Objectives and investment policy

The key features of the sub-fund are as follows:

- The sub-fund aims to outperform its reference indicator over a period exceeding five years and to seize the best opportunities available around the world using an active, discretionary investment strategy.
- The reference indicator is a combination of the following MSCI indices: 45% MSCI AC World Oil Gas & Consum NR (USD), 5% MSCI AC World Energy Equipment NR (USD), 40% MSCI AC World Metals & Mining NR (USD), 5% MSCI AC World Paper & Forest Products NR (USD), 5% MSCI AC World Chemicals NR (USD), since 01/07/2013 inclusive. It is rebalanced each quarter and converted into euro for EUR units and hedged units, and into the reference currency of the unit class for unhedged units.
- The sub-fund is an international equity fund invested across the whole of the natural resources sector (energy, precious metals, base metals, agricultural commodities and wood). Companies in which the sub-fund invests operate in the commodities, mining, production, enrichment and/or processing sectors. They may also be companies specialised in energy production, services and equipment. The sub-fund invests in financial markets all over the world.
- The manager may use Relative Value strategies as performance drivers, looking to take advantage of the relative value between different instruments. Short positions may also be taken through derivatives.
