and 31 March 2022.

Concentration of Investments

A sub-fund may at any one time be invested in a single industry or country and few issuers provided that such concentration complies with the UCITS Regulations. To the extent that a sub-fund's investments are concentrated in these ways, the overall adverse impact on a sub-fund could be considerably greater than if a sub-fund's investments were not concentrated to such an extent.

Accounting Records

The measures taken by the Directors to ensure compliance with the requirements of Section 281 to 285 of the Act, regarding adequate accounting records are through the appointment of the administrator, the implementation of necessary policies and procedures for recording transactions, the employment of appropriately qualified accounting personnel and the provision of adequate resources, including appropriate computerised accounting systems, to the financial function.

The accounting records of the Company are maintained at Second Floor, 5 Earlsfort Terrace, Dublin 2, D02 CK83, Ireland.

Risk Management

The role of the Board of Directors is to identify, monitor and manage risk on behalf of the Company. The Company has adopted procedures to ensure that material risks relating to the Company and its sub-funds have been identified and are managed.

The Directors of the Company have agreed that this process is suitable for adoption as the risk management process of the Company. UBS Fund Management (Ireland) Limited (the "Manager") is the Manager and is responsible for the risk management process.

The Directors of the Company have appointed the depositary who provides the safe keeping of all the assets of the Company and is subject to regulations of the Central Bank.

Going Concern

After making enquiries and considering relevant financial and other factors, the Directors have a reasonable expectation that the Company and its sub-funds have adequate resources to continue in operational existence for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast doubt upon the Company's and the sub-fund's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on a going concern basis.

Risk and Uncertainties

The Company is exposed to principal risks including market, credit and liquidity risk. The manner in which these risks have been dealt with is disclosed in Note 9 of the financial statements.

The war in Ukraine had and still has a material impact on financial markets, first and foremost on Russian and Ukrainian securities but also on the wider markets globally. The situation remains very volatile and is closely monitored by the Management of the Fund in order to quickly take appropriate action to protect the investor interest. The necessary measures were put in place to at all times comply with applicable laws and regulations, in particular but not limited to the most recently enacted sanction regimes in the EU, Switzerland, UK, US and United Nations (UN). As serious trading limitations beyond sanctioned Russian securities have been experienced, fair value pricing is applied for all relevant securities where price quotes (if available) are not considered reflective of their current market value. The sub-fund UBS Global Emerging Markets Opportunity Fund was impacted by the fair value decision taken. Also, further to the assessment made by the Management of the Company, neither the Company's and any of its sub-funds' going concern nor operations, at the date of this report, have been significantly impacted by the above.

Corporate Governance Code

The Board of Directors voluntarily adopted the Corporate Governance Code (the "IF Code") for Irish Domiciled Collective Investment Schemes as published by Irish Funds ("IF"), as the Company's corporate governance code. The Board of Directors has assessed the measures included in the IF Code as being consistent with its corporate governance practices and processes for the financial year.

General Principles

The Company is subject to comply with the requirements of the Act, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) (the "UCITS Regulations") and the Central Bank UCITS Regulations 2019 (the "Central Bank UCITS Regulations"), and with effect from 1 November 2015, the Central Bank (Supervision and Enforcement) Act 2013 as applicable. The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report.

The Company is also subject to corporate governance practices imposed by:

- 1. The Act, which is available for inspection at the registered office of the Company; and may also be obtained at: http://www.irishstatutebook.ie/home.html;
- 2. The Articles of Association of the Company which are available for inspection at the registered office of the Company at Second Floor, 5 Earlsfort Terrace, Dublin 2, D02 CK83, Ireland and at the Companies Registration Office in Ireland; and
- The Central Bank in their UCITS Regulations which can be obtained from the Central Bank's website at: http://www.centralbank.ic/regulation/industrysectors/funds/Pages/default.aspx
 and are available for inspection at the registered office of the Company.

Internal Control and Risk Management Systems in Relation to Financial Reporting

The Directors are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable, and not absolute, assurance against material misstatement or loss. The Directors have procedures in place to ensure that all relevant accounting records are properly maintained and are readily available including production of annual and half yearly financial statements.

Internal Control and Risk Management Systems in Relation to Financial Reporting (continued)

The Directors have appointed the Administrator to maintain the books and records of the Company. The Administrator is authorised and regulated by the Central Bank and must comply with the rules imposed by the Central Bank. From time to time, the Directors examine and evaluate the Administrator's financial accounting and reporting routines. The annual financial statements of the Company are produced by the Administrator and reviewed by the Investment Manager. They are required to be approved by the Directors and the annual and half yearly financial statements of the Company are required to be filed with the Central Bank. During the period of these financial statements, the Directors were responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditors who report annually to the Directors on their findings.

The Directors monitor and evaluate the independent auditor's performance, qualifications, and independence. As part of its review procedures, the Directors receive presentations from relevant parties including consideration of applicable accounting standards and their impact on the annual financial statements, and presentations and reports on the audit process. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

Derivative Instruments and Effective Portfolio Management Techniques

The Investment Manager's Reports contained in the Semi-Annual Report provide a general description of the use of derivative financial instruments and effective portfolio management techniques during the reporting period and the resulting amount of commitments. The notes to the financial statements also detail the purposes behind the use of various instruments together with the attendant risks.

The Value-at-Risk (the "VaR") tables report the exposure obtained through effective portfolio management techniques and derivative financial instruments.

The identity of the counterparties relating to these effective portfolio management techniques and derivative financial instruments, the type and amount of collateral received by the Company to reduce counterparty exposure are noted in the market risk tables for each sub-fund (Note 9 to the financial statements).

Income and expenditure related to all effective portfolio management techniques and derivative financial instruments are reflected in the Statement of Comprehensive Income of each sub-fund.

Restrictions on Transactions with Connected Persons

The Central Bank UCITS Regulations, paragraph 43(1) – 'Dealings by promoter, manager, trustee, investment adviser and group companies' states in paragraph one that any transaction carried out with a UCITS by a promoter, manager, trustee, investment adviser and/or associated or group companies of these ("connected parties") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the unit-holders of the UCITS.

The Board of Directors is satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in paragraph 43(1) are applied to all transactions with connected parties; and the Board is satisfied that transactions with connected parties entered into during the period complied with the obligations set out in this paragraph.

Significant Events during the Reporting Period

On 30 November 2022, UBS Fund Management (Ireland) Limited was appointed as manager of the Company replacing UBS Fund Management (Luxembourg) S.A.

On 11 October 2022, a new sub-fund UBS Global Emerging Markets Opportunity Reduced Carbon Fund launched.

There were no other events during the period that require adjustment to or disclosure in the financial statements.

Events After the Reporting Period

There were no other events after the reporting period that require adjustment to or disclosure in the financial statements.

Directors' Compliance Statement

The Directors, in accordance with Section 225(2) of the Companies Act 2014, acknowledge that they are responsible for securing the Company's compliance with certain obligations specified in that section arising from the Companies Act 2014 and Tax laws ("relevant obligations"). The Directors confirm that:

- A Compliance Policy Statement has been drawn up by the Directors which sets out the Company's policies for compliance with its relevant obligations under the Irish Companies Act;
- Appropriate procedures have been put in place, which have been designed to secure material compliance with the Company's relevant obligations; and
- A review process has been put in place, the purpose of which to ensure that the aforementioned assurance measures regarding the Company's Compliance Policies are appropriate and operating effectively during each financial period.

Statement of Relevant Audit Information

- So far as each Director is aware, there is no relevant audit information of which the Company's statutory auditors are unaware; and
- Each Director has taken all steps (being that he/she has made such inquiries of his fellow Directors and of the Company's statutory auditors) that he/she ought to have taken as a Director in order to make himself/herself aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.
- Section 167 (2) of the Companies Act 2014 requires the board of directors of a large company to establish an audit committee. The Directors have decided not to form an audit committee as the Board is formed of three non-executive Directors with two independent non-executive Directors and the Company complies with the provisions of the Corporate Governance Code. The Company did not establish an audit committee due to the size, nature and complexity of the Company and the Directors do not believe it is required.

Statement of Establishment or otherwise of an Audit Committee

The Directors have decided not to establish an audit committee pursuant to section 167(2) of the Act based on (a) the nature, scale and complexity of the Company's business and the range of services and activities undertaken in the course of that business; (b) the resources available to the Company and the resources and expertise of the various third parties engaged to support the Company and carry out certain functions on its behalf; and (c) the procedures in place for the review, approval and circulation of the unaudited financial accounts and statements which are appropriate for an investment company pursuant to the UCITS Regulations.

Independent Auditor

Ernst & Young have expressed their willingness to act as Auditor for the Company in accordance with Section 383 (2) of the Act.

UBS (Irl) Investor Selection- Currency Allocation Return Strategy

Investment Manager's Report - Unaudited

1st October 2022 to 31st March 2023

Market environment

The reporting period saw a much-improved environment for traditional asset classes as resilience in global growth and signs that the Federal Reserve ("Fed") was nearing the end of its hiking cycle supported bonds and equities. Early in the period, sentiment improved on hopes of a dovish shift in monetary policy as headline inflation figures showed signs of moving lower, however strength in the labour market remained a concern heading into Q1 2023. Global recession fears receded, as both Europe and the UK benefited from lessened energy pressures, while further afield, China announced plans to move away from its activitydampening COVID-zero policies. As a result, global composite PMI figures improved from Q4 2022 lows and moved into expansionary territory in the first three months of 2023. Despite optimism over the growth backdrop, stress in the US regional banking sector highlighted some potential cracks appearing after the sharp central banking tightening cycle seen in 2022. As a result of the banking concerns on both sides of the Atlantic, bank shares were the main in the first quarter of 2023, while government bond yields turned lower as investors appeared to assume that economic headwinds from the banking system would lead to an early end to central bank rate hikes. Within currency markets, the US dollar (USD) continued its downtrend through the first quarter, although February saw a brief recovery, while investors appeared to favour the euro (EUR) over the first quarter on the back of an improved economic environment as recession concerns eased. In the UK, economic data showed that the economy avoided a technical recession in in Q4 2022, however the high inflation environment continued with headline CPI above 10% through the quarter - raising the likelihood that the Bank of England (BoE) would remain on its tightening path. The higher inflation path and more stable fiscal environment aided sterling (GBP), which rallied over the quarter. Elsewhere, volatility was also seen in Latin American currencies over the period, although tight monetary policy and easing fiscal concerns were a tailwind in March 2023.

