Investment Policy

Credit Suisse (Lux) Cat Bond Fund is an actively managed UCITS fund that aims to invest in a diversified portfolio of catastrophe bonds ("Cat Bonds"). Cat Bonds are financial securities that transfer insurance risk to the capital markets. Cat Bonds are typically floating rate securities for which the total return consists of the collateral return and the coupon (i.e. reinsurance premium), in the absence of a pre-defined "trigger" event, for example a hurricane or an earthquake. If a trigger event occurs, the Fund may lose all or a portion of its principal invested in such a Cat Bond. The Fund is entitled to receive the return of its principal and interest payments so long as no trigger event occurs. The Cat Bonds are further selected according to ESG Factors as set out in the CSILS ESG Framework and defined in the SFDR Annex of the prospectus. The Fund qualifies as a financial product under Art. 8 (1). Furthermore, the Fund seeks in principle to achieve a low correlation to the returns of traditional asset classes.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Performance overview - monthly & cumulative

since 01.01.2024

Performance overview - cumulative

since 01.02.2016

Until **18.01.2021**, the Fund had different characteristics and performance was achieved under circumstances that no longer apply. Merger with Lombard Odier Funds – CAT Bonds as per 18.01.2021.

Performance overview - monthly & YTD

Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Event risk: In the case a trigger event occurs assets held by the Fund is written down and thus may lose substantially in value.
- Portfolio concentration risk: For example due to the limited number of independent insurance perils that are covered by Cat Bonds
- Residual credit risk: For example due to exposures to certain issuers of securities in which the collateral held in the Cat Bond trust account is invested. Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments generally have low credit risk.
- Liquidity and valuation risk: For example due to ongoing insurance events and / or due to changes in market expectations of the final losses related to insurance events that have occurred. Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Model risk and risk assumption: For example due to highly uncertain assumptions that could be based on subjective judgment to a certain degree and / or due to the difficulty in predicting type, frequency and severity of catastrophic events.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Subfund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Regulatory Political and Legal risks: For example due to unanticipated changes in insurance regulations to which the cat bond is exposed to, such as retrospective modifications of insurance laws that might make insurers (and by consequence, reinsurers) responsible for business interruption losses from insured's policies caused by COVID-19, notwithstanding the requirement of "physical damage" and other policy limitations.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant investment exposure.
- Other risks include, but are not limited to: Failure to achieve investment objectives, illiquidity risk/redemption right limitation, foreign exchange risks, tax risks, uncertainty of loss estimates and their development over time, risk of correlation with other asset classes, risk of cyclical fluctuations, limited ability to hedge, reliance on certain loss-related information, risk of indemnity, index or hybrid triggers, risk of maturity extension, risk of "follow the fortunes", risk of limited operating history and resources of issuers.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

Investors may lose part or all of their invested amount.

The full offering documentation including complete information on risks may be obtained free of charge from a Credit Suisse client advisor, representative, or, where applicable, via Fundsearch (credit-suisse.com/fundsearch).

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

Risk profile²

PRIIP SRI

Larger values (up to 7) indicate higher risk while lower values (up to 1) indicate lower risk.

² The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

ESG Approach

This fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector). It applies the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg), including norms-based, values-based and business conduct exclusions to Sponsors of CAT Bonds. Credit Suisse Insurance Linked Strategies ("CSILS") has adopted a CSILS ESG Framework that directs and governs activities related to sustainable investing. The CSILS ESG Framework defines how ESG Factors are taken into account by the Investment Manager to identify Cat Bonds and to reach the Fund's long-term investment objectives and principles, while managing certain Sustainability Risks. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

³ CS Product Sustainability Classifications and SFDR Article are valid at the time of publishing and may be subject to change.

⁴ If the currency of a financial product and/or its costs is different from your reference currency, the return and cost may increase or decrease as a result of currency fluctuations.

⁵ Active Ownership is part of the fund's strategy to act in the best interests of its investors and to preserve and optimize the long-term value of their investments. To promote best practices and to ensure that the investee companies are sustainable and successful in the long term, Active Ownership is designed to influence the investee companies on two levels: first, through proxy voting, and second, through engagement. In the case of investments in other funds (Target Funds), the fund has no or only limited ability to exercise Active Ownership on the Target Fund, resp. on the Target Funds' investee companies.

