

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity Funds - Sustainable Climate Bond Fund

a sub-fund of Fidelity Funds

Fidelity Funds - Sustainable Climate Bond Fund Y-MDIST-Euro (hedged)

(ISIN:LU0479691668)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

Objective: The fund aims to achieve capital growth over time and provide income.

Investment Policy: The fund invests at least 70% of its assets, in investment grade corporate debt securities anywhere in the world, including emerging markets. The fund may also invest in money market instruments on an ancillary basis. The fund focuses on the management of climate related risks and favours issuers with the lowest carbon profiles with their sectors, encouraging a transition towards a greener environment through the selection of issuers on an improving carbon transition path and investing in carefully selected green bond issuers. The strategy aims to be proactive in dealing with climate change through the continual engagement with global corporate bond issuers.

The fund invests at least 70% of its assets in securities of issuers with favourable environmental, social and governance (ESG) characteristics and up to 30% in securities of issuers with improving ESG characteristics.

The fund may invest in the following assets according to the percentages indicated:

Listed China onshore bonds (directly and /or indirectly) up to 30% (in aggregate) with direct exposure up to 10%

hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may also invest in subordinated debt and preference shares.

The fund will aim to have a lower carbon footprint compared to that of the broader market.

Investment Process: In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations. The Investment Manager also considers ESG factors when assessing investment risks and opportunities. In determining favourable ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

The fund assesses the ESG characteristics of at least 90% of its assets. The average ESG rating of the fund will exceed the average ESG rating of the fund's investment universe (as represented by the benchmark) after excluding 20% of the assets with the lowest ESG rating.

When investing in green, social and sustainability bonds (the 'labelled bonds') the Investment Manager employs a selection process mainly based on the International Capital Market Association ('ICMA') Green and Social Bond Principles ('GSBP') guidelines. Bonds certified as being compliant with Climate Bonds Initiative ('CBI') or European Green Bond Standards ('EUGBS') will be prioritised but the Investment Manager may use

other standards where deemed appropriate.

The GSBP are voluntary process guidelines for issuing green and social bonds. They seek to support issuers in financing environmentally and socially sound and sustainable projects. The CBI seeks to mobilise the bond market for climate change solutions through the development of the Climate Bonds Standard and Certification Scheme, a labelling scheme for bonds and loans. The EUGBS is a voluntary standard designed to help scale up and raise the environmental ambitions of the green bond market.

The fund adheres to the Fidelity Sustainable Family of Funds standards. For more information, see "Sustainable Investing and ESG Integration".

Derivatives and Techniques: The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

Benchmark: Bloomberg Global Aggregate Corporate Index, an index that does not take into account ESG characteristics. Used for: investment selection, risk monitoring and performance comparison.

Risk Management Method: Commitment. Continues on next page

Base Currency: EUR.

Distribution: Income earned by the fund is reinvested in additional shares or paid to shareholders on request.

Investments may be made in currencies other than the fund's reference currency. Exposure to currencies may be hedged, for example with currency forward contracts. The fund's reference currency is the currency used for reporting and may be different from the currency of denomination of the investments.

Currency hedging is used to substantially reduce the risk of losses from unfavourable exchange rate movements. Currency look-through hedging is used to hedge the underlying currency effects to that of the hedged share class reference currency, thereby delivering the underlying market returns. In order to preserve returns from any active currency positions in the fund, such exposures are hedged with reference to the currency weights of a comparison index rather than to the currency denominations of the underlying securities.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

This Fund is categorised in risk class 4 because, in accordance with the investment policy, the value of the investments may fluctuate moderately. Consequently, both the expected return and the potential risk of loss may be average.

Additional risks: emerging markets, credit. The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment. Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	N/A
Exit charge	N/A
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing charges	0.70%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.*

The ongoing charges figure is based on expenses for the year ending 30 April 2022. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 29 July 2009. This class was launched on 9 February 2010.

The currency of the Fund is USD, while the currency of the Class is EUR.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an "**"; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.
