The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

BlueBox Global Technology Fund (the "Fund"): Share Class S (USD) Acc
A Sub Fund of BlueBox Funds (the "Company")

ISIN: LU1793347128

Fuchs Asset Management S.A. is the Management Company (the "Management Company") to the Fund.

Objectives and Investment Policy

The main objective of the Fund is to seek to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the technology sector.

The remaining 30% of the total assets of the Fund may be invested in equity securities of companies or issuers of any size in any sector of the economy globally and whose predominant economic activity is not in the technology sector.

When it is in the best interests of the Shareholders to do so, the Investment Manager may, for cash management purposes, for the preservation of capital, for diversification and liquidity management purposes as well as for short-term defensive purposes invest up to 100% in cash and cash equivalents, bank deposits, Money Market Instruments, money market UCITS and Other UCIs or other liquid assets. During these periods, the Fund may not achieve its objective.

The overall investment strategy of the Fund is to seek out companies that will create value for the Shareholders from the multi-year tailwind in the information technology sector provided by the direct connection of computers to the real world.

The Fund will typically hold 30- 40 positions. The holding periods are expected to be generally fairly long (multiple years) and turnover low, although at times the Fund will play the cyclical nature of certain technology sub-sectors, with shorter holding periods. The geographic focus of the strategy is global and the sector focus is predominantly the information technology sector, however the Fund may also acquire shares in

companies classified in other sectors with a strong information technology element.

Holdings will be primarily of publicly listed companies, typically with a market capitalisation of about \$1bn or more, but the Fund will take part in initial public offerings (where the market cap may be significantly below \$1bn at listing) and it may occasionally invest in private companies where an Initial Public Offering ("IPO") is strongly expected to follow within 18 months or so. The Fund may not acquire shares carrying voting rights which should enable it to exercise significant influence over the management of an issuing body.

Investments in a currency other than the reference currency of the Fund may be hedged against the reference currency of the Fund.

The Fund will not invest in FDIs and will not enter into any securities financing transaction within the meaning of the SFT Regulations. It is currently also not contemplated for the Fund to invest in Russian equities or equity related securities.

Purchase and sale of shares in the Fund can be made on each Business Day.

The Fund is active and managed without any reference to a benchmark. The Investment Manager has discretion over the composition of its portfolio subject to this objective and investment policy.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

The Fund does not intend to declare or make distributions.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

This Fund is in category 6, since the share price has a high volatility, therefore the risk of loss as well as the expected reward can be high.

The following risks may not be fully captured by the risk and reward indicator:

Equity Risk: The risk that investments depreciate because of stock market dynamics.

Market Risk: The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility.

The concentration of the Fund on a given country implies the risk that the events concerning the given country may significantly and negatively affect the value of the whole portfolio of the Fund.

A complete description of risk factors is set out in the Prospectus in the section entitled 'Risk Factors Annex'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
