## Investment Objective and Policy

The Fund aims to provide capital growth by investing in equity securities of Hong Kong SAR companies.

At least two-thirds of the Fund's assets (excluding cash) will invest in equities of Hong Kong SAR companies. The Fund may invest directly in China B-Shares and China H-Shares and may invest up to 10% of its assets in China A-Shares through Shanghai-Hong Kong Stock Connect. The Fund may invest in financial derivative instruments including futures, forwards and options for the purposes of efficient portfolio management. The Fund may also hold cash.

## Risk Considerations

The capital is not guaranteed. Investments denominated in a currency other than that of the share-class may not be hedged. The market movements between those currencies will impact the share-class. Investments in small companies can be difficult to sell quickly which may affect the value of the fund and, in extreme market conditions, its ability to meet redemption requests upon demand. The fund will not hedge its market risk in a down cycle. The value of the fund will move similarly to the markets. Emerging markets will generally be subject to greater political, legal, counterparty and operational risk. The fund may hold indirect short exposure in anticipation of a decline of prices of these exposures or increase of interest rate. Changes in China's political, legal, economic or tax policies could cause losses or higher costs for the fund.

### Performance over 5 years (%)

Past performance is no indication of future fund performance. This depends on the trends in markets, investment returns and exchange rates (if relevant), and how successful the asset manager is in implementing the investment policy. The performance shown does not take account of any commissions and costs charged when subscribing and redeeming units. Prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

All fund performance data are on a NAV to NAV basis, net income reinvested. Data is not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the ongoing charges and the portfolio transaction costs, and including the impact of any performance fees if applicable.

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. Source: Schroders The Schroder ISF Hong Kong Equity fund was launched to accommodate a transfer of shareholders from the Schroder range of Hong Kong unit trusts to the Schroder ISF SICAV. Prior to August 2002 when the Schroder ISF Hong Kong Equity fund was launched the fund uses the track record of the Schroder Hong Kong Equity Unit Trust as a proxy performance track record. The since launch performance of the benchmark cannot be shown as it did not exist at the fund's launch date.

The fund currency may differ from that of your country of residence and the analysis of performance can differ when expressed in different currencies. For an explanation of the financial terms included in this factsheet visit [www.schroders.co.uk/glossary](http://www.schroders.co.uk/glossary)
