

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

The Colchester Global Real Return Bond Fund Share Class: EUR Unhedged Accumulation Class - I Shares (ISIN: IE00BQZJ1338), (Currency: EUR), (Code: IEUA)

a sub fund of The Colchester Multi-Strategy Global Bond Fund plc (the "Company"). Colchester Global Investors (Dublin) Management Ltd is the manager of the Company (the "Manager").

Objectives and Investment Policy

The Fund aims to generate income and increase the amount invested by investing in currencies and government bonds. A majority of the bonds held will be inflation-indexed ("real return"), meaning that the interest paid on these bonds is adjusted to compensate for the impact of inflation.

The Fund is actively managed against the Bloomberg World Government Inflation-Linked Bond Index (the "benchmark").

The Fund can invest in bonds (which may include inflation linked bonds) issued by governments, government agencies and supra-national agencies (such as the World Bank), irrespective of whether such bonds are included in the benchmark.

The Fund will tend to purchase bonds with characteristics similar to those in the benchmark however, the investment strategy can lead to significant deviation from the benchmark in terms of country and currency weightings and duration, which can cause the return of the Fund to differ significantly from that of the benchmark. The Fund can invest in currencies using contracts on the spot and forward market, such as forward currency contracts (contracts to buy or sell a currency at a specified future time at an agreed price).

Up to 20% of investments made by the Fund may be of lower quality than investment grade (for example, emerging market investments).

The choice of assets is guided by value. You should be aware that, if you decide to purchase Shares, you will be relying on the expertise of the Fund's investment manager to select investments for the Fund.

The possible gains and losses of the Fund may be increased through the use of financial derivative instruments such as forward currency contracts which are used by the Fund's investment manager to counteract currency exposure. These possible gains and losses cannot exceed 100% of the value of the Fund.

This Share Class of the Fund does not pay out any income. Any income generated is reinvested into the Fund.

It is recommended that you hold an investment in the Fund for 3 to 5 years.

You may sell your shares in the Fund on any day on which retail banks normally open for business in Ireland and the United Kingdom. For further information please refer to "Redemption Requests" in the prospectus available from the administrator. For more information about the Fund's investment policy see "Investment Objectives, Policies and Share Classes of the Funds" in the prospectus available from the administrator.

Risk and Reward Profile

The indicator above measures how much investment performance has varied over time. The lowest category does not mean risk free investment. This has been calculated over a 5 year period. Where the Fund has not existed for that length of time, the returns of a representative benchmark have been used. The risk and reward indicator for the Fund is not guaranteed to remain unchanged and may change over time.

The Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past.

Past returns are not a guarantee of future returns. The value of shares may go down as well as up. An investment in the Fund involves the risk of loss, including the loss of the entire amount invested.

The principal risks arising are:

The risk of loss of value arising where a bond issuer cannot pay interest or repay the amount invested when due. There is an additional risk in investing in bonds issued by governments because there may be difficulties in suing a government or country where it does not pay interest or repay the amount invested when due.

The risk that a bond cannot be sold easily, quickly or at a good price. This risk may be higher where the Fund invests in bonds where the interest and amount invested in these bonds is adjusted to compensate for the impact of inflation or where a bond is issued by the government of an emerging market country.

The risk of loss as a result of changes in currency exchange rates because the Fund invests in bonds and currencies other than the Class Currency of this Share Class. This Share Class will not seek to reduce this risk through currency hedging.

The risk of loss, bankruptcy or nationalization of any sub-custodian, registration agent or broker, or where ownership records are not maintained or respected.

Further information on the risks faced by the Fund is included in "Risk Factors" in the prospectus.

"Bloomberg®" and Bloomberg World Government Inflation - Linked Bond Index are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by Colchester Global Investors.
