Mediolanum European Equity S Hedged Class A Units ("SHA Class") - ISIN: IE00B609PZ88

Objectives and Investment Policy

- The Sub-Fund's objective is to achieve long term capital growth.
- The Sub-Fund invests in European equities (listed shares) and equity related securities either directly and/or indirectly (e.g. by investing in derivatives).
- Part of the Sub-Fund's investment strategy involves allocating to securities selected on the basis of attributes or factors that are associated with higher returns. These include factors such as "value" (securities with an attractive valuation), "quality" (a profitable operating business with competitive advantages), momentum (strong recent price history). The attractiveness of such factors varies over time which will affect the Sub-Fund's performance.
- The Sub-Fund may use financial derivative instruments (FDIs) whose performance is linked to that of underlying security(s) or asset class(es). Their use may be for efficient portfolio management, hedging and/or direct Investment purposes.
- The Sub-Fund may enter into securities lending transactions.
- The Sub-Fund is actively managed (meaning that the Manager has full discretion over the composition of the Sub-Fund's portfolio of assets) and is not managed with reference to any benchmark.
- The Manager has flexibility to change the Sub-Fund's asset allocation (% of the portfolio invested in equities/FDIs etc) at any time and has discretion to select investments within each asset class.
- The Sub-Fund is appropriate for investors with a long term investment horizon.
- The product is compatible with investors that can bear and/or afford to fully or partially lose the capital invested and are comfortable with no capital guarantee.
- FDIs are used to remove the impact of exchange rate movements (hedging) which may affect the value of these Classes of Units.
- All income and gains generated by the LHA Class and SHA Class of Units will be reinvested. No dividends will be paid.
- Units can be bought or sold on any business day from the Fund's Administrator.
- Please refer to the Prospectus and Sub-Fund Information Cards, in the sections titled 'Investment Objectives and Policies' for more detailed information.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The risk category is based on historical data and may not be a reliable indication for the future.
- It is not guaranteed and may change over time.
- The lowest category does not mean 'risk free' investment.
- The Sub-Fund is classified in the risk category above due to the nature of its investments. The risk level is measured by the volatility of the Sub-Fund's past returns (or from the past returns of a suitable model portfolio if a full 5 year history is unavailable).
- The sub-fund invests in sufficiently liquid markets although, under stressed market conditions, it may only be able to sell assets at a discount.
- Equity prices generally fluctuate more than bonds. The value of equity securities can be affected by many factors including political, economic news, company earnings, corporate events, and market sentiment.
- The sub-fund has a specific geographic focus which may lead to greater price fluctuations than a broader market strategy.

A complete description of risks is set out in the Prospectus of the Fund in the section entitled 'Risk Factors'.

The following risks are considered material and may not be fully captured by the risk and reward indicator:
