a sub-fund of Vontobel Fund

This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.

This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund aims to achieve the highest possible capital growth over the long term.

- It mainly invests in equities and equity-like securities. It may invest up to 20% via Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect in China A-Shares. It may also hold cash.
- The sub-fund mainly invests in securities of companies around the world that contribute to sustainable economic activity and are leaders within their sector.
- The investment decision-making process pursued by the portfolio manager of the Sub-Fund is based on fundamental analysis of the companies belonging to the investment universe. A significant part of this process is based on the proprietary "smart data approach"

which uses and combines a large set of fundamental company data servicing as a decision base for the portfolio manager in its stock selection and portfolio monitoring process.

- The sub-fund may use derivatives to achieve the investment objective and for hedging purposes.
- The sub-fund is not managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Income may be paid out each year.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate sharply due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors,

legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- Using derivatives generally creates leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
- The sub-fund also includes sustainability criteria in its investment process. This may mean that the sub-fund's performance is more positive or negative than a conventionally managed portfolio.
- Investments in China A-Shares are subject to changes in political, economic and social conditions in China as well as changes in the policies of the PRC government, laws and regulations.
- A company's stock price may be adversely affected by changes in the company, its industry or economic environment and prices can change quickly. Equities typically involve higher risks than bonds and money market instruments.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs for managing, marketing and distributing it. These charges reduce the return on your investment.
