Additional Sub-Funds may, with the prior consent of the Central Bank of Ireland and approval of the Trustee, be added by the Manager.

"A" Listed Units are listed on the Italian Stock Exchange (Borsa Italiana). PGSRF has one class unit listed but it is currently suspended. See Note 19 for further details.

#### **Investment Objectives**

The assets of a Sub-Fund will be invested separately in accordance with the investment objectives and policies of that Sub-Fund, which are set out in a Supplement to the Prospectus.

#### Units

"A" Units are non-distributing Units and, accordingly, the Manager does not intend to make distributions in respect of "A" Units.

"B" Units are distributing Units and, accordingly, the Manager may make distributions in respect of "B" Units.

<sup>&</sup>lt;sup>1</sup> Plurima Global Star Return Fund terminated on 13 September 2017 and relaunched on 23 February 2018. The net asset value for PGSRF was suspended for dealing on 2 November 2018. See Note 19 for further details.

#### MANAGER'S REPORT

#### Market Overview H1 2020

The strong rally the world financial markets experienced in 2019 ended when in February 2020, the spread of Covid-19 dramatically hit the prospects of the global economy. While entire countries went into lockdown to try to contain the outbreak, all asset classes fell sharply across all markets, although Governments and Central Banks announced measures to support businesses and households and reduce borrowing costs. The shock to the economy hit both demand and supply, hence the huge liquidity boost into the system by the Central Banks was not sufficient to avoid the sell-off in the first place, but it was enough to lead the world markets to one of the biggest rallies ever in the second quarter. Despite the strong rebound in risk assets, safe havens such as government bonds and gold have held up very well, with US Treasuries up about 9% year to date, while gold is up close to 18%. The risks remain, with the virus not contained and a vaccine not yet approved, the infections soaring in some countries, particularly the US and South America, uncertainty about amount and timing of the fiscal stimulus from the governments and political risks driven by the US election and tensions between the US and China.

US equities declined significantly over Q1, with the S&P500 ending the quarter 20% lower, while the NASDAQ slid 14%, reaching lows, on March 23<sup>rd</sup> of -31% and -24%, respectively. The rebound started at the end of March was incredible and brought the S&P500 almost flat for the 1<sup>st</sup> half and NASDAQ 12% higher. The performance was mixed among the sectors, with online retailers jumping very strongly year to date, while department stores falling down sharply, along with other sectors that have been most affected by the virus, such as hotels, airlines, retail REITS, energy companies and banks. While most of the worst-performing sectors year to date have also lagged during the rally since late March, energy companies have actually been one of the best-performing sectors, as oil prices partially recovered.

Eurozone equities experienced a sharp fall, too in Q1 and the rebound of Q2 was not as strong as the US one. Italy and Spain became some of the most severely affected countries. Growth in Europe was already fragile - the eurozone economy grew by just 0.1% in Q4 2019, with Germany registering zero growth. The German DAX and the Italian FTSEMIB ended Q1 25% and 27.5% lower, respectively, and rose 24% and 14% in Q2. On a positive political note, the European Union has taken steps towards reducing the risk of a politically induced rerun of the European sovereign debt crisis. The proposed recovery fund would essentially provide support to some of the worst-affected countries, such as Italy and Spain, from countries such as Germany and France.

UK equities tumbled 25% in Q1 and ended the 1<sup>st</sup> half 18% down. The Bank of England, recently increased its quantitative easing programme by a further GBP 100 billion, helping to keep UK 10-year Gilt yields low at around 0.2%.

The same panic selling hit all the other countries in the world in Q1, but the Japan Nikkei and the MSCI Asia EX Japan closed the 1<sup>st</sup> half down only 6% and 3.5%, respectively.

#### PORTFOLIO MANAGERS' REPORTS

#### Plurima Unifortune Global Strategy Fund

Unit Class: E EUR (ISIN: IE00B4VJTH30)									
%	Jan	Feb	Mar	Apr	May	Jun	YTD		
2020	(0.68)	(2.28)	(8.10)	4.28	2.27	1.04	(4.87)		

#### **Market Overview**

In H1 2020 all financial indexes delivered negative performances with MSCI world - 6.64%, S&P 500 -4.04%, Eurostoxx 50 -13.65%, MSCI Europe -14.08%, Nikkei 225 -6.59%, S&P GS commodity index -36.31% and Pimco global bond index stable at +0.98%. The only exception was Nasdag that grew by 12.11% in the first semester 2020. H1 2020 was a period divided into two halves. During Q1, global equity markets corrected -34% from their peak digesting the prospects of the global pandemic and lockdowns. Then in Q2, equity markets recovered roughly +37% from the trough as policy makers flooded the markets and the economy with liquidity and as better virus containment data enabled many countries to reopen more quickly than expected. Like in 2016 and 2018, the correction of 2020 was again altered by central bank intervention. The lack of market liquidity during Q1 was a reminder that quantitative easing (QE) does not eliminate market risk and requires more QE as imbalances remain unsolved. Q2 reflected the impact of an intervention bazooka. The exogenous nature and size of the activity shock has opened the door for unlimited monetary and fiscal intervention. Helicopter money is officially being disseminated, through direct payment from governments to individuals and companies either through state guaranteed loans or furlough packages. In addition, it is the first time in the developed world that significant fiscal stimuli are taking place. Policy makers have now been given a quasi-free mandate to operate. The U.S. economy experienced a historic slowdown through April. The fiscal and monetary response, however, has been equally extraordinary. The U.S. Federal Reserve cut interest rates to zero, announced unlimited quantitative easing, and committed to buy investment grade and high yield corporate bonds. The fiscal stimulus packages include forgivable loans to small businesses and unemployment benefits equal to wage income for the median worker who loses their job. European economies are emerging from lockdown. The economic cost, however, has been large with the OECD forecasting a Eurozone gross domestic product (GDP) decline of 9.1% in 2020 followed by a 6.5% rebound in 2021. Europe's disadvantage heading into the Covid-19 crisis was its lack of policy ammunition. The European Central Bank (ECB) policy rate was already negative, there were strict rules around increasing fiscal deficits, and high-debt countries like Italy were at risk of a re-run of the 2012 debt crisis. The policy response has surprised to the upside. The ECB has increased its asset-purchase program by more than 12% of GDP. Rules on fiscal deficits have been temporarily relaxed, resulting in fiscal stimulus of around 3.5% of GDP across the region. The work subsidy schemes implemented in most countries have kept the Euro area's unemployment rate near record lows.

