General information

The funds described in this report are sub-funds of a SICAV (Société d'Investissement à Capital Variable) incorporated under Luxembourg law.

Performance

The investment return, or performance, of a mutual fund investment is measured by the change in value of the fund's shares. The net asset values per share (= redemption prices) with the addition of intervening distributions, which are, for example, reinvested free of charge within the scope of investment accounts at DWS Investment S.A., are used as the basis for calculating the

value. Past performance is not a guide to future results. The corresponding benchmarks – if available – are also presented in the report. All financial data in this publication is as of June 30, 2021 (unless otherwise stated).

Sales prospectuses

Fund shares are purchased on the basis of the current sales prospectus, the key investor information document and the articles of incorporation and by-laws of the SICAV, in combination with the latest audited annual report and any semiannual report that is more recent than the latest annual report.

Issue and redemption prices

The current issue and redemption prices and all other information for shareholders may be requested at any time at the registered office of the Management Company and from the paying agents. In addition, the issue and redemption prices are published in every country of distribution through appropriate media (such as the Internet, electronic information systems, newspapers, etc.).

Coronavirus crisis

The coronavirus has spread since January 2020 and has subsequently led to a serious economic crisis. The rapid proliferation of the virus was reflected in, among other things, significant price market distortions and substantially increased volatility at the same time. Restrictions on freedom of movement, repeated lockdown measures, production stoppages, as well as disrupted supply chains, are exerting major pressure on downstream economic processes, which caused global economic prospects to deteriorate considerably. Even though gradual recovery or a return to a certain "normality" was to be observed again in the markets in the interim – due, among other things, to assistance programs in the context of monetary and fiscal policy as well as extensive vaccination campaigns – the actual or possible mid- to long-term effects of the crisis on the economy, individual markets and sectors, as well as the social implications, cannot be reliably evaluated or adequately forecast at the time of preparing this report in light of the pace of the global spread of the virus and the associated high degree of uncertainty. Consequently, there may still be a material impact on the respective sub-fund's assets. A high level of uncertainty exists in relation to the financial implications of the pandemic, as these are dependent on external factors such as the spread of the virus/emerging variants and the measures taken by individual governments and central banks, the successful stemming of the development of infection rates and the speedy and sustainable restart of the economy.

The Management Company is therefore continuing its efforts, within the framework of its risk management strategy, to assess these uncertainties and their possible impact on the activities, liquidity and performance of the respective sub-fund. The Board of Directors of the SICAV is ensuring that the Management Company is taking all measures deemed appropriate to protect investor interests to the greatest possible extent. In coordination with the service providers, the Board of Directors observed the consequences of the coronavirus crisis and adequately included its impact on the respective sub-fund and the markets in which the respective sub-fund invests into its decision-making processes. As of the date of this report, no significant redemption requests had been made in respect of the respective sub-fund; the effects on the respective sub-fund's share certificate transactions are continuously monitored by the Management Company; the performance capability of the most important service providers did not experience any significant impairment. In this context, the Board of Directors of the SICAV satisfied itself in line with numerous national guidelines and following discussions with the most important service providers (especially the Depositary, the portfolio management and the fund administration) that the measures taken and the business continuity plans put in place (including extensive hygiene measures on the premises, restrictions on business travel and events, precautions to ensure the reliable and smooth running of business processes in the event of a suspected case of coronavirus infection, expansion of the technical options for mobile working) will curb the currently foreseeable or ongoing operational risks and will ensure that the respective sub-fund's activities will not be disrupted.

At the time of preparing this report, the Board of Directors of the SICAV is of the opinion that there are no signs indicating any doubt on the ability of the respective sub-fund to continue as a going concern, nor were there any liquidity problems for the respective sub-fund.

Market risk exposure (value-at-risk) (according to CSSF of	arcular 11/512)		
Lowest market risk exposure	. %	96.430	
LOWEST HIGHET HON EXPOSUIE	. /0	30.430	
Highest market risk exposure	. %	108.169	
riigiloot markot nok oxposars	. ,0	100.100	

The values-at-risk were calculated for the period from March 31, 2021, through June 30, 2021, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the relative value-at-risk approach as defined in CSSF circular 11/512.