Glossary

Accumulating	Indicates a regular reinvestment of the dividends received in the portfolio itself
ESG aware	This product undertakes investments that explicitly assess and integrate the sustainability characteristics of companies in the investment process.
CSAM proprietary ILS ESG scoring methodology	The Investment Manager has a comprehensive ESG Framework ("CSILS ESG Framework") in place that directs and governs the integration of certain environmental and social characteristics into the investment process. Please refer to the prospectus for more details.
ESG benchmark	A ticked 'ESG benchmark' box reflects that the ESG section in this document compares the ESG performance of the portfolio with an ESG index. The fund does not use a reference benchmark to attain the environmental and/or social characteristics promoted.
Ex post	Refers to metrics based on historical data
Expected annual no-loss yield	The expected annual no-loss yield represents the total return anticipated if all instruments in the portfolio are held until maturity and includes a short term interest rate representing the expected collateral return. "No-loss" means in the absence of any catastrophe events causing a notional loss. It does not take into account costs, changes in the portfolio, market fluctuations and potential defaults.
Investment universe	The investment universe is composed of all relevant cat bonds in the cat bond market.
Key risk figures	Key risk figures (i.e. 95% and 99% - percentile annual VaR as well as the annual expected loss) are based on actual portfolio position data. All risk figures are modeled numbers produced using a third-party vendor catastrophe risk model and are subject to modeling uncertainty and change in assumptions over time. The risk model employs Monte Carlo type simulations where several hundred thousand of catastrophe events are generated and their financial impact on the portfolio is calculated. The annual expected loss is the simulated average loss per annum. The 95% and 99% - percentile annual VaR figures result from the expected annual no-loss yield in USD minus the modelled annual aggregated losses corresponding to the respective percentile.
Maximum drawdown	Represents the worst possible result (in percentage terms) that occurred during the period being analyzed.
MTD	Month-to-date
NAV	Net Asset Value
Not scored	This category is composed of all securities within the investment universe for which a rating has not been determined. Generally, all relevant cat bonds in the cat bond market are scored by the investment team. However, there could be investments without scoring (e.g. materiality and/or timing related).
Ongoing Charges	The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from fund fiscal year end and since inception, the ongoing charges figure is based on estimated expenses. After that, the ongoing charges correspond to the TER of the last annual report. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling shares/units in another collective investment undertaking.
Overall ESG CAT Score	The Investment Manager integrates ESG Factors on three levels when investing into a new Cat Bond: Sponsor level, Transaction Level and Collateral level. For each of these three levels a proprietary ESG assessment is conducted and an ESG score is calculated by the Investment Manager, which feeds into an "Overall ESG CAT Score" on Cat Bond level. Additionally, the Investment Manager maps a Cat Bond, if applicable, to one or more of the selected United Nations Sustainability Development Goals (SDGs) as defined in the CSILS ESG Framework. The Investment Manager employs quantitative thresholds on the total insured value of the Cat Bond transaction for that purpose, or on the risk capital which is freed up through a Cat Bond insurance transaction and is utilized to contribute to sustainability projects. Based on this mapping, the Bond receives a "Thematic Investing Score", which also feeds into the Overall ESG CAT Score. The Overall ESG CAT Score is factored into the Investment Manager's investment decision and portfolio construction process. The Overall ESG CAT Score ranges from 0-10, 10 reflecting the highest ESG score.
QTD	Quarter-to-date
Sustainable Finance Disclosure Regulation (SFDR)	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector
Sustainable investment objective	Where the 'sustainable investment objective' box is ticked, this means that the product implements CSAM investment strategies that allocate capital into investments that offer solutions to society's challenges and meet a sustainable investment objective. The sustainable investment objective is achieved through a dedicated investment process focusing on investments addressing specific ESG challenges. An unticked box reflects that the product does not aim to meet a sustainable investment objective.
TNA	Total Net Assets
YTD	Year-to-date

Warning statements

Asset breakdown	Indicative allocation may change over time. All holdings are shown strictly for information purposes only and do not constitute investment recommendations of Credit Suisse. Please note that this does not constitute an offer or a solicitation to buy or sell any interest or any investment.
Swinging Single Pricing	For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus
Performance start date	Performance calculation and presentation start with the first full month of an invested strategy. This can lead to a difference in launch and performance start dates.
PRIIP SRI	The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.