#### **Fund Performance**

For Q1 2020, on a gross basis Equity Long/Short and Global Macro delivered heavy negative performances, Directional Equity was almost flat, whilst Convertibles, Event Driven and Equity Market Neutral strategies provided a positive contribution to the fund. As mentioned above, Equity Long/Short was the worst negative contributor during the first 6 months. Performance was particularly negative in February and March as both months were characterized by deep falls in all equity indexes all over the world due to the effect of Covid-19. Macro was also a largest detractor. The main driver of such negative performance was the high volatility in currencies, commodities and Government bonds in March. Equity Market Neutral was able to adapt to the new equity market scenario and increased volatility context in February and March concluding the first six months positive thanks to the good performances of May and June. Directional Equity has only a fund investing in Healthcare that was almost flat in the period thanks to a strong recovery in April and May. Event Driven investments partially suffered in March but showed a favourable trend which took place in April and May. Convertible was also a positive contributor. The strategy reported heavy losses In February and March but thanks to a more benign market environment, the 2nd quarter was very positive for the strategy. During the period the fund maintained an equity net exposure around 35% and the allocation to the different strategies remained quite steady. The liquidity of the fund remains good and we are not aware of any Corporate Actions that could affect the fund.

#### **Market Overview**

Given the maturity of the economic cycle and how tight credit spreads had become in 2019, the portfolio managers started 2020 with what they felt was a relatively prudent portfolio in anticipation of a slowing economy. Credit exposure was around 65% with an average credit spread duration of around 2.3 years, while the rates position was close to 30% with a duration of 4.4 years. This gave a balanced portfolio with a reasonable degree of flexibility and liquidity, when combined with a 5% cash position. Unfortunately the portfolio was not prepared for the Covid-19 pandemic that has quickly resulted in an unprecedented shock to the entire global economy.

In the first week of March it became clear that the virus had spread beyond China and new epicentres had formed in South Korea and Italy; this was a game-changer and market sentiment and liquidity evaporated almost overnight. Indiscriminate forced selling from ETFs, and leveraged accounts breaching margin calls, exacerbated the market moves in a self-fulfilling spiral down.

The extent and momentum of the weakness immediately led to significant central bank stimulus, with coordinated rate cuts and significant injections of liquidity into markets. This was swiftly followed by unprecedented fiscal stimulus action from governments in Asia, North America, the UK and Europe. The managers did not capitulate into the initial weakness and instead took advantage by buying favoured credits on the dips. During March the managers were reducing the rates position, taking advantage of dislocated markets to improve the overall credit quality of the portfolio, extending credit spread duration and adding yield, thereby creating a more attractive medium to long term opportunity.

Given the speed of the sell-off in March and the lockdowns that brought commerce to a halt for much of the global economy, it was expected that the recovery period would be slow and volatile. However, the speed of response by authorities was very impressive; measures were taken to support financial market liquidity, payment holiday programmes were put in place, lending programs were launched to support both 'Main St' and 'Wall St' and central banks relaunched quantitative easing (QE) and corporate bond buying measures. These responses helped investor sentiment to rebound dramatically as estimates of corporate default rates were lowered significantly, from 12-15% in at the start of Q2 to 5-6% by the end.

The rebound in the valuation of risk assets was equally as impressive. Equity markets were led by the technology sector, where companies were widely seen as being the "winners" from the lockdown period, and the NASDAQ index hit new record highs during the quarter. In credit markets, IG indices returned 8-9% during Q2, and HY indices returned 10-11%.

The portfolio managers were very active over this period, cutting holdings of liquid assets (government bonds and cash) from 35% to 18% and putting the money to work in high quality assets, which led the recovery, at very attractive yields. These moves helped the Fund to recover the majority of the March losses, with the Fund returning 10.15% in Q2, and the current strong technical support is expected to result in further tightening over the summer. However, the managers recognise the continued headwinds for the global economy and the expected lag in the default rate; they remain selective in their asset allocation preferring higher quality assets at the longer end of the credit curve, avoiding cyclical assets and highly speculative bonds rated CCC or those rated single-B and unsecured.

Twenty Four Asset Management Limited Date: August 2020

#### Plurima Strategy Portfolio Fund

Unit Class: A Retail EUR (ISIN: IE00BVDPXL06)									
% Jan Feb Mar Apr May Jun YTD									
2020	1.51	(3.07)	(17.09)	4.54	5.85	1.32	(9.72)		

The first half of 2020 was characterized by strong volatility on the financial markets. In the first six months, we witnessed one of the worst crises with the emergence of Covid-19. The main equity indices lost more than 30%, oil dropped 80% of its value, and bonds also experienced difficulty, overwhelmed by double swings compared to the norm.

All this occurred in a few days, followed by an equally immediate reaction by the financial authorities. The Federal Reserve (Fed), for example, promised on March 23 to provide practically unlimited support. And the other central banks will not be outdone. These massive support measures, together with huge economic plans, helped cement interest rates to historic lows. The recoveries of the last few months have undoubtedly been significant and have returned the performance since the beginning of the year to more sustainable thresholds. The United States is around -4% year-on-year and with other markets close to -10% or slightly over.

In this scenario, the numbers are divided between strong health issues (Technology + 13% IT with Healthcare and Consumer Discretionary capable of eliminating losses) as opposed to companies in sectors that are unable to move away from the abyss (Energy -37%, Finance -24 %, Industrial -14% since the beginning of the year). The climate on the bond market also improved.

If on the one hand the government remains stable, on the other the credit emergency seems to have returned. Guaranteed liquidity in fact, both Corporate and High Yield have in part realigned. Commodities followed the recovery trend after the crisis, oil recovered a lot, doubling prices in a few months and halving the losses at the beginning of the year while Gold after settling is showing itself as an interesting investment alternative.

The performance of the fund in the first part of the year was affected by two factors above all; volatility on risk assets (exchanges) and tensions on the bond asset. Having said this, the first six months, despite a surge in volatility on all asset classes, showed a trend in the NAV in line with the best balanced funds in its category. During the months of the crisis and the second half of the year, attention was paid to these elements: - on the hunt for yields, the second half of the year is characterized by a better starting point than the first half of the year for investors, as valuations are now slightly more interesting both in the credit sector and in that of emerging markets, and central banks will be a key support element. On the equity front, we believe that the Covid-19 crisis has in fact accelerated some structural issues, such as digitization, medi-tech, e-learning / education and infrastructure investments with a 'green' focus, which could offer long-term opportunities for investors.

