Mr Jiro Ikegaya joined as Director of Nikko Asset Management Luxembourg S.A. on April 26, 2023.

Note 3. Significant Accounting Policies

(a) Presentation of Financial Statements

The financial statements are presented in accordance with Luxembourg legal and regulatory requirements. The preparation of financial statements, in accordance with Luxembourg requirements, requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The financial statements of the Fund have been prepared under the going concern basis of accounting.

(b) Determination of Net Asset Value per Share

The Net Asset Value ("NAV") per Share of each Sub-Fund is expressed in its currency of denomination. The NAV per Share of each Class of each Sub-Fund is calculated in the currency of the Sub-Fund on each valuation day ("Valuation Day") at the valuation point, as described in the prospectus.

(c) Cash

Cash and other liquid assets are valued at their face value with interest accrued to the end of the Valuation Day.

(d) Valuation of the Investments in Securities

The assets of each Sub-Fund were valued as follows:

Securities which are quoted or dealt in on any stock exchange shall be based on the last available closing price and each security traded on any other organized market shall be valued in a manner as similar as possible to that provided for quoted securities. For securities for which trading on the relevant stock exchanges is thin and secondary market trading is done between dealers who, as main market makers, offer prices in response to market conditions, the Management Company may decide to value such securities in line with the prices established.

For non-quoted securities or securities not traded or dealt in on any stock exchange or other organized market, as well as quoted or non-quoted securities on such other market for which no valuation price is available, or securities for which the quoted prices are not representative of the fair value, the value thereof shall be determined prudently and in good faith by the Management Company on the basis of foreseeable sales prices.

Shares or units in underlying open-ended investment funds shall be valued at their last available NAV reduced by any applicable charges.

In the event that extraordinary circumstances render such a valuation impracticable or inadequate, the Management Company is authorized, prudently and in good faith, to follow other rules in order to achieve a fair valuation of the assets of the Sub-Fund.

(e) Securities Transactions and Investment Income

Securities transactions are recorded as of trade date for financial reporting purposes. Realised gains and losses from securities sold are recorded on the identified average cost basis. Dividend income, net of any applicable withholding tax, is recorded on the ex-dividend date.

Interest income, including discount and amortization of premiums, is recorded daily on an accrual basis, net of any applicable withholding tax.

(f) Distribution Policy

Each year the Management Company may decide to distribute all available income as well as all other distributable items allowed by Luxembourg investment fund laws consisting, in addition of net income, of gains (realised or unrealised) or of capital as a distribution to the Shareholders, as long as and to the extent that the minimum sum of net assets of each Sub-Fund prescribed by Luxembourg law or its foreign equivalent is maintained. (g) Foreign Exchange Transactions and Translations (continued)

The exchange rate as at June 30, 2023 is used to translate the foreign currency amounts in the Combined Statement of Operations and Changes in Net Assets into USD.

Fluctuations in the value of currency holdings and other assets and liabilities resulting from changes in exchange rates are recorded as unrealised foreign currency gains or losses. Realised gains or losses and unrealised appreciation or depreciation on investment securities and income and expenses are translated on the respective dates of such transactions. The effects of changes in foreign currency exchange rates on investments in securities are not segregated on the Statements of Operations and Changes in Net Assets from the effects of changes in market prices of those securities, but are included with the net realised and unrealised gain or loss on investments.

(h) Forward Foreign Currency Exchange Contracts

Each Sub-Fund may enter into forward foreign currency exchange contracts in connection with settling planned purchases or sales of securities to hedge the currency exposure associated with some or all of a Sub-Fund's securities or classes of shares as a part of an investment strategy. The market value of a forward foreign currency exchange contract fluctuates with changes in foreign currency exchange rates. Forward foreign currency exchange contracts are marked-to-market daily and the change in value is recorded by a Sub-Fund as unrealised gain or loss. A realised gain or loss is equal to the difference between the value of the contract at the time it was opened and the value at the time that the contract was settled.

(i) Options

A purchaser of a put option has the right, but not the obligation, to sell the underlying instrument at an agreed upon price ("strike price") to the option seller. A purchaser of a call option has the right, but not the obligation, to purchase the underlying instrument at the strike price from the option seller.

Purchased Options Premiums paid by a Sub-Fund for purchased options are included in Investments in securities, at market value in the Statement of Net Asset. The option is adjusted daily to reflect the current market value of the purchased option and the change is recorded as net change in unrealised appreciation/(depreciation) on investments in the Statement of Operations and Changes in Net Assets. If the option is allowed to expire, a Sub-Fund will lose the entire premiums it paid and record a realised loss for the premium amount.

Notes to the Financial Statements as at June 30, 2023 (continued)

Note 3. Significant Accounting Policies (continued)

(i) Options (continued)

Written Options Premiums received by a Sub-Fund for written options are included in the Statement of Net Assets. The amount of the liability is adjusted daily to reflect the current market value of the written option and the change in market value is recorded as net change in unrealised appreciation/(depreciation) on written options in the Statement of Operations and Changes in Net Assets. Premiums received from written options that expire are treated as realised gains. A Sub-Fund records a realised gain or loss on written options based on whether the cost of the closing transaction exceeds the premiums received.