ESG Notes

The figures contained in this section are not audited. Where ESG related information, statements and scorings are made in this document, CS may have, partially or entirely, relied on publicly available information, internally developed data and/or information obtained from other third-party sources which CS believes to be reliable. CS' ability to verify such ESG objectives may be limited by the reliability of the data available in respect of the underlying assets and the status of the regulations in relation to tracking and providing such data. CS has not independently verified any information obtained from these public and third-party sources and cannot make any representations or warranties as to its accuracy, completeness or reliability. It is possible that the data from ESG data providers may be incorrect, unavailable, or not fully updated. This is especially true where CS has limited access to data from external parties regarding the underlying elements of an investment, for example due to a lack of look-through data. Such data gaps could result in an incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities. Investors shall not use the ESG data provided in this document for the sake of meeting their own regulatory disclosure or reporting requirements. CS cannot make any guarantee about the content or completeness of such ESG disclosures, which remain subject to change and cannot be relied upon. In particular, CS shall not be liable for any errors or omissions in connection with any ESG data herein, or for any direct, indirect, special, punitive, consequential or any other damages (including lost profits). In the absence of a standardized, industry-wide ESG classification system, CS has developed its own ESG framework (the "CS Sustainable Investment Framework"). Therefore, investors should note that the ESG classification of the fund reflects CS' opinion and is based on the CS Sustainable Investment Framework which classification may vary from the classification made by third parties. The fact that a fund follows the CS Sustainable Investment Framework does not necessarily mean that it meets the investors overall investment objectives, nor their sustainability preferences. Given that sustainability regulations and guidelines are still developing, CS may need to review certain ESG classifications/descriptions as industry practices change and as more regulatory guidance becomes available. The ESG-performance of a portfolio might also differ from its financial performance and CS cannot make any representation as to the correlation between financial and ESG performance. Sustainability-related practices also differ by region, industry and ESG issue and are continually evolving. Consequently, sustainability-related practices may change over time. Similarly, new local sustainability requirements may result in additional compliance costs, disclosure obligations or other restrictions on the fund. CS' view on the appropriate classification may also evolve over time, including in response to regulatory guidance or changes in industry approach to classification.

Important information

This material constitutes marketing material of Credit Suisse Insurance Linked Strategies Ltd and/or its affiliates (hereafter "CS").

This material does not constitute or form part of an offer or invitation to issue or sell, or of a solicitation of an offer to subscribe or buy, any securities or other financial instruments, or enter into any other financial transaction, nor does it constitute an inducement or incitement to participate in any product, offering or investment.

This marketing material is not a contractually binding document or an information document required by any legislative provision.

Nothing in this material constitutes investment research or investment advice and may not be relied upon. It is not tailored to your individual circumstances, or otherwise constitutes a personal recommendation, and is not sufficient to take an investment decision.

The information and views expressed herein are those of CS at the time of writing and are subject to change at any time without notice. They are derived from sources believed to be reliable.

CS provides no guarantee with regard to the content and completeness of the information and where legally possible does not accept any liability for losses that might arise from making use of the information. If nothing is indicated to the contrary, all figures are unaudited. The information provided herein is for the exclusive use of the recipient.

The information provided in this material may change after the date of this material without notice and CS has no obligation to update the information.

This material may contain information that is licensed and/or protected under intellectual property rights of the licensors and property right holders. Nothing in this material shall be construed to impose any liability on the licensors or property right holders. Unauthorised copying of the information of the licensors or property right holders is strictly prohibited.