Performance

The Fund delivered a positive return of +1.75% over the six-month period to end March 2023.

The largest positive contributor to performance was short positioning in the USD, which trended lower through the period as markets started to price in the end of the Federal Reserve hiking cycle. Short Canadian dollar (CAD) exposure was an additional value adding position as the Bank of Canada paused is hiking cycle in March. Short Chinese renminbi (CNH) exposure also contributed positively.

On the downside, long positioning in the Norwegian krone (NOK) was the main detractor over the quarter as Norges Bank hawkishness proved insufficient to support the currency. Long Japanese yen (JPY) positioning was a further headwind as the Bank of Japan maintained policy unchanged through the first quarter of 2023, while long Colombian peso (COP) exposure also contributed negatively.

Outlook

We remain more optimistic on the global economy than consensus. 2022's headwinds have turned into tailwinds for 2023. Global activity has been accelerating. China is leading the way with its reopening, the end of the tech regulatory campaign, and much more support for the property sector. Europe is rebounding after getting through the winter in a much better position than feared. And the US labour market continues to hold up, with lower gasoline prices providing some support for real consumer spending. While the tightening lending standards from recent bank stress will weigh on growth, we think the strong backdrop for the economy and recent easing of financial conditions will cushion economic activity. In our view, the resilient economy is not a good-news story for all asset classes, so we think volatility should persist across asset classes. We are more optimistic on the economy than we are on stocks at the index level. A solid economy and tight labour market means that inflation will be sticky. This may leave Federal Reserve on track to keep interest rates higher for as long as is necessary to bring about more cooling in wage growth.

Going into Q2 2023, we continue to appraise the opportunity set with a focus on valuation, however we remain cognisant of the recent uncertainty which has been influencing FX markets. After some slowdown in recent US CPI data, we are seeing the market attempting to price an end of the Fed hiking cycle and even price in some cuts earlier than the Fed has signalled. Following weaker US data in March and the regional banking crisis which is likely to tighten credit standards in the US, this leaves the US more vulnerable and gives us more confidence, particularly in light of a Fed which is indicating that it is almost at terminal rate, that the USD has peaked. We remain constructive on Japanese yen (JPY) - this long 'safe haven' exposure is largely offset by short USD exposure. Over the medium term, the valuation signal remains extremely strong, while the utility afforded by holding JPY remains attractive, particularly given downdrafts to global growth expectations and any 'bringing forward' of recessionary concerns. In Europe, the ECB's hawkish policy stance, scheduled removal of excess liquidity, and commitment to price stability does create a longer-term support for the EUR at a time when European activity is not as bad as expected. China's emergence from zero-COVID policy may lead to a pick-up in trade and broader economic activity across the bloc as well. While we have trimmed our overall EUR exposure in recent times, we continue to prefer expressing our European exposure via Norwegian krone (NOK) where the valuation case has become more attractive. Elsewhere We remain constructive on Latin American currencies, having rebalanced towards those where we see the greatest prospective upside. Generally, we are seeing monetary policymakers across the block signal the potential for future rate hikes to combat inflationary pressures, and this may support regional currencies as should the Fed pause its hiking cycle in the coming months.

Investment Manager's Report - Unaudited

1st October 2022 to 31st March 2023

Market environment

The period between 1 October 2022 to 31 March 2023 started with global equities recorded strong gains in Q4 2022, following three quarters of consecutive declines. Equities made a promising start to the quarter in October and November, supported by hopes that inflation may be peaking in Europe and the US. Negative performance in December reflected some market disappointment at major central banks reiterating plans to tighten monetary policy, even as inflation showed signs of peaking. Following a tough 2022, global equity markets had a strong first quarter of 2023, with Chinese equities performing especially well as the economy reopened, while better-than-expected Eurozone economic data also helped the region's equity market to advance. In the US, equities rallied on the back of a combination of falling inflation and hopes that the Fed is nearing the end of its rate-hike cycle. After an upbeat start to the year, markets turned pessimistic again in February, with the main concern that stubbornly high US inflation and robust jobs data would force the Federal Reserve to raise rates higher than expected and keep monetary policy restrictive for longer. Towards the end of the quarter, worries over the health of the banking system on both sides of the Atlantic were the main preoccupation for investors as market sentiment was undermined by the collapse of two mid-sized lenders in the US - Silicon Valley Bank and Signature Bank - forcing US regulators to take urgent action to shore up confidence.

Performance

The Equity Opportunity Long Short fund posted an absolute return of -2.3% (Q-PF share class, net of fee in EUR) from 1 October 2022 to 31 March 2023. The fund posted a negative absolute return over the period. Our more defensive positioning and lower beta of the strategy lagged the extremely sharp move up during January. Over the period, the largest detractor was negative stock selection in industrials. At the stock level, our short position in a European energy firm was the largest detractor. Elsewhere, our holdings in communication services, consumer discretionary and real estate also weighed on performance. Some of the negative contribution was offset by positive stock selection in energy, consumer staples and utilities. At the stock level, our short position in a US media and entertainment firm was the top performer.

Outlook

2022 proved very challenging for active managers in general as inflation and consequently Fed policy became the dominant force in the market. However it is unlikely that 2023 will follow the same pattern as bond yields are now at a much higher level and equity valuations are much lower therefore their interest rate sensitivity going forward is significantly reduced. In addition to this, inflation has already peaked globally, creating space for price weakness especially in goods where inventories are starting to fill fast. Further, house prices are starting to decline in many economies due to the tight monetary conditions, including the US, where the cost of a new 30-year fixed rate mortgage hit 7%, the highest since 2002. We therefore expect the Fed to pause soon and observe the effects in the real economy of this extraordinarily sharp rise in interest rates

Forward looking indicators such as the Purchasing Managers' Index (PMI) and the shape of the yield curve suggest that current rates are already causing significant headwinds. We remain conservatively positioned, following our single stock analysis that shows weak risk versus reward in cyclical sectors. Leading indicators have worsened, and we still expect a further economic slowdown, which is not reflected in the prices of those stocks. We see risks particularly with elevated profit margins and remain selective in our bottom-up stock selection process, maintaining our preference for companies with strong and stable free cash flow generation abilities.

Investment Manager's Report - Unaudited

1st October 2022 to 31st March 2023

Market environment

Global equities closed the period from 01 October 2022 to 31 March 2023 with a positive return. During Q4 2022 investors saw a global equity market rally that started in October which was fueled by signs of peaking inflation and hopes that soft landing would be possible in the US. After short-term weakness during December 2022, global equities had a strong start to 2023. Despite increased uncertainty triggered by the regional banking sector in the US, global equities also closed Q1 23 higher, pointing to confidence that regulators had acted with sufficient speed and force to avert a full-blown banking crisis. Between October 1st 2022 and March 31st 2023, global stocks (MSCI World index) delivered a total return of 15.7%.

Performance

The Global Equity Long Short fund was up +1.4% (I-B share class, net of fee in EUR) over the period. Our long sleeves in Information Technology and long and short books in Consumer Discretionary contributed most positively. Conversely, our longs in Energy as well as long and short books in Health Care added negatively. More generally speaking, growth outperformed value during the relevant period. Further, improving risk sentiment as well as the hope for a slower pace in monetary tightening were supportive for sectors like Information Technology and Communication Services.

Outlook

We continue to see an environment of unusually elevated market and macroeconomic volatility as worries over the health of the banking system on both sides of the Atlantic were the main preoccupation for investors in March. Additionally, markets still grapple with inflationary pressure which remains elevated and a higher interest rate backdrop, which is stoking recession fears globally. Against this market backdrop, we continue to search for fundamentally mispriced securities, and remain ready to take advantage of any opportunities presented by price/value dislocations caused by short term sentiment. We believe the fund is well positioned to face any market environment, as risk remains dominated by many diversified, idiosyncratic, stock-specific sources, driven by our fundamental analysts.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

UBS (Irl) Investor Selection – Global Equity Long Short Fund

Semi-Annual Report as of 31 March 2023

Investment Manager's Report - Unaudited

1st October 2022 to 31st March 2023

Market environment

Emerging markets (MSCI EM) equities returned (~14%) in USD terms over the 6 month-period ending March 31, 2023. Markets were supported by China's opening up following a difficult year with many local Covid related lockdowns.

Performance

The strategy underperformed its benchmark, the MSCI Emerging Marketing Index (r), over the 6 month period ending March 31, 2023. Our holdings in MercadoLibre (Uruguay, Consumer Discretionary), Naspers (South Africa, Communication Services) and Mediatek (Taiwan, IT) contributed positively to performance. MercadoLibre outperformed on the back of better than expected results, especially with respect to margin improvement. Naspers' outperformance was driven by good performance of Tencent. Mediatek outperformed despite lacklustre results, as it is trading at attractive valuations and investors expect the industry to be nearing the bottom of one of its worst downcycles. In contrast, our holdings in Eicher Motors (India, Consumer Discretionary), Banco Bradesco (Brazil, Financials). Eicher Motors fell amid the rotation from outperformers to underperformers. However its fundamentals remain strong. Banco Bradesco underperformed following Americanas' application for the equivalent of chapter 11 in Brazil. However, we believe the impact is manageable and the long-term outlook is still intact.

Outlook

Investors are mulling over a potential financial crisis, sparked by concerns in the US and EU/UK commercial real estate markets. Our team's view is that, while the indirect impact from contagion fear and general heightened risk aversion could keep markets volatile in the short run, our portfolio's direct exposure to the banking sector remains fundamentally robust with strong balance sheets and high liquidity and capital ratios. In the event of a global recession, Asia could arguably outperform. India and Indonesia are increasingly being supported by domestic demand. While trade-oriented economies like Singapore, Malaysia and Vietnam may be negatively impacted through exports and manufacturing, certain segments may still benefit from the outsourcing trend. China's recovery could lend a helping hand to the region, with China being ASEAN's major trading partner accounting for about 20% of ASEAN's total trade value. In addition, inflation has been moderating in Asia, thus allowing most Asian central banks to pause rate hikes soon.

China's ongoing recovery continues to show up in activity data such as subway traffic, flight data, hotel occupancy rates, etc albeit more gradually than initially anticipated when China abruptly exited from its zero-covid policy. Given there has been no major consumption stimulus, unlike in some developed market economies, we expect the recovery to continue at a measured pace and inflation to remain manageable. Overall there is significant improvement in sentiment for Chinese equities in the short term. In the longer term, we bear in mind certain risks including geopolitics and investor worries that the new top leadership's objectives may imply more redistributive policies, curtailment of free private enterprise, and thus weigh on longer term economic growth. We believe it is too early to draw definitive conclusions and, now that the top leadership team for President Xi's third term is in place, we will monitor the Chinese government's actions, as well as its stance towards the private sector and entrepreneurs. At the Boao Forum last month, Premier Li Qiang committed to "adhering to reform and opening up no matter how the world changes". Investors took heart at Alibaba's restructuring plan.

