

# HSBC Global Investment Funds

## BRAZIL EQUITY

Monthly report 31 March 2024 | Share class EC

### Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Brazilian shares.

### Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies of any size, that are based in, or carry out most of their business in Brazil. The Fund may invest up to 10% in Real Estate Investment Trusts and may also invest up to 10% of its net assets in other funds, including HSBC funds. The Fund may invest up to 10% in a combination of participation notes and convertible securities. See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Risk Disclosure

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark.