The full offering documentation including, the prospectus or offering memorandum, the Key Investor Information Document (KIID), the Key Information Document (KID), the fund rules, as well as the annual and bi-annual reports ("Full offering documentation"), as the case may be, may be obtained free of charge in one of the languages listed below from the legal entity/entities indicated below and where available via FundSearch (credit-suisse.com/fundsearch).

Information on your local distributors, representatives, information agent, paying agent, if any, and your local contacts in respect of the investment product(s) can be found below.

The only legally binding terms of any investment product described in this material, including risk considerations, objectives, charges and expenses are set forth in the prospectus, offering memorandum, subscription documents, fund contract and/or any other fund governing documents.

For a full description of the features of the products mentioned in this material as well as a full description of the opportunities, risks, and costs associated with the respective products, please refer to the relevant underlying securities prospectuses, sales prospectuses, or other additional product documents, which we will be pleased to provide to you at any time upon request.

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

This material may not be forwarded or distributed to any other person and may not be reproduced. Any forwarding, distribution or reproduction is unauthorized and may result in a violation of the U.S. Securities Act of 1933, as amended (the "Securities Act"). The securities referred to herein have not been, and will not be, registered under the Securities Act, or the securities laws of any states of the United States and, subject to certain exceptions, the securities may not be offered, pledged, sold or otherwise transferred within the United States or to, or for the benefit or account of, U.S. persons.

Investments in insurance-linked strategies, including the investment opportunity described herein, are speculative and risks include, among other things: (i) loss of all or a substantial portion of the investment due to leveraging, short-selling, use of derivatives or other speculative practices, (ii) incentives to make investments that are riskier or more speculative due to performance based compensation, (iii) lack of liquidity as there may be no secondary market for insurance-linked strategies and none is expected to develop, (iv) volatility of returns, (v) restrictions on transfer, (vi) potential lack of diversification and resulting higher risk due to concentration, (vii) higher fees and expenses associated that may offset profits, (viii) no requirement to provide periodic pricing or valuation information to investors, (ix) complex tax structures and delays in distributing important tax information and (x) fewer regulatory requirements than registered funds.

The performance of such insurance-linked investments depends on unpredictable factors such as natural catastrophes, climate influences, hauling capacities, political unrest, seasonal fluctuations and strong influences of rolling-forward, particularly in futures and indices. Prospective investors should independently and carefully assess (with their tax, legal and financial advisers) the specific risks described in available materials, and applicable legal, regulatory, credit, tax and accounting consequences prior to making any investment decision. If an investment is denominated in a currency other than your base currency consult with such advisor(s) as you consider necessary to assist you in making these determinations.

The duration of the liquidation of the Company or a Subfund will depend on the ability of the liquidator to sell the assets. Given the largely illiquid nature of the assets, the liquidation procedure may take longer than expected and there is no legal maximum of the duration of the liquidation. It may therefore take longer than expected until all liquidation proceeds have been distributed to Investors. Any Investor shall fully exercise his investor rights directly against the Company only in the case where the Investor appears himself and on his behalf in the register of Shareholders of the Company. In the case where an Investor invests in the Company through an intermediary (i.e., nominee) investing in the Company in his name but on behalf of the Investor, certain rights attached to the quality of Shareholder shall only be exercised through this intermediary.

Nothing in this document constitutes legal, accounting or tax advice. Credit Suisse does not advise on the tax consequences of investments and you are advised to contact a tax advisor should you have any questions in this regard. The levels and basis of taxation are dependent on individual circumstances and are subject to change.

In addition, there may be conflicts of interest with regard to the investment.

In connection with the provision of services, Credit Suisse AG and/or its affiliates may pay third parties or receive from third parties, as part of their fee or otherwise, a one-time or recurring fee (e.g., issuing commissions, placement commissions or trailer fees).

Prospective investors should independently and carefully assess (with their tax, legal and financial advisers) the specific risks described in available materials, and applicable legal, regulatory, credit, tax and accounting consequences prior to making any investment decision.

The alternative investment fund manager or the (UCITS) management company, as applicable, may decide to terminate local arrangements for the marketing of the shares/units of a fund, including terminating registrations or notifications with the local supervisory authority.

