

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### Fidelity Funds - Asia Pacific Multi Asset Growth & Income Fund

a sub-fund of Fidelity Funds

Fidelity Funds - Asia Pacific Multi Asset Growth & Income Fund E-ACC-Euro (Euro/USD hedged)

(ISIN:LU1846738786)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

#### Objectives and Investment Policy

**Objective:** The fund aims to achieve capital growth over the medium to long term and provide income.

**Investment Policy:** The fund invests at least 70% of its assets, in equities and debt securities issued governments, quasi-governments or companies that are listed, headquartered or do most of their business in the Asia Pacific region including Australia and New Zealand and excluding Japan. These investments may be from emerging markets and some bond investments may be below investment grade.

The fund may invest in the following assets according to the percentages indicated:

equities: up to 80%

below investment grade bonds: up to 50%

eligible commodity exposure: up to 10%

eligible REITs: up to 30%

investment grade bonds: up to 75%

China A and B shares and listed onshore bonds (directly and/or indirectly): less than 50% (in aggregate)

hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos

money market instruments: up to 30%.

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

**Investment Process:** In actively managing the fund, the Investment Manager combines macroeconomic, market and fundamental company analysis to flexibly allocate investments across asset classes and geographic areas based on their potential to generate capital growth and income within the portfolio. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see "Sustainable Investing and ESG Integration".

**Derivatives and Techniques:** The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

**Benchmark:** None.

**Risk Management Method:** Commitment.

**Base Currency:** EUR.

**Distribution:** As this is a non-distributing share class, dividends are re-invested.

The reference currency of the fund is hedged to the reference currency of the share class. This hedging has the effect of translating (or "replicating") the returns expressed in the fund's reference currency into returns expressed in the reference currency of the share class.

The long and short active currency positions may not be correlated with the underlying securities positions held by the fund.

#### Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

This Fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average.

Additional risks: liquidity, credit, leverage. The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment. Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