The Covid-19 crisis will further exacerbate the differences between emerging markets, with some of them more resilient to the crisis than others with external vulnerabilities, high debt and limited political margin. China and Asia are the main candidates to benefit from the road to recovery. The Fund at the end of June was invested at 81% and has this diversification: The bond asset prevalent by bonds and corporate/high yield and emerging funds, stands at 33% overall. Alternative management accounts for 12%. The equity asset, equally distributed between the USA and Europe in addition to the emerging markets, is equal to 36%. Liquidity stands at 19%.

## PORTFOLIO MANAGERS' REPORTS (continued)

#### Plurima Global Star Return Fund

The net asset value for Plurima Global Star Return Fund was suspended for dealing on 2 November 2018. There was no activity conducted during the period.

European and Global Advisors LLP Date: August 2020

## Plurima Theorema European Equity Long-Short Fund

Unit Class: B	Unit Class: B Institutional EUR (ISIN: IE00BZ6TFF52)									
%	% Jan Feb Mar Apr May Jun						YTD			
2020	2.29	(2.37)	(2.74)	2.80	2.14	(0.11)	1.99			

#### Market Overview

Global equity markets closed the first half of 2020 down (Stoxx 600 -12.1%, SPY -4.2%, SHCOMP -2.1%) in what was a very volatile market environment. After a strong start to the year, major equity indexes started to roll over, as evidence that the spread of Covid-19 would have a major impact on economic activity materialized. Coordinated fiscal and monetary interventions put a floor under equity markets in March, which have rallied since then. Moving on to our core regional focus, European equities followed the same trajectory as the main global indices. At sector level, Technology (+6.1%) was the top performer: continuous Chinese appetite for semiconductor equipment coupled with the fact that Covid-19 accelerated many existing trends (digital, payment) both helped the sector. At the other end of the spectrum, Travel and Leisure (-37.7%) was the heaviest hit by the pandemic and showing little sign of recovery prevented the sector from participating in the rally.

#### **Fund Performance**

The fund finished up a very respectable 1.99% in the first half of 2020. This was obtained with an average gross exposure, excluding the hedging book, of circa 95% and an average net exposure of circa 35%. Our hedging book (particularly our puts) protected us very well during the exceptionally volatile market conditions we witnessed in the second half of H1. Going into detail, Technology (circa +2%) was our largest contributor, mainly thanks to our longs in ASM International, ASML and Microsoft, and our extremely successful short bet on Wirecard. The latter's share price crashed on news that special audits carried out by Ernst and Young showed that Eur 1.9bn of cash in the accounts did not actually exist. The company has now filed for insolvency, in what looks to be one of the biggest corporate accounting frauds in post-war European history. Our next best performing sector was Retailers (circa +1.4%), helped by our Amazon long position, which was a big beneficiary from the Covid-19 crisis, with increasing and likely sustainable demand in eCommerce growth and cloud services continuing. The biggest detractor to the portfolio was our Cap Goods sector (circa -2.1%), where our two longstanding positions in Airbus and Safran suffered as a result of the ongoing Covid-19 related troubles of their biggest clients, the airline companies. Another stock worth a mention was one of our Commercial Services longs, Adyen, which was the portfolio's biggest individual contributor (circa +0.7%). The company is seen as a key beneficiary from an accelerated shift from cash to card payments and even faster adoption of online spending due to the current crisis. This acceleration in long term structural trends is believed to have brought forward years of already exciting growth potential for Adyen, whose best-in-class technology and product differentiation make it our favourite name in payments. In summary, we are very pleased with how well our portfolio's performance has held up so far this year, and we remain confident that we are well placed to ride out any continued volatility from here.

Theorema Advisors UK LLP Date: August 2020

#### Plurima 10 Convictions Fund

Unit Class: A Retail EUR (ISIN: IE00BF13LG55)									
% Jan Feb Mar Apr May Jun YTD									
2020	(3.63)	(9.11)	(27.59)	6.36	5.84	6.94	(28.60)		

The first half of the year was deeply characterized by the impact of coronavirus Covid-19 which spread its effects worldwide. It became clear that Covid-19 would have a dramatic and negative impact on the global economy. Central Banks deployed several actions to support economies. In Europe the ECB launched the PEPP (Pandemic Emergency Purchase Programme), in addition the EU is discussing the terms of implementation of a Recovery Fund to back the European economy. In the US the FED started, among others, the SMCCF (secondary market corporate credit facility). Global equity markets suffered a dramatic sell-off starting in the second half of February and lasting until mid-March before rebounding to a partial recovery in late March and early April. Uncertainty over the duration of the coronavirus pandemic and its potential economic impact caused volatility to spike. In this situation the markets suffered serious loss which was only partially recovered, with MSCI World down by 6.64% over the period, S&P 500 closed the period down by 4.04%, while Eurostoxx 50 tumbled -9.40%. Likewise, the EUR High Yield recorded a negative performance, -5.40% while EUR Eurozone sovereign indexes rose by 2.04%.

The fund performance was dragged down by the option component of the portfolio heavily impacted by the sell-off and the spike in volatility. In terms of countries the worst contributors were UK and Italy. In terms of sectors Materials, specifically Gold, was the best performance contributor during the period with Healthcare and Energy on the worst side. The fund ended the first half of the year with a performance of -28.60% for the retail share class and +4.40% for the institutional share class (launched on 12/05/2020).

Olympia Wealth Management Limited Date: August 2020

#### Plurima Mosaico Fund

Unit Class: A	Unit Class: A Premium IPO EUR (ISIN: IE00BYWH2448)								
% Jan Feb Mar Apr May Jun YTD							YTD		
2020	(0.62)	(0.57)	(3.38)	1.72	2.28	2.59	(0.68)		

This performance has been achieved in an economic and market environment characterized by extraordinary events. In March, the pandemic prompted authorities in most countries around the world to block people's movements, effectively blocking economies and generating an unprecedented economic contraction in terms of rapidity, and at the same time generating extreme volatility in financial markets. Three factors of further destabilization were added to the normal dynamics of equities, bonds, currencies, and commodities in a period of economic slowdown: lower oil prices, deteriorating credit quality and a decline in liquidity in financial markets. The risk of a simultaneous health-economic and financial crisis at the global level pushed Governments and Central Banks around the world to implement extraordinary measures aimed at sustaining corporate finances, employment, financial markets and the global economy. Thanks to those extraordinary and coordinated measures the economic and financial consequences of the pandemic have been substantially mitigated, at least for the moment. Financial markets have reverted most of the dislocations seen in March and April, equities are trading at multiples which are higher than in January, yield curves shifted down all around the world and corporate spreads are only marginally higher than at the beginning of the year. But most of the income statements around the world are in worse shape than before the pandemic, public and corporate balance sheets have been loaded with increasing amounts of debt and unemployment is worryingly growing. The second half of the year is going to be challenging for the economy, the public authorities, and investors around the world.

