Why is the fund in the specific category?

The fund has been classed as 7 because its volatility has been measured as high.

The indicator does not take into account the following risks of investing in this Fund:

Currency risk: The Fund may invest a small portion in companies from other parts of the world. Investing in companies from across the globe can be rewarding and can spread risk to different markets. This does, however, leave you open to the risk of currency rates and other factors reducing the value of your investment.

Asymmetric information risk: This Fund focuses its investments on stocks of companies that the Investment Manager believes are inexpensive relative to other stocks. These stocks are selected after careful disciplined review of publicly available information. There is a risk that important information is not disclosed, and that such information could have a negative impact on the value of the stock. The Fund attempts to limit large price movements by investing in additional companies that it believes will limit the risk and reward. There is no guarantee that such actions will have the intended result.

Concentration risk: This Fund holds a limited number of investments. If one of these investments falls in value it can have a greater impact on the Fund's value than if it held a larger number of investments.

For more information in relation to the risk factors applicable to the Fund, please see the section entitled "Certain Risk Factors" in the Company's Prospectus and the section entitled "Risk Factors" in the supplement in respect of the Fund.
