The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Man GLG Event Driven Alternative Class IN USD Shares

(ISIN:IE00BJJNGV56) Man GLG Event Driven Alternative (the 'Fund') is a sub-fund of Man Funds VI plc (the 'Company').

Man Asset Management (Ireland) Limited, part of Man Group plc, is the Manager of the Company.

Objectives and investment policy

- The Fund seeks to provide investors with absolute returns over a rolling three year period by taking positions in listed shares and bonds and related instruments of companies, with a primary focus on US and European companies.
- The Fund will invest in companies whose returns it believes will be impacted by events such as mergers or catalyst driven events, including litigation, regulatory changes or restructures. It is expected that impacts of mergers will be the primary strategy to be employed.
- The Fund will pursue a 'long-short strategy' whereby, in addition to buying and holding assets, it may use financial derivative instruments (ie, instruments whose prices are dependent on one or more underlying assets ("FDI")) extensively and to take 'short' positions (to take a position against issuers which are viewed as overvalued or expected to fall in value). The Fund may also invest in currencies, debt securities and other funds, and may increase its holdings of cash and other liquid assets in times of market turbulence.
- The Fund may actively use FDI to achieve the investment objective, for hedging a given instrument or against anticipated movements in a market where it is more cost effective. FDI may allow the Fund to obtain market exposure in excess of the value of the Fund's assets (leverage).
- The extensive use of FDI may mean the Fund is consistently required to hold a substantial portion of its assets in bank deposits and other money market securities.
- The Fund will invest globally, but it is expected that the Fund's investments in the US and Europe will together constitute the largest regional allocations, however, a majority of the Fund may be invested in non-US and European issuers. The Fund may invest up to 40% in emerging markets and shall not exceed 10% in Russia.
- Debt securities may be issued by any government, company or international agency and are not subject to a minimum rating requirement.
- Benchmarks. The Fund is actively managed; no benchmark is used as a universe for selection or for performance comparison purposes.
- Any income earned on investments will be added to the value of investors' shares and investors can buy and sell their shares on each dealing day of the Fund.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 4 as funds of this nature engage in strategies that typically have a moderate volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.
- The Fund may invest a significant proportion of its assets in securities with exposure to emerging markets which involve additional risks relating to matters such as the illiquidity of securities and the potentially volatile nature of markets not typically associated with investing in other more established economies or markets.
- The Fund will be exposed to credit risk on counterparties with which it trades

in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.

- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- The Fund invests a significant proportion of its assets in securities issued by distressed companies that are either in default or in high risk of default, such investments involve significant risk.
- The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
- Whilst the Fund aims to provide capital growth over 3 years a positive return is not guaranteed over any time period and capital is in fact at risk.
- The Fund will invest financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) to achieve its investment objective. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The extensive use of FDI may significantly multiply the gains or losses.
- The Fund's use of FDI may result in increased leverage which may lead to significant losses.
- There is no guarantee that the Fund will achieve its investment objective.

A complete description of risks is set out in the prospectus section entitled 'Certain Investment Risks'.