A summary of investor rights for investing into European Economic Area domiciled investment funds managed or sponsored by Credit Suisse Asset Management can be obtained in English via www.credit-suisse.com/am/regulatory-information, local laws relating to investor rights may apply.

Important note regarding ESG

There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.

The impacts of sustainability risks are likely to develop over time and new sustainability risks may be identified as further data and information regarding sustainability factors and impacts become available and the regulatory environment regarding sustainable finance evolves. These developments may entail the risk of reclassification under the CS Sustainable Investment Framework.

Where a sustainability assessment is identified as including elements which track Environmental, Social or Governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources may be limited in terms of correctness, accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g., lack of available data.

An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company/product can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Unless this has been explicitly communicated in the product or service documentation, no representation is given as to whether the product or service meets any specific regulatory framework or CS' own criteria for internal sustainability frameworks.

The non-financial / ESG-performance is independent of the financial performance of the portfolio or the product. The performances depend on various factors and may differ significantly.

Inclusion of ESG factors in investment strategy does not guarantee a positive sustainability impact or does not necessarily result in successfully identifying and mitigating all material sustainability risks.

The Product Sustainability classification of products and services in this document reflects the opinion of CS based on the CS Sustainable Investment Framework.

In the absence of standardized, industry-wide ESG classification system, CS has developed its own ESG framework. Therefore, CS' Product Sustainability Classification can vary from classification made by third-parties. Given the nascent nature of ESG /sustainability regulation and guidelines, CS may need to review the representation that is made in this document regarding the Product Sustainability classifications/descriptions in response to evolving statutory, regulatory or internal guidance or changes in industry approach to classification. This is true for Product Sustainability classification/description made by CS and third-parties. As such, any Product Sustainability classification/description referenced in this document is therefore subject to change.

The impacts of sustainability risks are likely to develop over time and new sustainability risks may be identified as further data and information regarding sustainability factors and impacts become available and the regulatory environment regarding sustainable finance evolves. These developments may result in a potential reclassification of products/services under the CS Sustainable Investment Framework.

In addition, due to the evolving nature of regulations, references to relevant regulations such as SFDR, may need to be reviewed in the future and are subject to change.

In assessing a particular investment, the funds and their Manager may be dependent upon information and data obtained through third parties that may be incomplete, inaccurate or unavailable.

This applies in particular for certain investments for which CS may only have limited access to data from external parties in respect of the underlying constituents of an investment, due to, e.g., absence of look-through data. In such cases, the fund's manager will attempt to assess such information on a best-effort basis. Such data gaps could result in the incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities. Sustainability-related practices differ by region, industry and issue which evolve accordingly. An investment's

sustainability-related practices or the assessment of such practices by the fund managers may change over time. Similarly, new sustainability requirements imposed by jurisdictions in which the fund manager does business and/or in which the funds are marketed may result in additional compliance costs, disclosure obligations or other implications or restrictions on the fund or on their managers. Under such requirements, the fund managers may be required to classify themselves or the funds against certain criteria, some of which can be open to subjective interpretation. The funds managers' and/or CS' views on the appropriate classification may develop over time, including in response to statutory or regulatory guidance or changes in industry approach to classification, and this may include making a change to the classification of the fund. Such change to the relevant classification may require further actions to be taken, for example it may require further disclosures by the funds' manager or the funds or it may require new processes to be set up to capture data about the funds or their investments, which may lead to additional cost.

In addition, under Regulation (EU) 2020/852 (the "Taxonomy Regulation") a financial product qualifying as Article 8(1) under SFDR that promotes environmental characteristics must make additional disclosures as of 1 January 2022 on such environmental characteristics and a description of how and to what extent its investments are in economic activities that qualify as environmentally sustainable under Article 3 of the Taxonomy Regulation. However, given the lack of available data, CS may not be in the position to take into account the EU Taxonomy alignment of investments in the investment decision process. Accordingly, there might be investments underlying these financial products that may not take into account the EU criteria for environmentally sustainable economic activities. CS will keep the situation under continuous review.
