## GF ABSOLUTE RETURN BOND FUND

KEY INVESTOR  
INFORMATION  
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF Absolute Return Bond Fund is a sub-fund of Liontrust Global Funds plc. This document is based upon the B1 USD Accumulating share class (ISIN: IE00BD85PM41), which is the representative class for all share classes listed in this document.

### Objective

- The Fund aims to generate a positive absolute return through a combination of capital growth and income over a rolling 12 month period, irrespective of market conditions.

### Policy

- The Fund is actively managed without reference to any benchmark meaning that the Investment Adviser has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.
- The Fund aims to achieve its investment objective through investment in corporate and government fixed income markets worldwide, including developed and emerging markets.
- In achieving its objective, the Fund also aims to minimise volatility and reduce the possibility of a significant drawdown (i.e. a period where the Fund is worth less than the initial investment at the start of a 12 month period).
- The Fund invests in a wide range of bonds issued by companies and governments, from investment grade through to high yield.
- The Fund invests in developed and emerging markets, with a maximum of 20% of its net assets invested in emerging markets.
- Investments are made in US Dollar denominated assets or non-US Dollar denominated assets that are predominately hedged back into US Dollar.
- Up to 10% of the Fund's currency exposure may not be hedged (i.e. the Fund may be exposed to the risks of investing in another currency for up to 10% of its assets).
- The Fund may invest both directly, and through the use of derivatives. The use of derivatives may generate market leverage (i.e. where the Fund takes market exposure in excess of the value of its assets).
- The Fund has both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.

### Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11.59a.m. (Irish time) for execution at midday valuation point. Further details can be found at [www.liontrust.co.uk](http://www.liontrust.co.uk).

### Investment process

- The fund manager aims to produce a portfolio that provides a positive absolute return over a rolling 12 month period whilst maintaining a low volatility and minimising the risk of significant drawdown.
- To achieve this, the fund manager decides which investments to hold in the Fund based on an assessment of a combination of macroeconomic, asset, sector and individual investment level factors.
- Before being selected for the portfolio, a number of different factors are considered for each investment, such as expected total return relative to the assessed risk, duration and sustainability of cashflows.

## Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the higher of the actual historical annualised volatility and the translated annualised volatility of the Fund based upon the internal Value at Risk limit.
- The Fund is categorised 2 primarily for its exposure to a diversified portfolio of debt instruments along with a number of derivative positions.
- The SRRI may not fully take into account the following risks:
  - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result.
  - The creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- The Fund can invest in derivatives. Derivatives are used to protect against currency, credit or interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- The Fund has both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- The Fund invests in emerging markets which carries a higher risk than investment in more developed countries. This may result in higher volatility and larger drops in the value of the fund over the short term.
- Counterparty risk: any derivative contract, including FX hedging, may be at

risk if the counterparty fails.

- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).
