### Investment Policy

This short-term variable net asset value money market fund seeks to provide investors with stable and low-risk returns. We aim to preserve the value of all capital invested and offer investors liquidity (the possibility to enter/leave the fund with the same day value). The fund invests in all types of money market instruments denominated in Euro like commercial paper, floating rate notes (notes with a variable interest rate), Treasury Bills, short-term bonds, deposits and certificates of deposits. The fund limits its weighted average maturity (duration) to 60 days and its weighted average life (weighted average of the times until an asset's principal is repaid) to 120 days. The fund is actively managed and the benchmark Euro Overnight Index Average (Eonia) is not used for portfolio construction but for performance measurement purposes only. Furthermore, we always make sure that a regular cash flow is obtained. We add value by forming a view on the evolution of interest rates, and acting on that view. In addition we selectively take positions in attractively priced credit instruments. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. Money Market funds (MMF) are not guaranteed investments. Investing in MMFs is different from investing in deposits and the risk of principal fluctuation exists. An MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilizing the NAV per unit or share. The risk of loss of the principal is borne by the investor. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

### Risk Profile

SRRI

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is risk-free.

This fund is in category 1 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past performances and future potential evolution of the markets, associated with financial instruments used to reach the investment objective is considered low.

These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is low. The fund's liquidity risk is set to low. Liquidity risks arise when a specific underlying investment is difficult to sell, causing possible difficulty to redeem your investment from the fund. No guarantee is provided as to the recovery of your initial investment.

### VaR (95% annualized)

## Legal Disclaimer

This is a promotional document and as such the views contained herein are not to be taken as an offer, advice or recommendation to buy or sell any investment or interest thereto. The information in this material can neither be considered as a fiscal or legal advice. Reliance upon information in this material is at the sole risk and discretion of the reader.

The Luxembourg funds mentioned in this document are sub-funds of SICAV's, established in Luxembourg. These SICAV's are duly authorized by the Commission de Surveillance du Secteur Financier (CSSF) in Luxembourg. Both sub-fund and SICAV are registered with the CSSF. All performance values that are not given in the fund currency have been calculated by conversion. The performance is calculated on the basis of the net asset value per unit: NAV-NAV (excluding any initial charge; distributions reinvested), with income reinvested. Where a Fund invests overseas, its value may fluctuate due to currency exchange rates. The Ongoing Charges are the sum of all commissions and costs charged on an ongoing basis to the average fund assets (operating expenses). The value is expressed as a percentage of the fund's assets. Unless otherwise stated, all data is unaudited.

Investment sustains risk which may include the risk of capital loss. Please note that the performance quoted above is historical and the value of your investment may rise or fall and also that past performance is no guarantee of current or future performance. The past performance is not indicative of future results and shall in no event be deemed as such. Price of Units and any income from them may fall as well as rise and is not guaranteed. Investors may not get back the amount originally invested. Foreign exchange volatility constitutes an additional exchange rate risk. Investors should not base investment decisions on this document. Read the prospectus before investing. The value of your investments depends in part upon developments on the financial markets. In addition, each fund has its own specific risks. See the prospectus for fund-specific costs and risks. For more detailed information about the investment fund, its costs and risks, please refer to the prospectus, Key Investor Information Document (KIID) and the corresponding supplements.