Tech-heavy markets Taiwan and Korea are outperforming the region year-to-date, though the economically sensitive tech sector continues to be under pressure from concerns about a global slowdown. Our research trip to Taiwan in March showed signs of cyclical bottoming in certain segments. We think the industry cycle may bottom out in the next few months, as we have seen an industry glut, order cuts and destocking. However end demand would ultimately be subject to the global economic cycle. The industry dynamics for semiconductors remains structurally positive, and has even improved during this period of depressed sentiments. Many companies are likely to see their profitability improve compared to pre-covid years. We believe we need to ride through the economic downcycle for the sector, hence we remain overweight.

In ASEAN, Vietnam, Thailand and Singapore are likely most leveraged to a recovery in Chinese tourism. Asia is also expected to benefit from the outsourcing story brought about by the China-plus-one and to an extent, also as European industry and manufacturing get impacted by energy shortages. Indonesia benefitted from higher energy and commodity prices, and has also put in place reforms to position it to benefit from supply chain diversification. There have also been initiatives to build out the EV supply chain given Indonesia's nickel ore supply. Financial health of corporates and households remains robust which should support domestic demand recovery.

Investment Manager's Report - Unaudited (continued)

1st October 2022 to 31st March 2023

Outlook (continued)

The Indian market had been quite resilient most of last year but has faltered in the last few months, as valuations started to look relatively more expensive despite fundamentals still being strong. During our research trip to India last month, we found the "Made in India" theme to be progressing well, with FDI flowing into the country. However the supply chain still needs to be built out.

Outside of Asia, the economies Eastern Europe are doing better than expected despite the circumstances, not last due to help from increasing funds from the EU, worth up to 3% of GDP in the coming years. The Middle East should be benefiting from structural reforms. However, given the valuation, active stock selection continues to be the key in this region. With respect to Latam, uncertainty around Brazil has increased since the election of Lula. On the one hand, Brazil was very quick to tighten the monetary policy, so as a result the inflation has been already falling during 2022. Brazil might be among the first countries to cut rates in 2023 – this could help to maintain the economic momentum during 2023. On the other hand, there has been mixed signal from the new president in terms of fiscal discipline and degree of state intervention into the markets. Rates might stay higher for longer and both FX and growth might become weaker than expected. Hence, we continue to monitor the risk coming from the latest election. It still remains to be seen as to how much check and balance the conservative congress and senate can exercise on the executive branch.

Investment Manager's Report - Unaudited 1 October 2022 to 31 March 2023

Market Environment

The China market rallied strongly soon after the conclusion of the 20th National Party Congress ("NPC") particularly following the aggressive supportive policies in the Real Estate sector as well as the lift of the 2 year zero-COVID lockdown. This saw one of the strongest rallies between November and January as investors' confidence in the prioritization by the Chinese government on growth increased. However, this was short-lived where market corrected in February following the weaker than expected data around recovery post Chinese New Year, reemergence of US-China geopolitical risks, and impact of growing inflationary pressures globally. In March, the sentiment-driven strong rally of generative AI-related names, which drove a rotation out from other sectors also proved challenging environment for investors.

Performance

The Fund returned an absolute return of -7.2% net (share class P-PF-acc, in USD) between 1 October 2022 and 31 March 2023, as the highly beta-driven market adversely impacted both our long and alpha short positions. Our discipline of keeping a conservative portfolio through low gross (average 100-120% gross) and tighter net (+5-10% beta-adjusted) during this period also meant that the Fund missed upside capture of the beta-driven rally, although this protected the Fund in February when the market retreated. In March, the swift rotation by the market from other sectors into the generative AI-related themes also affected both our long and short books. Despite the highly challenging market for an alpha-focused, fundamentally driven strategy like us, we stayed true to our investment philosophy and investment process of constructing our portfolio based on bottom-up, fundamental thesis and not to chase for short-term returns at the expense of downside risks. At sector level, we had a good hit rate in healthcare, consumer staples and communication services while our long exposures in property management and internet detracted performance. During this period, we remained focused on implementing portfolio hedging strategies in the effort to minimize as much downside risks as we navigated through the macro driven market.

Outlook

While we acknowledged the challenging performance during this period, we are also comfortable with the decision to maintain a conservative portfolio as we ride through the beta-driven market whilst simultaneously we focused on identifying the alpha opportunities. Although we are turning more constructive on the China market, we are also expecting volatility to stay a little longer with a probability of another market correction in the near term as more data surfaces and geopolitical matters develop. We will continue to be balanced and objective in assessing these macro factors and emerging new alpha opportunities, such as the generative-AI space, as they develop while staying disciplined in our investment process and risk management.

Other Updates

The Investment Manager would like to take this opportunity to remind investors that nothing in the Company's or Sub-Fund's governing documents or offering documents will be construed as a waiver of any rights of the Sub-Fund or any investor thereof under applicable U.S. securities laws

Investment Manager's Report - Unaudited 1 October 2022 to 31 March 2023

Market environment

Emerging markets (MSCI EM) equities returned (~15.50%) in USD terms over the 6 month-period ending March 31, 2023. Markets were supported by China's opening up following a difficult year with many local Covid related lockdowns.

Performance

The strategy slightly outperformed its benchmark, the MSCI Emerging Marketing Index (r), from October 11, 2022 to end of March 31, 2023. Our holdings in Naspers (South Africa, Communication Services), Ping An Insurance (China, Financials) and LG Electronics (Korea, IT) contributed positively to performance. Naspers' outperformance was driven by good performance of Tencent. Ping An Insurance outperformed following China's opening and government's support for the real estate sector. LG Electronics outperformed on expectations of an earnings recovery as pandemic driven one-off costs normalize and underlying core operations stabilize. In contrast, our holdings in Banco Bradesco (Brazil, Financials) and u/w in Tencent detracted. Banco Bradesco underperformed following Americanas' application for the equivalent of chapter 11 in Brazil. However, we believe the impact is manageable and the long-term outlook is still intact. Our u/w in Tencent has detracted. However, we have indirect exposure to Tencent through Naspers.

Outlook

Investors are mulling over a potential financial crisis, sparked by concerns in the US and EU/UK commercial real estate markets. Our team's view is that, while the indirect impact from contagion fear and general heightened risk aversion could keep markets volatile in the short run, our portfolio's direct exposure to the banking sector remains fundamentally robust with strong balance sheets and high liquidity and capital ratios. In the event of a global recession, Asia could arguably outperform. India and Indonesia are increasingly being supported by domestic demand. While trade-oriented economies like Singapore, Malaysia and Vietnam may be negatively impacted through exports and manufacturing, certain segments may still benefit from the outsourcing trend. China's recovery could lend a helping hand to the region, with China being ASEAN's major trading partner accounting for about 20% of ASEAN's total trade value. In addition, inflation has been moderating in Asia, thus allowing most Asian central banks to pause rate hikes soon.

China's ongoing recovery continues to show up in activity data such as subway traffic, flight data, hotel occupancy rates, etc albeit more gradually than initially anticipated when China abruptly exited from its zero-covid policy. Given there has been no major consumption stimulus, unlike in some developed market economies, we expect the recovery to continue at a measured pace and inflation to remain manageable. Overall there is significant improvement in sentiment for Chinese equities in the short term. In the longer term, we bear in mind certain risks including geopolitics and investor worries that the new top leadership's objectives may imply more redistributive policies, curtailment of free private enterprise, and thus weigh on longer term economic growth. We believe it is too early to draw definitive conclusions and, now that the top leadership team for President Xi's third term is in place, we will monitor the Chinese government's actions, as well as its stance towards the private sector and entrepreneurs. At the Boao Forum last month, Premier Li Qiang committed to "adhering to reform and opening up no matter how the world changes". Investors took heart at Alibaba's restructuring plan.

Tech-heavy markets Taiwan and Korea are outperforming the region year-to-date, though the economically sensitive tech sector continues to be under pressure from concerns about a global slowdown. Our research trip to Taiwan in March showed signs of cyclical bottoming in certain segments. We think the industry cycle may bottom out in the next few months, as we have seen an industry glut, order cuts and destocking. However end demand would ultimately be subject to the global economic cycle. The industry dynamics for semiconductors remains structurally positive, and has even improved during this period of depressed sentiments. Many companies are likely to see their profitability improve compared to pre-covid years. We believe we need to ride through the economic downcycle for the sector, hence we remain overweight

In ASEAN, Vietnam, Thailand and Singapore are likely most leveraged to a recovery in Chinese tourism. Asia is also expected to benefit from the outsourcing story brought about by the China-plus-one and to an extent, also as European industry and manufacturing get impacted by energy shortages. Indonesia benefitted from higher energy and commodity prices, and has also put in place reforms to position it to benefit from supply chain diversification. There have also been initiatives to build out the EV supply chain given Indonesia's nickel ore supply. Financial health of corporates and households remains robust which should support domestic demand recovery.

UBS Global Emerging Markets Opportunity Reduced Carbon Fund Semi-Annual Report as of 31 March 2023

Investment Manager's Report – Unaudited (continued)

Outlook (continued)

The Indian market had been quite resilient most of last year but has faltered in the last few months, as valuations started to look relatively more expensive despite fundamentals still being strong. During our research trip to India last month, we found the "Made in India" theme to be progressing well, with FDI flowing into the country. However the supply chain still needs to be built out.

Outside of Asia, the economies Eastern Europe are doing better than expected despite the circumstances, not last due to help from increasing funds from the EU, worth up to 3% of GDP in the coming years. The Middle East should be benefiting from structural reforms. However, given the valuation, active stock selection continues to be the key in this region. With respect to Latam, uncertainty around Brazil has increased since the election of Lula. On the one hand, Brazil was very quick to tighten the monetary policy, so as a result the inflation has been already falling during 2022. Brazil might be among the first countries to cut rates in 2023 – this could help to maintain the economic momentum during 2023. On the other hand, there has been mixed signal from the new president in terms of fiscal discipline and degree of state intervention into the markets. Rates might stay higher for longer and both FX and growth might become weaker than expected. Hence, we continue to monitor the risk coming from the latest election. It still remains to be seen as to how much check and balance the conservative congress and senate can exercise on the executive branch.