The portfolio has been invested in equities, fixed income, currencies, money market instruments and commodities.

Equity exposure was around 60% at the beginning of the year, moved between 10% and 40% between end of February and mid-May, and gradually increased to 55% till the end of June. The portfolio privileged earnings visibility and balance sheet strength, avoiding those areas of the market most exposed to financial and liquidity stress and deteriorating credit quality. Regional asset allocation was focused mainly on US and European equities.

In fixed income we invested mainly in European and US government bonds, Investment Grade floating rate corporate bonds, EM government bonds both hard and local currency, and local currency Chinese Government bonds. We have been completely out of HY bonds. The bond portfolio and total fund duration reached the highest levels in the month of March, reaching respectively 9 and 3.5 years.

Currency diversification from the EURO has been mainly on USD, JPY, GBP, CHF and SEK. USD and CHF were the biggest exposure in the period. Gold represented a relevant part of the asset allocation.

The main positive contribution to the performance came from US, European and Global Equities, followed by Gold and a short position on High Yield debt during the month of March. Emerging market equities and debt, together with Investment Grade government debt, had a negative contribution to the H1 fund's result.

European and Global Advisors LLP Date: August 2020

#### Plurima TORO Fund

Unit Class: A Institutional Premium EUR (ISIN: IE00BD723G68)									
%	Jan	Feb	Mar	Apr	Мау	Jun	YTD		
2020	(1.43)	(3.18)	(24.02)	(8.61)	(7.81)	(3.73)	(38.91)		

In the first half of 2020, all major financial asset classes experienced impressive volatility peaks. In six months we have experienced one of the worst crises with the main equity indices losing more than 30%, oil losing 80% of its value and bonds in difficulty, overwhelmed by volatility doubled compared to the norm. All this happened in the space of a few days and was followed by an equally immediate reaction, by the financial authorities, which promptly cancelled, at least in large part, the ongoing financial drama.

The Covid-19 situation evolved during the last months reaching and breaking records of new patients, new cases surged from 6.14 million to 14 million over the period. New cases rose significantly because of gatherings during protests, pushing the total cases curve upwards. Despite being highly affected by Covid-19, Emerging markets are benefitting, closing the period with positive data.

The recovery of the last few months have undoubtedly been significant and have brought the performance since the beginning of the year to more sustainable thresholds. The United States is at around -4% year-on-year with other markets close to -10% or just above.

But global indices only partially explain the context in which we are moving, which remains characterized by a high level of selectivity. In this scenario, the numbers are divided between strong health issues (Technology + 13% IT with Healthcare and Consumer Discretionary capable of eliminating losses) as opposed to companies in sectors that are unable to move away from the abyss (Energy -37%, Finance -24 %, Industrial -14% since the beginning of the year). The whole is enriched by a strong gap in favour of the Growth towards Value business. These intangible elements of the individual companies are difficult to estimate with traditional valuation approaches.

On the Bond side, too, the situation improved. If on the one hand the government bonds remain stable, on the other the credit emergency seems to have returned. Guaranteed liquidity in fact, both Corporate and High Yield have realigned and now the valuations have shifted, to the potential solvency risk, even if default levels are currently under control.

Commodities followed the recovery trend after the crisis, oil recovered a lot, doubling prices in a few months and halving the losses at the beginning of the year while Gold after settling is showing itself to be an interesting investment alternative.

Stock markets faced one volatility spike during the last month due to WHO declarations and "BLM" protests which started in the US but then rapidly expanded to European countries as well.

However, stock markets were able to close the semester with a rally, defining a positive performance thanks to Investor hopes for the economic environment in a post epidemic crisis scenario.

During the period 01.06.2020 – 30.06.2020 Plurima Toro Fund equities registered a negative return of -38.91%. Following the major drawdown recorded in March, due to the impact of the Covid-19 pandemic on financial markets, our reaction was not sufficient to recover the lost performance.

#### PORTFOLIO MANAGERS' REPORTS (continued)

#### Plurima TORO Fund (continued)

The volatility in the first semester was 24.29%.

Over the past few weeks we have implemented two automatic strategies for trading with Interactive Brokers and LMAX, that will help recover the performances of the fund given the positive track record of the strategy. We have also increased our bond investments up to 24.59% and decreased equity investments to 8.61%.

In the medium term we are considering implementing new portfolio models for the equity/bond part of the fund in order to have higher diversification and to maintain the volatility of the fund in lower ranges.

JCI Capital Limited Date: August 2020

## Plurima Apuano Dynamic Equity Fund

On 14th January 2020, unitholders were informed that the Plurima Apuano Dynamic Equity Fund would be closed as it was no longer financially viable. Following, positions in the Fund were liquidated, moving into cash instruments. The Fund was terminated on the final dealing date of 14th February 2020.

Saemor Capital B.V. Date: August 2020

#### Plurima VB Strategy Ranking Fund

Unit Class: A Institutional Plus EUR (ISIN: IE00BYZ5XH51)									
% Jan Feb Mar Apr May Jun YTD									
2020	(5.43)	(8.79)	(10.74)	4.8	0	0	(19.00)		

The first half of the year was deeply characterized by the impact of coronavirus Covid-19 which spread its effects worldwide. It became clear that Covid-19 would have a dramatic and negative impact on the global economy. Central Banks deployed several actions to support economies. In Europe the ECB launched the PEPP (Pandemic Emergency Purchase Programme), in addition the EU is discussing the terms of implementation of a Recovery Fund to back the European economy. In the US the FED started, among others, the SMCCF (secondary market corporate credit facility). Global equity markets suffered a dramatic sell-off starting in the second half of February and lasting until mid-March before rebounding to a partial recovery in late March and early April. Uncertainty over the duration of the coronavirus pandemic and its potential economic impact caused volatility to spike. In this situation the markets suffered serious loss which was only partially recovered, with MSCI World down by 6.64% over the period, S&P 500 closed the period down by 4.04%, while Eurostoxx 50 tumbled -9.40%. Likewise, the EUR High Yield recorded a negative performance, -5.40% while EUR Eurozone sovereign indexes rose by 2.04%.

The fund performance was dragged down by cash equities component that represented a large part of the portfolio. In terms of countries the worst contributors were Italy, France and Japan, while on the other hand Switzerland and UK generated a positive contribution over the period. In terms of sectors Energy, Industrial and Consumer Discretionary have been the worst performance contributors during the period with Consumer Staples and Materials on the best side. The fund was significantly impacted by the massive redemptions received which drove to the final decision to liquidate it on 14/05/20, closing the period with a negative performance of -19%.

