

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Sustainable Global Bond

ISIN	LU1246874629	a sub-fund of Vontobel Fund
Share Class	I	This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.
Currency	EUR	This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

## Objectives and investment policy

This actively managed sub-fund aims to achieve the best possible investment returns. It promotes environmental and social characteristics, but does not have as its objective a sustainable investment. It is categorized as Article 8 SFDR.

- It mainly invests in fixed and variable-rate securities, including convertible bonds, from issuers around the world. Up to 20% may be invested in asset-backed and mortgage-backed securities. It may also acquire money market instruments and hold cash.
- The sub-fund promotes environmental or social characteristics by integrating ESG (environmental, social and governance) criteria in the investment process and directing investments into more sustainable issuers which meet the investment manager's ESG criteria. The ESG investment process consists of a quantitative screening based on data from specialized third-party ESG research providers followed by a qualitative analysis of the material sustainability risks by the portfolio manager. At least 90% of the securities in the sub-fund have the sustainability selection criteria applied to it. The average ESG rating score calculated at portfolio

level is expected to be higher than the average ESG rating score of the global bond investment universe calculated after eliminating at least 20% of the worst values of the ESG rating score. **Main methodological limits:** potential inconsistency, inaccuracy or lack of availability of ESG data issued by external third party providers. **More details on the above can be found in the prospectus.**

- The sub-fund may use derivatives to achieve the investment objective and for hedging purposes.
- The sub-fund is not managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Any income generated will be reinvested and included in the value of your shares.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).
- I shares are exclusively reserved for institutional investors.

## Risk and reward profile

- The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.
- The share class is assigned to this category because its share price can fluctuate moderately due to the investment policy applied.
  - The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
  - The risk category shown is not guaranteed and may change.
  - Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include

- risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:
- Securities with a lower credit quality means a higher risk that an issuer may fail to meet its obligations. The investment value may fall if an issuer's credit rating is downgraded.
  - Using derivatives generally creates leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
  - Asset-backed and mortgage-backed securities, and their underlying receivables are often intransparent. The sub-fund may also be subject to a higher credit and/or prepayment risk.
  - The sub-fund also includes sustainability criteria in its investment process. This may mean that the sub-fund's performance is more positive or negative than a conventionally managed portfolio.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs for managing, marketing and distributing it. These charges reduce the return on your investment.

### ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST

Entry charge	5.00%
Exit charge	0.30%
Conversion fee	1.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### CHARGES TAKEN FROM THE FUND OVER A YEAR

Ongoing charges	0.58%
-----------------	-------

### CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS

#### Performance fee

not charged

## Past performance

The chart shows past performance based on full calendar years. One-off charges are not included when calculating performance.

- Past performance is not an indicator of current or future returns.
- The stated performance of the share class includes ongoing charges, but excludes one-off charges.
- Shares were first issued for this share class in 2015.
- **The investment policy was changed significantly as at 17.12.2019. The performance previously achieved was achieved under circumstances that are no longer valid today.**
- The sub-fund uses the benchmark Bloomberg Global Aggregate Index (EUR hedged) for performance comparison only. The benchmark is not consistent with the environmental and social characteristics promoted by the Sub-Fund.
- Past performance of the fund is shown in the currency of the share class (EUR).
