When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

The share class shown has adopted a hedging strategy intended to reduce the effect of exchange rate movements between the currency of the Fund's investment strategy and the currency of the share class. Ongoing Charges Figure	1.59%

The charges are the fees the Fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund. Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

The **Ongoing Charges Figure** (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

What are the Risks?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is subject to the following risks which are materially relevant: **Counterparty risk:** the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes. **Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities. **Derivative Instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks. **Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues. **Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. **Investment funds risk:** the risk that investing in other funds may be more costly or provide less liquidity than investing in underlying securities directly, or that a closed-end fund holding may trade at a premium or discount to its net asset value. Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

Glossary

**Comparator:** Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.