Olympia Wealth Management Limited Date: August 2020

#### 1. Principal Accounting Policies

The significant accounting policies followed by the Fund are as follows:

### a) Basis of Accounting

The condensed financial statements for the period ended 30 June 2020 have been prepared in accordance with IAS 34. 'Interim Financial Reporting'.

The principal accounting policies applied in the preparation of these financial statements are consistent with the accounting policies applied in the preparation of the Audited Financial Statements for the year ended 31 December 2019, which were prepared in accordance with International Financial Reporting Standards ("IFRS").

#### 2. Taxation

Under current Irish law and practice, on the basis that the Fund qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, it is not chargeable to Irish tax on its relevant income or relevant gains. However, tax can arise on the happening of a chargeable event in the Fund. A chargeable event includes any distribution or dividend payments to Unitholders, disposals, redemptions, cancellations, encashment or assignment of Units in the Fund. No tax will arise on the Fund in respect of chargeable events in respect of a Unitholder who is neither Irish resident nor Irish ordinarily resident at the time of the chargeable event provided that a relevant declaration in the form authorised by the Irish tax authorities is in place. In the absence of a relevant declaration, there is a presumption that the investor is Irish resident or Irish ordinarily resident.

Dividends, interest and capital gains (if any) which the Fund receive with respect to its investments (other than securities of Irish issuers) may be subject to taxes, including withholding taxes, in the countries in which the issuers of investments are located. Dividends received by the Fund from investment in Irish equities may be subject to Irish dividend withholding tax at the standard rate of corporation tax (currently 12.5%).

However, the Fund can make a declaration to the payer that it is a collective investment undertaking beneficially entitled to the dividends which will entitle the Fund to receive such dividends without deduction of Irish dividend withholding tax.

#### 3. Fees

### **Management Fees**

Pursuant to the Trust Deed, European and Global Investments Limited have been appointed Manager to the Fund. The Manager is responsible for the general management and administration of the Fund's affairs. The Manager is entitled to receive an annual fee, as set out below, out of that proportion of the Net Asset Value of a Sub-Fund attributable to the relevant Class, accrued daily and payable monthly in arrears at the following rates (plus VAT, if any);

Out of this management fee the Manager will pay the fees of the individual portfolio managers. The Manager is also entitled to receive a performance fee (plus VAT, if any), calculated in accordance with the disclosure below for each Sub-Fund.

The Manager is also entitled to be repaid out of the assets of the relevant Sub-Fund all of its administration and operational expenses. European and Global Investments Limited received a management fee of €1,545,309 (30 June 2019: €1,889,209) for the period of which an amount of €360,883 (31 December 2019: €424,170) was outstanding at the period end.

Where a Sub-Fund invests in one or more Sub-Funds of the same umbrella the investing Sub-Fund may not charge an annual management fee in respect of that portion of its assets invested in other Sub-Funds.

<sup>&</sup>lt;sup>2</sup> Terminated on 14 May 2020.

### 3. Fees (continued)

#### Service Fees

The Manager shall also be paid out of that proportion of the assets of a Sub-Fund attributable to the relevant Class an annual service/ maintenance fee, as set out below. The service/ maintenance fee will be accrued daily and payable monthly in arrears (plus VAT, if any) except Plurima Unifortune Global Strategy Fund which not entitled for the service fees. Service fees are included in Other Charges in the Statement of Comprehensive Income.

### 3. Fees (continued)

Performance Fees (continued)

TYPE B (continued)

#### Plurima VB Strategy Ranking Fund<sup>1</sup>

"A" Listed Class Units	20%
"A" Retail Class Units	20%
"A" Institutional Class Units	20%

<sup>&</sup>lt;sup>1</sup> Terminated on 14 May 2020.

In each case, of the increase in the Net Asset Value of the Class (plus VAT, if any), taking subscriptions and redemptions into account, calculated in the following manner:

- 1. At the end of the first Performance Period, the Benchmark is the issue price per Unit in the initial offer.
- 2. If the Net Asset Value per Unit at the end of a Performance Period exceeds the Benchmark, a performance fee is payable. Subject to 1 above, in this case, the Benchmark for a Performance Period is the reported, final Net Asset Value per Unit at the end of the previous Performance Period for which a performance fee was payable.
- 3. If the Net Asset value per Unit at the end of a Performance Period is lower than the Benchmark, no performance fee is payable. In this case, the Benchmark for the next Performance Period is the Benchmark for the previous Performance Period being the previous Performance Period for which a performance fee was payable.
- 4. When a performance fee is payable on Units, it is calculated as the Net Asset Value per Unit less the Benchmark multiplied by the performance fee rate for the relevant Class set out above, multiplied by the average number of Units in issue during the Performance Period. The average number of Units in issue at the end of the Performance Period shall be deemed to include Units which fall to be redeemed and exclude Units which fall to be issued as at the end of the Performance Period.

The performance fee will be calculated and be taken into account in the calculation of the Net Asset Value per Unit on each Valuation Day. The "Benchmark" is the value, on the last Valuation Day of each Performance Period which the Net Asset Value per Unit on the same day must exceed in order for a performance fee to be payable. A "Performance Period" means the period from one Valuation Day to the next. The first calculation period shall be the period from the close of the initial offer period of the Class to the first Valuation Day. Fees payable to the Investment Manager shall be accrued on the Business Day following each Valuation Day and shall be calculated and payable monthly in arrears.

The calculation of the performance fee will be verified by the Trustee.

Where a performance fee is payable out of the Sub-Fund it shall be calculated upon the increase in the Net Asset Value per Unit calculated at the end of the relevant Performance Period. Included in that calculation shall be net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of the relevant period. As a result, performance fees may be paid on unrealised gains which may subsequently never be realised.

The Manager received a performance fee of €471,056 (30 June 2019: €455,284) for the period of which an amount of €64,689 (31 December 2019: €161,106) was outstanding at the period end.

#### Trustee's Fees

Pursuant to the Trust Deed, RBC Investor Services Bank S.A., Dublin Branch acted as Trustee to the Fund. The Trustee is entitled to receive out of the assets of the Fund an annual fee not to exceed 0.80% of the Net Asset Value of the Fund, accrued daily and payable monthly in arrears (which fee is inclusive of the fees of any sub-custodian appointed by it (plus VAT, if any)). The Trustee is also entitled to be reimbursed out of the assets of the Fund for its sub-custodians' third party expenses such as local reregistration fees, stamp duty and other market levies.