99.970

In the reporting period, the average leverage effect from the use of derivatives was 0.0, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Lowest market risk exposure	%	0.000
Highest market risk exposure	%	95.971
Average market risk exposure	%	87.734

The values-at-risk were calculated for the period from March 31, 2021, through June 30, 2021, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the relative value-at-risk approach as defined in CSSE pricular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.1, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 845 562.21 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are valued to a small extent at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Assets reported in this report are not valued at derived market values.

Footnotes

* For structural reasons, there is no information on the investment portfolio for the sub-fund as of June 30, 2021. The sub-fund invests all of its net proceeds in total return swaps of one type in order to achieve a return that is linked to the performance of the relevant reference portfolio, whereby the nominal value amounted to the values listed individually by share class under "Additional information on the investment portfolio – June 30, 2021". As of June 30, 2021, the unrealized net appreciation of these transactions was USD 836 777 302.64 (100.02% of the fund's net assets). This type of total return swap agreement leads to receivables from swap transactions, whereby the amount of the receivables reflects the theoretical value.

Against the backdrop of the aforementioned explanations and due to technical reasons, the information within the statement of income and expenses and the statement of changes in net assets disclosed as part of this financial report is likewise not presented in a way which takes into account the link between the total return swaps and the respective share classes, but is instead presented at sub-fund level.

** Swaps as defined in Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012.

Additional information on the investment portfolio - June 30, 2021

The total amounts of the total return swaps listed in the investment portfolio and associated with the individual share classes correspond in each case to the total of the nominal amounts listed below, whose underlyings are the specified reference bonds:

With reference to the ESMA Opinion on Share Classes of UCITS of January 30, 2017 (ESMA34-43-296) and the transitional provisions defined therein stipulating that share classes that do not meet the principles defined in the ESMA opinion

the Management Company of the fund made an agreement, inter alia, with the Luxembourg Supervisory Authority ((Financial Sector Supervisory Commission (CSSF)) on the occasion of the merger of the former sub-fund Institutional Fixed Income of the SICAV DB Platinum IV into the sub-fund DWS Concept Institutional Fixed Income, which was newly launched in December 2019, that the sub-fund DWS Concept Institutional Fixed Income would be closed for further new subscriptions and would be continued for the purposes of existing share-holders under the proviso that the structure and investment policy of the merged sub-fund Institutional Fixed Income of the SICAV DB Platinum IV would remain identical.

⁻ were to be closed for investment by new investors after July 30, 2017;

⁻ and no additional investment by existing investors was permissible in such share classes after July 30, 2018,

Composition of the reference portfolio (according to CSSF circular 11/512)

60% iBoxx Euro Overall Index, 40% MSCI All Country World Net TR Index - in EUR

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	97.257
Highest market risk exposure	%	121.025
Average market risk exposure	%	110 728

The values-at-risk were calculated for the period from January 1, 2021, through June 30, 2021, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the relative value-at-risk approach as defined in CSSF circular 11/512.

In the reporting period, the average eleverage effect from the use of derivatives was 0.3, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 2 802 584 335.08 as of the reporting date. Does not include any forward currency transactions entered into for currency hedging purposes at the level of the share

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Footnotes

- * Some or all of these securities are lent.
- ** Floating interest rate
- *** The prepaid placement fee is amortized over a period of three years (as specified in article 12 (d) of the general section of the fund's management regulations).
 **** Does not include positions with a negative balance, if such exist.

Composition of the reference portfolio (according to CSSF circular 11/512)

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	83.942
Highest market risk exposure	%	100.427
Average market risk exposure	%	91 257

The values-at-risk were calculated for the period from January 1, 2021, through June 30, 2021, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the relative value-at-risk approach as defined in CSSF circular 11/512.

In the reporting period, the average eleverage effect from the use of derivatives was 0.0, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

^{**} The fund's consolidated net assets correspond to the sum of the results of the individual sub-funds. In the case of investments between sub-funds (in which one sub-fund invests in another sub-fund of the same umbrella fund), the corresponding accounts of the fund were not the object of an elimination for the purposes of the consolidated presentation of results.

^{***} In the case of derivatives and forward transactions, the amount reported as "total assets" comprises the positive balance of the netted individual positions within the same type of product, while negative balances are included under "total liabilities."

¹ The sub-fund was launched on March 31, 2021.