1. Organisation

The Company was incorporated on 1 December 2009 as an open-ended investment company with variable capital organised under the laws of Ireland (registration number 478169) and has been authorised in Ireland by the Central Bank pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, the Central Bank UCITS Regulations, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). The Company is structured as an umbrella fund consisting of different sub-funds, each comprising one or more share classes.

The Company has an appointed management company. As at 31 March 2023, the Company had no employees. The investment activities of UBS (Irl) Investor Selection – Currency Allocation Return Strategy are managed by UBS Asset Management Switzerland AG, UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund and UBS (Irl) Investor Selection – Global Equity Long Short Fund are managed by UBS Asset Management (UK) Ltd., UBS Global Emerging Markets Opportunity Fund and UBS Global Emerging Markets Opportunity Reduced Carbon Fund are managed by UBS Asset Management (Singapore) Ltd. and UBS (Irl) Investor Selection PLC – O'Connor China Long/Short Alpha Strategies UCITS is managed by UBS O'Connor LLC (collectively, the "Investment Manager"). The registered office of the Company is situated at Second Floor, 4 Earlsfort Terrace, Dublin 2, D02 CK83, Ireland.

UBS Fund Management (Luxembourg) S.A. acted as manager of the Company until 29 November 2022. On 30 November 2022 UBS Fund Management (Ireland) Limited was appointed as manager of the Company.

A&Q Fundamental IS Equity Long Short UCITS terminated on 28 February 2022. The sub-funds which were active at 31 March 2023 and approved by the Central Bank are as follows:

Sub-fund	Launched on	Commencement of operations
UBS (Irl) Investor Selection - Currency Allocation Return Strategy	30 June 2014	30 June 2014
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund	29 October 2010	29 October 2010
UBS (Irl) Investor Selection - Global Equity Long Short Fund	28 August 2012	28 August 2012
UBS Global Emerging Markets Opportunity Fund	1 January 2010	1 January 2010
UBS (Irl) Investor Selection PLC - O'Connor China Long/Short Alpha Strategies UCITS	10 September 2021	10 September 2021
UBS Global Emerging Markets Opportunity Reduced Carbon Fund	11 October 2022	11 October 2022

2. Significant accounting policies

(a) Statement of compliance

The unaudited financial statements are prepared in accordance with International Accounting Standard 34 ("IAS 34"), *Interim Financial Reporting* as adopted by the European Union (the "EU"). The financial statements were authorised for issue on 29 May 2023.

The unaudited financial statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Company's annual financial statements for the year ended 30 September 2022 (approved on 23 January 2023).

(b) Basis of preparation

The financial statements of the Company are presented in United States Dollars ("USD") and rounded to the nearest USD. They are prepared on a fair value basis for financial assets and financial liabilities at fair value through profit or loss and derivative financial instruments. Other financial assets and financial liabilities are stated at amortised cost of redemption amount (redeemable participating shares).

Going concern

After making enquiries and considering relevant financial and other factors, the Directors have a reasonable expectation that the Company and its active sub-funds have adequate resources to continue in operational existence for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast doubt upon the Company's and the active sub-fund's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on a going concern basis.

2. Significant accounting policies (continued)

(b) Basis of preparation (continued)

Use of judgements and estimates

The preparation of financial statements, in conformity with International Financial Reporting Standards ("IFRS") as adopted by the EU, requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of income, expenses, assets and liabilities. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period and future periods if the revision affects both current and future periods. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial period, as well as critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in Notes 6 and 9.

(c) Foreign currency translation

Functional currency is the currency of the primary economic environment in which the Company operates. If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. The majority of the Company's investments and transactions are denominated in USD. Investor subscriptions and redemptions are determined based on net asset value ("NAV"), and received and paid in the currency of the sub-fund. The expenses (including management fees, depositary fees and administration fees) are denominated and paid in USD. Accordingly, management has determined that the functional currency of the Company is USD.

Transactions in foreign currencies are translated into the reporting currency at exchange rates at the dates of the transactions. For practical reasons, a rate that approximates the actual rate at the date of the transaction is often used, for example, an average rate might be used for all transactions in each foreign currency occurring during the period. However, if exchange rates fluctuate significantly, the use of the average rate for the period will be inappropriate. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Comprehensive Income. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to USD at the exchange rate at the date that the fair value was determined. For income and expenses that are recognised in the Statement of Comprehensive Income, the use of average exchange rate is permitted under IFRS if they are a reasonable approximation of the actual exchange rates. Foreign currency exchange differences relating to investments at fair value through profit and loss and derivative financial instruments are included in the net (loss)/gain on foreign exchange.

The Company operates a number of sub-funds, each with its separately determined functional currency as stated below.

	Functional Currency	Reporting Currency
UBS (Irl) Investor Selection PLC	USD	USD
UBS (Irl) Investor Selection - Currency Allocation Return Strategy	GBP	GBP
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund	EUR	EUR
UBS (Irl) Investor Selection - Global Equity Long Short Fund	EUR	EUR
UBS Global Emerging Markets Opportunity Fund	USD	USD
UBS (Irl) Investor Selection PLC - O'Connor China Long/Short Alpha Strategies UCITS	USD	USD
UBS Global Emerging Markets Opportunity Reduced Carbon Fund	USD	USD

The financial statements of each sub-fund are presented in the currency that it is primarily exposed to with the Company financial statements being presented in USD. The difference arising from translation of the primary statements at different exchange rates, for the purpose of producing the financial statements of the Company, is included as a foreign currency translation adjustment in total other comprehensive gain/(loss) in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

2. Significant accounting policies (continued)

(c) Foreign currency translation (continued)

The following exchange rates were used for the conversion of the Company combined financial statements into USD as at 31 March 2023, 30 September 2022 and 31 March 2022:

		Closing Rates			Average Rates	
_	31 March 2023	30 September 2022	31 March 2022	31 March 2023	30 September 2022	31 March 2022
GBP	1.2365	1.1163	1.3167	1.1942	1.2801	1.3447
EUR	1.0865	0.9797	1.1127	1.0467	1.0841	1.1328

(d) New Standards, amendments and interpretations

There are no new standards, interpretations or amendments to existing standards that are effective for the period beginning on or after 31 March 2023, that would have had a material impact on these financial statements.

The following new standards, amendments to standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below:

Standards	Narrative	Effective date*
Amendments to IAS 1	Classification	1 January 2024
Amendments to IAS 8	Definition of Accounting Estimates	1 January 2024

^{*}Annual periods beginning on or after.

These amendments are not expected to have a material impact on the Company's financial statements.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the Company.

(e) Financial instruments

(i) Classification

On initial recognition, the Company classifies financial assets as measured at amortised cost or fair value through profit or loss ("FVTPL"). A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI").

All other financial assets and financial liabilities of the Company are measured at FVTPL including transferable securities, derivative financial assets and derivative liabilities.

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the Company considers all of the relevant information about how the business is managed, including:

- The documented investment strategy and the execution of this strategy in practice. This includes whether the
 investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile,
 matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows
 or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How the Investment Manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

2. Significant accounting policies (continued)

- (e) Financial instruments (continued)
 - (i) Classification (continued)

The Company has determined that it has two business models.

- Held-to-collect business model: this includes interest and dividend receivables, due from brokers, deposits with
 credit institutions and other receivables. These financial assets are held to collect contractual cash flows.
- Other business model: this includes transferable securities and derivatives. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Assessment whether contractual cash flows are SPPI

For the purpose of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition.

'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- Contingent events that would change the amount or timing of cash flows;
- Leverage features;
- Prepayment and extension features;
- Terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features); and
- Features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

The Company has determined that the only financial assets classified at amortised cost are cash and cash equivalents due to the related contractual cashflows being solely payments of principal and interest.

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition unless the Company were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The contractual cash flows of the Company's debt securities are solely principle and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. Consequently, all investments are measured at fair value through profit or loss.

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

The Company's policy requires the Investment Manager and the Board of Directors to evaluate the information about these financial assets and financial liabilities on a fair value basis with other related financial information.

(ii) Recognition

The Company recognised financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instruments. Transactions are recognised using trade date accounting. From this date any gains and losses arising from changes in fair value of the financial assets or liabilities are recorded.

2. Significant accounting policies (continued)

(e) Financial instruments (continued)

(iii) Measurement

Financial instruments are measured initially at fair value (transaction price). Transaction costs on financial assets and financial liabilities at fair value through profit and loss are expensed immediately to the Statement of Comprehensive Income.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income. Financial assets classified as receivables are carried at amortised cost using the effective interest method, less impairment losses, if any. Financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method. Financial liabilities arising from the redeemable participating shares issued by the Company are carried at the redemption amount representing the investors' right to a residual interest in the Company's assets.

The fair value of financial assets and financial liabilities that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date.

Valuation techniques used for non-standardised financial instruments such as OTC options and forwards, include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

(iv) Fair value measurement principles

The fair value of financial instruments is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. Financial assets and liabilities are priced at current mid-price.

Unlisted financial assets and financial liabilities (or traded on any stock exchange or over-the-counter market) are valued at their fair value estimated with care and in good faith by a stockbroker or other competent person, such as the Administrator, appointed by the Investment Manager and approved by the Depositary.

For certain other financial instruments, including amounts due from/to brokers, accounts payable and accrued expenses, the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments.

The carrying amounts of the financial assets and financial liabilities not classified as FVTPL at the reporting date approximated their fair values.

(v) Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or are extinguished or it transfers the financial asset and the transfer qualifies for derecognition in accordance with IFRS 9, *Financial Instruments* ("IFRS 9").

The Company uses the first in first out (the "FIFO") method to determine realised gains and losses on derecognition.

A financial liability is derecognised when the Company's obligation specified in the contract is discharged, cancelled or the obligation expires.

2. Significant accounting policies (continued)

- (e) Financial instruments (continued)
 - (vi) Specific instruments

Forwards

Forwards are commitments either to purchase or sell a designated financial instrument or currency amount at a specified future date for a specified price. Forwards may be settled in cash or in another financial asset. Forwards are individually traded over-the-counter contracts. Forwards result in credit exposure to the counterparty to the extent that the counterparty does not meet its obligations under the contract.

Forwards result in exposure to market risk based on changes in market prices relative to contracted amounts. Market risks arise due to the possible movement in foreign currency exchange rates and securities' values underlying these instruments. In addition, due to the low margin deposits normally required in relation to nominal contract sizes, a high degree of leverage may be typical of a forward trading account. As a result, a relatively small price/rate movement in the underlying security/currency of a forward may result in substantial losses to the Company.

Nominal amounts are the underlying reference amounts to foreign currencies upon which the fair value of the forward contracts traded by the Company are based. While nominal amounts do not represent the current fair value and are not necessarily indicative of the future cash flows of the forwards, the underlying price changes in relation to the variables specified by the nominal amounts affect the fair value of these derivative financial instruments.

Equity swaps

Equity swaps allow a direct exposure to the market, to a sector or to an individual security. Swaps have a fixed maturity and naturally expire once the maturity reaches. However, the parties involved in a swap transaction may also terminate the contract before its expiry. Equity swaps are used to gain exposure to share price movements without buying the shares themselves. An equity swap on a company's shares will specify the price of the shares when the contract commences. The swap contract is an agreement to pay out cash on the difference between the starting share price and when the swap contract is closed.

Daily fluctuations in the value of a swap contract are recorded for financial reporting purposes as unrealised gains or losses and are recorded as a realised gain or loss when the position is closed.

Options

Premiums received on written call and put options are recorded as a liability and the premiums paid on the purchase of call and put options are recorded as an asset at inception. The fair values of unexpired option contracts are based upon the quoted market value of the option. Realised and the change in unrealised gains and losses are included in the Statement of Comprehensive Income. Premiums received from writing options and premiums paid on purchased options that expire unexercised are recognised as realised gains and realised losses, respectively within financial assets and liabilities at fair value through profit or loss.

Futures

Futures are commitments either to purchase or to sell a designated financial instrument or currency at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the futures contract values are settled daily. Futures contracts have little credit risk as counterparties are futures exchanges.

Futures result in exposure to market risk based on market prices relative to contracted amounts. In addition, due to the low margin deposits normally required in relation to nominal contract sizes, a high degree of leverage may be typical of a futures trading account. As result, a relatively small price movement in the underlying security of a futures contract may result in substantial losses to the Company. Certain futures exchanges do not permit trading in particular futures contracts at prices that represent a fluctuation in price during a single day's trading beyond certain set limits. If prices fluctuate during a single day's trading beyond those limits, the Company could be prevented from promptly liquidating unfavourable positions and thus could be subject to substantial losses.

The changes in value of open future contracts are recognised as unrealised gains or losses by marking-to-market the value of the contract at the reporting date. When the contract is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded in the Statement of Comprehensive Income.

2. Significant accounting policies (continued)

- (e) Financial instruments (continued)
 - (vi) Specific instruments (continued)

Swaps

Credit default swaps are contracts in which the Company pays or receives premium flows in return for the counterparty accepting or selling all or part of the risk of default or failure to pay off a reference entity for which the swap is written, where the Company has bought protection the maximum potential loss is the value of the premium flows the Company is contracted to pay until maturity of the contract.

Where the Company has sold protection the maximum potential loss is the nominal value of the protection sold.

Interest rate swaps are contracts in which the Company exchanges interest rate cash flows for cash flows based on the return of a fixed income instrument, a securities index or another stream of cash flows.

These contracts allow the Company to manage its interest rate exposures. Interest rate swap returns are based on the movement of interest rates relative to a specified alternative as per the contract.

All swap contracts are stated at market value. The net income or expense in the swap agreements entered into by the Company is reflected in the Statement of Comprehensive Income. The unrealised gain or loss is reported as an asset or liability and changes in the market value are reflected in the Statement of Comprehensive Income in the period in which they occur.

Contracts for difference

Contracts for difference allow a direct exposure to the market, a sector or an individual security. Unlike a forward contract, there is no final maturity, the position being closed out at the discretion of the position taker. Contracts for difference are used to gain exposure to share price movements without buying the shares themselves. A contract for difference on a company's shares will specify the price of the shares when the contract was started. The contract is an agreement to pay out cash on the difference between the starting share price and when the contract is closed. Daily fluctuations in the value of a swap contract are recorded for financial reporting purposes as unrealised gains or losses and are recorded as a realised gain or loss when the position is closed.

Warrants

Warrants are options to purchase additional securities from the issuer at a specified price during a specified period. Warrants are sometimes used to gain exposure to emerging market equities where custody, liquidity, or other issues make ownership of local shares sub-optimal. Risks associated with the use of warrants are generally similar to risks associated with the use of purchased options. However, warrants do not have standardised terms, and may have longer maturities and may be less liquid than exchange-traded options. In addition, the terms of warrants may limit the Company's ability to exercise the warrants at such times and in such quantities as the Company would otherwise wish. Warrants are measured at fair value through profit or loss and are designated as financial assets or financial liabilities at fair value through profit or loss.

(f) Interest income and expense

Interest income and expense on financial instruments at amortised cost is calculated using the effective interest rate method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or financial liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Company estimates future cash flows considering all contractual terms of the financial asset, future credit losses are not considered.

The calculation of the effective interest rate includes all fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

Interest income and expense includes interest on cash and cash equivalents and on financial assets and financial liabilities.

2. Significant accounting policies (continued)

(g) Gains and losses on financial assets and financial liabilities at fair value through profit or loss

Gains and losses on financial instruments at fair value through profit or loss include all realised gains/(losses) on transferable securities and derivative financial instruments, and unrealised gains/(losses) from fair value changes and foreign exchange differences. Realised gains and losses are based on the FIFO method.

(h) Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or a financial liability.

An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, the Company shall measure the instrument at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, forwards and swaps are included in the purchase and sale price of the investment. Transaction costs cannot be practically or reliably estimated as they are embedded in the price of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities, options and futures are included in net gain/(loss) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

Custody transaction costs are separately identifiable transaction costs. The amounts incurred by each sub-fund during the period are disclosed in Note 15.

(i) Expenses

All expenses, including management fees, depositary fees, interest expense, bank charges, tax expenses and general and operating expenses are recognised in the Statement of Comprehensive Income on an accrual basis. Other fees include general and operating expenses, bank charges, miscellaneous expenses, commission expenses, depositary fees and tax expenses.

(j) NAV per share

NAV per share at year-end is calculated by dividing the NAV of the relevant class in each sub-fund at year-end by the number of redeemable participating shares of the relevant class in issue as at the year-end.

(k) Cash and cash equivalents

Cash comprises current deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. Cash and cash equivalents are valued at face value plus any accrued interest, where applicable.

(l) Balance due from/(to) brokers

In accordance with the Company's policy of trade date accounting for regular way sale and purchase transactions, sales/purchases awaiting settlement represent amounts receivable/payable for securities sold/purchased but not yet settled as at the Statement of Financial Position date. Due from/(to) broker accounts include the settlement amounts and all of the collateral amounts.

2. Significant accounting policies (continued)

(m) Foreign exchange gains and losses

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in the fair value in the Statement of Comprehensive Income. Included in net (loss)/gain on foreign exchange in the Statement of Comprehensive Income are net foreign exchange gains and losses on monetary financial assets and financial liabilities other than those classified at fair value through profit or loss. Foreign exchange differences arising on translation of the sub-funds' financial statements for the purpose of preparing the Company's financial statements are recognised in Other Comprehensive Income.

(n) Dividend income and expense

Dividend income and dividend expense are recorded on the ex-dividend date. Dividend income is recognised on a gross basis, before withholding tax.

(o) Distribution policy

Shares of a sub-fund may be issued as accumulating shares or distributing shares. The dividend policy and information on the declaration and payment of dividends for each sub-fund will be specified in the relevant supplement. The Constitution of the Company gives the Directors the right to declare dividends in respect of any Shares in the Company out of the net income of the relevant sub-fund (whether in the form of dividends, interests or otherwise) and/or net realised gains (i.e. realised gains net of realised and unrealised losses) or net realised and unrealised gains (i.e. realised and unrealised losses) subject to certain adjustments.

(p) Redeemable participating shares

All redeemable participating shares issued by the Company provide the investors with the right to require redemption for cash at the value proportionate to the investor's share in the Company's net assets at the redemption date. In accordance with IAS 32, *Financial Instruments: Presentation* ("IAS 32") such instruments give rise to a financial liability for the present value of the redemption amount.

Applications for Shares may be made through the Administrator on behalf of the Company. Applications received and accepted by the Administrator prior to the subscription deadline for the relevant subscription day will be processed on that subscription day. Shareholders may redeem their shares on and with effect from any Redemption Day at the NAV per share calculated on or with respect to the relevant Redemption Day as described in the Prospectus. Subject to certain exceptions in relation to certain switches of shares from one class to another class in the same sub-fund, switching will generally amount to a disposal of the original shares for tax purposes and accordingly, a chargeable gain or an allowable loss may be realised.

(q) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the Statement of Financial Position when and only when, the Company has legal right to offset the amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRS as adopted by the EU, e.g. for gains and losses arising from a group of similar transactions, such as gains and losses from financial instruments at fair value through profit or loss.

(r) Anti-dilution measures

The Company may use "swing pricing" as the method to adjust the price of shares to minimise the impact of "dilution" on Shareholders' interests. Dilution occurs when the cost of purchasing or selling the assets of the Company is greater than the value of these assets due to taxes, dealing charges or any spread between the buying and selling prices of these assets. If the aggregate subscriptions and redemptions exceed a threshold then the NAV used to process all deals in the Company (or a sub-fund) is adjusted to reflect by a swing factor. The swing factor, which shall not exceed 2%, and the threshold are set by the Directors and/ or the Investment Manager.

2. Significant accounting policies (continued)

(r) Anti-dilution measures (continued)

For the purpose of calculating any expenses of the Company (or a sub-fund) which are based on the NAV of the Company (or a relevant sub-fund), the Administrator will continue to use the un-swung NAV.

The anti-dilution levy ("ADL") is booked onto each sub-fund every time there are net flows which exceed the threshold. All capital activity is booked onto each sub-fund using un-swung NAV and all capital is booked on the transfer agent's system with swung information. The ADL is booked onto each sub-fund to make up the difference in the cash settlement of the capital trade and is booked as positive (negative) income to each sub-fund depending on net flows. The ADL is booked into each sub-fund the same time the capital trades are booked.

(s) Taxation

The Company is an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997. Therefore, the Company is not liable to tax in respect of its income and gains, other than on the occurrence of a chargeable event.

