M&G (Lux) Episode Macro Fund

a sub-fund of M&G (Lux) Investment Funds 1

USD Class S – Accumulation shares ISIN no. LU1670713921

Managed by M&G Luxembourg S.A.

Objective and investment policy

The fund aims to provide a combination of capital growth and income of 4-8% a year above the Secured Overnight Financing Rate (SOFR), over any five-year period.

Core investment: The fund typically invests via derivatives in a mix of assets, including company shares, bonds, currencies, and cash or assets that can be turned quickly into cash from anywhere in the world, including emerging markets. The fund may also invest in these assets directly or through other funds.

The fund may invest in China A-Shares and in Chinese bonds denominated in renminbi.

Other investments: The fund may invest in asset-backed securities, convertibles, contingent convertible debt securities, other funds and property-related securities. The fund may also invest in cash or assets that can be turned into cash quickly.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund has a highly flexible investment approach, with the freedom to invest in different types of assets from anywhere in the world. The approach combines in-depth research to work out the 'fair' value of assets over the medium to long term, with analysis of market reactions to events to identify investment opportunities. In cases where the investment manager believes the opportunities are limited to a few areas, the fund may be very concentrated in certain assets or markets. Such strategies may result in greater changes in the fund's short-term performance.

Benchmark: SOFR + 4-8%

The benchmark is a target which the fund seeks to achieve. The rate has been chosen as the fund's benchmark as it is an achievable performance target and best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance objective and does not constrain the fund's portfolio construction.

The fund is actively managed. The investment manager has complete freedom in choosing which assets to buy, hold and sell in the fund.

For unhedged and currency hedged share classes, the rate is shown in the share class currency.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 13:00 Luxembourg time will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These may have a material impact on your returns.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

■ The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its simulated Net Asset Value has shown high rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

■ The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

■ The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

■ The fund may be highly concentrated at times in a limited number of investments or areas of the market, which could result in large price rises and falls.

■ Investing in emerging markets involves a greater risk of loss as there may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	4.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	1.98%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the period/year ending 30 September 2022. This figure may change from year to year. It excludes portfolio transaction costs. This figure includes extraordinary expenses and underlying charges for closed-ended-funds, such as investment trusts and Real Estate investment trusts.
