Harbour US Equity

A Sub-Fund of PERINVEST (Lux) SICAV Class B LU0564490273

Sub-Fund managed by: Degroof Petercam Asset Services S.A.

Objectives and investment policy

Objective

- To maximize the return on your investment over the long term. Specifically, the Sub-Fund aims to exceed the returns of the U.S. Equity markets over an economic cycle while offering some degree of decorrelation from these markets.

Portfolio securities

- Under normal conditions, the Sub-Fund mainly invests in shares of companies, including small capitalisation companies, in the United States.
- The Sub-Fund may use derivatives to reduce its exposure to various investment risks (hedging) and for efficient portfolio management, but not to directly seek investment gains.

Investment process

- The Sub-Fund is managed actively and the composition of its portfolio may differ from its benchmark.**
The investment manager uses economic data, onsite visits and management calls to determine the level of investment in companies that appear to have the potential for growth.
Benchmark: 50% S&P500 and Russel 2000
Benchmark purpose: Performance comparison.

Designed For

- Investors who understand the fund's risks and who have an investment horizon of 3 to 4 years minimum.

Sub-Fund Reference Currency USD

Orders to buy and sell shares will be processed every Luxembourg Business Day.

The Sub-Fund issues only accumulation shares (shares in which any income earned is added to the share price).

Terms to Understand

- Derivatives** Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.
- Shares** Securities that represent a share in the business results of a company.

Risk and reward profile

- The value of an investment in the Sub-Fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the Sub-Fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.
- The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the Sub-Fund's share price over five years). Going forward, the Sub-Fund's actual volatility could be lower or higher, and its rated risk/reward level may be changed.
- The Sub-Fund's risk level reflects the following factor(s):
- As a class, shares carry higher risks than bonds or money market instruments.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

- Derivatives risk** Certain derivatives could increase Sub-Fund volatility or expose the Sub-Fund to losses greater than the cost of the derivative.
- Management risk** Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.
- Counterparty risk** The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honor its commitments to the Sub-Fund.
- Operational risk** In any market, but especially in emerging markets, the fund could lose some or all of its investments through fraud, corruption, political or military actions, the seizure of assets, or other irregular events.
- Liquidity risk** Certain securities could become hard to value, or to sell at a desired time and price.