Generally, a chargeable event arises on redemption, repurchase, cancellation, transfer of shares or on the ending of a 'Relevant Period'. A 'Relevant Period' is an eight year period beginning with the acquisition of the shares by the Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- An exchange by a shareholder, effected by way of an arm's length bargain where no payment is made to the shareholder, of shares in the Company for other shares in the Company;
- Any transactions (which might otherwise be considered a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners;
- A transfer by a shareholder of the entitlement to shares where the transfer is between spouses and former spouses, subject to certain conditions; or
- An exchange of shares arising on a qualifying amalgamation or reconstruction (within the meaning of Section 739H of the Taxes Act) of the Company with another investment undertaking.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event. Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders.

(t) Hedge classes

For the benefit of holders of classes of shares that are denominated in a currency other than the base currency, the Investment Manager may, but is not obliged to, seek, through the use of forwards and/or futures, to hedge the foreign exchange exposure arising as a result of fluctuations between the denominated currency of the class and the base currency. Hedged positions will be kept under review to ensure that over hedged positions do not exceed 105% of the NAV of the class. This review will also incorporate a procedure to ensure that positions in excess of 100% will not be carried forward from month to month.

Any financial instruments used to implement such strategies with respect to one or more classes shall be assets/liabilities of a sub-fund as a whole but will be attributable to the relevant class(es) and the gains/(losses) on the relevant financial instrument and the costs of the relevant financial instruments will accrue solely to the relevant class. Where a class of shares is to be hedged this will be disclosed in the supplement for the sub-fund in which such class is issued. Any currency exposure of a class may not be combined with or offset against that of any other class of a sub-fund. The currency exposure of the assets attributable to a class may not be allocated to other classes. Hedge classes are currently operational in the UBS (Irl) Investor Selection - Currency Allocation Return Strategy and UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund sub-funds.

Investors should also note that, to the extent that hedging is successful, the performance of the class is likely to move in line with the performance of the underlying assets and that investors in a hedged class will not benefit if the class currency falls against the base currency and/or the currency in which the assets of the Company are denominated and that this hedging strategy may substantially limit holders of these shares from benefiting if the base currency falls against the denominated currency of the class. Each sub-fund's currency hedging policy is set out in the relevant supplement of the Prospectus.

3. Interest income and expense

Fair value estimation

The following tables provide an analysis of financial instruments measured at fair value at the reporting date by the level in the fair value hierarchy into which each financial instruments' fair value measurement is categorised. The amounts are based on the values recognised in the Statement of Financial Position. All fair value measurements noted are recurring.

6. Fair value estimation (continued)

The fair value hierarchy is as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); or
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement of an instrument is categorised in its entirety is determined on the basis of the lowest level input, 1 being the highest level that is significant to the fair value measurement of that instrument in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded derivatives, warrants, US government treasury bills and certain non-US sovereign obligations. Quoted market prices are primarily sourced from market leading financial data vendors. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include fund of funds investments, collective investment schemes, investment-grade convertible bonds and certain non-US sovereign obligations, and over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

The Company's level 2 investments primarily include collective investment schemes, forwards and equity swaps which are easily valued based on observable market data.

There was no movement in the Company's level 3 instruments for the period ended 31 March 2023.

The following table presents the movement in the Company's level 3 instruments for the year ended 30 September 2022 2022.

	Fair value measurement using Level 3 Inputs
	30 September 2022 USD
Opening balance at the beginning of the year	-
Net transfer in	196,121,594
Change in unrealised depreciation	(196,121,594)
Closing balance at the end of the year	<u> </u>

During the year ended 30 September 2022, there were USD196,121,594 transfers in to level 3 investments. Transfers in to level 3 investments are related to the conflict in Ukraine. The Investment Manager took the decision to write down the positions transferred into level 3 to USD Nil in March 2022 due to the conflict and the essential shutting down of the Russian market.

7. Share capital

The authorised share capital of the Company is 500,000,000,000 shares of no par value and 300,000 redeemable non-participating shares of no par value. The minimum issued share capital of the Company is 2 redeemable non-participating shares of no par value. The 2 redeemable non-participating shares of no par value are each held by the Investment Manager. Non-participating shares do not entitle the holders to any dividends and on a winding up entitle the holders to receive the amount paid up thereon but do not otherwise entitle them to participate in the net assets of the Company.

7. Share capital (continued)

The Company is a daily dealing fund therefore an investor can subscribe and/or redeem as they wish. Both the Company and the investor have an option to redeem shares. No premium is payable on the redemption of shares.

The Directors reserve the right to impose "an anti-dilution levy" representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought or sold) and other dealing costs relating to the acquisition or disposal of assets and top reserve the value of the underlying assets of the sub-fund.

UBS Global Emerging Markets Opportunity Reduced Carbon Fund

There were new classes launched in UBS (Irl) Investor Selection PLC - O'Connor China Long/Short Alpha Strategies UCITS during the period. UBS (Irl) Investor Selection - Currency Allocation Return Strategy Fund and UBS (Irl) Investor Selection PLC - O'Connor China Long/Short Alpha Strategies UCITS had a class which closed during the period.

The rights attaching to the redeemable participating shares issued in the Company or any class may, whether or not the Company is being wound up, be varied or abrogated with the consent in writing of the shareholders of three-quarters of the issued shares of the Company or the relevant class, or with the sanction of an ordinary resolution passed at a general meeting of the Shareholders of the Company or the relevant class.

The rights attaching to the shares shall not be deemed to be varied by the creation, allotment or issue of any further shares ranking pari passu with shares already in issue.

Redeemable participating shares may be redeemed on redemption days as set out in the Prospectus and will be redeemed at the NAV per share quoted on that day, calculated in accordance with the Prospectus.

8. Cash and cash equivalents and balances due from/to brokers

Balances due from/to brokers as at 31 March 2023 and 30 September 2022 are held with JP Morgan, Bank of America Merrill Lynch, Goldman Sachs International and Morgan Stanley (excluding negligible balances), the balances also relate to security transactions that have not yet settled as at the reporting date:

Cash and cash equivalents as at 31 March 2023 and 30 September 2022:

The credit ratings of the banks as classified by Fitch (2020: Moody's) are as follows: J.P. Morgan (AA) (30 September 2022: Aa1), UBS AG (AA-) (30 September 2022: Aa2), Morgan Stanley (A) (30 September 2022: Al), Bank of America Merrill Lynch (A2) (30 September 2022: A2), Goldman Sachs (A1) (30 September 2022: A1) and Bank of New York Mellon (AA-) (30 September 2022: Aa1). There are no restrictions on the cash and cash equivalents amounts held with these brokers.

9. Financial instruments and associated risks

The Company maintains positions in a variety of derivative and non-derivative financial instruments as dictated by its investment management strategy.

The Company's investing activities expose it to various types of risk that are associated with the financial instruments and markets in which it invests. The most significant types of financial risk to which the Company is exposed are market risk, credit risk, liquidity risk and operational risk.

The Company employs derivative financial techniques and instruments for the purposes of investment and/or efficient portfolio management subject to the limits laid down by the Central Bank and subject to the terms of the supplement for the relevant sub-fund. These derivative financial techniques and instruments may include, but are not limited to, warrants, exchange traded futures and options, forwards and swap agreements.

The Manager uses a risk management process to measure, monitor and manage risks attached to the derivative financial positions and details of this process have been provided to the Central Bank.

The Manager employs a risk management process which enables it to measure, monitor and manage the risks within the sub-funds. The Company must calculate its global exposure on at least a daily basis. Global exposure is calculated using VaR for UBS (Irl) Investor Selection – Currency Allocation Return Strategy, UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund, UBS (Irl) Investor Selection – Global Equity Long Short Fund, A&Q Fundamental US Equity Long Short UCITS and UBS (Irl) Investor Selection PLC – O'Connor China Long/Short Alpha Strategies UCITS. Global exposure is calculated using the commitment approach for the UBS Global Emerging Markets Opportunity Fund and UBS Global Emerging Markets Opportunity Reduced Carbon Fund. Any techniques or instruments including repurchase agreements which are used by the sub-funds to generate additional leverage or exposure to market risk are taken into account when calculating the global exposure of the sub-fund. Leverage is calculated using the sum of the notionals of the derivatives used by the sub-fund. Through regular monitoring and review of risks related to the specific sub-funds, the Manager aims to quantify and analyse the current risk against the expected risk profile of the portfolio and performance targets of the sub-funds. Methods of measuring risk include, but are not limited to, VaR analysis, stress testing, sensitivity measures, leverage and relative risk. An ex-ante tracking error model is also used by the Manager to control risk. All sub-funds remain within the allotted parameters.

The Board of Directors issues a risk management statement (Derivative Financial Instrument Report) to the Central Bank on an annual basis.

Asset allocation is determined by the Company's Investment Manager who manages the distribution of the assets to achieve the investment objectives. Divergence from target asset allocations and the composition of the portfolio is monitored by the Company's Investment Manager. The nature and extent of the financial instruments outstanding at the reporting date and the risk management policies employed by the Company are discussed below. However these are not all the risks involved. Investors should refer to the Prospectus to see the full list of risks.

(a) Market risk

Market risk is the risk that changes in currency risk, price risk and interest rates risk will affect the positions held by the Company.

The Company is exposed to market risk on investments in that the Company may not be able to readily dispose of its holdings when it chooses and also that the price obtained on disposal is below that at which the investment is included in the Company's financial statements. All trading financial instruments are recognised at fair value through profit or loss and all changes in market conditions directly affect net income.

The Investment Manager uses derivative financial instruments which may give rise to leverage within the portfolio, subject to the limits set out in the Prospectus, to increase the potential overall return on capital. Leverage may be created through the use of derivative financial instruments, subject to UCITS Regulations. The leverage created through the use of derivative financial instruments will be measured using either the commitment approach or VaR depending on the risk profile of the strategies pursued by each sub-fund.

The commitment approach calculates leverage by measuring the market value of the underlying exposures of derivative financial instruments. An overall risk monitoring structure is in place which sets risk and leverage limits for the Company, and prescribes action to be taken upon these limits being breached.

In pursuing each sub-fund's investment objectives, the Investment Manager seeks to allocate risk capital in the most appropriate way, given prevailing market opportunities, in order to achieve the desired compensation for the risk capital being expended.

9. Financial instruments and associated risks (continued)

(a) Market risk (continued)

Risk management is therefore at the forefront in setting investment strategy. Before entering into an investment, the Investment Manager will always take note of the investment's market price. Price is a required data point in assessing attractiveness. Similarly, the attractiveness of an investment cannot be estimated without a thorough analysis of the investment's potential risk.

