The SPI® Extra index (published in CHF) offers the possibility of monitoring the development of securities that are not included in the SMI® and is therefore the benchmark for these securities. It is calculated in real time. Like the SPI and SMI, the SPI EXTRA is a free-float weighted index; it is calculated both as a performance index and as a price index. Information on this index is available at: <https://www.six-swiss-exchange.com>.

Fund manager's report

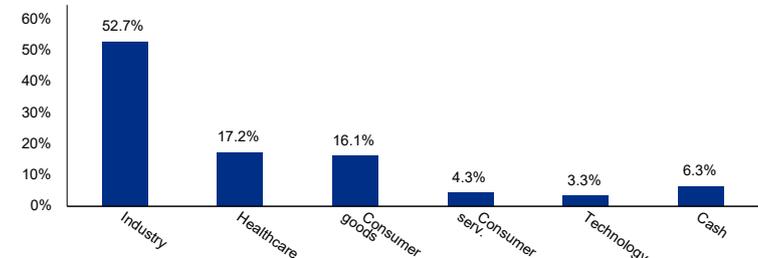

The main contributors to the monthly relative performance were our overweight positions in Tecan (+5.3%), Belimo (+2.4%), Interroll (+7.3%) and Galenica (+4.4%) and the absence of Kuehne + Nagel (-5.9%). Conversely, the main detractors were our overweight positions in Sika (-6.5%), Bachem (-12.0%), Flughafen Zürich (-8.3%) and the absence of Swatch Group (+5.3%) and PSP (+4.3%). During the month, we increased our position in Bachem.

In 2022, the underperformance was mainly due to our allocation (absence of financials and real estate, overweight in industrial companies)
