

Mirabaud - Sustainable Global Strategic Bond Fund N dist. USD

30 April 2024

Investment Overview

A global 'go anywhere' best ideas approach to fixed income investing. A top-down, macro view informs our dynamic allocation across the different geographies, sectors and components of the global fixed income universe, moving between credit and duration risk. Bottom-up analysis incorporates fundamental, technical and valuation (FTV) factors, along with ESG integration to help us identify strong sustainable opportunities. We mitigate down markets with an active hedging process.

Approach to Sustainability

We encourage responsible and sustainable industry practices, and assess how material ESG issues can positively and negatively impact the overall credit profile. The integration of ESG and extra-financial considerations into our analysis is key to understanding risk and long-term opportunity. Our three-step process: 1. Exclusion – we apply an exclusion filter for controversial activities; 2. Positive screening – companies are reviewed according to their ESG-climate profile using a traffic light system that classifies the universe into green, orange and red investments; we exclude the worst performing 20%. Eligible companies are subject to Fundamental, Technical & Valuation analysis to define the portfolio 3. Engagement (post-investment), through active engagement we address ESG/climate issues and encourage best practices among orange issuers and across critical sectors for energy transition.

Risk Information

Investments in debt securities are subject to interest rate, credit and default risk. The fund may invest in emerging markets that may be more volatile and generate higher operational risks than equity markets of well established economies. The fund may invest in lower rated securities that are subject to higher credit risk and are more volatile than higher rated securities. The fund may invest in asset backed instruments that would lose their value if their underlying assets value was to diminish or if their issuer was to default and be unable to meet its contractual obligations. The fund may invest in securities that are less liquid because buyers/sellers are not always in sufficient numbers to trade these securities readily. Financial derivative instruments may be used as part of the investment process, which may increase the fund volatility and expose the fund to the risk of default of its counterparties. Currency forwards will be used to reduce the currency risk generated by investments in share-classes or instruments that are not denominated in the fund base currency. The effectiveness of that hedging process will be subject to counterparty and operational risk. Cash placed in time deposits or money market funds are exposed to their issuer default risk.

IMPORTANT INFORMATION

This marketing material contains or may incorporate by reference information concerning certain collective investment schemes ("funds") which are only available for distribution in the registered countries. It is for your exclusive use only and it is not intended for any person who is a citizen or resident of any jurisdiction where the publication, distribution or use of the information contained herein would be subject to any restrictions. It may not be copied or transferred.

This material is provided for information purposes only and shall not be construed as an offer or a recommendation to subscribe, retain or dispose of fund units or shares, investment products or strategies. Before investing in any fund or pursuing any investment strategy, potential investors should take into account all their characteristics or objectives as well as consult the relevant legal documents. Potential investors are recommended to seek prior professional financial, legal and tax advice. The sources of the information contained within are deemed reliable. However, the accuracy or completeness of the information cannot be guaranteed and some figures may only be estimates. In addition, any opinions expressed are subject to change without notice. There is no guarantee that objectives and targets will be met by the portfolio manager.

All investment involves risks, returns may decrease or increase because of currency fluctuations and investors may lose the amount of their original investment. Past performance is not indicative or a guarantee of future returns.

This communication may only be circulated to Eligible Counterparties and Professional Investors and should not be circulated to Retail Investors for which it is not suitable.