Efficient risk capital allocation involves expending appropriate amounts of a Company's risk budget when it is desirable to do so in response to conditions in the market environment. It also involves separating and diversifying the decision dimensions available to the Investment Manager. The output of the Company's risk capital allocation system parallels investment decision-making by embodying and visually representing these characteristics.

The Investment Manager is able to use the risk capital allocation system to test and evaluate potential changes to investment strategy.

Currency risk

The Company may invest in financial instruments and enter into transactions denominated in currencies other than its functional currency. Consequently, the Company is exposed to risks that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse affect on the value of that portion of the Company's assets or liabilities denominated in currencies other than the functional currency.

The Company's foreign currency exchange rate risk is managed on a daily basis by the Investment Manager.

The Company may employ strategies aimed at hedging against currency risk at the class level. When the Company enters into such currency transactions as part of the sub-fund's investment policy, the hedging transactions at the share class level will be considered distinct from the tactical currency transactions of the relevant sub-fund.

The Investment Manager may utilise hedging strategies in order to hedge the exposure of classes that are denominated in currencies other than the base currency of the relevant sub-fund. The hedging will typically be undertaken by means of forwards but may also include currency options.

Global Exposure

Risk Management

Global exposure in accordance with the applicable laws and regulatory provisions, is calculated using either the commitment approach or the VaR approach. The VaR of each sub-fund's portfolio is the estimated loss that may arise on the portfolio over a specified period of time (holding period) from an adverse market movement within a specified probability (confidence level).

Leverage

Leverage is defined pursuant to the applicable ESMA directives as the total of the notional values of the derivatives used by the respective sub-fund. According to this definition, leverage may result in artificially increased leverage amounts, as some derivatives that can be used for hedging purposes may be included in the calculation. Consequently, this information does not necessarily reflect the precise actual leverage risk that the investor is exposed to.

VaR models

When global exposure is monitored using a VaR model, the following inputs are used for the models:

VaR model	Confidence level	Time horizon	Length of data history
Monte Carlo VaR	99%	20 days	2 years
Historical VaR	99%	20 days	2 years or 5 years

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based give rise to some limitations, including the following:

- A 20-day holding period assumes that it is possible to hedge or dispose of positions within that period. This may not be the case for certain highly illiquid assets or in situations in which there is severe general market illiquidity.
- A 99% confidence level does not reflect losses that may occur beyond this level, meaning that within the model used there is a 1% probability that losses could exceed the VaR.
- VaR is calculated on an end-of-day basis and does not reflect exposures that may arise on positions during the trading day.
- The use of historical data as a basis for determining the possible range of future outcomes may not always cover all possible scenarios, especially those of an exceptional nature.

9. Financial instruments and associated risks (continued)

(a) Market risk (continued)

Global Exposure (continued)

VaR models (continued)

- The VaR measure is dependent on the sub-fund's position and the volatility of market prices.
- The VaR of an unchanged position reduces if market price volatility declines, and vice versa.

The overall structure of VaR limits is subject to review and approval by the board of directors. VaR is measured daily.

Price risk

Price risk is the risk that value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Price risk is mitigated by the Company's Investment Manager by constructing a diversified portfolio of instruments traded on various markets. Details of price risk exposure and concentrations by industry and geographical area contained in the Schedule of Investments.

Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Company holds cash and cash equivalents and financial instruments that are interest earning and as a result the Company is subject to risk due to fluctuations in the prevailing levels of market interest rates in relation to this financial instrument.

The Company's hedging transactions using derivative instruments also involve the risk that unanticipated and significant changes in interest rates will cause a significant loss of basis in the contract. The counterparties to the Company's derivatives are financial institutions carefully selected by the Investment Manager.

The Company's interest rate risk is managed on a daily basis by the Investment Manager.

(b) Credit risk

Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. Credit risk associated with trading and investing activities is managed through the Company's market risk management process discussed above.

The amount of credit exposure is represented by the carrying amounts of the assets in the Statement of Financial Position. Substantially all financial instruments are cleared through and/or held in custody by the Depositary. The Company is therefore subject to credit risk to the extent that the Depositary may be unable to fulfil its obligations either to return the Company's securities or repay amounts owed. Details of credit risk exposure and concentration are contained in the Schedule of Investments.

Substantially all of the assets held by the Company are held by the Depositary (the parent company J.P. Morgan Chase Bank N.A has a Credit rating of AA at Fitch). Bankruptcy or insolvency by J.P. Morgan Bank (Ireland) plc may cause the Company's rights with respect to the assets held by J.P. Morgan Bank (Ireland) plc to be delayed or limited. The Company monitors its risk by monitoring the credit ratings of J.P. Morgan Chase Bank N.A on a monthly basis, as reported by Standard and Poor's, Moody's or Fitch.

The Company will be exposed to the credit risk of the Depositary or any depository used by the Depositary regarding the cash balances held in unsegregated accounts with same. In the event of insolvency or bankruptcy of the Depositary or any depository used by the Depositary, the Company will be treated as a general creditor.

The risk that counterparties to both derivative and other instruments might default on their obligations is monitored on an ongoing basis. To manage the level of credit risk, the Company deals with counterparties of good credit standing as per credit rating agencies such as Moody's.

9. Financial instruments and associated risks (continued)

(b) Credit risk (continued)

The below table states the counterparties used by the Company and also states the collateral and collateral type held by counterparty for the sub-funds in relation to out of the money positions.

21	March	2022

Counterparties	Ratings	Collateral Type	Base Value
JP Morgan (cost USD 6,446,572)	AA	USD denominated cash	6,434,230
Morgan Stanley (cost USD 6,407,590)	A	USD denominated cash	6,406,983
Goldman Sachs (cost USD 4,240,000)	A+	USD denominated cash	4,240,000
Total Collateral			17,081,213
30 September 2022 Counterparties	Ratings	Collateral Type	Base Value
			USD
JP Morgan (cost EUR17,775,183)	Aa1	USD denominated cash	17,861,297
Morgan Stanley (cost EUR6,419,420)	A+	USD denominated cash	6,422,113
Bank of America Merrill Lynch (cost GBP980,000)	A2	USD denominated cash	1,093,974
Total Collateral			25,377,384

(c) Liquidity risk

The Company's liquidity and cash flows are related to its market risks. Liquidity and cash flow risk may result from a significant decline in the market value of investments. The performance of the Company will therefore depend in part on the ability of the Investment Manager to anticipate and respond to such fluctuations in market interest rates and to utilise appropriate strategies to maximise returns while attempting to minimise the associated risks. The Company's Constitution provides for daily creation and cancellation of shares and it is therefore exposed to the liquidity risk associated with meeting shareholder redemptions at any time.

The Company invests in futures, options, and in a number of derivative financial instruments including but not limited to: credit default swaps, interest rate swaps, swaptions, currency swaps, total return swaps, forwards and warrants which are not exchange traded.

Financial liabilities of the Company comprise of investments in derivative financial instruments, redemptions payable, amounts due to broker, accounts payable and accrued expenses and net assets attributable to holders of redeemable participating shares. Investments in derivative financial instruments, redemptions payable, amounts due to broker, accounts payable and accrued expenses are typically settled within 30 days to 1 year from the transaction date.

The total NAV of the Company is considered to be a liability of the Company as investors may choose to redeem part or all of their outstanding shares at any time.

The carrying value of liabilities is the same as the contractual cash flow being short term in nature (except for the liabilities at FVTPL).

(d) Operational risk

The primary responsibility for the development and implementation of controls over operational risk rests with the Board of Directors. This responsibility is supported by the development of overall standards for the management of operational risk, which encompasses the controls and processes at the service providers and the establishment of service levels with the service providers, in the following areas:

- requirements for appropriate segregation of duties between various functions, roles and responsibilities;
- requirements for the reconciliation and monitoring of transactions;
- compliance with regulatory and other legal requirements;
- documentation of controls and procedures;
- requirements for the periodic assessment of operational risk faced, and the adequacy of controls and procedures to address the risks identified;
- contingency plans;
- ethical and business standards; and

9. Financial instruments and associated risks (continued)

(d) Operational risk (continued)

• risk mitigation, including insurance if this is effective.

The Directors' assessment over the adequacy of the controls and processes in place at the service providers with respect to operational risk is carried out via regular discussions with the service providers and a review of the service providers' SOC 1/ISAE 3402 reports on the internal controls, if available.

Substantially all of the assets of the Company are held by the Depositary. Bankruptcy or insolvency of the Company's Depositary may cause the Company's rights with respect to the securities held by the Depositary to be delayed or limited.

The Manager monitors credit ratings and the capital adequacy of its depositary and reviews the findings documented in the SOC 1/ ISAE 3402 report on the internal controls annually.

The Company has provided the Depositary a general lien over the financial assets held in custody for the purpose of covering the exposure from providing depositary services. The general lien is part of the standard contractual terms of the custody agreement.

(e) Capital management

The Company is required to maintain a minimum capital requirement of EUR300,000, or its foreign currency equivalent. If redemptions or decreases in the value of the Company's investment portfolio cause the value of the share capital to fall below the equivalent of EUR300,000, the Board of Directors will make a decision to seek the termination of the Company, the return of assets to shareholders and the revocation of the Company's authorisation.

The Administrator will notify the Board of Directors if during any particular month, the NAV of the Company falls below this level. As soon as the Board of Directors becomes aware that the capital of the Company is below the required level, the Board of Directors will inform the Depositary and the Central Bank.

(f) Leverage

The Company may be leveraged. The use of leverage creates special risks and may significantly increase the Company's investment risk. Leverage creates an opportunity for greater yield and total return but, at the same time, will increase the Company's exposure to capital risk and interest costs.

Any investment income and gains earned on investments made through the use of leverage that are in excess of the interest costs associated therewith may cause the NAV of the shares to increase more rapidly than would otherwise be the case. Conversely, where the associated interest costs are greater than such income and gains, the NAV of the shares may decrease more rapidly than would otherwise be the case.

(g) Depositary

The Company has appointed J.P. Morgan Bank (Ireland) plc as Depositary of all of its assets pursuant to the custodian agreement.

In accordance with and subject to the depositary agreement, the Depositary provides safe custody for all the assets of the Company under the control of its custodial network. The Depositary will be obliged, inter alia, to ensure that the issue and repurchase of shares in the Company is carried out in accordance with the relevant legislation and the Articles of Association. The Depositary will carry out the instructions of the Company unless they conflict with the UCITS Regulations or the Articles of Association. The Depositary is also obliged to enquire into the conduct of the Company in each financial period and report thereon to the shareholders.