Trustee's fees for the period amounted to €99,396 (30 June 2019: €133,473) of which an amount of €32,210 (31 December 2019: €33,521) was outstanding at the period end.

#### 3. Fees (continued)

#### **Audit Fees**

Audit fees for the period amounted to €43,232 (30 June 2019: €49,788).

#### Administrator's Fees

RBC Investor Services Ireland Limited acts as Administrator to the Fund. The Manager pays to the Administrator out of the assets of the Fund an annual administration fee not to exceed 0.045% of the Net Asset Value of the Fund, accrued daily and payable monthly in arrears (plus VAT, if any), which minimum fee will range from €15,000 to €26,000 per annum in respect of each Sub-Fund.

Where a Sub-Fund has more than one Portfolio Manager, the Manager pays to the Administrator out of the assets of the Fund an additional minimum fee of €2,000 per annum (plus VAT, if any) in respect of each additional Portfolio Manager in excess of one.

The Administrator shall also be entitled to be reimbursed out of the assets of the Fund for any third party expenses incurred on behalf of the Sub-Fund (plus VAT, if any) including, but not limited to, telephone, fax, cable and communications network, postage expenses, printing and publication costs of reports, circulars and any other documents.

Administrator's fees for the period amounted to €101,613 (30 June 2019: €127,340) of which an amount of €63,105 (31 December 2019: €64,297) was outstanding at the period end.

Pursuant to the Trust Deed, RBC Investor Services Ireland Limited acts as the Transfer Agent to the Fund. The Manager shall pay to the Administrator out of the assets of the Fund a fee of €10,000 per annum in respect of each Sub-Fund (plus VAT, if any). This fee is subject to a maximum of 18 Sub-Funds and 4 classes per Sub-Fund.

Transfer Agent fees for the period amounted to €47,635 (30 June 2019: €60,176) of which an amount of € 30,383 (31 December 2019: €30,100) was outstanding at the period end.

#### 4. Related Parties

IAS 24 'Related Party Transactions' requires the disclosure of information relating to material transactions with parties who are deemed to be related to the reporting entity.

The Fund and European Investment Consulting are considered related parties by virtue of Julian Alworth's role as a Director of EGI and his employment by and part ownership of European Investment Consulting, a provider of consulting services to the Fund. Fees charged directly to the Fund for the period amounted to €17,054 (30 June 2019: €15,895).

European and Global Advisers LLP ("EGA LLP") is considered a related party as David Costin and Julian Alworth are Directors of EGI and partners in EGA LLP. See page 4 for a list of Sub-Funds for which EGA LLP is the portfolio manager.

The below table shows fees paid to EGA LLP for facility fees, research costs and UK tax reporting for the financial period ended 30 June 2020 and 30 June 2019:

Sub-Fund Name	30 June 2020	30 June 2019
Plurima Theorema European Equity Long-Short Fund	€564	€1,088
Plurima TORO Fund	Nil	€52,539
Plurima Multi Selection Fund	Nil	€2,500

#### 4. Related Parties (continued)

Fees outstanding to EGA LLP as at 30 June 2020 amounted to €3,799 (31 December 2019: €533).

The Manager administers the security lending scheme on behalf of the participating Sub-Funds, and receives a fee to cover expenses and time incurred in the process. Please see Note 15 for details.

Twenty Four Asset Management Limited is the Portfolio Manager of Plurima Apuano Flexible Bond Fund. This Sub-Fund has investments in the TwentyFour Income Fund Ltd and TwentyFour Select Monthly Income Fund Ltd, funds managed by Twenty Four Asset Management Limited, valued at €2,760,334, 4.47% of the Net Assets of the Sub-Fund (31 December 2019: €3,265,159, 4.65% of the Net Assets of the Sub-Fund). This would be considered a related party transaction by virtue of Portfolio Manager connection.

#### **Connected Persons**

In accordance with the requirements of Regulation 41(1) of the CBI UCITS Regulations, any transaction between the Fund and a Connected Person must be conducted at arm's length and in the best interests of the Unitholders where a "Connected Person" means "the Manager, the Trustee / Depositary, their delegates or sub-delegates and any associated or group company of such parties or their delegates or sub-delegates. The Manager is satisfied that there are arrangements in place (evidenced by written procedures) to ensure that the obligations set out in the CBI UCITS Regulations applied to all transactions with connected parties and that transactions with connected parties entered into during the period complied with the obligations set out in the CBI UCITS Regulations.

#### 5. Efficient Portfolio Management

Where considered appropriate, a Sub-Fund may utilise financial derivative techniques and instruments for efficient portfolio management and/or to protect against foreign exchange risks, subject to the conditions and within the limits laid down by the Central Bank of Ireland. These techniques and instruments include, but are not limited to futures, options, swaps and forward foreign exchange contracts, details of which are disclosed in Note 11. Please see Note 10 for details of cash held as collateral. Details of securities lending are provided in Note 15.

#### 6. Financial Instruments and Associated Risks

The Fund's activities expose it to a variety of financial risks: market risk (including other price risk, interest rate risk and foreign currency risk), credit risk and liquidity risk.

The Fund is also exposed to operational risks such as settlement and custody risk. Custody risk is the risk of loss of financial assets and liabilities held in custody occasioned by the insolvency or negligence of the Trustee. Although an appropriate legal framework is in place that reduces the risk of loss of value of the financial assets and liabilities held by the Trustee, in the event of failure, the ability of the Trustee to transfer the financial assets and liabilities might be impaired.

A full description of the risks the Fund is subject to and how the risks are managed is disclosed within the annual audited financial statements for the year ended 31 December 2019.

#### 7. Fair Value Measurements

IFRS 13, Fair Value Measurement, requires a fair value hierarchy for inputs used in measuring fair value that classify investments according to how observable the inputs are. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's assumptions, made in good faith, about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy is categorised into three levels based on the inputs as follows:

Level 1 - Valuations based on quoted prices in active markets for identical assets or liabilities (level 1);

Level 2 - Valuations based on quoted prices in markets that are not active or based on inputs other than quoted prices for which all significant inputs are observable, either directly (as prices) or indirectly (derived from prices) (level 2) and:

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement (level 3).

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement (lowest being level 3).

Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect Fund management's assumptions, made in good faith, about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The determination of what constitutes "observable" requires significant judgment by Fund management. Fund management considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to Fund management's perceived risk of that instrument.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, Fund management's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. Fund management uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

#### **Valuation Techniques**

When fair values of listed equity and debt securities, as well as publicly traded derivatives at the reporting date, are based on quoted market prices or binding dealer price quotations (official closing prices), without any deduction for transaction costs, the instruments are included within level 1 of the hierarchy. When the Fund has assets and liabilities with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the off-setting risk positions and applies the official closing prices to the net open position as appropriate.