(j) Futures Contracts

A futures contract is a firm commitment to buy or sell a specified quantity of a standardized amount of deliverable grade security, commodity or cash at a standardized price and specified future date, unless the contract is closed before the delivery date. Initial margin deposits are made to the broker upon entering into futures contracts. During the period the futures contract is open, changes in the value of the contract are recognized as unrealised appreciation or depreciation by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised appreciation is incurred. When the contract is closed, a realised gain or loss is recorded. This realised gain or loss is equal to the difference between the proceeds from (or cost of) the closing transaction and the Sub-Fund's basis in the contract.

(k) Swap Contracts

Credit default swap index (CDX)

A credit default swap is an agreement under which a buyer of protection is obligated to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

(I) Organizational Expenses

The organization expenses of the Sub-Fund are costs incurred by each Sub-Fund during its formation. Organization expenses are amortized on a straight-line basis over a maximum five year period for all Sub-Funds.

Note 7. Taxe d'abonnement

The Company is not liable to any Luxembourg income or corporation tax. However, the Company is liable in Luxembourg to a tax of 0.05% of its net assets at the end of the relevant quarter. The Sub-Funds are subject to Luxembourg law with respect to its tax status. The rate is reduced to 0.01% per annum, in respect of the Share Classes reserved to Institutional Investors and is payable quarterly and calculated on the basis of the net assets of the relevant Share Class at the end of the relevant quarter.

Note 8. Transaction Costs and Other expenses

Transaction costs are the costs incurred by a Sub-Fund in connection with transactions on its portfolio of investments. These costs are both incremental and directly attributable to the acquisition, issue or disposal of financial assets and liabilities, with incremental costs being those that would not have been incurred if the Sub-Fund had not entered into the transaction.

These Other expenses comprise fees and commissions paid to depositary, agents, advisers, brokers and dealers, and any taxes associated with the transaction. Other expenses include fees for the Director fees, Registration fees, FATCA fees, CSSF fees, Risk monitoring fees, Printing fees, and Miscellaneous Expense.

Note 9. Reimbursement from Management Company

The Management Company voluntarily capped the Total Expenses ratio of each Sub-Fund for the period ended June 30, 2023. Any expenses in excess of this cap is reimbursed by the Management Company to the Fund.

The amount is reflected in the caption "Reimbursement from Management Company" in the Statement of Net Assets and in the Statement of Operation and Changes in the Net Assets. At its discretion, the Management Company can decide to vary or cease the voluntary fees cap.

Note 10. Swing Pricing

A Sub-Fund may suffer a reduction in value, known as "dilution" when trading the underlying investments as a result of net inflows or net outflows of the respective Sub-Fund. This is due to transaction charges and other costs that may be incurred by liquidating and purchasing the underlying assets and the spreads between the buying and selling prices.

In order to counter this effect and to protect Shareholders' interests, the Management Company may adopt a swing pricing mechanism as part of its valuation policy. This means that in certain circumstances the Management Company may make adjustments to the net asset value per Share to counter the impact of dealing and other costs on occasions when these are deemed to be significant. This power has been delegated to the Management Company.

If on any Valuation Day, the aggregate net investor(s) transactions in a Sub-Fund exceed a pre-determined threshold, the net asset value per Share may be adjusted upwards or downwards to reflect the costs attributable. Typically, such adjustments will increase the net asset value per Share when there are net subscriptions into the Sub-Fund and decrease the net asset value per Share when there are net redemptions out of the Sub-Fund. The Management Company is responsible for setting the threshold, which will be a percentage of the net assets of the respective Sub-Fund. The threshold is based on objective criteria such as the size of a Sub-Fund and the dealing costs for a Sub-Fund, and may be revised from time to time.

The swing pricing mechanism may be applied across all Sub-Funds of the Company. The percentage by which the net asset value per Share is adjusted will be set by the Management Company and subsequently reviewed on a periodic basis to reflect an approximation of current dealing and other costs. The extent of the adjustment may vary from Sub-Fund to Sub-Fund due to different transaction costs in certain jurisdictions on the sell and the buy side. The maximum swing factor will not exceed 3% of the original net asset value per Share in normal market circumstances.

In exceptional market circumstances, such as high market volatility, disruption of markets or slowdown of the economy caused by terrorist attack or war (or other hostilities), a serious pandemic or a natural disaster (such as a hurricane or a super typhoon), this maximum level may be increased up to 5% on a temporary basis to protect the interests of Shareholders of the Company.

Notes to the Financial Statements as at June 30, 2023 (continued)

Note 10. Swing Pricing (continued)

The net asset value per Share of each Share Class in a Sub-Fund will be calculated separately but any adjustment will be made on Sub-Fund level and in percentage terms, equally affecting the net asset value per Share of each Share Class. If swing pricing is applied to a Sub-Fund on a particular Valuation Day, the net asset value adjustment will be applicable to all transactions placed on that day.

Investors are advised that as a consequence of the application of swing pricing, the volatility of the Sub-Fund's net asset value may be higher than the volatility of the Sub-Fund's underlying portfolio. Certain information on the swing pricing adjustment is available to the relevant Shareholders upon request at the Company's discretion.

All Sub-Funds except the NIKKO AM GLOBAL UMBRELLA FUND - Nikko AM Global Green Bond Fund were subject to the swing pricing mechanism. Over the reference period covered by this semi-annual report the following Sub-Fund have swung their NAV as a result of the swing pricing mechanism application:

- NIKKO AM GLOBAL UMBRELLA FUND Nikko AM Asia ex-Japan Fund
- NIKKO AM GLOBAL UMBRELLA FUND Nikko AM Japan Value Fund