9. Financial instruments and associated risks (continued)

(h) Use of derivative instruments

Each sub-fund may invest in derivative instruments. The types and degrees of risk vary depending upon the characteristics of the particular instrument and the assets of a Company as a whole. Use of these instruments may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large impact on a Company's performance.

10. Taxation

The Company is an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997. Therefore, the Company is not liable to tax in respect of its income and gains, other than on the occurrence of a chargeable event.

Generally a chargeable event arises on redemption, repurchase, cancellation, transfer of shares or the ending of a 'Relevant Period'. A 'Relevant Period' is an eight year period beginning with the acquisition of the shares by the Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- (i) any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland;
- (ii) an exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another Company;
- (iii) certain exchanges of shares between spouses and former spouses;
- (iv) an exchange of shares representing one sub-fund for another sub-fund of the Company;
- (v) shareholders who are neither Irish resident nor Irish ordinarily resident for tax purposes at the time of the chargeable event and who have provided the Company with a relevant declaration to that effect; or
- (vi) certain exempted Irish tax resident Shareholders who have provided the Company with the necessary signed statutory declarations.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event.

There were no chargeable events for the period under review.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its Shareholders.

11. Segregation of liabilities between sub-funds

As a matter of Irish law, the assets of one sub-fund will not be available to meet the liabilities of another. However, the Company is a single legal entity which may operate or have assets held on behalf of or be subject to claims in other jurisdictions (such as the United Kingdom) which may not necessarily recognise such ring-fencing and, in such circumstances, the assets of one sub-fund may be exposed to the liabilities of another.

Shareholders who choose or are obliged under local regulations to pay or receive subscription or redemption monies or dividends via an intermediate entity rather than directly to or from the Administrator (e.g. a Paying Agent in a local jurisdiction) bear a credit risk against that intermediate entity with respect to (a) subscription monies prior to the transmission of such monies to the Administrator for the account of the Company, and (b) redemption monies payable by such intermediate entity to the relevant Shareholder.

12. Cross investments

There were no cross investments made by the sub-funds during the period.

13. Fees and expenses

The aggregate fees of the Investment Manager and the Administrative Costs (being, generally, the fees of the Manager, the Depositary and the Administrator together with auditors' fees, legal fees, registration fees and Directors' fees) equal the percentage of the NAV of the sub-fund as set out in the table below:

The performance fees payable by UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund, UBS (Irl) Investor Selection - Global Equity Long Short Fund and UBS Global Emerging Markets Opportunity Fund amount are subject to Depositary approval and are still payable as at 31st March 2022.

**Sub-fund launched on 11 October 2022...

The performance fees will be calculated and accrued as at each Valuation Point. The performance fees will be calculated in respect of each financial period (a "Calculation Period"). However, the first Calculation Period in respect of any Class of Shares will be the period commencing on the Business Day immediately following the close of the Initial Offer Period for that Class and ending on 30 September in that same year. The first value used in determining the first performance fees shall be the Initial Price.

Administration fees

The Company and/or the Manager, on behalf of the Company, shall pay to the Administrator out of the assets of the Company an annual fee, accrued at each valuation point and payable quarterly in arrears at a rate which shall not exceed 0.075% per annum of the NAV of each sub-fund (before calculation of the Investment Manager's fees, Manager fees or the Administration fees) subject to an annual fee of EUR60,000 (plus VAT, if any thereon) per sub-fund and to a fee of EUR3,000 plus VAT, if any, in respect of the preparation by the Administrator of each set of financial statements required to be prepared in respect of the Company.

The Administrator shall also be entitled to be repaid out of the assets of the Company all of such government or similar fees (including but not limited to filing fees and annual return fees to the extent payable by the Administrator), charges, taxes, duties and imposts whatsoever levied on or in respect of the Company or business of the Company as it may properly pay.

^{**}Sub-fund terminated on 28 February 2022. ***Sub-fund launched on 10 September 2021.

13. Fees and expenses (continued)

Administration fees (continued)

The fees and charges of the Administrator are subject to variation and renegotiation from time to time provided that any increase in the Administrator's fee is subject to prior notification to Shareholders.

Directors' fees

The Constitution authorises the Directors to charge a fee for their services at a rate determined by the Directors. All Directors, are non-executive Directors and do not earn a fee. Ian Fitzpatrick is an Executive Director of UBS Asset Management, an entity within the UBS Group. The fees of any Director in any accounting period shall not in any event exceed EUR50,000 (plus VAT, if any) without the approval of the Board. Any increase in Directors' remuneration above that figure will be notified in advance to Shareholders and Shareholders will be given sufficient time to redeem their Shares prior to the implementation of any such increase. All Directors will be entitled to reimbursement by the Company of expenses properly incurred in connection with the business of the Company or the discharge of their duties.

During the period ended 31 March 2023, the Directors charged fees of EUR32,500 (31 March 2022: EUR32,500) for UBS (Irl) Investor Selection PLC. At 31 March 2023, EUR21,875 (31 March 2022: EUR32,500) was payable.

14. Accounting estimates and judgments

As indicated in Note 2(e) many of the Company's financial instruments are measured at fair value in the Statement of Financial Position and it is usually possible to determine their fair values within a reasonable range of estimates. For the majority of the Company's financial instruments, quoted market prices are readily available.

Fair value estimates are made at a specific point in time, based on market conditions and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgement (e.g., interest rates, volatility, estimated cash flows etc.) and therefore, cannot be determined with precision.

15. Transaction costs

The below table shows the transaction costs incurred by the sub-funds during the period. The transaction costs include the equity costs (trade commissions and miscellaneous trade fees required at a country level and charged separately from the trade price) and the derivative transaction costs (future and option commissions charged separately from the trade price and also swap trade fees that are included in the trade price).

18. Related parties (continued)

The fees charged by the Manager and the Investment Managers, who form part of the UBS group of companies, are disclosed in Note 13. The Investment Managers have undertaken to limit the general and operating expenses attributable to each class of share, as set out at the beginning of Note 13, for each sub-fund and for each share class that has launched. Each figure is expressed as a percentage per annum of the NAV of the particular share class. The general and operating expenses accrue daily and are generally paid monthly in arrears. To achieve this, the relevant Investment Manager absorbs, either directly by waiving a portion of its Investment Management fee or by reimbursement to the account of the relevant class of the sub-fund, any general and operating expenses over the applicable limit that may arise.

The fees charged by the Swiss Representative, Swiss Paying Agent and Distributor, who are affiliated to the Investment Manager and form part of the UBS group of companies, are part of general and operating fee amount.

19. Commitments and contingent liabilities

As at 31 March 2023, the Company did not have any significant commitments or contingent liabilities (30 September 2022: Nil).

20. Significant events during the reporting period

On 30 November 2022, UBS Fund Management (Ireland) Limited was appointed as manager of the Company replacing UBS Fund Management (Luxembourg) S.A.

On 11 October 2022, a new sub-fund UBS Global Emerging Markets Opportunity Reduced Carbon Fund launched.

There were no other events during the period that require adjustment to or disclosure in the financial statements.

21. Subsequent events

Economic and financial market uncertainties remain elevated, driven by higher sustained inflation and tightening monetary policy as Central Banks have increased base rates, along with the tightening of credit conditions as illustrated with recent events in the banking sector. These market conditions are contributing to additional volatility and fluctuation in market variables including but not limited to interest rates, foreign exchange, equity prices, commodity prices, widening credit spreads, implied volatilities and asset correlations. Management are actively monitoring events and any exposure to elevated risk sectors.

Subsequent to the period ended 31 March 2023 and until approval of these financial statements by the Board, the Company incurred the following net subscriptions and redemptions:

```
UBS (Irl) Investor Selection - Currency Allocation Return Strategy
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund
(5,324,608)
UBS (Irl) Investor Selection - Global Equity Long Short Fund
UBS Global Emerging Markets Opportunity Fund
(50,097,636)
UBS (Irl) Investor Selection PLC - O'Connor China Long/Short Alpha Strategies UCITS
(7,415,050)
```

There were no other events after the period-end that require adjustment to or disclosure in the financial statements.

22. Approval of financial statements

The accounts were approved by the Board on 29 May 2023.

Soft commissions

The Investment Manager may make use of arrangements to enable it to obtain execution and research services which are beneficial to the sub-funds, both from counterparties and third parties. All transactions undertaken and the services provided under these arrangements in respect of the sub-funds will be subject to Financial Conduct Authority rules and to the fundamental rule of providing best execution to the sub-funds, being the best price available in the market, exclusive of any charges, but taking into account any exceptional circumstances such as counterparty risk, order size or client instructions.

There were no soft commissions arrangements during the period ended 31 March 2023.

Foreign exchange rates

The following foreign exchange rates were used to translate assets and liabilities into the reporting currency USD at 31 March 2023 and 30 September 2022.

	31 March 2023	30 September 2022

Total expense ratio ("TER")

This ratio was calculated in accordance with the Asset Management Association Switzerland (AMAS) / Swiss Funds and Asset Management Association (SFAMA) "Guidelines on the calculation and disclosure of the TER" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

The TER for classes of units which were active less than a 12 month period are annualised.

Securities financing transactions regulation

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTs) and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs.

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") came into force on 12 January 2016 and, amongst other requirements, introduces new disclosure requirements in the Company financial statements published after 13 January 2017 detailing the sub-fund's use of securities financing transactions and total return swaps. As a result, additional disclosures have been included in this appendix.

Below is the market value of assets engaged in securities financing transactions as at 31 March 2023. The assets which are engaged in securities financing transactions at this date are total return swaps, in the form of Contracts for Difference ("CFDs") and Equity Swaps. The sub-funds do not engage in securities lending, or repo transactions.

Below is the market value of assets engaged in securities financing transactions as at 31 March 2023 based on a commitment amount of EUR24,809 in absolute terms.

Fund Name	Amount EUR	% of net assets as at 31 March 2023
UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund	(9,737)	(0.01)%

The following table details the counterparty for the Equity Swaps held by UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund.

		Equity Swaps	Transaction cost for the
Counterparty Name /		Market Value as at 31	period ended 31 March
Financial Institutions	Country of Counterparty	March 2023	2023
Bank of America Merrill Lynch	United States of America	(9,737)	436

The Equity Swaps are settled bi-laterally.

The following table provides an analysis of the maturity tenor of the Equity Swaps held by UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund as at 31 March 2023.

Maturity tenor	EUR
Less than one week	-
One day to one week	-
One week to one month	-
One month to three months	-
Three months to one year	-
Above one year	-
Open maturity	(9,737)
