BlackRock Strategic Funds

April 2024

Performance, Portfolio Breakdowns and Net Asset information as at: 30-Apr-2024. All other data as at: 13-May-2024.

This document is marketing material. For the Investors in LatAm. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve positive absolute returns through a combination of capital growth and income on your investment regardless of market conditions.
- The Fund seeks to gain at least 70% of its investment exposure to equity securities (e.g. shares) and equity-related securities of companies globally.
- The Fund will invest at least 70% of its assets in equity securities, other equity-related securities and when determined appropriate, fixed-income (FI) securities (such as bonds), money market instruments (MMIs) (i.e. debt securities with short term maturities) deposits and cash.

RISK INDICATOR

Lower Risk Potentially Lower Rewards Compared to the potential of the pot

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact
 on the performance of fixed income securities. Potential or actual credit rating
 downgrades may increase the level of risk.
- The value of equities and equity-related securities can be affected by daily stock market
 movements. Other influential factors include political, economic news, company
 earnings and significant corporate events.
- Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
