Ostrum Global Inflation Fund
is a sub-fund of Natixis International Funds (Lux) I (the "SICAV").
I/A (EUR) ISIN LU0255251166
Natixis Investment Managers S.A., part of the BPCE Group, is the Management Company of the Fund.

OBJECTIVES AND INVESTMENT POLICY

- The investment objective of Ostrum Global Inflation Fund (the "Fund") is to outperform the Bloomberg World Government Inflation-Linked Bond Index Hedged in Euro over the recommended investment period of 2 years. The Fund is actively managed and integrates environmental, social and governance criteria. This Fund may not be appropriate for investors who plan to withdraw their money within less than 3 years.
- The Fund is managed in reference to and seeks to outperform the Bloomberg World Government Inflation-Linked Bond Index over the recommended investment period. In practice, the portfolio of the Fund is likely to include constituents of the index, however, the Fund is unconstrained by the index and may therefore significantly deviate from it.
- The Fund is actively managed and uses a research-driven strategy in selecting securities.
- The Fund invests primarily in inflation-linked debt securities of issuers worldwide which are member states or have their registered offices in member states of the Organisation for Economic co-operation and Development (OECD). It invests globally in debt securities of governments, public international bodies or other public or corporate issuers. Such debt securities may have a fixed, adjustable or variable rate. The Fund may invest up to one-third of its total assets in money market instruments, time deposits or other debt securities, such as non-inflation-linked debt securities. The Fund is based on a fully discretionary investment strategy depending on the assessment of the markets evolution by the Investment Manager within the global inflation-linked bonds markets.
This investment strategy is based on an active selection of inflation linked bonds. The strategy results from a combination of an approach that takes into account the overall portfolio allocation and then selects the transferable securities comprising the portfolio together with another approach that is based on the selection of transferable securities comprising the portfolio followed by a global analysis of the portfolio. Both approaches aim at the choice of issuers and the issues selection. This investment strategy is the main source of expected return. The Fund promotes environmental or social characteristics but does not have as its objective a sustainable investment. After excluding the most controversial issuers, the Investment Manager analyses a set of quantitative and qualitative indicators through the environmental, social and governance pillars.
- The Fund may use derivatives for hedging and investment purposes.
- Income earned by the Sub-Fund is reinvested.
- Shareholders may redeem Shares on demand on any business day in Luxembourg by 13h30
- Please refer to the section entitled "Subscription, Transfer, Conversion and Redemption of Shares" of the Prospectus for additional information.