For all other financial instruments, fair value is determined using valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models and other relevant valuation models.

### 7. Fair Value Measurements (continued)

#### Valuation Techniques (continued)

The Fund uses widely recognised valuation models for determining fair values of over-the-counter derivatives. For these financial instruments, inputs into models are market observable and are therefore included within level 2.

The fair values of currency exchange contracts (forwards and swaps) are calculated by reference to current exchange rates for contracts with similar maturity and risk profiles.

The fair values of any investments in any open ended collective investment schemes (CIS) are based on the net asset value (market value of the underlying CIS's assets less liabilities / number of shares) calculated by the administrator of the underlying CIS. The net asset value of the underlying CIS is adjusted for any factors that indicate that the net asset value per share, as calculated by the administrator of the underlying CIS, may not be the fair value. Investments in CIS are categorised in level 2, except for any ETF (Exchange Traded Funds), which may be classified as level 1.

For the Fund's assets and liabilities not measured at fair value at 30 June 2020 Cash at Bank and Bank overdraft are classified to level 1 and the remaining Fund's assets and liabilities are classified to level 2.

The following table's presents information about the Fund's assets and liabilities measured at fair value as of 30 June 2020:

Opening balance	169,215
Total gains and losses recognised in profit or loss	10,556
Purchases	-
Sales	(34,811)
Transfers into or out of level 3	
Closing balance	144,960

There were no transfers between level 1, level 2 and level 3 during the period for the Sub-Funds not disclosed in the above tables.

#### Level 3 securities valuations methodology

Level 3 securities were valued by a competent person selected by the Directors and approved for such purpose by the Trustee with care and in good faith in accordance with the Fund's valuation policy. The approach taken to establish the probable realisation value for such assets is to use cost or last traded price.

The competent person for Plurima Apuano Flexible Bond Fund is Twenty Four Asset Management Limited.

The competent person for Plurima 10 Convictions Fund is Olympia Wealth Management.

### 8. Foreign Exchange Translation

The exchange rates as at 30 June 2020, which were used to convert assets and liabilities denominated in foreign currencies back to EUR were as follows:

Currency	30 June 2020	31 December 2019
AED	4.125497	4.123109
AUD	1.631300	1.596842

EUR	1.100120	1.180178

The exchange rates as at 30 June 2020, which were used to convert assets and liabilities denominated in foreign currencies back to USD were as follows:

Currency	30 June 2020	31 December 2019
HKD	7.750436	7.791803

### 9. Soft Commissions

The Manager and Portfolio Managers may effect transactions with or through the agency of another person with whom the Manager and Portfolio Managers have arrangements under which that party will from time to time provide or procure for the Manager and Portfolio Managers, goods, services or other benefits, such as research and advisory benefits, the nature of which must be such that their provision will assist in the provision of investment services to the Sub-Funds and for which no direct payment is made, but instead the Manager and Portfolio Managers undertake to place business with that party.

The Manager and Portfolio Managers will not retain the benefit of any commission rebate (being repayment of a cash commission made by a broker or dealer to the Manager) paid or payable from any such broker or dealer to the Manager and Portfolio Managers for or on behalf of the Sub-Funds.

There were no soft commissions arrangements affecting any of the Sub-Funds during the period ended 30 June 2020 or during the year ended 31 December 2019.

### 14. Net Assets Value

There were no adjustment made to the figures in the financial statements for the period ending 30 June 2020 that would cause the net asset value of the Sub-Funds to differ from the published valuations as at 30 June 2020. The net asset values in the financial statements as at 31 December 2019 for the below Sub-Funds differs from that included in the published valuations as at 31 December 2019. The difference is due to the change in methodology in accounting for organisation costs as prescribed by IFRS, and the methodology indicated in the most recent Prospectus. This does not have any effect on the published or dealing Net Asset Values of any of the Sub-Funds.

	Plurima Mosaico Fund

		€	
Total Net Assets for financial statement purposes	22,047,156	52,820,861	
Adjustment for unamortised organisation costs	-	3,366	
Total Net Assets for Unitholder dealing/prospectus	22,047,156	52,824,227	

### 15. Security Lending

The Sub-Funds detailed below provide securities on loan to third parties in exchange for a collateral payment. The gross income amount of securities lending for the period ended 30 June 2020 is €17,123 (30 June 2019: €36,381) and the net amount of securities lending income is €9,924 (30 June 2019: €21,355). Direct costs amounted to €6,849 (30 June 2019: €14,553). There were no indirect costs. The Manager administers the security lending scheme on behalf of the participating Sub-Funds, and receives a fee to cover expenses and time incurred in the process. For 2020 the Manager was paid a fee of €5,877 (30 June 2019: €6,834). The below tables contain the aggregate collateral value of securities on loan with the relevant counterparties as at 30 June 2020:

<sup>&</sup>lt;sup>1</sup> PCCO - Plurima CSV China Opportunities Fund terminated on 31 December 2019.

### 16. Significant Events During the Period

During the period we saw the development of the coronavirus Covid-19 outbreak initially in China and now reaching most continents. It has been declared a global pandemic by the World Health Organisation. The nature and extent of the impact of such an event is difficult to predict but it may adversely affect the return on each Fund and its investments and there is growing concern about the impact on the world economy, especially if there is a second wave in the coming months. There was a significant correction in the financial markets in the period although this has been partially recouped. The Directors of the Manager and the Investment Managers continue to monitor the efforts of governments to contain the spread of the virus and monitor the economic impact on the investments in the portfolios.

Plurima Apuano Dynamic Equity Fund was terminated on 13 February 2020.

The VB Strategy Ranking Fund was terminated on 14 May 2020.

There were no other significant events during the period.

#### 17. Events After The Period End

There were no significant events after the end of the financial period which would require adjustment to or disclosure in the financial statements.

<sup>&</sup>lt;sup>2</sup> PVBSRF - Plurima VB Strategy Ranking Fund terminated on 14 May 2020.

