JPM Managed Reserves Fund X (acc) - USD a Share Class of JPMorgan Funds – Managed Reserves Fund a Sub-Fund of JPMorgan Funds

LU0513031053

The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to achieve a return in excess of US money markets by investing primarily in USD denominated short-term debt securities.

Investment Policy: At least 67% of the Sub-Fund's assets (excluding cash and cash equivalents) will be invested in debt securities including but not limited to US Treasury securities, securities issued or guaranteed by the US government or by its agencies, corporate securities and asset-backed securities. For efficient portfolio management purposes, the Sub-Fund may also enter into Reverse Repurchase Transactions with highly rated counterparties collateralised with securities including, but not limited to, US Treasury securities, corporate securities, asset-backed and mortgage-backed securities and equity securities. Such collateral will be USD denominated only and, where applicable, be restricted to investment grade. No maturity constraints will apply to the collateral.

The weighted average duration of the Sub-Fund's investments will not exceed one year and the initial or remaining maturity of each debt security will not exceed three years from the date of settlement. The initial or remaining average life of asset-backed securities will not exceed three years from the date of settlement.

Debt securities with a long-term rating will be rated at least investment grade at the time of purchase by Standard & Poor's (S&P) or otherwise similarly rated by another independent rating agency. No more than 10% of such investments will be rated below A- by S&P or otherwise similarly rated by another independent rating agency. In the event that ratings agencies apply different ratings to a security, the highest rating will be used.

Debt securities with a short-term rating will be rated at least A-2 at the time of purchase by S&P or otherwise similarly rated by another independent rating agency.

Asset-backed securities will be rated at least AAA at the time of purchase by S&P or otherwise similarly rated by another independent rating agency. The Sub-Fund will not invest in mortgage-backed securities or asset-backed securities with significant extension risk.

The Sub-Fund may invest in unrated debt securities of comparable credit quality to those specified above.

The assets of the Sub-Fund will be primarily denominated or hedged into USD, although the Sub-Fund may invest in assets denominated in any currency.

The Sub-Fund may use financial derivative instruments for the purposes of hedging and efficient portfolio management.

Redemption and Dealing: Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Share Class is BofA Merrill Lynch US 3-Month Treasury Bill Index (Total Return Gross).

The benchmark is a point of reference against which the performance of the Share Class may be measured. The portfolio of the Sub-Fund may bear little resemblance to its benchmark.

Distribution Policy: This Share Class will not pay dividends.

Risk and Reward Profile

Lower risk

Higher risk

Potentially lower reward

Potentially higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 1 because its Net Asset Value has shown very low fluctuations historically.

Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.

- Investments held in the Sub-Fund may have higher risks than that of a money market fund.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer.
- Asset-backed securities may be highly illiquid, subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying asset are not met.
- The counterparty of Reverse Repurchase Transactions may fail to meet its obligations which could result in losses to the Sub-Fund.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.
