Risk Indicator

The Risk Indicator is subject to change and is correct based on the data available at the time of publication.

Investment objective

To provide a high level of current income, consistent with the preservation of capital, by investing primarily in adjustable rate senior loans organized or located in the United States or Canada. The benchmark index is shown for performance comparisons purposes only. The fund is actively managed and does not track the index. The investment concerns the acquisition of units in an actively managed fund and not in a given underlying asset.

Investment strategy

- The fund invests primarily in senior, secured loans to non-investment grade corporations.
- Invesco seeks to invest in loans to companies which in its judgement exhibit mature and stable operating profiles, with dependable cash flow generation and strong asset coverage.
- To manage risk, the team keeps the portfolio broadly diversified and generally avoids industries they believe to be fundamentally flawed or speculative

Risk warnings

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Senior loans may be illiquid and more difficult to sell quickly at a fair price. Because of the risk of illiquidity of the instruments in which the product will invest, the processing of the redemption requests may be deferred in certain circumstances.

Interest rates on senior loans depend on the level of an underlying rate; as such, they may change and cause fluctuations in the net asset value of the product.

Senior loans are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the scheduled dates.

The product will hold debt instruments which are of lower credit quality and may result in larger fluctuations in the value of the product.

The product may also use derivatives for investment purposes. The use of derivatives may result in the product being significantly leveraged and may result in large fluctuations in the value of the product.

The product may invest in developing markets, this may cause large fluctuations in the net asset value of the product.

Past performance does not predict future returns. Please refer to next page for additional performance disclosure.

Returns may increase or decrease as a result of currency fluctuations.

All data sourced from Invesco unless otherwise stated.

⁴ Net of fees returns reflect management fees and fund expenses. Returns include reinvested distributions; classes which do not pay out distributions show NAV to NAV returns. Returns for periods of less than one year are cumulative; all others are annualised.

** The Management Company has appointed and delegated discretionary investment decisions with respect to the Fund to Invesco Senior Secured Management, Inc. ("The Investment Manager"). See prospectus for more information.

¹ Weighted average based on market values. Prior to November 2015, this was calculated based on par.

² Distribution Yield is equal to the most recent monthly dividend distribution multiplied by twelve and divided by the NAV at month-end. Indicative monthly distribution is used for HHX EUR AD class. Classes which pay distributions are: GX, HX, HHX AUD, HHX SGD, HHX EUR, HHX EUR AD, and HHX GBP. The distribution rate cannot be assured, is not intended to predict future performance, and will fluctuate. Class HHX EUR AD was previously class KH.

³ Invesco has launched a specific share class in light of the German Investment Act and the German Investment Tax Act. Please contact us for further details. Restrictions for KH and HHX units may also be seen in the Prospectus.

⁵ The benchmark for US dollar returns is the Credit Suisse Leveraged Loan Index. This index is designed to reflect the investable universe of the US\$-denominated leveraged loan market. Since inception returns for index are shown since 31 July 2006. There is no benchmark which appropriately reflects currency hedging for euro, sterling, Swiss franc or Australian dollar hedged classes. The benchmark index is shown for performance comparison purposes only. The Fund does not track the index.

⁶ All holdings of issuers domiciled in Canada and structured products domiciled in Cayman Islands are included in USA category. The Canadian exposure is relatively small and more closely correlated with US risk as well.

⁷ Original class inception date was 18 October 2013. Class was fully redeemed then relaunched. Performance inception from 30 October 2015.