## 18. Valuation of Thema International Fund PLC and Herald LUX – Absolute Return by Plurima Alpha Selection Fund

At a board meeting held on 15 December 2008, the Board of Directors of European and Global Investments Limited (the "Manager"), with the consent of RBC Investor Services Bank S.A., Dublin Branch (the "Trustee"), decided to suspend the calculation of the net asset value and the issue and redemption of units in the Plurima Alpha Selection Fund (the "Sub-Fund") with effect from 16 December 2008, pursuant to its powers under Clause 17.03 (f) of the Trust Deed of the Fund. Clause 17.03 (f) of the Trust Deed provides that the Manager may suspend the calculation of the Net Asset Value and dealing in a Sub-Fund if "any other reason makes it impossible or impracticable to determine the value of a substantial portion of the assets of the Fund". The decision to suspend the Sub-Fund was taken due to the belief of the Manager that two of the underlying funds (both UCITS, one Irish domiciled and one Luxembourg domiciled) in which the Sub-Fund had invested may have been seriously impacted by issues relating to the Madoff scandal. The Irish UCITS in which the Sub-Fund invested is Thema International Fund plc ("Thema"), which itself suspended on or about 17 December 2008. The Luxembourg Fund in which the Sub-Fund invested is Herald (Lux) ("Herald"), which also suspended in a similar fashion. Thema and Herald holdings represented approximately 18.8% of the net assets of the Sub-Fund as at 16 December 2008.

Accordingly, following consultation with the Central Bank of Ireland, the Manager decided that the best solution would be for the Sub-Fund to enter into a scheme of reconstruction which would involve:

- i the transfer of the liquid assets of the Sub-Fund to the newly established Plurima Frame Alpha Strategy Fund (the "New Sub-Fund") in consideration for the issue of Units in the New Sub-Fund to Unitholders in the Sub-Fund, and;
- ii the illiquid assets of the Sub-Fund, namely the holdings in Thema and Herald, (together with a provision of €150,000 to cover any expenses) remaining in the Sub-Fund (and each Unitholder remaining a Unitholder of the Sub-Fund). These assets are written down as zero on the Sub-Fund Statement of Financial Position.

As disclosed in prior years, settlement of the claim in relation to the Thema Fund was made in 2013 and the distribution was made to Unitholders in December 2013.

On 20 February 2020 the Sub-Fund received a final residual payment for liquidation of €29,892.32 representing the last expected payment from this asset.

On 11 December 2014 Herald (Lux) Liquidators signed a settlement with the Trustee of the Estate of Bernard Madoff. The agreement recognises the customer claim of Herald (Lux). It allows a customer claim of 90% of the net amount invested by Herald (Lux). It is not clear yet what the exact amount will be. In Quarter 4 2015, the Manager received several requests for information from the liquidator of Herald (Lux). EGI provided all requested details and it has been confirmed by the liquidators that they are satisfied that the Sub-Fund has completed all relevant AML and KYC requirements.

On 2 June 2017 the liquidators announced they reached a settlement agreement with the parties involved in the Luxembourg proceedings. The settlement agreement will result in a considerable contribution to the estate in addition to the funds from the Madoff estate.

The settlement agreed in the Luxembourg proceedings were approved by the Court on 30 November 2017. In December 2017 the US Trustee announced he will seek approval from US Bankruptcy Court for the allocation of a distribution on the allowed customer claims. The percentage announced was 3.585%. The liquidators will aim at integrating this amount in the forthcoming distribution payment.

Plurima Alpha Selection Fund received payments of HSBC settlement monies on 18 April 2018 of €164,213. On 2 August 2018 Plurima Alpha Selection Fund received a further payment of \$591,061 from Herald.

The Sub-Fund made onward distributions to unitholders of these monies. The liquidator has confirmed that further payments will be made.

As of December 2019, the liquidators were in the process of finalising the sale of the allowed claim held by Herald (Lux) in the BLMIS bankruptcy. However, in March 2020 due to the situation of financial markets the liquidators were notified by the potential buyer of the claim of the break off of the negotiations. The liquidators are now reconsidering all options regarding the next steps to be taken in view of the closing of the liquidation and a final distribution. The liquidators received the 11th interim distribution from the BLMIS Trustee in the amount of USD 4,543,290 or 1.975% of the allowed claim.

#### 19. Plurima Global Star Return Fund

With effect from 2 November 2018 the Manager decided in line with the procedure laid out in the Prospectus to suspend the calculation of the net asset value and the issue and redemption of units in the Plurima Global Star Return Sub-Fund pursuant to its powers under Clause 17.03 (e) of the Trust Deed of the Fund.

#### 20. Material Changes to Prospectus

- a. Incorporation of disclosures to comply with the Central Bank Dear CEO Closet Index Letter.
- b. Insertion of definition of "Benchmark Regulation" and a new Section headed "Application of the Benchmark Regulation" in the general section headed "Investment objective and policies";
- Update of list of sub-funds to reflect those which are active and those which have since terminated and in respect of which application has been made to the Central Bank for revocation of approval;
  - PLURIMA Frame Alpha Strategy Fund; and
  - PLURIMA European Absolute Return Fund.
- d. Update of Section headed "Investment Objectives and Policies" on pages 17 and 18 to make some general changes and to insert new sections headed "Performance Measurement" and "Active Nature of management of Sub-Funds";
- e. Update to Section 2.4 and 2.8 of the Investment Restrictions to reflect the CBI UCITS Regulations 2019;
- f. Update of Risk Factors;
- g. Update of Section Headed "Paying Agents" in order to remove reference to EGA as paying agent in the UK;
- VB Selection Opportunities Fund The reference to EONIA was removed as it is no longer relevant.
- i. Plurima Strategy Portfolio Fund This Supplement was updated to state that the performance benchmark for the Sub-Fund is EONIA and that the Sub-Fund is considered to be actively managed in reference to EONIA by virtue of the fact that it uses EONIA for performance comparison purposes.
- j. Plurima Latin America Fund it is proposed to delete the statement that the Sub-Fund will aim to have a risk profile in line with that of the MSCI Latin America index.
- k. Plurima Pairstech Market Neutral Fund the removal of the following statement from the investment objective "with volatility lower than that of equity market indices (such as the S&P 500 Index, the DJ Euro Stoxx 50 Index and other G7 board market indices)."
- I. Plurima Mosaico Fund update of investment policy subject to investor approval;
- Toro Fund the updated Supplement for the Toro Fund dated 7<sup>th</sup> November, 2019 has been incorporated;
- n. The Supplements for the following sub-funds have been deleted from the Prospectus on the basis that the relevant sub-funds have terminated and application has been made / will shortly be made to the Bank for revocation of approval of the sub-funds:
  - Plurima VB Total Return Bond Fund;
  - Plurima Apuano Romulus Equity Fund;
  - Plurima CSV China Opportunities Fund;
  - Plurima Apuano Dynamic Equity Fund.
